PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

SENATE—*Wednesday, April 20, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 12:30 p.m., on the expiration of the recess, and was called to order by Hon. GARY HART, a Senator from the State of Oklahoma.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, Lord of all history, to whom every day is Judgment Day, look upon this Nation in mercy and compassion.

We thank Thee for Thy bountiful gifts to us in nature—for treasures of energy above, beneath, and in the land Thou hast given us. Forgive us for our desecration of natural beauty, for the scars we have left on Thy creation, and for our wanton waste of soil and sea and sky. If our knowledge of ourselves and our world leads to repentance, help us to repent earnestly and honestly and to renew our covenant with Thee for a better stewardship of Thy gifts to us. Be with us this day that we may hear with understanding, say what we have to say with clarity, and act under the guidance of Thy Spirit to set forward Thy kingdom on Earth.

We pray in the name of Him who was servant of all. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 20, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. GARY HART, a Senator from the State of Colorado, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. HART thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, April 19, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, consent was given yesterday for all committees to meet today. Perhaps the minority leader and I, after conversing later today, can outline the situation for tomorrow. However, that matter has been taken care of for today.

APPOINTMENT OF COMMITTEE OF SENATORS TO ESCORT THE PRESIDENT INTO THE HOUSE CHAMBER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President of the Senate be authorized to appoint a committee of Senators on the part of the Senate to join with a like committee on the part of the House of Representatives to escort the President of the United States into the House Chamber tonight.

The PRESIDING OFFICER (Mr. BENTSEN). Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the two leaders or their designees have been recognized under the standing order, there be a period for the transaction of routine morning business, of not to exceed 30 minutes, with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I have no requirement for my time, and I have no requests. I yield back my time under the standing order.

Mr. ROBERT C. BYRD. Mr. President, I do the same.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 1 p.m., with statements therein limited to 5 minutes each.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. SASSER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Tennessee.

RESEARCH AND DEVELOPMENT OF CENTRIFUGE METHOD AT OAK RIDGE NATIONAL LABORATORY

Mr. SASSER. Mr. President, I call to the attention of my colleagues an article which appeared in this morning's Washington Post. The article indicates that President Carter has decided to urge the Congress to approve four new nuclear fuel production plants and that the President will recommend that these new facilities for enriching uranium be constructed within the next 10 years.

The facilities would utilize the gas centrifuge method of enrichment instead of the gaseous diffusion method which is currently in commercial use.

Mr. President, if this story is accurate, and I believe that it is, the decision by the Carter administration to proceed in this manner should be applauded.

This decision will help insure the energy security of this country. It will establish the United States as a reliable supplier of nuclear fuel for conventional powerplants to meet both domestic and international enrichment requirements.

It is estimated that by the year 2000 the demand for nuclear fuel will almost triple the existing capacity at the ERDA diffusion plants at Oak Ridge, Tenn., Portsmouth, Ohio, and Paducah, Ky.

These new facilities will allow this country to meet our needs at home and, at the same time, permit us to capture a large portion of the foreign market. This, I submit, is of great importance in the President's plan of reducing the possibility of the acceleration of worldwide nuclear proliferation.

If the United States becomes a reliable fuel supplier for the foreign nations,

there will be less need for other nations to build enrichment facilities.

I would like to point out, Mr. President, that the Oak Ridge National Laboratory has been at the forefront of development of the gas centrifuge. Currently, ERDA has under construction a gas centrifuge demonstration facility in Oak Ridge. A total of $25 million will be spent in fiscal year 1977 for this plant and another $35 million in fiscal year 1978.

On April 8, I wrote President Carter and urged him to make a commitment to proceed with the decision to commercialize the gas centrifuge. I called to his attention the work that has been done at Oak Ridge on this technology and I encouraged him to select Oak Ridge as the site for the expansion of these enrichment facilities.

Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from my letter to President Carter; and also the Washington Post article which appeared in this morning's edition.

There being no objection, the excerpts and article were ordered to be printed in the RECORD, as follows:

EXCERPT

We must recognize the need for expanded uranium enrichment capacity. The existing diffusion plants at Oak Ridge, Tennessee; Paducah, Kentucky; and Portsmouth, Ohio, simply are not large enough to provide for this nation's domestic needs and the anticipated requirements of foreign countries which would be willing to purchase the enriched fuel if it were available.

I am aware of the current plans of ERDA to build additional enrichment capacity to the existing facility at Portsmouth. However, it is my understanding that this add-on plant will not, alone, provide this country with the capacity we need, and that the utilities in the Portsmouth area have failed to make any commitment to build the electric power plants needed to run the planned add-on facility.

It is my recommendation that you rapidly accelerate the development of the gas centrifuge method of enriching uranium. As you know, this method will be vastly superior to diffusion. The centrifuge process requires only 7% of the electricity needed for diffusion plants.

As you are aware, operation of production-type centrifuges began in 1970. The Centrifuge Process Demonstration Facility is currently under construction at Oak Ridge and $25 million will be spent in the current year for this facility. Another $35 million has been included in your budget request for Fiscal Year 1978. I urge you to accelerate the development and operation of this demonstration plant.

It is also requested that you direct ERDA to speed the commitment to commercialization of the gas centrifuge process. Of course, since this process has been primarily developed in Oak Ridge, I urge that the first commercial centrifuge enrichment facility be built there, close to the demonstration facility now under construction.

Mr. President, I hope that you will keep these suggestions in mind as you formulate your final decisions regarding the energy policy for this country.

Sincerely,

JIM SASSER,
U.S. Senator.

CARTER TO SEEK 4 CENTRIFUGE FACILITIES TO MAKE A-FUEL FOR ELECTRIC PLANTS

(By Thomas O'Toole)

President Carter is expected to ask Congress to construct four enrichment plants that would produce uranium for electricity by a new method that has been secretly developed for almost 20 years at the Oak Ridge National Laboratory in Tennessee.

Administration sources said the President will announce in his energy policy message today his wish to build four gas centrifuge plants that would cost an estimated $4.4 billion and produce, over 30 years, enough enriched uranium to run 90 atomic power plants of 1 million kilowatts each during that period.

To be built over the next 10 years at locations still not determined, the centrifuge plants would serve to back up Carter's promise that the United States will continue to supply the world's enriched uranium needs in exchange for other nations' waiving their rights to use the plutonium fuel generated in the burned-out uranium.

The indefinite postponement of plutonium use is at the heart of Carter's policy to prevent the spread of nuclear weapons. The uranium that the United States supplies the world from its three enrichment plants cannot be used to make atomic bombs. The plutonium that can be extracted from the burned-out uranium can be used in weapons.

The centrifuge method of uranium enrichment has been under development since 1960 at Oak Ridge. Almost all of its development has been classified, since the centrifuge technique could be tailored to make uranium for weapons as well as electricity.

Since World War II, uranium has been enriched in the United States at factories in Oak Ridge, Paducah, Ky. and Portsmouth, Ohio by a technique called gas diffusion. The same technique is used in the Soviet Union, France and Great Britain, the only other countries of the world with known enrichment plants.

Gas diffusion involves pumping uranium hexafluoride gas through thousands of membrance-like barriers, which trap the heavier isotopes of uranium called U-238 and allow the lighter isotopes called U-235 to pass through. The heavier istopes do not fission and cannot produce electricity. The lighter ones fission and produce electricity.

The centrifuge method involves the same hexafluoride gas but spins the gas in super-tough steel cylinders that bring the lighter isotopes to the top and settle the heavier ones on the bottom, just like the centrifuges at a dairy separate milk from cream.

The advantage of a centrifuge plant is that it costs much less to operate than a diffusion plant. Centrifuge uses less than 10 percent of the electricity diffusion does, which would mean a saving of hundreds of millions of dollars over a year.

Mr. BAKER. Mr. President, I wish to commend my colleague for his statement. I think it is a wise and accurate statement, and I devoutly hope that the recommendations he has made to the President of the United States will be acted upon favorably.

Tennessee has been in the vanguard of the nuclear age since the first moment of its birth. Those of us who live in Tennessee know firsthand the value and the safety of nuclear power. We know of its important contribution to the economy of our region, to this country and, potentially, to the world.

We know of the dangers and the destructiveness, but we have always understood those realities and, in our own way, have rationalized those problems.

Oak Ridge has been a center for the production of weapons, for research and development, for medicine and, foremost, has recently been a center for the production of fuel for reactors for peaceful purposes in the development of new technology.

The Senator from Tennessee (Mr. SASSER) rightly points out that the centrifuge technology which, at its present state of development, is uniquely a product of the Oak Ridge effort, is the leading process for future developments of the additional fuel requirements that will be needed for a light water reactor economy as recommended or to be recommended by President Carter.

I hope that future development of the centrifuge process will be undertaken at Oak Ridge. I think it is logical, the most cost-effective, and simply right that it be located at the birthplace of nuclear power where we have accepted and embraced the development of nuclear energy for so long and where the research and development has been undertaken for this new technology.

Parenthetically, Mr. President, I think the President of the United States acted bravely if this program does, in fact, embody the recommendations that I believe it will with respect to the development of light water reactors. I think he was correct, and I think that portion of his energy program is wise and farsighted.

I very much hope that the President will join my colleague and me in the belief that Oak Ridge, Tenn., should continue to be the center of that research and development, and particularly that the gas centrifuge plant of commercial proportions should be located there.

I take this opportunity to express my appreciation to my colleague for bringing this matter to our attention, and my thanks to him for permitting me to associate myself with him in these remarks.

TRANSFER OF MEASURE TO UNANIMOUS-CONSENT CALENDAR—SENATE RESOLUTION 139

Mr. ROBERT C. BYRD. Mr. President, there is a measure on the calendar which has been cleared for action by unanimous consent. I ask unanimous consent that the clerk transfer that measure, Calendar Order No. 75, Senate Resolution 139, a resolution authorizing the Committee on Human Resources to inspect and receive tax returns, and tax related matters of the Central States, Southeast, and Southwest Areas Pension Fund under sections 6103 and 6104 of the Internal Revenue Code of 1954, to the Unanimous Consent Calendar where it may be disposed of later today, tomorrow, or subsequently.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME-LIMITATION AGREEMENT—S. 855

Mr. ROBERT C. BYRD. Mr. President, I have a unanimous-consent request that I shall propose, it having been cleared on both sides of the aisle. It has to do with S. 855, a bill to authorize appropriations for the activities of the National Science

Foundation, and for other purposes. That bill is Calendar Order No. 74. There is a House companion bill, Calendar Order No. 73, H.R. 4991, also on the Calendar. It is my understanding that the managers of the bill will wish to proceed to the consideration of S. 855 at some point and that upon that bill's reaching third reading they will likely want to call up H.R. 4991 and substitute the language of the Senate bill for the language of the House bill. I say all that as a premise to the unanimous-consent request which I am about to propound.

I ask unanimous consent that at such time as S. 855 is called up and made the pending business before the Senate there be a time limitation for debate thereon of 1 hour, to be equally divided between Mr. KENNEDY and Mr. JAVITS, that there be a time limitation on any amendment of 30 minutes, that there be a time limitation of 30 minutes on the amendment by Mr. HATCH, that there be a time limitation on any debatable motion, appeal, or point of order, if such is submitted to the Senate for its consideration, of 20 minutes, that the agreement be in the usual form with the understanding, of course, that the amendment by Mr. HATCH is covered by the agreement allowing it in, with the further proviso that once the measure, S. 855, has reached third reading that any motion or request to call up the companion House bill and substitute the Senate language therefor will be in order without any other intervening motion, debate, or amendment.

The PRESIDING OFFICER. Is there objection?

The unanimous-consent agreement reads as follows:

Ordered, That during the consideration of S. 855 (Order No. 74), a bill to authorize appropriations for the activities of the National Science Foundation, and for other purposes, debate on any amendment shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill, and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: Provided, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the Minority Leader or his designee: Provided further, That no amendment that is not germane to the provisions of the said bill (except one to be offered by the Senator from Utah (Mr. HATCH)) shall be received.

Ordered further, That on the question of the final passage of the said bill, debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the Senator from Massachusetts (Mr. Kennedy) and the Senator from New York (Mr. Javits): Provided, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

Ordered further, That following the third reading of S. 855, it shall be in order to proceed to H.R. 4991 and to move to strike all after the enacting clause and insert the language of S. 855, with no further debate or other intervening motion or amendment being in order.

(April 20, 1977).

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I understand that the Hatch amendment is not in the usual form and is eligible under this unanimous-consent proposal regardless of its content.

Mr. ROBERT C. BYRD. Yes. The distinguished minority leader is correct. Even though it may not be germane it will be in order for it to be called up.

Mr. BAKER. Mr. President, it is cleared, and there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT OF THE COUNCIL ON WAGE AND PRICE STABILITY—MESSAGE FROM THE PRESIDENT—PM 68

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Banking, Housing and Urban Affairs:

To the Congress of the United States:

In accordance with section 5 of the Council on Wage and Price Stability Act, as amended, I hereby transmit to the Congress the ninth quarterly report of the Council on Wage and Price Stability. This report contains a description of the Council activities during the fourth quarter of 1976 in monitoring both prices and wages in the private sector and various Federal Government activities.

JIMMY CARTER.

THE WHITE HOUSE, *April 20, 1977.*

MESSAGES FROM THE HOUSE

At 12:36 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its clerks, announced that:

The House agrees to the amendment of the Senate to the amendments of the House to the bill (S. 489) to amend the Foreign Assistance Act of 1961.

The House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 4836. An act to extend by seven months the term of the National Commission on New Technological Uses of Copyrighted Works;

H.R. 5101. An act to authorize appropriations for activities of the Environmental Protection Agency, and for other purposes; and

H.R. 5864. An act to approve with modifications certain proposed amendments to the Federal Rules of Criminal Procedure, to disapprove other such proposed amendments, and for other related purposes.

ENROLLED BILL SIGNED

At 3:10 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the Speaker has signed the following enrolled bill:

S. 489. An act to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1177. A letter from the Acting Administrator of the General Services Administration transmitting, pursuant to law, the Stockpile report to Congress for July–September 1976 (with an accompanying report); to the Committee on Armed Services.

EC–1178. A letter from the Chairman of the Interstate Commerce Commission transmitting, pursuant to law, a report of the Interstate Commerce Commission on Rail Transportation Services in the Delmarva Peninsula (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1179. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, notice of an approval on November 12, 1976 of a Day Hospital Service in Rehabilitation Medicine (with an accompanying report); to the Committee on Finance.

EC–1180. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Well-Being of Older People in Cleveland, Ohio" (HRD–77–70) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1181. A letter from the Administrator of the Environmental Protection Agency transmitting a draft of proposed legislation to amend title XIV of the Public Health Service (with accompanying papers); to the Committee on Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PROXMIRE, from the Committee on Banking, Housing and Urban Affairs:

A report entitled "Oversight Activities of the Committee on Banking, Housing and Urban Affairs (Rept. No. 95–95).

By Mr. MAGNUSON, from the Committee on Commerce, Science, and Transportation:

With an amendment:

H.R. 735. An act to amend the Federal Aviation Act of 1958 relating to eligibility for aircraft registration (Rept. No. 95–96).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PROXMIRE, from the Committee on Banking, Housing and Urban Affairs:

Chester Crawford McGuire, Jr., of California, to be an Assistant Secretary of Housing and Urban Development.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. JACKSON, from the Committee on Energy and Natural Resources:

David J. Bardin, of New Jersey, to be a Deputy Administrator of the Federal Energy Administration.

Joan Mariarenee Davenport, of New Jersey, to be an Assistant Secretary of the Interior.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. JACKSON. Mr. President, the committee on Energy and Natural Resources has reported favorably the nominations of Joan M. Davenport to be Assistant Secretary of the Interior for Energy and Minerals and David J. Bardin as a Deputy Administrator of the Federal Energy Administration.

Ms. Davenport and Mr. Bardin appeared before the committee at a hearing last Monday. I ask unanimous consent that their statements to the committee be printed in the RECORD at this point.

In accordance with the committee's rules, both nominees submitted sworn financial statements to the committee, I ask unanimous consent that these statements also be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF JOAN M. DAVENPORT

Mr. Chairman and distinguished members of the Senate Energy and Natural Resources Committee.

Before making my statement, I would like to express my disappointment and deep regret that the timing of this hearing and the Easter recess were such that I was unable to meet with members of the Committee prior to today. I assure you that this was a matter of logistics, not intent, as I am strongly committed to working with Congress in the many difficult areas involving energy and resource development which face us.

I am deeply honored by the confidence which President Carter and Secretary Andrus have shown in me by nominating me to this important position. Much of my professional career has been directly related to technical and policy problems surrounding development of energy and non-energy minerals. The challenges we face are immense. The solutions will be difficult, but we will find solutions.

We have reached a watershed in our history as a Nation. Two great surges of opinions and problems have emerged in the past decade. On the one hand, citizens all over the Nation are becoming more aware of their environment, are demanding more protection for factors affecting quality of life, and are more vocal in demanding that non-economic criteria be considered in both Government and private resource development decisions. Concurrently, our frontier mentality that there will always be ample and more, more land, more water, and especially more mineral and energy resources to fuel this great industrial economy, has received a devastating blow by events of the past few years.

We are entering an era which requires active rather than reactive management of natural resources within the public domain. Only through early identification of problem areas and sound planning can competing demands for land and resources be harmonized. I firmly believe that national goals relating to environmental protection and to development of domestic resources can be achieved. Without this conviction, I certainly would not be appearing before you today.

We are both an idealistic and technically ingenious people. From these basic national traits arise competing demands on our land and our natural resources. I come before you as a spokesperson for no vested interest group, for I would sacrifice neither of these basic traits which have made us a great Nation.

Clearly, certain areas need to be set aside to preserve the heritage of natural beauty and open space which our forefathers passed to us and we will pass to our children. But we also need to prudently develop and use our resources to assure the vitality of this Nation.

All too often, problems relating to energy and mineral development and its environmental consequences achieve national attention at a point of high confrontation. This need not be the case. A great number of the issues with which we must deal in developing publicly owned mineral resources relate more to how and where those resources are to be developed rather than whether they should be developed. With early identification of issues and problems, and with adequate channels for inputs from all levels of Government and from competing interest groups, solutions and compromises often can be found and confrontation avoided.

Perhaps the greatest challenge to the Nation is to change our wasteful ways and to conserve our increasingly scarce natural resources. However, even with a very substantial conservation effort, there will be a need to develop new sources of supply. With many minerals such as coal, many options are still available. We need not mine areas which are uniquely valuable for other reasons. With other minerals, however, our options are not as broad and we will have to make the tough decisions as to what degree of environmental disturbance is acceptable in order to secure needed supplies. Such mining should take place only with foreknowledge of probable environmental impacts and our best efforts for mitigating those impacts.

If the Committee should see fit to confirm me for the position of Assistant Secretary for Energy and Minerals of the Interior Department, I can assure you that the doors to my office will be open to all interests. It is my belief that diverstiy of views and free exchange of ideas are conducive to optimal decisions in the public interest.

In conclusion, Secretary Andrus in his confirmation hearings told this Committee that we can and must make certain that our natural resources are developed or not developed for the benefit of everyone and, through such use, keeps our Nation strong and our quality of life high. This is the essence of the challenge which faces us in developing the energy and mineral resources of the United States.

Mr. Chairman, I thank you for this opportunity to appear before you and am available to answer any questions which you or members of this Committee may have.

[From the U.S. Senate, Committee on Interior and Insular Affairs, Washington, D.C.]

INFORMATION REQUESTED OF PRESIDENTIAL NOMINEES

Rule 9 of the Rules of the U.S. Senate Committee on Interior and Insular Affairs requires that each Presidential nominee considered by the Committee shall submit a financial statement sworn to by the nominee as to its completeness and accuracy. Under the rule all such statements must be made public by the Committee unless the Committee in executive session determines that special circumstances necessitate a full or partial exception to this requirement. Rule 9 also provides that at any hearing to confirm a Presidential nomination, the testimony of the nominee and, at the request of any member, any other witness shall be under oath.

In order to assist the Committee in its consideration of nominations, each nominee is requested to complete the attached Financial Statement and Statement For Completion By Presidential Nominees.

The original and twenty (20) copies of the requested information should be made available to Honorable Henry M. Jackson, Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C. 20510 (Attn: Staff Director) as soon as possible.

FINANCIAL STATEMENT OF JOAN M. DAVENPORT

Provide a complete, current financial net worth statement which itemizes in detail all assets (including bank accounts, real estate, securities, trusts, investments, and other financial holdings) and all liabilities (including debts, mortgages, loans, and other financial obligations) of yourself, your spouse, and other immediate members of your household.

ASSETS

Cash on hand and in banks, $2,075.
U.S. Government securities*, $3,200.
Personal property, $31.250.
Other assets—itemize: C.D., $1,000, $1,700.
Total assets, $39,225.

LIABILITIES

Notes payable to banks—unsecured, $756.
Accounts payable, $300.
Unpaid income tax, $50.
Other debts—itemize: NDEA Loans, $1,667, $2,773.
Total liabilities, $2,773.
Net worth, $36,452.

1. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, uncompleted contracts and other future benefits which you expect to derive from previous business relationships, professional services and firm memberships or from former employers, clients, and customers. None.

2. Are any assets pledged? No.

3. Are you currently a party to any legal action? No.

4. Have you ever declared bankruptcy? No.

JOAN M. DAVENPORT.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: Joan Mariarenée Davenport.
Date of birth: January 22, 1943.
Place of birth: New Jersey.
Marital status: Married.
Full name of spouse: Matthew Patrick Daley.
Name and ages of children: Shannon Daley, age 7 (stepdaughter).
Education: O. L. Valley High School, 1957–1960; Georgetown University, 1960–1964, degree BSFC, 1964; Georgetown University, 1966–1968, degree MS, 1968.
Honors and awards: List below all scholarships, fellowships, honorary degrees, military meda's, honorary society memberships, and any other special recognitions for outstanding service or achievement—Cerificate of Superior Service (FEA), 1975; Certificate of Award (EPA), 1973.
Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations—

---

* Series E, U.S. Saving Bonds.

Organization: American Economic Association, 1967–74; Audubon Society, 1977; National Wildlife Federation, 1974–77.

Employment record: List below all positions held since college, including the title and description of job, name of employer, location, and dates—

Director, Office of Environmental Assessment, Federal Energy Administration, Wash., DC; March 1975 to present.

Actg Dir., Office of Technical Analysis, Environ. Protection Agency, Wash., DC; May 1974 to March 1975.

Deputy Dir., Office of Technical Analysis, Environ. Protection Agency, Wash., DC; December 1973 to May 1974.

Staff Economist, Office of Technical Analysis, Environ. Protection Agy, Wash., DC; July 1971 to December 1973.

Staff Economist, Div. of Energy & Minerals, Bur. of Land Management, Depart of Interior, Wash., DC, July 1969 to July 1971.

Economist, Conference on Economic Progress, Wash., DC; January 1966 to July 1968.

Researcher, The Carnegie Corporation, Columbia University, New York; September 1965 to December 1965.

Statistical Clerk, The Conference on Economic Progress, Wash., DC; May 1965 to September 1965.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions—

Federal Energy Adminis., Director, Office of Environmental Assessment, Wash., DC.

U.S. Environmental Protection Agency, Acting Director, Office of Technical Analysis, Wash., DC.

U.S. Environmental Protection Agency, Deputy Director, Office of Technical Analysis, Wash., DC.

U.S. Environmental Protection Agency, Staff Economist, Office of Technical Analysis, Wash., DC.

U.S. Department of Interior, Staff Economist, Bureau of Land Management, Wash., DC.

Published writings: List the titles, publishers and dates of any books, articles, or reports you have written.—"Offshore Sand and Gravel Production: A Case Study," Marine Technology Society Journal.

Qualifications: State fully your qualifications to serve in the position to which you have been named. (Attach sheet).

Future employment relationships:

1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate. I will.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your current or any previous employer, business firm, association or organization. No. As a civil servant, I would consider future employment in Federal service, but not with the Federal Energy Administration or the Department of Interior.

3. Has anybody made you a commitment to a job after you leave government? No.

4. Do you expect to serve the full term for which you have been appointed? Yes.

Potential conflicts of interest:

1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated. None.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated. None.

3. Describe any business relationship, dealing or financial transaction (other than tax-paying) which you have had during the last 10 years with the Federal Government, whether for yourself or relatives, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated. None.

4. List and describe any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or for the purpose of affecting the administration and execution of national law or public policy. No lobbying activities. Responsibilities undertaken as a Federal employee have included analyses and comment on proposed legislation and regulations.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items. I do not believe I have any conflict of interests.

Development of the energy and non-energy mineral estate of the United States in the late 20th century presents challenges, problems, and opportunities unparalleled in our history. The competing demands for land, for mineral resources to sustain the economy, and for environmental protection can only be harmonized through exposition of relevant data and balancing of all interests.

During Government service, I have been exposed to many aspects of the energy and mineral development question. As an economist in the Bureau of Land Management's Division of Energy and Minerals, I was part of a team charged with revitalizing mineral leasing programs in the early 1970's. Our goal was to foster orderly development of mineral resources while assuring fair return to the public and compliance with the National Environmental Policy Act.

In 1971, I joined the Office of Technical Analysis of the Environmental Protection Agency (EPA). At that time, EPA was a new Agency charged with implementing Federal programs of environmental regulation. The Office of Technical Analysis was formed to be the senior technical advisor to the enforcement arm of the Agency. The overall mission was to assure that adequate data and analyses were available to support both regulations and enforcement actions originating in program offices. During this time, I represented the Office of Enforcement and General Counsel in energy matters and was a member of the EPA Energy Policy Committee.

My responsibilities with the Federal Energy Administration include the weighing of Federal resource development options and environmental considerations associated with such options. Specifically, the Office of Environmental Policy is charged with analyzing the environmental costs of energy initiatives, as well as reviewing the energy costs of environmental regulations.

Having participated in Government activities relating to the development of energy and minerals, the regulation of energy and minerals, and the balancing of development options and environmental considerations, I believe I am well qualified to assume the duties of Assistant Secretary for Energy and Minerals of the Department of the Interior.

JOAN M. DAVENPORT.

STATEMENT OF DAVID J. BARDIN

Nominee to be Deputy Administrator of the Federal Energy Administration, before the U.S. Senate Energy and Natural Resources Committee, April 18, 1977.

Mr. Chairman, Members of the Committee: I feel privileged to appear before you as a nominee to join President Carter's Administration.

This 96th Congress will grapple with energy issues of paramount importance. Previous Congresses analyzed these complex problems, passed legislation and pointed the way to further solutions.

The Executive Branch must conscientiously implement the law. I feel confident that the leadership and combined efforts of President Carter and the Congress can effectively address the agenda of unresolved issues.

In the last three years, our energy imports rose by 2 quadrillion British thermal units, to about 22% of our total consumption and 42% of our oil consumption. We depend on these imports even more today than we did before the 1973 embargo to meet our domestic energy requirements. Energy imports drained $35 billion from our economy last year.

As long as domestic consumption exceeds, more and more, domestic production, foreign imports fill the resulting gap and we continue to be vulnerable to world oil price domination and import supply interruption. If we reduce our domestic supply/demand imbalance, we will reduce the associated risks to our economic and political well being.

Our country can alter the trend toward increased imports and begin to achieve a better balance between the energy we consume and the energy we produce. Americans are adaptable. We have repeatedly demonstrated a pioneering spirit. We relish technological challenges, are proud of our technological successes and want to sustain excellent performance.

American society has an extraordinary capacity to innovate—an experimental capacity that profoundly influences other countries. We have the capacity to achieve more coherent national energy policies, in harmony with our objectives for the environment, employment, freedom, international security, and a stable economy.

Today, as a State environmental protection commissioner responsible for making regulatory policy decisions, I am concerned about the energy implications of the choices before me. When I used to recommend energy policy decisions to the Federal Power Commission, I considered the environmental implications. If I am entrusted with responsibilities to assure comprehensive analysis of Federal energy policies, the environmental implications will continue to concern me. The American people do not want us to risk public health or irreparably damage the environment in the name of some supposed energy short-cut.

I do not see energy and environment as either/or propositions. We need energy and environmental policies that fit together. It takes energy to carry out environmental programs. Often energy and environmental programs fortify one another. (For example, we reduce air pollution and save gasoline by New Jersey's regulation of automobiles in use.)

We should strive to optimize on a broad scale rather than to deal with each issue in isolation. Thus, emphasis on conservation now can reduce energy risks, prevent environmental insults, create jobs, and protect the consumer's pocketbook.

The energy consuming public needs facts about energy. Open dealing engenders consumer and business confidence. Business needs timely decisions, clear ground rules and a firm sense of where government is heading.

Abraham Lincoln's insight applies to Americans today: If we could know where we are and whither we are tending, we could better judge what to do and how to do it.

Individual citizens depend upon their Federal government to secure and share the facts: facts about consumption, supply, financial expenditures, competition and profit centers. We need to know what are the trends; what are the timetables for given actions; what is the price of drift and indecision.

There can be a bright energy future for our children and their children. The difficulty and the danger lie in getting from here to there. We can afford neither inaction nor reckless action.

Tonight will mark the anniversary of Paul Revere's celebrated ride. Two hundred and two years ago, Americans were ready for Revere's message that bespoke perils and uncertainties for the future—and also hope for surmounting the crisis.

It seems to me that we have good reason for hope today if we can control our consumption of energy within prudent bounds; if we accelerate the shift to more abundant supply sources; if we employ creatively and meaningfully the human and material resources of our country; and if we move zealously to substitute abundant, renewable energy sources as quickly as possible for inherently circumscribed, dwindling supplies.

President Carter and the Congress are committed to meeting the challenge. I would like to lend a hand.

Thank you Mr. Chairman. I would welcome any questions.

U.S. SENATE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

INFORMATION REQUESTED OF PRESIDENTIAL NOMINEES

Rule 9 of the Rules of the U.S. Senate Committee on Interior and Insular Affairs requires that each Presidential nominee considered by the Committee shall submit a financial statement sworn to by the nominee as to its completeness and accuracy. Under the rule all such statements must be made public by the Committee unless the Committee in executive session determines that special circumstances necessitate a full or partial exception to this requirement. Rule 9 also provides that at any hearing to confirm a Presidential nomination, the testimony of the nominee and, at the request of any member, any other witness shall be under oath.

In order to assist the Committee in its consideration of nominations, each nominee is requested to complete the attached Financial Statement and Statement For Completion By Presidential Nominees.

The original and twenty (20) copies of the requested information should be made available to Honorable Henry M. Jackson, Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C. 20510 (Attn: Staff Director) as soon as possible.

FINANCIAL STATEMENT OF DAVID J. BARDIN

Provide a complete, current financial net worth statement which itemizes in detail all assets (including bank accounts, real estate securities, trusts, investments, and other financial holdings) and all liabilities including debts, mortgages, loans, and other financial obligations) of yourself, your spouse, and other immediate members of your household.

ASSETS

Cash on hand and in banks, $17,532.

U.S. Government securities—add schedule, $12,025.

Listed securities, 0.

Unlisted securities, $16,800.

Real estate interests, including mortgages, $101,600.

Personal property, $11,900.

Life insurance—cash value, $2,800.

Other assets—itemize: U.S. Government and N.J. pension funds, $17,345.

Total assets, $180,002.

LIABILITIES

Accounts payable, $545.

Real estate mortgages payable—add schedule, $34,133.

Other debts—itemize: Tuition to fall due, $1,290.

Total liabilities, $35,968.

Net worth, $144,034.

FINANCIAL STATEMENT SCHEDULE

(self, wife, four children)

U.S. Government Securities: Treasury notes, $12,000, U.S. Savings Bond, $25; total, $12,025.

Unlisted securities: Certificate of deposit N.J. National Bank, $13,000, State of Israel Bond, $3,750, Bank Leami Bond, $50; total, $16,800.

Real estate: Brick house, Trenton, N.J., $40,000, Two condominium apartments, Jerusalem, Israel, $16,600; total, $101,600.

Real estate mortgages payable N.J. National Bank, Trenton, N.J., $29,103, Bank Adanim, Tel Aviv, $5,030; total, $34,133.

1. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, uncompleted contracts and other future benefits which you expect to derive from previous business relationships, professional services and firm memberships or from former employers, clients, and customers. None.

2. Are any assets pledged? (Add schedule.) None.

3. Are you currently a party to any legal action? As a State official, I have been involved in court cases as either the plaintiff or the defendant on material related to the New Jersey Department of Environmental Protection's constitutional and statutory responsibilities.

4. Have you ever declared bankruptcy? No.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES

Name: David Jonas Bardin.

Position to which nominated: Deputy Administrator FEA.

Date of birth: June 2, 1933.

Place of birth: New York, N.Y.

Marital status: Married.

Full name of spouse: Livia Goldcen.

Name and ages of children: Jacob Eli Bardin, 15, Matthew Chaim Bardin, 12, Joseph Raphael Bardin, 9, Sarah Adele Bardin, 6.

Education: Columbia College, 1950–54, degree, A.B., 1954. Columbia University Law School, 1953–56, degree, LL.B. (converted to J.D. 1969), 1956.

Honors and awards: List below all scholarships, fellowships, honorary degrees, military medals, honorary society memberships, and any other special recognitions for outstanding service or achievement—Harlan Fiske Stone Scholarship (Columbia Law School); New York State Regents Scholarship; National Merit Scholarship (honorary); Younger Federal Lawyer Award (Federal Bar Association); Special Service Awards (FPC); Outstanding Performance Rating (U.S. Civil Service Commission).

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations—

Organization: American Bar Association; Federal Bar Association; Federal Power Bar Association; District of Columbia Bar Association; Israel Chamber of Advocates; Bar of New York State.

Employment record: List below all positions held since college, including the title and description of job, name of employer, location, and dates—

Student assistant. Professor Walter Gellhorn. Columbia University Law School, New York, New York 1955.

Soldier, U.S. Army. Transportation Research & Engineering Command. Fort Eustis, Virginia 1956–58.

Lecturer. University of Virginia (Extension). Williamsburg, Virginia.

Trial Attorney; assistant general counsel; deputy general counsel. Federal Power Commission. Washington, D.C. 1958–1969.

Assistant. Attorney General of Israel. Jerusalem, Israel. 1970–72.

Counsel. Israel National Council for Research and Development. Jerusalem Israel. 1972–1973.

Lecturer. Bar-Ilan Law School (Ramat Gan. Israel) and Tel Aviv University Law School (Ramat Aviv, Israel). 1972–1974.

Counsel. Environmental Protection Service of Israel. Jerusalem, Israel. 1973–74.

Self-employed attorney and consultant. Jerusalem, Israel and Washington, D.C. (c/o Spiegel & McDiarmid).

Commissioner. State of New Jersey, Department of Environmental Protection. 1974–date.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions—

Soldier. U.S. Army Transportation Research & Engineering Command, Fort Eustis, Virginia. 1956–58.

Trial Attorney, assistant general counsel; deputy general counsel. U.S. Federal Power Commission. Washington, D.C. 1958–1969.

Commissioner. State of New Jersey, Department of Environmental Protection. 1974–date.

Published writings: List the titles, publishers and dates of any books, articles, or reports you have written—

Regulatory decisions (mimeo) under N. J. Coastal Areas Facilities Review Act include:

Opinion No. 1, Lehigh Construction Company, Toms River Condominium (10 July 1974), affirmed coastal review board, affirmed appellate division.

Opinion No. 20, Public Service Electric & Gas Co., Hope Creek Generating Station (3 September 1975), affirmed coastal review board, appeal pending.

In the matter of Jersey Central Power & Light Co., exemption of Forked River nuclear generating station unit 1 (14 Dec. 1976), subject to appeal.

Report on the Trenton Water Crisis (Bound pamphlet, May 1976).

Ocean Dumping of Sludge—Program through Phase Out in 1981 (Mimeo, January 1977).

Regulations adopted or proposed (published in N.J. Register):

March 1977, adopted, Glass industry particulate emissions.

January 1977, proposed, Spill control.

January 1977, proposed, Non-degradation water quality standards: Pine Barrens ground and surface waters.

January, 1977, proposed, Ban on spray-on asbestos.

December 1976, proposed, Expansion of automotive emissions inspection.

December 1976, adopted, Rules for preservation of the sea clam resource.

October 1976, adopted, Pesticide application qualifications.

June 1976, adopted, Water effluent standards for oil and grease.

May 1976, adopted, Stack testing procedures.

April 1976, adopted, Fees for air pollution permits.

March 1976, adopted, Interim easing of sulfur-in-fuel limits for Cumberland County.

March 1976, adopted, Fees for construction permits.

March 1976, adopted, Increase in state park user fees.

December 1975, adopted, Control of emissions from oil & chemical storage tanks.

October 1975, adopted, Liberalized rules for agricultural open burning.

October 1975, adopted, Rules on sewer connection bans.

July 1975, adopted, Morses Creek surface water quality standards.

May 1975, adopted, Real property tax exemption for non-profit conservation lands.

April 1975, adopted, Flood plain land use controls.

Testimony before committees of U.S. Congress—

Senate Committee on Public Works, Subcommittee on Environmental Pollution (31 January 1977) on Renewed Funding for the Municipal Construction Grants Program.

House of Representatives, Committee on Interior and Insular Affairs, New York City (29 November 1976) on Gateway National Recreation Area.

House of Representatives, Committee on Interstate & Foreign Commerce, Subcommittee on Oversight and Investigations, Newark, N.J. (28 May 1976) on cancer and the environment.

Senate Committee on Public Works, Subcommittee on Environmental Pollution (26 May 1976) on wastewater construction grants.

House of Representatives, Committee on Interstate & Foreign Commerce, Subcommittee on Transportation (7 April 1976), Symposium on Resource Conservation and Recovery.

House of Representatives, Ad Hoc Select Committee on the Outer Continental Shelf, Ocean City, N.J., (25 July 1975), statement of Governor Brendan T. Byrne.

House of Representatives, Small Business Committee, Subcommittee on SBA and SBIC (15 July 1975) on pollution control financing.

Senate Committees on Interior and Insular Affairs and Commerce (joint hearing, 17 March 1975) on OCS legislation.

Testimony before New Jersey state legislature and executive bodies on:

Cancer and environment,

Comprehensive spill control and compensation bill,

Fluoridation of potable water,

Nuclear power,

Air pollution,

Appropriations and budget,

Capital needs.

Speeches:

Opening statement at public hearings on proposed regulations to implement Spill Compensation and Control Act, Trenton, N.J., 9 March 1977.

Association of New Jersey Environmental Commissions, 7th Annual Commissioners Day, Trenton, N.J., 1 March 1977.

Association of Metropolitan Sewerage Agencies' Conference, Anaheim, California, 16 February 1977 on funds for water pollution control in a time of transition.

Public meeting on Wastewater Treatment Facility Grants, Trenton War Memorial, 22 November 1976.

Utility Contractors Association of N.J., Inc., Annual Convention, MacAfee, N.J., 17 September 1976 on the Ocean Pollution Nightmare and the Water Cleanup Dream.

N.J. Water Pollution Control Association, 61st Annual Meeting, Atlantic City, N.J., 12 May 1976 on managing the water cycle.

N.J. Builders Association Annual Convention, Cherry Hill, N.J., 8 April 1976 on water conservation plumbing.

South Jersey Chamber of Commerce, Cherry Hill, N.J., 25 March 1976 on jobs and the environment.

N.J. Paint and Coatings Association, Legislative Up-date Dinner, Hasbrouck Heights, N.J., 11 February 1976 on greater attention to carcinogens and other toxics.

Greater Newark Chamber of Commerce's Questions and Answers '76 Series, Newark, N.J., 14 June 1976 on What does the future hold for environmental quality in N.J. cities?

Texas Coastal Zone Management Program, Advisory Committee, General Land Office, State of Texas, Houston, Texas, 13 January 1976 on "Coastal Zone Management in New Jersey in 1976."

Vice President's Public Forum on Domestic Policy, Philadelphia, Pa., 18 November 1975 on local garbage as a national asset.

Mercer County Chamber of Commerce "Salute to Volunteers" of the Water Crisis, Trenton War Memorial, Trenton, N.J., 11 November 1975.

"The Clean Water Referendum" to Labor leaders, Cherry Hill, N.J., 24 October 1975.

N.J. State AFL-CIO, 14th Annual Convention, Atlantic City, N.J., 11 June 1975 on environment is not a frill: good news and bad news.

3rd Annual National Coastal Zone Management Conference, Asilomar, CA., 29 May 1975 on "Coastal Zone Management in N.J. Today: From Action to Planning to More Action."

N.J. Clean Air Council Annual Hearing, Newark, N.J., 22 May 1975 on Air Quality Maintenance.

N.J. Water Pollution Control Association, 60th Annual Meeting, Atlantic City, N.J., 7 May 1975 on "The Byrne Administration and Water Pollution Control."

N.J., Mosquito Control Association, 62nd Annual Meeting, Atlantic City, N.J., 12 March 1975, welcoming address.

N.J. State Agricultural Convention, Trenton, N.J., 28 January 1975, address at Farmers' Week Dinner.

N.J. Concrete Pipe Association, Queens Campus, Rutgers, 24 October 1974, "Environmental Considerations in Drainage Design and Construction."

Association of American Feed, Pesticide and Fertilizer Control Officials, Inc., 28th Annual Meeting, Atlantic City, N.J., 6 August 1974, on the role of State regulators.

Qualifications: State fully your qualifications to serve in the position to which you have been named. (attach sheet).

Future employment relationships:

1. Indicate whether you will sever all connections with your present employer, business firm, association or organization if you are confirmed by the Senate. Yes.

2. As far as can be foreseen, state whether you have any plans after completing government service to resume employment, affiliation or practice with your current or any previous employer, business firm, association or organization. No.

3. Has anybody made you a commitment to a job after you leave government? No.

4. Do you expect to serve the full term for which you have been appointed? Yes.

Potential conflicts of interest:

1. Describe any financial arrangements or deferred compensation agreements or other continuing dealings with business associates, clients or customers who will be affected by policies which you will influence in the position to which you have been nominated. None.

2. List any investments, obligations, liabilities, or other relationships which might involve potential conflicts of interest with the position to which you have been nominated. None.

Qualifications: Background of public service in federal and state government, and experience abroad, is detailed in the attached biographical statement. In my present position I supervise a department of over 1500 employees engaged in all aspects of environmental regulations and resource management. That position demands integrity, candor, hardwork, judgment and leadership.

3. Describe any business relationship, dealing or financial transaction (other than tax-

paying) which you have had during the last 10 years with the Federal Government, whether for yourself or relatives, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated. None.

4. List and describe any lobbying activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or for the purpose of affecting the administration and execution of national law or public policy. On behalf of the State of New Jersey, I have testified before Congressional Committees, communicated with their Chairmen, members and staff, and have advised the New Jersey delegation.

5. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items. I anticipate no conflicts. If situations arise that raise a question, I shall abide by the dictates of conscience and advice of the Attorney General or agency general counsel.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that today, April 20, 1977, he presented to the President of the United States the enrolled bill (S. 489) to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 4836. An act to extend by seven months of the term of the National Commission on New Technological Uses of Copyrighted Works; to the Committee on the Judiciary.

H.R. 5101. An act to authorize appropriations for activities of the Environmental Protection Agency, and for other purposes; to the Committee on Environment and Public Works.

H.R. 5864. An act to approve with modifications certain proposed amendments to the Federal Rules of Criminal Procedure, to disapprove other such proposed amendments, and for other related purposes; to the Committee on the Judiciary.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. PROXMIRE:

S. 1312. A bill to amend the Truth in Lending Act to facilitate compliance with requirements proposed under that Act by simplifying such requirements, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

S. 1313. A bill to require the enactment of special legislation to continue the expenditure or obligation of funds on any major military or civil acquisition whenever the cost of such acquisition has increased or, on the basis of estimates, will increase by 50 per centum or more; to the Committee on Governmental Affairs.

By Mr. NELSON (for himself and Mr. MATHIAS):

S. 1314. A bill to amend title 28, United States Code, to provide that State prisoners and Federal prisoners shall not be denied Federal habeas corpus relief on the ground that such prisoners were previously afforded a full and fair opportunity to litigate their claims, and for other purposes; to the Committee on the Judiciary.

By Mr. DECONCINI (for himself, Mr. ALLEN, Mr. BAYH, and Mr. KENNEDY):

S. 1315. A bill to amend title 28, United States Code, to provide more effectively for bilingual proceedings in all district courts of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. CULVER:

S. 1316. A bill to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973; to the Committee on Environment and Public Works.

By Mr. RANDOLPH:

S. 1317. A bill for the relief of Marietta Dizon Pamintuan; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

S. 1318. A bill to permit the State of Hawaii to use the proceeds from the sale, lease, or other disposition of certain real property for any public purpose; to the Committee on Armed Services.

S. 1319. A bill for the relief of certain natives of the Philippines who served in the U.S. Armed Forces during World War II; to the Committee on the Judiciary.

By Mr. STONE:

S. 1320. A bill to amend the Federal Election Campaign Act of 1971 with respect to the filing of reports with State officers; to the Committee on Rules and Administration.

By Mr. EAGLETON:

S. 1321. A bill to extend the deadline for transmittal of U.S. Commission on Civil Rights report on unreasonable discrimination based on age in programs and activities receiving Federal financial assistance, and for other purposes; to the Committee on Human Resources.

S. 1322. A bill to revise the basis for estimating the annual Federal payment to the District of Columbia for water and water services and sanitary sewer services furnished to the United States; to the Committee on Governmental Affairs.

S. 1323. A bill for the relief of Mr. and Mrs. Harold H. Vollmer; to the Committee on the Judiciary.

By Mr. LONG (for himself, Mr. MAGNUSON, Mr. BAYH, and Mr. CASE):

S. 1324. A bill to amend the Regional Rail Reorganization Act of 1973 to require Conrail to make premium payments under certain medical and life insurance policies, to provide that Conrail shall be entitled to a loan under section 211(h) of such act in an amount required for such premium payments, and to provide that such premium payments shall be deemed to be expenses of administration of the respective railroads in reorganization; to the Committee on Commerce, Science, and Transportation.

By Mr. PEARSON:

S. 1325. A bill to amend section 406(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1376) to provide explicit statutory authority for the payment of "flow-through" subsidy pursuant to an experimental program administered by the Civil Aeronautics Board during the period August 1, 1973 through July 31, 1975; to the Committee on Commerce, Science, and Transportation.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 1312. A bill to amend the Truth in Lending Act to facilitate compliance with requirements proposed under that act by simplifying such requirements, and for other purposes; to the Committee on Banking, Housing and Urban Affairs.

TRUTH IN LENDING SIMPLIFICATION AND REFORM ACT

Mr. PROXMIRE. Mr. President, I am today introducing the Truth in Lending Simplification and Reform Act, legislation to amend the Truth In Lending Act.

As you know, I was the sponsor of the original Truth in Lending Act and worked long and hard for its passage. I still believe that the guiding principal of truth in lending—disclosure to the consumer—is as important today as it was in 1968 when the act was signed into law. But truth in lending has gone amiss.

The Federal Reserve Board has written a regulation which is so complex and technical that, frankly, I often wonder if even they understand it. Disclosure statements have grown increasingly detailed to the point where, instead of being concise and understandable, they are liable to be 2 feet long. My office files are bulging with letters from creditors who have struggled in good faith to comply with the act but nonetheless found that they were in violation. On top of this, some consumers and their attorneys have seized upon technicalities and recovered statutory damages in the tens of thousands of dollars. All of this, of course, means greater costs for creditors which in turn are passed along to all consumers.

I am also sad to say that administrative enforcement by the Federal bank regulatory agencies has been woefully inadequate. Oversight hearings before the Committee on Banking, Housing and Urban Affairs last summer revealed a shocking laxity on their part in terms of both attitude and resources. All three agencies conceded that their enforcement activities had been deficient, leading to what the Comptroller of the Currency called "an alarming degree of substantial noncompliance" with the act. In light of this admission, overeager consumers by no means deserve all the blame for the mountain of truth in lending litigation.

I believe that now, 9 years after the act's passage, we must take a comprehensive second look. This is by no means a retreat from strong consumer credit legislation. On the contrary, I regard this as an important opportunity to strengthen the act by stripping away the bureaucratic technicalities and making the disclosures more meaningful to consumers and easier for creditors to provide.

I am determined to reduce the complexity of truth in lending, but not at the cost of depriving consumers of the types of information they want and need. In addition, we must strengthen administrative enforcement of the act, as well as provide additional aids for the consumer so that the cost of credit is even more readily available.

This legislation, then, has five objectives: First, to eliminate unnecessary disclosures which detract from key credit information; second, to limit a creditor's civil liability so that damages attach only to violations of a meaningful nature; third, to make compliance easier for creditors and more understandable to consumers by requiring the Federal Reserve Board to issue simple, easily

understood model forms and clauses, like Citibank's, the proper use of which would guarantee compliance; fourth, to provide increased credit information to consumers through "shopper's guides to credit"; and finally, to strengthen administrative enforcement of the act by granting enforcement authority to certain State officials and by providing for restitution to borrowers and publication of the names of violating creditors when serious violations have occurred.

I realize that truth in lending streamlining means different things to different people. To me, it means making truth in lending work better by making it less complex, easier to comply with, and—above all else—an even more useful tool for consumers who are shopping for credit.

Mr. President, I ask unanimous consent that the text of the bill, a section-by-section analysis, and copies of Citibank's old and newly revised disclosure statements be printed at this point in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1312

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Truth in Lending Simplification and Reform Act".

AGRICULTURAL CREDIT

SEC. 2. (a) Section 103(h) of the Truth in Lending Act is amended by striking out "household, or agricultural" and inserting in lieu thereof "or household".

(b) Section 104 (1) of such Act is amended by striking out "or commercial" and inserting in lieu thereof a comma and "commercial, or agricultural".

(c) Section 104 of such Act is amended by striking out paragraph (5).

ADMINISTRATIVE ENFORCEMENT

SEC. 3. Section 108 of the Truth In Lending Act is amended by adding at the end thereof the following:

"(e) In any case where a State has been granted an exemption pursuant to section 123, 171, or 186, compliance with the requirements imposed under the applicable law of such State shall be enforced under that law by the appropriate agency or official of that State with respect to the activities within that State of any creditor or lessor doing business in that State, including any creditor or lessor which is subject to the jurisdiction of a Federal department or agency specifically referred to in subsection (a), but only as to those classes of transactions exempted by the Board.".

RESTITUTION TO BORROWERS

SEC. 4. Section 108 of the Truth in Lending Act is amended by adding at the end thereof the following:

"(f) In carrying out its enforcement activities under this section, each agency referred to in subsection (a) or (c) shall take the following actions to obtain voluntary compliance with the requirements of this title:

"(1) In cases where an annual percentage rate or finance charge was inaccurately disclosed, the agency shall require the creditor to make an adjustment to the account of the person to whom credit is extended, except where the agency finds the result of such a requirement would be unreasonably burdensome, to insure that such person will not be required to pay a finance charge in excess of the finance charge actually disclosed or the dollar equivalent of the annual percentage rate, whichever is lower.

"(2) In the event a creditor fails or refuses to comply with any requirement issued in accordance with this subsection within a reasonable period, the agency shall in writing notify the person to whom credit is extended of the facts known to the agency and of the rights accruing to that person under this title.

"(g) When an agency referred to in subsection (a) or (c) finds that a creditor has engaged in repeated and substantial violations of this title or regulations of the Board, the agency shall make information available to the public which, in accordance with regulations of the Board, may include the name of the creditor involved, the number of violations discovered, the percentage of transactions inspected and found to be in violation, the nature of the violations found, the amount of monetary adjustments, if any, made by the creditor, and any other information deemed appropriate by the agency.".

LIMITATION ON CIVIL ACTIONS

SEC. 5. Section 130(e) of the Truth in Lending Act is amended to read as follows:

"(e) An action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within one year from the date of the occurrence of the violation, except where the consumer has received notice of a violation pursuant to section 108(e), in which case the action may be brought within 90 days thereafter, but in no event more than three years from the date of the transaction.".

ANNUAL REPORTS

SEC. 6. Section 114 of the Truth in Lending Act is amended by striking out "Not later than January 3 of each year after 1969" and inserting in lieu thereof "Each year".

(b) Section 18(f)(5) of the Federal Trade Commission Act (15 U.S.C. 58a(f)(5)) is amended by striking out "not later than March 15 of each year".

(c) Section 707 of the Equal Credit Opportunity Act is amended by striking out "Not later than February 1 of each year 1976" and inserting in lieu thereof "Each year".

MODEL FORMS AND CLAUSES

SEC. 7. (a)(1) Chapter 1 of the Truth in Lending Act is amended by adding at the end thereof the following new section:

"§ 116. Model forms and clauses.

"(a) The Board shall issue model forms and clauses for common transactions to facilitate compliance with the disclosure requirements of this title and to aid the borrower in understanding the transaction by utilizing readily understood language to simplify the technical nature of the disclosures.

"(b) Such forms and clauses shall be adopted by the Board after notice duly given in the Federal Register and opportunity for public comment in accordance with section 553 of title 5, United States Code.".

(2) The table of sections of chapter 1 of the Truth in Lending Act is amended by adding at the end thereof the following:

"16. Model forms and clauses.".

(b) Section 130(f) of the Truth in Lending Act is amended to read as follows:

"(f) No provision of this section or section 112 imposing any liability shall apply to—

"(1) any act done or omitted in good faith in conformity with any rule, regulation, or interpretation thereof by the Board or in conformity with any interpretation or approval by an official or employee of the Federal Reserve System duly authorized by the Board to issue such interpretations or approvals under such procedures as the Board may prescribe therefor; or

"(2) any failure to make disclosures in proper form if the creditor utilized any appropriate model form or clause issued by the Board,

notwithstanding that after such act, omission has occurred, or after the use of such form or clause, such rule, regulation, approval, or model form or clause is amended, rescinded, or determined by judicial or other authority to be invalid for any reason.".

RECESSION RIGHTS

SEC. 8. The first sentence of section 125(a) of the Truth in Lending Act is amended by striking out "residence" and inserting in lieu thereof "dwelling".

OPEN END CREDIT PLANS

SEC. 9. (a) Section 127(a) of the Truth in Lending Act is amended by striking out paragraph (5).

(b) Section 127(b) of the Truth in Lending Act is amended by striking out paragraph (7).

FINANCE CHARGE ITEMIZATION

SEC. 10. (a) Section 128(a)(6) of the Truth in Lending Act is amended to read as follows:

"(6) Except in the case of a sale of a dwelling, the amount of the finance charge, which shall be itemized if it contains more than one charge.".

(b) Section 129(a)(4) of such Act is amended to read as follows:

"(4) Except in the case of a loan secured by a first lien on a dwelling and made to finance the purchase of that dwelling, the amount of the finance charge, which shall be itemized if it contains more than one charge.".

(c) Section 106 of such Act is amended by striking out paragraph (d).

DEFAULT CHARGES

SEC. 11. (a) Section 128(a)(9) of the Truth in Lending Act is amended to read as follows:

"(9) Any monetary charge payable in the event of a late payment or delinquency.".

(b) Section 129(a)(7) of such Act is amended to read as follows:

"(7) Any monetary charge payable in the event of a late payment or delinquency.".

SECURITY INTERESTS

SEC. 12. (a) Section 128(a)(10) of the Truth in Lending Act is amended to read as follows:

"(10) A statement indicating that a security interest is taken in any property which is the subject of the extension of credit and a clear identification of any other property in which a security interest is held or is to be retained or acquired by the creditor in connection with the extension of credit.".

(b) Section 129(a)(8) of such Act is amended to read as follows:

"(8) A statement indication that a security interest is taken in any property which is acquired with the proceeds of the extension of credit and a clear identification of any other property in which a security interest is held or is to be retained or acquired by the creditor in connection with the extension of credit.".

LIMITED CIVIL LIABILITY

SEC. 13. The text preceding clause (1) of section 130(a) of the Truth in Lending Act is amended to read as follows:

"Except as otherwise provided in this section, any creditor who fails to comply with any requirement imposed under this chapter (other than under section 128); any requirement imposed under section 128 of this chapter with respect to disclosure of the total of the amount to be financed, the finance charge, the annual percentage rate, the number, amount, and due dates of payments scheduled to repay the indebtedness, any monetary charge payable in the event of a late payment or delinquency, the existence of and identification of property subject to

a security interest, or the borrower's right to rescission; or any requirement imposed under chapter 4 or 5 of this title, with respect to any person is liable to such person in an amount equal to the sum of—".

SET-OFF RIGHTS

SEC. 14. Section 130(h) of the Truth in Lending Act is amended by adding at the end thereof the following new sentence: "This subsection may not be construed to prohibit such person from raising a creditor's violation of this title by way of recoupment, offset, or counterclaim in an action before a court of competent jurisdiction where permitted by law.".

DISSEMINATION OF ANNUAL PERCENTAGE RATES

SEC. 15. (a) Chapter 2 of the Truth in Lending Act is amended by adding at the end thereof the following new section:

"§ 136. Dissemination of annual percentage rates

"(a) The Board shall semiannually collect, publish, and disseminate to the public the annual percentage rates charged for credit, other than open end credit, by all creditors extending or offering to extend such credit in each standard metropolitan statistical area with populations in excess of 500,000.

"(b) The Board is authorized to enter into contracts or other arrangements with appropriate local consumer or public interest organizations to carry out its functions, under subsection (a), and to furnish financial assistance in support thereof.".

(b) The analysis of such chapter is amended by adding at the end thereof the following new item:

"136. Dissemination of annual percentage rates.".

EFFECTIVE DATE

SEC. 16. The amendments made by this Act take effect upon the expiration of 1 year after the date of enactment of this Act.

FIRST NATIONAL CITY BANK, PERSONAL FINANCE DEPARTMENT—NEW YORK

Application Number_____
Annual percentage rate_____%
Total of payments (4)+(7) $_____
Proceeds to Borrower (1) $_____
Property Ins. Premium (2) $_____
Filing fee (3) $_____
Amount financed (1)+(2)+(3) (4) $____
Prepaid finance charge (5) $_____
Group credit Life Ins. premium (6) $____
Finance Charge (5)+(6) (7) $_____
PI. NO. and date loan made_____

For value received, the undersigned (jointly and severally) hereby promise(s) to pay to First National City Bank (the "Bank") at its office at 399 Park Avenue, New York, New York 10022 (1) the sum of _____ ($____) (Total of Payments) ( ) in _____ equal consecutive monthly instalments of $____ each on the same day of each month, commencing ____ days from the date the loan in made; or ( ) in ____ equal consecutive weekly instalments of $____ each on the same day of each week, commencing not earlier than 5 days nor later than 45 days from the date the loan is made; or ( ) in ____ equal consecutive bi-weekly instalments of $____ each, commencing not earlier than 10 days nor later than 45 days from the date the loan is made, and on the same day of each second week thereafter; or ( ) in ____ equal consecutive semi-monthly instalments of $____ each, commencing not earlier than 10 days nor later than 45 days from the date the loan is made, and on the same day of each semi-monthly period thereafter, (iii) a fine computed at the rate of 5c per $1 on any instalment which has become due and remained unpaid for a period in excess of 10 days, provided (A) if the proceeds to the borrower are $10,000 or less, no such fine shall exceed $5 and the aggregate of all such fines shall not exceed the lesser of 2% of the amount of this note or $25, or (B) if the *annual percentage rate* stated above is 7.50% or less, the limitations provided in (A) shall not apply and no such fine shall exceed $25 and the aggregate of all such fines shall not exceed 2% of the amount of this note, and such fine(s) shall be deemed liquidated damages occasioned by the late payment(s); (iii) in the event of this note maturing, subject to an allowance for unearned interest attributable to the matured amount, interest at a rate equal to 1% per month and (iv) if this note is referred to an attorney for collection, a sum equal to all costs and expenses thereof, including an attorney's fee equal to 15% of the amount owing on this note at the time of such reference, for necessary court costs. The acceptance by the bank of any payment(s) even if marked payment in full or similar wording, or if made after any default hereunder, shall not operate to extend the time of payment of or to waive any amount(s) then remaining unpaid or constitute a waiver of any rights of the bank hereunder.

In the event this note is prepaid in full or refinanced, the borrower shall receive a refund of the unearned portion of the prepaid finance charge computed in accordance with the rule of 78 (the "sum of the digits" method). Provided that the bank may retain a minimum finance charge of $10, whether or not earned, and, except in the case of a refinancing, no refund shall be made if it amounts to less than $1. In addition, upon any such prepayment or refinancing, the borrower shall receive a refund of the charge, if any, for group credit life insurance included in the loan equal to the unearned portion of the premium paid or payable by the holder of the obligation (computed in accordance with the rule of 78), provided that no refund shall be made of amounts less than $1.

As collateral security for the payment of the indebtedness of the undersigned hereunder and all other indebtedness or liabilities of the undersigned to the bank, whether joint, several, absolute, contingent, secured, unsecured, matured or unmatured, under any present or future note or contract or agreement with the bank (all such indebtedness and liabilities being hereinafter collectively called the "obligations"), the bank shall have, and is hereby granted, a security interest and/or right of set-off in and to (a) all monies, securities and other property of the undersigned now or hereafter on deposit with or otherwise held by or coming to the possession or under the control of the bank, whether held for safekeeping, collection, transmission or otherwise or as custodian, including the proceeds thereof, and any and all claims of the undersigned against the bank, whether now or hereafter existing, and (b) the following described personal property (all such monies, securities, property, proceeds, claims and personal property being hereinafter collectively called the "collateral"): ( ) Motor Vehicle ( ) Boat ( ) Stocks, ( ) Bonds, ( ) Savings, and/or____ see customer's copy of security agreement(s) or collateral receipt(s) relative to this loan for full description.

If this note is secured by a motor vehicle, boat or aircraft, property insurance on the collateral is required, and the borrower may obtain the same through a person of his own choice.

If this note is not fully secured by the collateral specified above, as further security for the payment of this note, the bank has taken an assignment of 10% of the undersigned borrower's wages in accordance with the wage assignment attached to this note.

In the event of default in the payment of this or any other Obligation or the performance or observance of any term or covenant contained herein or in any note or other contract or agreement evidencing or relating to any Obligation or any Collateral on the Borrower's part to be performed or observed; or the undersigned Borrower shall die; or any of the undersigned become insolvent or make an assignment for the benefit of creditors; or a petition shall be filed by or against any of the undersigned under any provision of the Bankruptcy Act; or any money, securities or property of the undersigned now or hereafter on deposit with or in the possession or under the control of the Bank shall be attached or become subject to distraint proceedings or any order or process of any court; or the Bank shall deem itself to be insecure, then and in any such event, the Bank shall have the right (at its option), without demand or notice of any kind, to declare all or any part of the Obligations to be immediately due and payable, whereupon such Obligations shall become and be immediately due and payable, and the Bank shall have the right to exercise all the rights and remedies available to a secured party upon default under the Uniform Commercial Code (the "Code") in effect in New York at the time, and such other rights and remedies as may otherwise be provided by law. Each of the undersigned agrees (for purposes of the "Code") that written notice of any proposed sale of, or of the Bank's election to retain, Collateral mailed to the undersigned Borrower (who is hereby appointed agent of each of the undersigned for such purpose) by first class mail, postage prepaid, at the address of the undersigned Borrower indicated below three business days prior to such sale or election shall be deemed reasonable notification thereof. The remedies of the Bank hereunder are cumulative and may be exercised concurrently or separately. If any provision of this paragraph shall conflict with any remedial provision contained in any security agreement of collateral receipt covering any Collateral, the provisions of such security agreement or collateral receipt shall control.

Acceptance by the Bank of payments in arrears shall not constitute a waiver of or otherwise affect any acceleration of payment hereunder or other right or remedy exercisable hereunder. No failure or delay on the part of the Bank in exercising, and no failure to file or otherwise perfect or enforce the Bank's security interest in or with respect to any Collateral, shall operate as a waiver of any right or remedy hereunder or release any of the undersigned, and the Obligations of the undersigned may be extended or waived by the Bank, any contract or other agreement evidencing or relating to any Obligation or any Collateral may be amended and any Collateral exchanged, surrendered or otherwise dealt with in accordance with any agreement relative thereto, all without affecting the liability of any of the undersigned. In any litigation (whether or not arising out of or relating to any Obligation or Collateral or other matter connected herewith) in which the Bank and any of the undersigned may be adverse parties, the Bank and each such undersigned hereby waives their respective right to demand trial by jury and, additionally, each such undersigned waives his right to interpose in any such litigation any counterclaim of any nature or description which he may have against the Bank. In addition, the Bank shall not be deemed to have obtained knowledge of any fact or notice with respect to any matter relating to this note or any Collateral unless contained in a written notice mailed, postage prepaid, or personally delivered to the Personal Finance Department of the Bank at its address set forth above. Each of the undersigned, by his signature hereto, hereby waives presentation for payment, demand, notice of non-payment, protest and notice of protest with respect to the indebtedness evidenced by this note, and each such undersigned hereby agrees that this note shall be deemed to have been made

under and shall be construed in accordance with the laws of the State of New York.

Each of the undersigned hereby authorizes the Bank to date this note as of the day the loan evidenced hereby is made, to correct patent errors herein and, at its option, to cause the signatures of one or more co-makers to be added without notice to any prior obligor.

Receipt of a copy of this note, appropriately filled in, is hereby acknowledged by the borrower:

ASSIGNMENT OF WAGES, SALARY, COMMISSIONS OR OTHER COMPENSATION FOR SERVICES

This Assignment is executed as security for, or as a manner or method of repayment of, money advanced by a bank, trust company or credit union doing business in New York.

To: First National City Bank—as assignee, Personal Finance Department, 810 Seventh Avenue, New York, New York 10019.

Date ————, 19—.

I, the undersigned, being the "Borrower" indicated on the promissory note which appears above, in consideration of your making the loan evidenced by said note, do hereby assign to you, as collateral security for the payment of the indebtedness evidenced thereby, any and all monies which may hereafter become due or owing to me a salary, wages, commissions or other compensation for services from any present or future employer of mine (herein referred to as my "Employer"), to the extent of an amount equal to 10%, thereof, computed at the time when such salary, wage(s), commission(s), or other compensation is (are) payable, and you are hereby authorized to apply the same, as and when received by you, to the satisfaction of all such indebtedness as shall then be due and owing by the undersigned on account of said note until all such indebtedness shall be fully paid.

I hereby authorize my Employer to give full force and effect hereto, he being hereby released and discharged from any and all liability to me for or on account of any and all monies which may be paid you hereunder.

I hereby acknowledge receipt of a copy hereof.

This is an assignment of wages, salary, commissions or other compensation for services.

Signature of assignor:

NOTICE OF PROPOSED GROUP INSURANCE

Credit life insurance on the life of the "Borrower" obligated under the Note on the reverse side hereof may be taken out by the Bank under a group life insurance policy issued to the Bank by The Prudential Insurance Company of America, having its home office in Newark, New Jersey. Such insurance, if effected on the life of the Borrower, will be effective from the date of said Note until the Note is repaid, or said group policy terminates, or the final maturity date of the Note, whichever first occurs, in an amount necessary to reduce or extinguish the Borrowers indebtedness under said Note, but not to exceed $20,000 in respect of all indebtedness of the Borrower to the Bank for which the life of the Borrower may have been insured under said group life insurance policy, the proceeds of which insurance shall be paid to the Bank for application to the discharge of such indebtedness. If an identifiable charge is to be made to the Borrower for such insurance, the amount thereof will be set forth at Item (6) of the Note on the reverse side hereof. If any such insurance for which an identifiable charge has been made to the Borrower is declined by the insurer or otherwise does not become effective, the Borrower will be given immediate notice thereof and any such charge paid by the Borrower will be promptly refunded. The Borrower will receive a certificate of insurance relative to any insurance effected on his life within 30 days of the date of the Note.

————————

Borrower to sign if identifiable charge is made.

The application for credit evidenced by the note on the reverse side of this form has been:

Withdrawn—the accommodation requested cannot be granted at this time except on the terms or conditions offered to you. This decision was based in part:

Declined—The decisions not to grant the accommodation requested at this time was based in part:

On information, not necessarily of a derogatory nature, contained in a consumer report from the consumer reporting agency(s) listed below.

On information, not necessarily of a derogatory nature, obtained from sources other than a consumer reporting agency, you may, within sixty days of the receipt of this disclosure, submit a written request for the reasons for our decision.

SUMMARY OF CERTAIN SECTIONS OF ARTICLE 3-A OF THE PERSONAL PROPERTY LAW OF THE STATE OF NEW YORK

§ 46-c—An assignment of earnings (Assignment) shall be contained in a separate written instrument, and at its top and just above the place reserved for the signature of the assignor, must be described in at least 10 point bold type, as an assignment of wages, etc.; it must contain the name and address of the assignee and, in its text or in a writing permanently attached, identify specifically and describe fully the transaction to which it relates, the amount of the indebtedness, the dates on which and place at which payments are to be made, and that it secures only the transaction or series of transactions described in such assignment.

§ 46-e—The Assignment must be personally executed by the assignor and a copy of it, and of any papers attached thereto, together with a copy of any papers executed by the assignor pertaining to the transaction described in the Assignment, must be delivered to the assignor before the same is filed with the employer.

§ 46-f—Except as provided by Article 9 of the New York Banking Law, the charges made by the assignee must not exceed a greater sum than 18% per annum on the amount of the loan or advance, except as permitted by Section 5-531 of the General Law of New York.

§ 48—Before an Assignment (except assignments given security for money actually advanced to or at the request of the assignor by any bank, trust company or credit union doing business in the State of New York) shall be filed with an employer:

(a) the assignor must be at least 21 days in default on a payment, and after such default the assignee must have mailed to the assignor by certified mail, return receipt requested, a copy of the Assignment and any attached papers with a written notice that, unless the amount in default shall be paid within 20 days from the date of the mailing, the Assignment will be served on the assignor's employer, and advising assignor of his right to a hearing on the validity of the Assignment (pursuant to § 47-e, below) and any defense to the underlying debt;

(b) if the assignor notifies the assignee of a defense, the assignee cannot file the Assignment until it obtains a court order;

(c) the written notice given the assignor must instruct him to bring the notice with him and have any payment endorsed thereon and, if a payment is so endorsed, or if the assignor receives, a written receipt referring to the notice, the Assignment cannot be served on the employer until subsequent default and similar notice.

(d) if the notice is returned undelivered, it may then be served the same as a summons or mailed to the Assignee by certified mail, return receipt requested, where he works.

§ 47-e—With the exception of an order made by a family court or in a matrimonial proceeding, the assignor, his employer or any other interested party may commence a special proceeding to vacate the Assignment in the county where assignee or assignor resides or where the Assignment is filed. The court may consider any defense to the Assignment and underlying debt, with burden of proof on each to be on the Assignee, and may grant appropriate interim relief. If vacated by a judgment it may be presented to the county clerk.

§ 48-a—No amount is deductible from the assignor's future earnings until at least 10 days have elapsed after a true and authenticated copy of the Assignment together with an itemized statement of the amount then due the assignee, has been filed with the employer, and, if the assignment relates to indebtedness of less than $1,000: (a) the amount collectible in any month can be not more than 10% of the assignor's earnings in that month; (b) it is subordinate to any prior assignment, income execution or order under Section 5226 of the Civil Practice Law and Rules of New York.

§ 48-b—No amount is deductible from the assignor's future earnings unless the same exceed, $85 per week.

§ 48-c—Unemployment by the assignor at the time of or subsequent to the Assignment does not prevent the Assignment from becoming effective later.

§ 49—Banks, Trust Companies and Credit Unions doing business in the state of New York are not required to file such an Assignment with any public office or officer.

FIRST NATIONAL CITY BANK

CONSUMER LOAN NOTE

Date ————————, 19———.

(In this note, the words I, me, mine and my mean each and all of those who signed it. The words you, your and yours mean First National City Bank.)

Terms of Repayment: To repay my loan, I promise to pay you ———— Dollars ($———). I'll pay this sum at one of your branches in —— uninterrupted —— installments of $—— each. Payments will be due ————, starting from the date the loan is made.

Here's the breakdown of my payments:

1. Amount of the Loan $————
2. Property Insurance Premium $————
3. Filing Fee for Security Interest $————
4. Amount Financed (1+2+3) $————
5. Finance Charge $————
6. Total of Payments (4+5) $————

Annual Percentage Rate————%

————————

Prepayment of Whole Note: Even though I needn't pay more than the fixed installments, I have the right to prepay the whole outstanding amount of this note at any time. If I do, or if this loan is refinanced—that is, replaced by a new note—you will refund the unearned finance charge, figured by the rule of 78—a commonly used formula for figuring rebates on installment loans. However, you can charge a minimum finance charge of $10.

Late Charge: If I fall more than 10 days behind in paying an installment, I promise to pay a late charge of 5% of the overdue

installment, but no more than $5. However, the sum total of late charges on all installments can't be more than 2% of the total of payments or $25, whichever is less.

Security: To protect you if I default on this or any other debt to you, I give you what is known as a security interest in my [ ] Motor Vehicle and /or ———— (see the Security Agreement I have given you for a full description of this property), [ ] Stocks, [ ] Bonds, [ ] Savings Account (more fully described in the receipt you gave me today) and any account or other property of mine coming into your possession.

Insurance: I understand I must maintain property insurance on the property covered by the Security Agreement for its full insurable value, but I can buy this insurance through a person of my own choosing.

Default: I'll be in default:

1. If I don't pay an installment on time; or

2. If any other creditor tries by legal process to take any money of mine in your possession.

You can then demand immediate payment of the balance of this note, minus the part of the finance charge which hasn't been earned figured by the rule of 78. You will also have other legal rights, for instance, the right to repossess, sell and apply security to the payments under this note and any other debts I may then owe you.

Irregular Payments: You can accept late payments or partial payments, even though marked "payment in full," without losing any of your rights under this note.

Delay in Enforcement: You can delay enforcing any of your rights under this note without losing them.

Collection Costs: If I'm in default under this note and you demand full payment, I agree to pay you interest on the unpaid balance at the rate of 1 percent per month, after an allowance for the unearned finance charge. If you have to sue me, I also agree to pay your attorney's fees equal to 15 percent of the amount due, and court costs. But if I defend and the court decides I am right, I understand that you will pay my reasonable attorney's fees and the court costs.

Comakers: If I'm signing this note as a comaker, I agree to be equally responsible with the borrower. You don't have to notify me that this note hasn't been paid. You can change the terms of payment and release any security without notifying or releasing me from responsibility on this note.

Copy Received: The borrower acknowledges receipt of a completely filled-in copy of this note.

TRUTH IN LENDING SIMPLIFICATION AND REFORM ACT SECTION-BY-SECTION ANALYSIS

SEC. 1. The Act is cited as the Truth in Lending Simplification and Reform Act.

SEC. 2. Agricultural credit.—Would amend sections 103(h), 104(1), and 104(5) to exempt credit transactions which are primarily for agricultural purposes. The Federal Reserve Board has pointed out that inclusion of agricultural credit in Truth in Lending has resulted in numerous complexities in Regulation Z. In addition, the Board believes that Truth in Lending has been of little value in such transactions because they are primarily commercial in nature.

SEC. 3. Administrative enforcement.—Would amend section 108 to grant authority to state officials in exempted states to enforce state Truth in Lending laws with regard to national banks and federal savings and loan associations within such states. Banking officials in exempted states are presently unable to examine these institutions to assure that they are in compliance with state law. Substantial evidence exists that there is widespread noncompliance, and the effectiveness of the Act would be enhanced by providing for this added enforcement.

SEC. 4. Restitution to borrowers.—Would amend section 108 to require enforcement agencies to request restitution to borrowers in those cases where the annual percentage rate or finance charge in a transaction was inaccurately disclosed. In such a case, the borrower's account would be adjusted, except where the agency finds it would be unreasonably burdensome, so that the borrower will not be required to pay a finance charge in excess of the finance charge actually disclosed or the dollar equivalent of the annual percentage rate, whichever is lower. If a creditor refuses to provide restitution, the enforcement agency shall notify the borrower of the facts discovered and of the borrower's rights under the Act.

Statistics recently compiled by the Federal Deposit Insurance Corporation indicate that errors in the finance charge and annual percentage rate—the two most important disclosures—are the most frequent Truth in Lending violations. The States of Connecticut, Maine, and Wisconsin currently utilize a similar enforcement scheme with regard to their Truth in Lending laws, and officials of these states believe this has led to a dramatic increase in creditor compliance. Strengthened enforcement techniques are essential if greater compliance is to be achieved.

The amendment further provides that where an agency finds that a creditor has engaged in repeated and substantial violations of the Act, it is authorized to publicize the name of the creditor and other information regarding the frequency and nature of the violations. This is currently the practice of officials in Connecticut and has led to increased creditor compliance.

SEC. 5. Limitation on civil actions.—Would amend section 130(e) to provide that a consumer who receives notification of a Truth in Lending violation from an enforcement agency pursuant to section 4, above, may file a civil action for damages within 90 days after such notification, notwithstanding that more than one year has elapsed since the violation. No such action may be commenced, however, more than three years from the date of the transaction. This section complements the previous section under which enforcement agencies are required to notify borrowers of certain violations when a creditor refuses to provide restitution.

SEC. 6. Annual reports.—Would amend section 114 of the Truth in Lending Act, section 18(f)(5) of the Federal Trade Commission Act, and section 707 of the Equal Credit Opportunity Act in order to permit the Federal Reserve Board to submit its annual reports for these statutes as part of the Board's general annual report. This has been recommended by the Federal Reserve Board.

SEC. 7. Model forms and clauses.—Would amend Chapter 1 of the Truth in Lending Act to require the Federal Reserve Board to issue model forms and clauses for common consumer credit transactions. The forms should be written in readily understood language designed to simplify the technical nature of the disclosures. Prior to adopting these forms, the Board shall provide notice through the Federal Register and obtain the comments of all interested parties. In addition, section 130(f) is amended to provide that proper use of these model forms would constitute a defense as to the form of disclosures in civil actions.

Issuance of model forms and clauses will greatly aid creditors by eliminating uncertainty as to compliance, lessening creditor costs, and reducing the amount of civil litigation. Credit industry representatives have long sought such forms from the Federal Reserve Board.

SEC. 8. Recission rights.—Would amend section 125(a) to substitute "dwelling" for "residence" thereby making clear that recission rights apply only to transactions in which the creditor is taking a security interest in real property containing the borrower's home, and not to security interests covering vacant lots. This amendment has been recommended by the Federal Reserve Board.

SEC. 9. Open end credit plans.—Would strike out section 127(a)(5) and section 127(b)(7) which call for disclosure of an "average effective annual percentage rate of return" in certain open end plans. This amendment has been recommended by the Federal Reserve Board on the ground that these sections have rarely, if ever, been used and have accounted for an entire section of Regulation Z.

SEC. 10. Finance charge itemization.—Would amend sections 128(a)(6) and 129(a)(4) to affirm the Federal Reserve Board's interpretation of these sections to the effect that finance charges which consist of only one element need not be itemized. Enactment of these amendments would substantially reduce litigation.

In addition, would strike out section 106(d) which permits certain types of charges, such as taxes, to be excluded from the finance charge if separately itemized. These charges are imposed on cash and credit customers alike, so inclusion in the finance charge is inappropriate. The amendment, recommended by the Federal Reserve Board, will conceptually simplify the Act.

SEC. 11. Default charges.—Would amend sections 128(a)(9) and 129(a)(7) to make clear that these provisions do not require disclosure of a creditor's right of acceleration upon default or other charges which are not monetary fees payable directly upon default. These amendments have been recommended by the Federal Reserve Board and should substantially reduce litigation.

SEC. 12. Security interests.—Would amend sections 128(a)(10) and 129(a)(8) to eliminate the need for creditors to disclose the type of security interest taken by a creditor. This information is of little, if any, benefit to borrowers, but has resulted in considerable litigation. In addition, these amendments would limit the requirement for a clear identification of property taken as security in a closed-end transaction to make it inapplicable to those items which are being purchased. While a creditor need not clearly identify the property subject to a security interest if it is the item purchased, the creditor still must state that purchased items are subject to a security interest. These amendments, which have been recommended by the Federal Reserve Board, would reduce the complexity of disclosure statements without limiting information to borrowers.

SEC. 13. Limited civil liability.—Would amend section 130(a) to limit civil liability in closed-end transactions to seven types of disclosure violations: (1) the amount to be financed; (2) the finance charge; (3) the annual percentage rate; (4) the number, amount, and due dates of payments scheduled to repay the indebtedness; (5) any monetary charge payable in the event of a late payment or delinquency; (6) the existence of and identification of property subject to a security interest; and (7) the borrower's right of recission.

Creditors currently face civil liability for improperly disclosing a host of closed-end credit terms which often are already known to the borrower or are of only secondary importance in shopping for credit. This amendment will reduce by more than half the number of disclosures for which creditors will be civilly liable. Creditors will no longer be liable for improperly disclosing the following: the name of the creditor; the cash price; the

downpayment; the unpaid balance of the cash price; other itemized charges comprising the amount financed; the unpaid balance; the deferred payment price; the total of payments; any prepayment penalty; the method of rebating unearned interest upon prepayment; the date on which the finance charge begins to accrue; and the sequence of disclosures.

This amendment will limit civil liability to only those disclosures of primary importance and will thereby sharply reduce litigation.

SEC. 14. Set-off rights.—Would amend section 130(h) of the Truth in Lending Act to make clear that this section, which prohibits a borrower from offsetting Truth in Lending damages against a debt owed unless a court has found a Truth in Lending violation, does not prohibit a borrower from raising a creditor's violation by way of recoupment or similar doctrine where permitted by State law. It was Congress' intent in enacting this section in 1974 to prohibit a debtor from unilaterally offsetting alleged damages, but not to prohibit the borrower from seeking an offset in a legal action. This amendment will supersede an erroneous court decision on this subject.

SEC. 15. Dissemination of annual percentage rates.—Would amend chapter 2 of the Truth in Lending Act to require the Federal Reserve Board to publish semiannually the annual percentage rates charged by creditors for various types of closed-end credit in standard metropolitan statistical areas with populations in excess of 500,000. These "Shopper's Guides to Credit" would make credit information even more readily available for more than half of the nation and would also enhance competition between creditors. The Board is authorized to contract with consumer or public interest groups to carry out this activity.

SEC. 16. Effective date.—The Act would take effect one year after its enactment.

By Mr. PROXMIRE:

S. 1313. A bill to require the enactment of special legislation to continue the expenditure or obligation of funds on any major military or civil acquisition whenever the cost of such acquisition has increased or, on the basis of estimates, will increase by 50 per centum or more; to the Committee on Governmental Affairs.

COST OVERRUN CONTROL BILL

Mr. PROXMIRE. Mr. President, today I am introducing a bill to automatically cut off Federal funding for any civilian or military project that has a cost overrun of 50 percent or more.

We all know that cost overruns are a fact of life in Government. Alarming statistics of massive overspending are reported every day in the newspapers and by the electronic media.

The real question is what can the Government do about it? This bill provides an answer to that question.

It would automatically cut off Federal funding to any major military or civilian project after it increases in price by more than 50 percent. Inflation would not be counted in determining this 50-percent threshold.

Funding for any program interrupted by this bill could be reinstated only by passing a special act of Congress and then only for a period of 1 year at a time.

This would have several beneficial effects. First, it would highlight the problem areas in HEW, DOD, NASA, or any other governmental agency. Second, it would force the Congress to deal with each program as it became a problem. Third, it would put all Government agencies on alert that their pet projects would be interrupted if they were mismanaged and that Congress would then have to step in.

The Comptroller General of the United States would be responsible for collecting cost data, as he does now, and reporting to the Congress and the relevant agency each time a project went over the 50 percent mark. At that point no further Federal funds could be spent on that project until Congress specifically said it was proper to continue.

In order not to tie up the Comptroller General or the Congress in small projects, only those programs with a research and development cost of over $50 million or a procurement cost of over $200 million would be reviewed.

For the first time, if this bill is passed, every major Corps of Engineers, Department of Defense, HEW, or Transportation project that gets in financial trouble will be assured of a tough congressional review. And the agency heads will know that if their projects start showing a trend toward cost overruns, the automatic funding cutoff could go into effect.

This will force discipline on the program managers and the Congress.

Why do we need such a cutoff? The latest General Accounting Office report indicates that 753 civil and military projects currently in research and development or construction have cost increases of $176 billion or 64 percent over the original estimated costs.

A special audit of 201 of the worst offenders showed that they increased in cost by $150 billion of which 47 percent or $71 billion was for inflation.

The biggest overrun was in the Department of Defense with an increase of $74 billion followed closely by the Federal Highway Administration with an increase of $60 billion. The Corps of Engineers had the most projects with a cost overrun of 100 percent or more—83 out of 178.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1313

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as used in this Act—

(1) The term "major military acquisition" means any construction, acquisition, or procurement financed with funds appropriated to or for the use of the Department of Defense the estimated cost of which, including research, development, testing, and evaluation costs, exceeds $200,000,000, or any such construction, acquisition, or procurement with respect to which the research, development, testing, and evaluation costs are estimated to be in excess of $50,000,000.

(2) The term "major civil acquisition" means any construction, acquisition, or procurement not included in paragraph (1) of this section financed in whole or in part with Federal funds (not including any funds allocated to a State under a revenue sharing program), the estimated cost of which, including research, development, testing, and evaluation costs, in terms of Federal funds, exceeds $200,000,000, or any such construction, acquisition, or procurement with respect to which the research, development, testing, and evaluation costs are estimated to be in excess of $50,000,000.

(3) The term "baseline cost" means a planning or development cost as determined by the Comptroller General.

(4) The term "Comptroller General" means the Comptroller General of the United States.

SEC. 2. (a) The Comptroller General twice each year shall be responsible for determining the cost growth statistics on all major military acquisitions and on all major civil acquisitions. Such statistics shall be determined on the basis of data furnished to him by the appropriate departments and agencies of the Government and on the basis of independent audits and reviews conducted by him under authority of law. All departments and agencies of the Government are hereby required to furnish the Comptroller General with any data or information he might determine to be required for compiling cost growth statistics.

(b) Whenever the Comptroller General determines in the case of any major military acquisition or major civil acquisition that the actual cost or estimated projected cost of such acquisition has resulted or will result in a cost growth of 50 per centum or more compared to an established baseline cost, he shall promptly notify the Congress and the head of the department or agency concerned of his finding. In determining the cost growth with respect to any major military acquisition or any major civil acquisition the Comptroller General shall exclude any amount from such cost growth attributable to inflation.

(c) After the date on which the head of a department or agency receives a notice from the Comptroller General described in subsection (b) relating to any major military acquisition or any major civil acquisition, no additional funds may be obligated or expended with respect to such acquisition unless authorizing legislation as described in subsection (d) is enacted by the Congress after the date of such notice.

(d) Legislation referred to in subsection (c) means a bill or joint resolution which (1) pertains only to the continuation of the authority to obligate and expend funds for a major military acquisition or major civil acquisition with respect to which the authority to obligate and expend funds has been terminated as the result of a notice issued by the Comptroller General under subsection (b), and (2) continues for a period of not more than one year from the date of enactment of such bill or joint resolution the authority to obligate and expend funds for such acquisition.

SEC. 3. The provisions of this Act shall not apply to any major military acquisition or major civil acquisition for which funds have been appropriated prior to the date of enactment of this Act.

By Mr. NELSON (for himself and Mr. MATHIAS):

S. 1314. A bill to amend title 28, United States Code, to provide that State prisoners and Federal pirsoners shall not be denied Federal habeas corpus relief on the ground that such prisoners were previously afforded a full and fair opportunity to litigate their claims, and for other purposes; to the Committee on the Judiciary.

Mr. NELSON. Mr. President, I am introducing today, for myself and Senator MATHIAS, legislation amending the Federal habeas corpus statute, 28 U.S.C. section 2241 et seq. This legislation is a direct response to two Supreme Court decisions last year which departed rad-

ically from longstanding precedent and seriously curtailed the rights of those in custody to petition the Federal courts for a writ of habeas corpus. The legislation represents an improved version of S. 3886, which I introduced on this subject at the end of the last Congress.

In *Francis* v. *Henderson*, 425 U.S. 536 (1976), the Supreme Court held that a State prisoner who failed to make a timely challenge to the composition of the grand jury that indicted him could not, after his conviction, bring that challenge in a Federal habeas corpus proceeding. In reaching this decision, the Court rejected the existing law that, absent a deliberate bypass of State procedures, a procedural default by a State prisoner will not foreclose him from making a constitutional challenge through a habeas petition. The Court had reached a similar conclusion 3 years earlier for Federal prisoners, holding that constitutional claims might be waived for the purpose of 28 U.S.C. section 2255, which is analogous to habeas corpus, if the prisoners had not raised them within the time limits spelled out by the Federal Rules of Criminal Procedure. *Davis* v. *United States*, 411 U.S. 233 (1973).

In *Stone* v. *Powell*, 96 S. Ct. 3037 (1976), the Court held that when a State has provided an opportunity for a full and fair litigation of a fourth amendment claim of illegal search and seizure, a State prisoner may not be granted habeas relief on the ground that evidence illegally seized from him was used against him at trial. In reaching this decision, the Court reached the unprecedented conclusion that certain constitutional rights cannot be vindicated through a habeas corpus petition.

The legislation I am proposing today would overrule Francis and Stone. It would amend 28 U.S.C. section 2254 to provide that when a person in State custody applies to a Federal court for a writ of habeas corpus, first, the application cannot be denied on the ground that the applicant did not raise the claim at trial or in a pretrial proceeding in the State court unless the court finds that the applicant understandingly and knowingly decided not to raise the claim, and second, that an otherwise valid claim for a writ of habeas corpus cannot be denied simply because the State courts furnished the applicant a full and fair opportunity to litigate his claim. This legislation would also amend section 2255 to provide the same protections for those in Federal custody.

Legislation overruling Supreme Court decisions is a major step which should be taken only after careful consideration and under narrow circumstances. In support of the legislation there are four points which the Senate should consider:

First, habeas corpus is one of our most cherished constitutional rights. Its diminution reduces the freedom of all Americans.

Second, habeas corpus in this country has been liberally granted and construed, by Congress and the courts, particularly in the last 50 years. The Francis and Stone decisions reverse that historical trend, without justification, and without a willingness to acknowledge the scope of the departure.

Third, these decisions represent a significant incursion on the constitutional power and obligation of Congress, under article III of the Constitution, to define the jurisdiction of the Federal courts.

Finally, these decisions convey the impression of being justified, at least in part, by the Supreme Court's desire to cope with the increased caseload of the Federal courts. However serious this problem may be, the remedy must come from Congress, and not from the Court in the guise of decisions on the merits.

When I introduced S. 3886 at the end of the last Congress, I recognized, of course, that no legislative action was possible at that time. However, it was my hope that the legislation would help to generate discussion, not only about the Supreme Court's handling of the habeas corpus issue, but also about the Court's increasing general tendency to render decisions restricting access to the Federal courts. As Justice Brennan wrote, dissenting in Stone against Powell, the decision was "in keeping with the regrettable recent trend of barring the Federal courthouse door to individuals with meritorious claims."

Most of these troubling decisions have involved restrictive interpretations of title 42, United States Code, section 1983, the Civil Rights Act of 1871, the principal statute which permits aggrieved individuals to challenge Government actions which they believe to be violative of their constitutional rights. In the statement which accompanied the introduction of S. 3886 last year, I discussed at length a number of these decisions which have ignored the intent and undermined the effect of section 1983. (CONGRESSIONAL RECORD, October 1, 1976, pages 34689–34695). I am encouraged that public attention has begun to focus on these regressive decisions. A large measure of the credit for this increased concern belongs to Senators MATHIAS and BROOKE, who introduced S. 35, the Civil Rights Improvement Act, legislation to overrule the major restrictive interpretations of section 1983 by the Supreme Court. My concern about these decisions weakening 1983, the Civil Rights Act of 1871, the objectives of S. 35. For the purposes of this statement, I will confine my analysis to the legislation we are proposing today and its vital objective: Restoring the "great writ" of habeas corpus to the exalted place it occupied in our constitutional framework before Francis against Henderson and Stone against Powell.

I

The "province" of habeas corpus, "shaped to guarantee the most fundamental of all rights, is to provide an effective and speedy instrument by which judicial inquiry may be had into the legality of the detention of a person. It allows restraints contrary to our fundamental law, the constitution, to be challenged, even when the conviction has been imposed by a court of competent jurisdiction." *Carafas* v. *LaVallee*, 391 U.S. 233, 238 (1968). As Justice Holmes once wrote, "Habeas corpus cuts through all forms and goes to the very tissue of the structure. It comes in from the outside, not in subordination to the proceedings," *Frank* v. *Mangum*, 237 U.S. 309, 346–347 (1915).

Title 28, United States Code, section 2241 et seq. is the Federal law governing petitions for haebas corpus; 2241(a) provides that "writs of habeas corpus may be granted by the Supreme Court, any Justice thereof, the district courts and any circuit judge within their respective jurisdictions." Section 2254 sets forth the grounds for a motion for habeas by a State prisoner; section 2255 is the counterpart for Federal prisoners. Although the Federal prisoner has wider grounds on which to base a motion, the crucial aspect of both sections is that a State or Federal prisoner can seek habeas or post-conviction relief on the grounds that the prisoner is "in custody in violation of the Constitution or laws or treaties of the United States."

Throughout our history, habeas corpus has been known as the Great Writ, a cornerstone of individual freedom. It is "the most celebrated writ in the English law." 3 Blackstone Commentaries 129. It is "a writ antecedent to statute, and throwing its root deep into the genius of our common law. It is perhaps the most important writ known to the constitutional law of England, affording as it does an imperative remedy in all cases of illegal restraint and confinement. It is of immemorial antiquity, an instance of its use occurring in the 33d year of Edward I." *Secretary of the State for Home Affairs* v. *O'Brien*, (1923) A.C. 603, 609 (H.C.)

In the United States, habeas corpus was received into our law during the colonial period, explicitly recognized in article I, section 9, clause 2 of the Constitution and incorporated into the first grant of Federal court jurisdiction, act of September 24, 1789 c. 20 section 14, 1 Stat. 81–82. Chief Justice John Marshall recognized habeas corpus to be a "great constitutional privilege." Ex parte Bollman and Swartout, 4 Cranch 75, 95. Nearly 150 years later, the Supreme Court reaffirmed the importance of habeas corpus, writing:

> We repeat what has been so truly said of the federal writ: "there is no higher duty than to maintain it unimpaired." *Boman* v. *Johnston*, 306 U.S. 19, 26 (1939) and unsuspended, save only in the cases specified in our Constitution. *Smith* v. *Bennett*, 365 U.S 708, 713 (1968). *Fay* v. *Noia*, 372 U.S. 391, 399–400 (1963).

Although no body of law developed over 150 years can ever be completely consistent, it is fair to say that the Supreme Court has accorded great respect to the writ of habeas corpus. Moreover, in the past half century, the Court in a series of decisions has greatly expanded the concept of habeas corpus. The early concept of habeas was that it guaranteed only that proper legal processes had been followed. The stated doctrine was that the writ would issue only if the court which committed the prisoner had lacked jurisdiction to do so. However, in *Moore* v. *Dempsey*, 261 U.S. 86 (1923), the court held that a prisoner could attack his

conviction by habeas corpus, even if the court proceedings were formally proper, if those proceedings were under the sway of a mob, making the trial a mere sham. In *Mooney* v. *Holohan*, 294 U.S. 103 (1935), the court extended habeas to a prisoner whose conviction rested on perjured testimony; in *Johnson* v. *Zerbst*, 304 U.S. 458 (1938), the court concluded habeas was appropriate because although the trial court originally had "jurisdiction," it relinquished it by not providing the petitioner with counsel. Finally in 1942, the court completely discarded the jurisdictional fiction and stated that—

The use of the writ in federal courts to test the constitutional validity of a conviction for crime is not restricted to those cases where the judgment of conviction is void for want of jurisdiction of the trial court to render it. It extends also to those exceptional cases where the conviction has been in disregard of the Constitutional rights of the accused, and where the writ is the only effective means of preserving his rights. *Waley* v. *Johnston*, 316 U.S. 101, 104–105 (1942).

II

In 1963, the Court decided *Fay* v. *Noia*, 372 U.S. 391 (1963). The issue before the Court was whether Federal habeas corpus relief could be granted to a State prisoner who had been denied State post-conviction remedies, because a coerced confession claim had been decided against him and the prisoner had allowed the time for a direct appeal to lapse without seeking State appellate review. In a painstaking review of the history of the Great Writ, the majority of the Court, per Justice Brennan, concluded that the lower Federal courts had erred in denying the writ. The essence of the court's conclusion was that the Great Writ was the remedy for incarcerations in violation of fundamental rights. Therefore, if Noia was in prison in violation of his constitutional rights, Federal habeas corpus was an available remedy for him to challenge that incarceration, despite his procedural default. In reaching that decision, the Court considered at great length its effect on the relationship between State and Federal courts, but concluded that the State's interest would be adequately protected by a deliberate bypass standard, and that no stricter standard could be accepted given the overriding importance of habeas corpus:

We fully grant . . . that the exigencies of federalism warrant a limitation whereby the federal judge has the discretion to deny relief to one who has deliberately sought to subvert or evade the orderly adjudication of his federal defense in the state courts. Surely no stricter rule is a realistic necessity. . . . [I]f because of inadvertence or neglect he runs afoul of a state procedural requirement, and thereby forfeits his state remedies, appellate and collateral, as well as direct review thereof in this Court, those consequences should be sufficient to vindicate the State's valid interest in orderly procedure. Whatever residuum of state interest there may be under such circumstances is manifestly insufficient in the face of the federal policy, drawn from the ancient principles of the writ of habeas corpus, embodied both in the Federal Constitution and in the habeas corpus provisions of the Judicial Code, and consistently upheld by this Court, of affording an effective remedy for restraints contrary to the Constitution . . .

Although we hold that the jurisdiction of the federal courts on habeas corpus is not affected by procedural defaults incurred by the applicant during the state court proceedings, we recognize a limited discretion in the federal judge to deny relief to an applicant under certain circumstances. . . . narrowly circumscribed, in conformity to the historic role of the writ of habeas corpus as an effective and imperative remedy for deteriations contrary to fundamental law, the principle is unexceptionable. We therefore hold that the federal habeas judge may in his discretion deny relief to an applicant who has deliberately by-passed the orderly procedure of the state courts and in so doing has forfeited his state court remedies.

But we wish to make very clear that this grant of discretion is not to be interpreted as a permission to introduce legal fictions into federal habeas corpus. The classic definition of waiver enunciated in *Johnson v Zerbst*, 304 U.S. 458, 464—"an intentional relinquishment or abandonment of a known right or privilege"—furnishes the controlling standard. If a habeas applicant, after consultation with competent counsel or otherwise, understandingly and knowingly forewent the privilege of seeking to vindicate his federal claims in the state courts, whether for strategic, tactical, or any other reasons that can fairly be described as the deliberate by-passing of state procedures, then it is open to the federal courts on habeas to deny him all relief if the state courts refused to entertain his federal claims on the merits—though of course only after the federal court has satisfied itself, by holding a hearing or by some other means, of the facts bearing upon the applicant's default.

372 U.S. at 433–434, 438–439.

In my view, this statement reflects a profound understanding of priorities in a free society dedicated to constitutional rights. The Court decided that the States' interest in orderly procedure could not prevail over the constitutional rights of a person wrongfully incarcerated. Until this term, the Supreme Court had repeatedly reaffirmed the holding of *Fay*. See, for example, *Henry* v. *Mississippi*, 379 U.S. 443, 452 (1965); *Camp* v. *Arkansas*, 404 U.S. 69 (1971); *Lefkowitz* v. *Newsome*, 429 U.S. 283, 290 n. 6 (1975).

At the same time, a series of court decisions has established that the notion of being "in custody" should be construed liberally. Originally habeas was appropriate only in those cases in which petitioner's claim, if upheld, would result in an immediate release from prison. *McNally* v. *Hill*, 293 U.S. 131 (1934). Subsequently, the Court concluded that a person on parole was "in custody" for the purpose of raising a habeas claim. *Jones* v. *Cunningham*, 371 U.S. 236 (1963). Similarly, later court decisions established that habeas claims could be raised by individuals at large on their own recognizance, but subject to several conditions pending execution of sentence. *Hensley* v. *Municipal Court*, 411 U.S. 345 (1973) and those released on bail after conviction pending final disposition of their cases. *Lefkowitz* v. *Newsome*, 429 U.S. 283 (1975). These decisions underscore the view that habeas "is not now and never has been a static, narrow, formalistic remedy; its scope has grown to achieve its grand purpose—the protection of individuals against erosion of their right to be free from wrongful restraints upon their liberty. Besides physical imprisonment, there are other restraints on a man's liberty, restraints not shared by the public generally, which have been thought sufficient in the English-speaking world to support the issuance of habeas corpus." *Hammond* v. *Lenfest*, 398 F. 2d 705, 710–11 (2d Cir. 1968), quoting *Jones* v. *Cunningham*, 371 U.S. 236, 240, 243 (1963).

Against this background, *Francis* v. *Henderson*, 425 U.S. 536 (1976) was a startling, regrettable departure. In *Davis* v. *United States*, 411 U.S. 233 (1973), the Court had held that a Federal prisoner who had failed to make a timely challenge to the allegedly unconstitutional composition of the grand jury which indicted him could not subsequently attack his conviction under 28 U.S.C. 2255. In *Francis*, the Court extended the *Davis* ruling to bar a state prisoner from a habeas challenge to the allegedly unconstitutional composition of the grand jury which indicted him. The majority of the court concluded that since *Davis* held that the Federal courts must give effect to the legitimate rules and time limitations imposed by F.R. Crim. P. 12(b)(2):

Then surely considerations of comity and federalism require that they give no less effect to the same clear interests when asked to overturn state criminal proceedings." *Francis* v. *Henderson*, 425 U.S. at 541.

The Court concluded that applying the Davis rule with "equal force" meant that petitioner must show not only "cause" for the untimely challenge, but also actual prejudice resulting from the failure to comply.

This holding obviously departs sharply from Fay against Noia. After summarizing the holding of Fay, Mr. Justice Brennan wrote in his dissent:

Yet the Court, invoking "comity and federalism," would now essentially preclude federal habeas relief for state defendants deprived of their constitutional rights, so long as the State required that they assert those rights within a certain time period; this absolute and automatic "waiver" of the underlying constitutional claim would apparently take effect whether or not the defendant knew of his rights, whether or not the "untimely" challenge was nevertheless made at a time when no legitimate state interest would be upset by an adjudication of the claim on the merits, and whether or not mere inadvertence or actual incompetence of counsel accounted for the untimely challenge. *Francis* v. *Henderson*, 425 U.S. at 450 (dissenting opinion of Brennan).

The dissent was particularly critical of the Court's willingness to undercut Fay against Noia without confronting the case's precedential impact:

It is particularly distressing . . . [that] . . . the Court exposes its hostility towards and makes substantial inroads into the precedential force of *Fay* without directly confronting its underlying premises, continuing validity, or the possibility of distinguishing the failure to raise different constitutional rights in a timely manner in the state courts. Such "oversights" are especially ironical in light of the Court's recent admonition that "[o]ur institutional duty is to follow until changed the law as it now is, not as some members of the Court might wish it to be." *Hudgens* v. *NLRB*, 424 U.S.— (1976). If the Court believes that *Fay* is no longer good law, and if the Court has the "institutional duty" to develop and explicate the law in a reasoned and consistent manner, then it has the duty to face squarely our

prior cases interpreting the federal habeas statutes and honestly state the reasons, if any, for its altered perceptions of federal habaes jurisdiction. *Francis* v. *Henderson*, 425 U.S. at 546–47 (dissenting opinion of Brennan).

Underlying both Francis and Davis is apparently the view that defendants must be deterred from raising procedural claims after the Court, witnesses, and the parties have gone to the burden and expense of a trial. However, as the Court recognized in Fay, deterrence is only an effective policy for prisoners who act knowingly and intentionally. Prisoners who because of inexperience, poor counsel, or other reasons are unaware of their rights will not be deterred by the Court's new standard; they will simply be trapped in "an airtight system of forefeitures." (*Fay* v. *Noia*, 372 U.S. at 432.) In Davis and Francis the Court has thereby elevated the State and Federal interests in efficiency above the rights of individuals to have their constitutional claims heard. My legislation recognizes these considerations and puts the Federal court's focus on whether the prisoner has deliberately relinquished his right to raise a conditional claim.

The holding of Stone against Powell was equally disturbing, and the reasoning no more compelling. Powell had been convicted of murder in State court because of crucial testimony concerning a revolver which had been taken from him when he was arrested for violating a vagrancy statute. On appeal, the State courts rejected Powell's claim that the vagrancy statute was unconstitutional and, therefore, the resulting search was invalid. The Federal court of appeals, however, concluded that the statute was unconstitutional and the search unlawful. The Supreme Court reversed, holding that when the State has provided an opportunity for full and fair litigation of a fourth amendment claim, a State prisoner may not be granted habeas corpus relief on the ground that evidence obtained through an unconstitutional search and seizure was introduced at trial. In reaching the decision, the Court distinguished away *Kaufman* v. *United States* 397 U.S. 217 (1969), which held squarely that a Federal prisoner could raise search and seizure claims in a motion to vacate sentence based on 28 U.S.C. section 2255.

The Court's majority reached its result by arguing first, that the exclusionary rule, made applicable to the states in *Mapp* v. *Ohio*, 376 U.S. 643 (1960) was not constitutionally required, but a "judicially created remedy designed to safeguard fourth amendment rights generally through its deterrent effect * * *" The Court went on to note that the exclusionary rule did not establish an absolute bar against the use of illegally seized evidence; such evidence can be used in a grand jury proceeding, *United States* v. *Calandra*, 414 U.S. 338 (1974), or in a trial court to impeach a defendant, *Walder* v. *United States* 347 U.S. 62 (1954). Since the purpose of the rule is deterrence and the extension of the rule to habeas corpus would not greatly add to its deterrent effect below, the Court chose not to extend it to habeas corpus. The Court buttressed its holding by distinguishing the exclusionary rule which "deflects the truth-finding process and often frees the guilty" from others constitutional rights, such as the fifth amendment right to be free from self-incrimination, the violation of which could distort the search for guilt or innocence, *Stone* v. *Powell*, 96 S. Ct. at 3050.

The dissent's scorn for this reasoning was stated plainly. Mapp was obviously constitutionally based "or there would be no basis for applying the exclusionary rule in State criminal proceedings." Cases like Walder and Calandra cut back on the substance of the exclusionary rule, but they were constitutional decisions, rather than judicial interpretations of the habeas statute to foreclose the prisoner from seeking habeas. Most important, 28 U.S.C. section 2254 provides that habeas corpus will be granted if a prisoner "is in custody in violation of the Constitution." There is nothing in the statute or its legislative history leading to the conclusion that some constitutional rights are subordinate to others.

The effect of these decisions is a severe curtailment of the right of habeas corpus. Moreover, in Justice Brennan's words, the premises underlying the decisions, particularly Stone, mark the cases "as a harbinger of future eviserations of the habeas statutes * * *" Stone, 96 S. ct at 3062. For a major premise in the court's decision is reflected in the observation that—

> Resort to habeas corpus, especially for purposes other than to assure that no innocent person suffers an unconstitutional loss of liberty, results in serious intrusions on values important to our system of government. They include (i) the most effective utilization of limited judicial resources, (ii) the necessity of finality in criminal trials, (iii) the minimizaton of friction between our federal and state systems of justice and (iv) the maintenance of the constitutional balance upon which the doctrine of federalism is founded. *Stone*, 96 S. Ct at 3050 n. 31.

These considerations will be no less important in future habeas cases. They will inevitably be balanced against the right to habeas, to which the court majority does not accord the exalted position that history does. In the eyes of the court, habeas has been reduced to the level of just another appeal. As Justice Rehnquist, writing for the court in Davis, noted—

> We find it difficult to conceptualize the application of one waiver rule for purposes of Federal appeal and another for purposes of Federal habeas corpus. 411 U.S. 213, 233.

Yet this reasoning disregards two centuries of history concerning the Great Writ. The Court was more accurate in *Townsend* v. *Sain*, 372 U.S. 293, 311–12 (1963) writing:

> The whole history of the writ—its unique developments—refutes a construction of the federal courts' habeas corpus powers that would assimilate their tasks to that of courts of appellate review. The function on habeas is different. It's to test by way of an original civil proceeding, independent of the normal channels of review of criminal judgments, the very gravest allegations.

III

The analysis so far explains why I believe the Francis and Stone decisions to be unjustified departures from precedent and serious denigrations of the habeas writ. But these feelings alone would not prompt me to offer this legislation. I have never accepted the view of our esteemed former colleague, Sam Ervin, that the Constitution had a meaning apart from the Supreme Court decisions expounding it. In my view, what the Supreme Court says interpreting the Constitution is the law, no matter how adamantly I might disagree with a decision. Decisions representing constitutional interpretations cannot be overruled legislatively.

However, not all Supreme Court decisions are equally sacrosanct. When the Court interprets a Federal statute, and Congress disagrees with its interpretation, Congress can work its will through additional legislation. Moreover, under article III of the Constitution, Congress which had the power to create the lower Federal courts, also defines the jurisdiction of those courts. When decisions by the Court affect these issues, Congress can and should consider whether the decisions are desirable or wise and accurately reflect congressional intent.

History makes it obvious that the operation of the habeas corpus statutes is a proper concern of Congress. In the Judiciary Act of 1789, Congress granted the Federal courts authority to issue the writs in cases of prisoners in custody of the United States. In 1867, Congress expanded the writ to State prisoners, giving relief in "all cases where any person may be restrained of his or her liberty in violation of the Constitution or any treaty or law of the United States." Act of February 5, 1867, c. 28 s. 1, Stat. 385. In that act:

> Congress was enlarging the habeas remedy . . . not only in extending its coverage to state prisoners, but also in making its procedures more efficient.

The Supreme Court, shortly after the passage of the act, described it in equally broad terms:

> This legislation is of the most comprehensive character. It brings within the habeas corpus jurisdiction of every writ and of every judge every possible case of privation of liberty contrary to the National Constitution, treaties or laws. It is impossible to widen this jurisdiction. *Ex Parte McCardle*, 6 Wall. 318, 325–26 (1868); *Fay* v. *Noia*, 372 U.S. at 415-17.

In *Johnson* v. *Zerbst*, 304 U.S. 458, 465 (1938), the Court noted:

> The scope of inquiry in *habeas corpus* proceedings has been broadened—not narrowed—since the adoption of the Sixth Amendment . . . Congress has expanded the rights of a petitioner for *habeas corpus* . . . There [is] no doubt of the authority of the Congress to thus liberalize the common law procedure on habeas corpus. . . . *Walter* v. *Johnston*, 312 U.S. 275, 285 (1941)

Evaluating the relationship between Congress and the Supreme Court on habeas corpus, Justice Frankfurter wrote:

> Congress could have left the enforcement of federal constitutional rights governing the administration of criminal justice in the

States exclusively to the State courts. These tribunals are under the same duty as the federal courts to respect rights under the United States Constitution. . . . It is not for us to determine whether this power should have been vested in the federal courts. . . . [T]*he wisdom of such a modification in the law is for Congress to consider,* particularly in view of the effect of the expanding concept of due process upon enforcement by the State of their criminal laws. *It is for this Court to give fair effect to the habeas corpus jurisdiction as enacted by Congress. By giving the federal courts that jurisdiction, Congress imbedded into federal legislation the historic function of habeas corpus adapted to reaching an enlarged area of claims. Brown* v. *Allen,* 344 U.S. 443, 499–500 (1953) (emphasis added)

The division of responsibility is relatively straightforward: It is the responsibility of the court to define the substantive scope of constitutional rights but "it is for Congress to decide what the most efficacious method is for enforcing Federal constitutional rights and asserting the primacy of Federal law." *Stone* v. *Powell* 96 S. Ct. at 30360, (dissenting opinion of Brennan).

Once the congressional interest is clear, the need for corrective legislation becomes obvious. Section 2254 provides that—

A state prisoner can seek a writ of habeas corpus . . . on the ground that he is in custody in violation of the Constitution. . . .

Since the fourth amendment is violated by the use of evidence illegally seized against a petitioner, it is clear that in those circumstances, petitioner would have the right to petition the district court of a writ of habeas corpus. To my knowledge, there is not a shred of legislative history to suggest that Congress somehow intended to exclude fourth amendment rights from the plain language of the habeas status, and the majority in Stone does not produce any. As Justice Brennan pointed out:

There remains, as noted before, no basis whatsoever in the language or legislative history of the habeas statutes for establishing such a hierarchy of federal rights, certainly there is no constitutional warrant in this Court to override a Congressional determination respecting federal court review of decisions of state judges determining constitutional claims of state prisoners. *Stone* 96 S. Ct at 3068

Francis is an equally disturbing derogative of congressional intent. Federal habeas for State prisoners has been a controversial subject for years, and Congress has not been oblivious to the furor. The tension created in relations between State and Federal courts prompted congressional enactment of 2254 (b) and (c), a codification of the case law rule requiring that State prisoners exhaust State court remedies before applying for Federal habeas. But the consideration of comity embodied in the exhaustion requirement dictates only that Federal habeas can be delayed until after the State court determination, not foreclosed. In Fay, the court concluded that to rule otherwise would convert "a rule of timing * * * [into] a rule circumscribing the power of the Federal courts on habeas, in defiance of unmistakable, congressional intent." *Fay* v. *Noia,* 3732 U.S. 391, 420 (1963); *Stone* v. *Powell,* 96 S. Ct. at 3060 n. 10 (Brennan dissenting).

The "unmistakable congressional intent" perceived by the Court in Fay has not changed in the last 13 years. "Indeed," as Justice Brennan points out, "subsequent congressional efforts to amend those jurisdictional statutes to effectuate the result that [the Court] accomplish[es] by judicial fiat have consistently proved unsuccessful." Stone, 96 S. ct. at 3068. In 1968, for example, a provision in the Omnibus Crime Control and Safe Streets Act, as reported by the Senate Judiciary Committee, would have abolished Federal habeas for State court prisoners. Despite the passions of that particular year, that section was deleted from the bill by the Senate overwhelmingly. The Senate apparently agreed with the views expressed by the minority of the Judiciary Committee that—

A hundred years of experience under the federal habeas corpus provisions forcefully demonstrate that absolute reliance on state courts to protect federal rights does not adequately protect those rights. To abolish this jurisdiction would roll back a century of progress in American constitutional law and restore American criminal procedure to the dark ages of the early 1900's. S. Rep. 1097, 90th Cong. 2nd Sess., 159–160.

Because of this background, Justice Brennan charged the majority with "nothing less than an attempt to provide a veneer of respectability for an obvious usurpation of Congress' article III, power to delineate the jurisdiction of the Federal courts." Stone, 90 S. ct. at 3061. I believe this harsh judgment is unfortunately accurate, and I am introducing this legislation as a vehicle for the reassertion of congressional authority.

IV

There is a related, disturbing point. It is no secret that the Federal courts are seriously clogged. In fiscal year 1970, 127,280 cases were filed throughout the country in Federal court, an average of 317 per district court judge. Only 5 years later in fiscal year 1975, there were 160,-603 cases filed, 402 per each judge. The appellate workload has increased even more dramatically, rising from 282 appeals per judge to 515 in the years from 1968 to 1975.

Congress has responded to the burden on the Federal courts slowly and incompletely. Four years after the Judicial Conference documented the pressing need for new judges, the Senate finally passed legislation creating an additional 45 district court judgeships. Legislation to split the fifth and ninth circuits to deal with the unique problems there has been reported by the Judiciary Committee. The creation of a national court of appeals to occupy an intermediate position between the existing circuits and the Supreme Court continues to be considered. Other significant steps—such as the elimination of diversity jurisdiction or raising the $10,000 requirement for such claims—are frequently talked about, but as yet there has been no serious legislative movement on these issues.

It is troubling that the Federal courts are backlogged and that the Congress has responded insufficiently. But it is more disturbing that the recent series of cases cutting off access to the Federal courts conveys the impression of being prompted at least as much by concern about the judicial caseload as by concern for the merits of the cases.

The effect of particular Supreme Court decisions on the judicial workload is never discussed at length in the majority opinions. It is confined to occasional references to "scarce judicial resources" and the "plethora of cases" in the Federal system. However, the issue has been addressed several times explictly in the dissenting opinions, indicating the dissenters' belief that it is motivating the majority or that they are thinking about it themselves.

For example, in 1971, the Court held that a person whose fourth amendment rights were violated by a Federal agent had a cause of action for damages against that agent, grounded directly on the fourth amendment, even though there was no Federal statute creating such a cause of action. *Bivens* v. *Six Unknown Named Police Agents,* 403 U.S. 388 (1971). In dissent, Justice Black argued that the creation of a new cause of action was a legislative function. He then pointed out that even if the Court viewed it as a judicial function, there were "many reasons why we should decline to create a cause of action":

The courts of the United States as well as those of the States are choked with lawsuits. The number of cases on the docket of this Court have reached an unprecedented volume in recent years. A majority of these cases are brought by citizens with substantial complaints—persons who are physically or economically injured by torts or frauds or governmental infringement of their rights; persons who have been unjustly deprived of their liberty or their property; and persons who have not yet received the equal opportunity in education, employment, and pursuit of happiness that was the dream of our forefathers. Unfortunately, there have also been a growing number of frivolous lawsuits, particularly actions for damages against law enforcement officers whose conduct has been judicially sanctioned by state trial and appellate courts and in many instances even by this Court. My fellow Justices on this Court and our brethren throughout the federal judiciary know only too well the time-consuming task of conscientiously pouring over hundreds of thousands of pages of factual allegations of misconduct by police, judicial, and corrections officials. 403 U.S. at 428 (dissenting opinion of Black).

More recently, dissenting in Warth, Justice Douglas noted:

The mounting caseloads of the federal courts is well-known. But cases such as this one reflect festering sores in our society . . . I would lower the technical barriers and let the courts serve that ancient need. They can in time be curbed by legislative or constitutional restraints if an emergency arises. We are today far from facing an emergency. 422 U.S. at 519.

The judicial backlog problem is particularly sensitive where habeas corpus is involved. There is no doubt that prisoners' petitions comprise a substantial percentage of the Federal courts' docket, or that over 90 percent of these petitions lack merit. But this predicament is not new. In reporting tht 1968 legislation, the Senate Judiciary Committee noted:

This title also adds a new section . . .designed to relieve our overburdened federal courts from the growing practice of convicted persons using the habeas corpus procedure as a substitute for direct appeal . . . The

extent to which this process has increased the business of the federal courts is appalling . . . Applications by state prisoners for writs of habeas corpus in the federal courts grew from 127 in 1941 to 981 in 1961 and 4,664 in 1965. The proportion of increase was 675%, from 1941 to 1961 and 3,750% from 1941 to 1965. S. Rep. 107, 90th Congress, 2nd Sess., at 64.

In 1959, Professor Hart of Harvard Law School wrote about a Supreme Court decision on habeas corpus:

The question is one of large import not only for the liberty of Americans under law but for the just and expeditious dispatch of federal judicial business. The federal courts are flooded with these petitions, and taken, together with cases involving cognate questions on direct review of judgments of conviction in state courts, they constitute one of the most important categories of business on the Supreme Court's own dockets. Hart, Forward: The Time Chart for the Justices, 73 Harv. L. Rev. 84, 102–103 (1959).

Ten years earlier, Chief Justice Vinson wrote that—

In each of the past three years, a little less than one-half of the matters received by the Court were applications from prisoners seeking post-conviction relief. Vinson, Work of the Federal Courts, 60 S. Ct v, vii, (1949).

Yet despite these statistics, the Federal courts have continued to function. Some evidence suggests that while the burden on the courts is plainly serious, it is less crushing than unvarnished statistics would suggest. In a comprehensive study of habeas corpus, the Harvard Law Review observed:

Yet it is all too easy to overstate the strain that an expanded habeas jurisdiction and expanded federal constitutional rights put on the judicial system. Most of the petitions were quickly dismissed: less than 500 reached the hearing state, and most of those hearings lasted less than one day. Nor was the burden on the states staggering: many petitions do not even require a response; less than ten percent of the state convictions attacked had to be defended in a hearing, and so few prisoners were released that the burden of retrial must be small. Developments in the Law: Federal Habeas Corpus, 83 Harv. L. Rev. 1038, 1041 (1970).

An empirical study of the handling and effect of habeas petitions in the Federal district court in Massachusetts points to the same conclusion. That study termed the effect of Fay against Noia "slight," and concluded that more than 50 percent of all habeas petitions were disposed of within 50 days after they had been filed. Shapiro, Federal Habeas Corpus: A Study in Massachusetts, 87 Harv. L. Rev. 321, 333, 346–49 (1973).

Moreover, Congress has helped ease the burden by passage of the Federal Magistrates Act, 28 U.S.C. section 636, in 1968. Section 636(b) provides that magistrates may conduct "preliminary review of applications for posttrial relief made by individuals convicted of criminal offenses, and submission of a report and recommendations to facilitate the decision of the district judge * * *" The performance of this function was explicitly intended "to afford some degree of relief to district judges and their law clerks, who are presently burdened with burgeoning numbers of habeas corpus petitions and applications under 28 U.S.C. section 2255. S. Rept. 371, 90th Cong., 1st Sess., 26 (1967).

It is not my intention to minimize the burden placed on the Federal courts by habeas applications or to imply that Congress has taken all necessary steps to respond to the rising caseload. But the problem is not new, it has been recognized and Congress has chosen not to ease the judicial caseload by making radical changes in the habeas corpus statute. What is different now from the past is that the Supreme Court has apparently taken matters into its own hands, alleviating the judicial backlog by striking sharply at the premises underlying habeas jurisdiction. The strong sense which emerges from the majority opinions in Davis, Francis, and Stone is that habeas corpus is not particularly important.

There is a great advantage to approaching the problems of Federal court jurisdiction comprehensively. We need to create additional judgeships; pay Federal judges salaries needed to attract and keep our finest lawyers on the bench; reduce or eliminate diversity of citizenship as a basis for Federal jurisdiction; and generally focus more attention on the impact that our legislation will have on the operation of the courts—perhaps by incorporating a sort of "court impact statement" in committee reports dealing with relevant legislation. If the caseload crisis can be defused, public support for legislation facilitating access to the Federal courts will be enhanced.

But if comprehensive reform cannot be accomplished, decisions like Stone and Francis should still be overruled swiftly and unequivocally. The assertion of constitutional rights—and the existence of a Federal forum to review those claims—is vitally important for the society, as well as for the petitioner. Our willingness to use scarce judicial resources in this way reflects again the high priority this society places on constitutional liberties and individual freedom.

We must not be blinded by caseload statistics. When the Supreme Court restricts access to the lower courts, the impact falls disproportionately on the poor, minorities, and those seeking to challenge the political, economic, and social status quo. Most often, those who find the courthouse door closed are precisely those individuals and groups most in need of "heightened judicial solicitude," in the words of Justice Stone's famous footnote in Carolene Products.

Moreover, in a society committed to peaceful change through the rule of law full and direct access to the courts is a necessity. ACLU Director Arveh Neier has expressed the importance of the Federal courts in the 1950's and 1960's in this way:

It was a turbulent period in American history; there were wide-ranging pressures for social change; many groups of people previously disenfranchised by reasons of race, sex, status, dependency or youth sought the full protections of citizenship. The federal courts were a forum open to them to accommodate those pressures. While the federal courts did not always side with the people who were seeking changes, the very openness of the federal courts and their willingness to hear the claims for full citizenship, had a profound impact. This produced very substantial and very beneficial social changes. The courts channeled the activities of people seeking redress of their grievances into orderly and lawful paths in which claims for benefits became claims for rights. Grievances were adjudicated in the context of the U.S. Constitution.

These principles may seem farfetched when juxtaposed with some frivolous habeas corpus petition by a convicted felon. But these are constitutional rights that we deal with. We balance them away—by whatever rationalizations—at our peril. As Justice, Frankfurter wrote in the landmark habeas corpus case, Brown against Allen:

The meritorious claims are few, but our procedures must ensure that those few claims are not stifled by discriminating generalities . . . For surely it is an abuse to deal too casually and too lightly with rights guaranteed by the Federal Constitution, even though they invoke limitations upon state power and may be invoked by those morally unworthy.

Too often in the past, politicians have conveyed the message that full respect for the constitutional rights of those who commit crimes frustrates effective law enforcement. The inference is that we could somehow reduce the constitutional rights of "bad" people, while leaving intact the rights of law abiding Americans. Surely this is a dangerous delusion. When constitutional rights are shortchanged in the name of the law and order or judicial efficiency, the rights of the innocent will be lost as surely as the rights of the guilty. We maintain a constitutional system only by protesting infringements on constitutional rights—whatever the source, and whoever the target.

We can have a judicial system that accords full respect to constitutional rights and operates efficiently. But to the extent we must choose, I would not dilute the "great writ" of habeas corpus, or other individual rights guaranteed by the Constitution. As the Supreme Court wrote in a 1971 decision:

This basic law and the values that it represents may appear unrealistic or extravagant to some. But the values were those of the authors of our fundamental constitutional concepts. If times have changed, reducing every man's scope to do as he pleases in an urban and industrial world, the changes have made the values served by (the Constitution) more, not less, important.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1314

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2254 of title 28, United States Code, is amended—

(1) by redesignating subsections (b), (c), (d), (e), and (f) as subsections (c), (d), (e), (f), and (g), respectively;

(2) by adding immediately after subsection (a) the following new subsection:

"(b) No application for a writ of habeas corpus in behalf of a person in custody pursuant to the judgment of a State court shall

be denied on the ground that such State afforded the applicant a full and fair opportunity to raise and have decided his claim that his rights, privileges, or immunities under the Constitution or laws or treaties of the United States were violated by officers of such State, or any agency or political subdivision thereof, in connection with the investigation, apprehension, processing, or conviction of such person or any appeal relating to the judgment of such State court.";

(3) by inserting "(1)" immediately before "An" in subsection (d), as redesignated by paragraph (1) of this section; and

(4) by adding at the end of subsection (d), as redesignated in paragraph (1) of this section, the following:

"(2) No application for a writ of habeas corpus shall be denied under this section on the ground that the applicant did not raise the claim at trial or in any pretrial proceeding unless after a hearing the court finds that such applicant, after consultation with competent counsel or after a knowing and understanding waiver of the right to counsel, understandingly and knowingly forwent the privilege of seeking to vindicate his claim in the State courts."

SEC. 2. Section 2255 of title 28, United States Code, is amended—

(1) by adding immediately after the second paragraph the following:

"No motion for such relief shall be denied on the ground that such prisoner was afforded a full and fair opportunity to raise and have decided his claim that his rights, privileges, or immunities under the Constitution or laws or treaties of the United States were violated by officers of the Federal Government or any agency or political subdivision thereof, in connection with the investigation, apprehension, processing, or conviction of such prisoner or any appeal relating to the sentence of such court."; and

(2) by adding after the fifth paragraph of such section, taking into account the new paragraph added by paragraph (1) of this section, the following:

"No such motion shall be denied on the ground that the prisoner did not raise the claim at trial or in any pretrial proceeding unless after a hearing the court finds that such applicant, after consultation with competent counsel or after a knowing and understanding waiver of the right to counsel, understandingly and knowingly forwent the privilege of seeking to vindicate his claim in such trial court or in such pretrial proceedings.".

Mr. NELSON. Mr. President, I ask unanimous consent that a statement by Senator MATHIAS, together with other material, be printed in the RECORD.

There being no objection, the statement and material were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MATHIAS

I join my distinguished colleague from Wisconsin (Mr. NELSON), in offering this bill to amend the Federal habeas corpus statute. Specifically, this bill would provide that:

Federal habeas relief shall not be denied to State or Federal prisoners on the ground that the applicant was afforded the opportunity for a full and fair hearing on his claim at the State or Federal trial, and

A defendant, who had not raised a Federal constitutional or statutory claim at his State or Federal trial, shall not be precluded from raising it on Federal habeas unless he had deliberately bypassed his State or Federal remedies.

The purpose of this bill is to insure the continued vitality of the writ of habeas corpus—"the great writ"—which has long been a cornerstone of both English and American jurisprudence. Regrettably, in a series of recent decisions the United States Supreme Court has significantly curtailed the availability of the great writ.

The legislation which we now offer would reverse this disturbing trend by offsetting two of these recent decisions, *Stone v. Powell* 96 S. Ct. 1037 (1976) and *Francis* v. *Henderson* 425 U.S. 536 (1976).

In *Stone*, the court, disregarding years of precedent and practice and without even adverting to the text of the habeas statute to support its conclusions, held that Federal habeas relief is not available to State prisoners to challenge the admissibility of evidence that was alleged to have been seized in violation of the Constitution, if the State had afforded the defendant an opportunity for a full and fair litigation of the claim.

In *Francis*, the court ruled that State prisoners, who did not raise their Federal claims at the State trials, may not subsequently assert them in Federal habeas petitions, unless they show good cause for their failure and actual prejudice resulting from the claimed violation. In so ruling, the court brushed aside its earlier holding in *Fay* v. *Noia*, 372 U.S. 391 (1963), a decision which had been substantially codified by Congress in statute. *Noia* held that a defendant, who had not raised a constitutional issue at his State trial, was precluded from raising it on Federal Habeas only if the court determined that he had deliberately bypassed his State remedy.

In both *Stone* and *Francis* the Court took it upon itself to rewrite significant portions of the Habeas statute. In doing so, it clearly usurped the authority of Congress under article III of the Constitution to delineate the jurisdiction of the inferior Federal courts. The late Justice Frankfurter, in his cogent opinion in *Brown* v. *Allen* 344 U.S. 443 (1953), set forth the constitutional principle that supports Congress' authority to review Habeas Corpus claims. He wrote:

"Congress could have left the Enforcement of Federal Constitutional Rights governing the Administration of Criminal Justice in the States exclusively to the State courts. These tribunals are under the same duty as the Federal courts to respect rights under the United States Constitution . .. is it not for us to determine whether this power should have been vested in the Federal courts . . . (T)he wisdom of such a modification in the law is for Congress to consider, particularly in view of the effect of the expanding concept of due process upon enforcement by the States of their Criminal laws. It is for this court to give fair effect to the Habeas Corpus jurdisction as enacted by Congress . . . by giving the Federal courts that jurisdiction, Congress has imbedded into Federal legislation the historic function of Habeas Corpus adapted to reaching an enlarged area of claims . . . The prior State determination of a claim under the United States Constitution cannot foreclose consideration of such a claim, else the State court would have the final say which the Congress, by the Act of 1867, provided it should not have . . . Congress has the power to distribute among the courts of the States and of the United States jurisdiction to determine Federal claims. It has seen fit to give this court power to review errors of Federal law in State determinations, and in addition to give to the lower Federal courts power to inquire into Federal claims, by way of Habeas Corpus . . . but it would be in disregard of what Congress has expressly required to deny State prisoners access to the Federal courts."

Furthermore, the court in both *Stone* and *Francis* ignored the fact that in the past Congress had considered and consistently rejected legislative efforts which would have watered down the scope of the "great writ." Most recently, in the 93rd Congress, both the House and Senate refused to pass bills which would have limited the availability of the writ of Habeas Corpus by limiting the constitutional claims that could be raised on collateral attack in Federal court by State prisoners.

Equally disturbing is the Court's overruling the longstanding principle that all Constitutional claims are cognizable on Federal Habeas Corpus and that there are no second class Constitutional Rights for purposes of Federal Habeas Corpus. As Justice Brennan aptly noted in his dissent in Stone:

"(T)here is no foundation in the language or the history of the Habeas statute for discriminating between types of Constitutional transgressions, and efforts to relegate certain categories of claims to the status of "second class rights" by excluding them from that jurisdiction have been repulsed. Today's opinion, however, marks the triumph of those who have sought to establish a hierarchy of Constitutional Rights, and to deny for all practical purposes a Federal forum for review of those rights that this Court deems less worthy or important."

As an attorney and as a member of a coequal branch of Government, I am naturally reluctant to support legislation which overrules certain decisions of the Supreme Court. Such action must be taken only after the most deliberate and careful consideration, and only in the most compelling cases. I am convinced, however, that the importance of insuring the vitality of the Habeas Corpus statute is such a case.

The Congress should move promptly to enact the legislation which we now offer and to reassert the strong Federal interest in broad Federal Habeas Corpus review of State court convictions. For, unless the Congress takes such action, the Court's majority may well defeat "the manifest Federal policy that Federal Constitutional Rights of personal liberty shall not be denied without the fullest opportunity for plenary Federal review." (Justice Brennan dissenting in *Stone*)

Regrettably, the Court's recent decisions limiting the availability of the writ of Habeas Corpus, appear to be part of an effort by the Court's majority to severely limit access to the Federal Courts for both civil and criminal litigants. Earlier this year, I introduced S. 35, "The Civil Rights Improvements Act of 1977," which is primarily aimed at offsetting several recent court decisions which have substantially narrowed the scope of "The Civil Rights Act of 1871" (42 U.S.C. 1983)—our most important civil rights statute. I urge my colleagues to support both the bill we now offer and S. 35.

I submit for the RECORD a short section-by-section analysis of this bill, together with a memorandum prepared by the American Law Division of the Congressional Research Service, entitled "Possible Legislative Revision of *Stone* v. *Powell*," and a recent article on *Stone* v. *Powell* from the Harvard Journal on legislation.

SECTION BY SECTION ANALYSIS WITH SUPPORTING COMMENTS OF PROPOSED BILL TO AMEND HABEAS CORPUS STATUTES

The first section would amend 28 U.S.C. § 2254 and restore the law governing federal habeas corpus rights of state prisoners to what it was prior to *Stone* v. *Powell*, 96 Sup. Ct. 3037 (1976). In that case, the Court held that persons convicted of offenses in state courts who were allegedly subjected to illegal and unconstitutional searches and seizures in the obtaining of evidence leading to their convictions could not present their search and seizure claims in federal courts upon petitions for habeas, if the state court has provided them with a full and fair opportunity to litigate the claims in the state trials. The rationale of the Court is not logically limitable to search and seizure cases but it must extend as well to all cases where-

in the federal constitutional claim does not go a violation of rights which relates directly to the possibility of an innocent person being convicted, as in the case of a denial of the right to counsel with the defendant thus being compelled to stand trial unsupported by legal assistance. Thus, confessions and out-of-court identifications are prime candidates for similar exclusions from habeas litigation as are allegations of race and sex discrimination in the selection of grand and petit juries.

This section simply reiterates what the law has always been until it was judicially amended in *Powell* and it spells out that habeas relief shall not be denied on the ground that the applicant was afforded the opportunity for a full and fair hearing on his claim at the state trial.

The section does not, of course, provide any substantive rights; it does not spell out what is an unconstitutional search and seizure. Substantive rights are to be determined in line with judicial interpretations of the Constitution and with other congressional enactments of a substantive nature.

The second section would amend 28 U.S.C. § 2254 to restore the law of habeas as explicated in *Fay* v. *Noia* 372 U.S. 391 (1963), and accepted by Congress in subsequent amendments. *Noia* held that a defendant who had not raised a federal constitutional issue at his state trial was to be precluded from raising it on federal habeas only if the court determined that he had deliberately bypassed his state remedies; that is, if he had, after consultation with competent counsel, or otherwise, understandingly and knowingly forewent the privilege of seeking to vindicate his federal claims in the state courts, perhaps for strategic, tactical, or other reasons, that could be described as a deliberate by-pass, the federal habeas court could refuse to hear his federal claims.

In effect this provision would reverse recent cases in which the Court has held that state prisoners who did not raise their federal claims at the state trials may not subsequently assert them in federal habeas petitions unless they show good cause for their failure and actual prejudice resulting from the claimed violation. *Francis* v. *Henderson* 425 U.S. 536 (1976) and *Estelle* v. *Williams* 425 U.S. 501 (1976).

The final section of the bill amends the statute relating to habeas for federal prisoners (28 U.S.C. § 2255), the substitute motion to vacate a sentence, to make clear that *Stone* v. *Powell* does not apply in such actions, that *Kaufman* v. *United States* 394 U.S. 217 (1969) remains good law, and to preserve the deliberate by-pass standards as well. The process of cutting back was begun in *Davis* v. *United States*, 411 U.S. 233 (1973).

CONGRESSIONAL RESEARCH SERVICE,
July 13, 1976.

To: Hon. Charles Mathias.
From: American Law Division.
Subject: Possible legislative revision of Stone v. Powell.

This is in response to your request for an analysis of *Stone* v. *Powell*, No. 74–1055 (July 6, 1976), in which the Supreme Court held that the lower federal courts were no longer to hear on habeas corpus petitions the contentions of convicted state prisoners that evidence obtained by unconstitutional searches and seizures had been introduced at their trials where the state courts afford the defendants the opportunity for a full and adequate hearing on the Fourth Amendment claim. You were particularly interested in the question whether Congress could alter the decision legislatively and the manner in which this might be accomplished.

The analysis included herein will be directed to the specific question of congressional revision. For additional background, we would refer you to The Constitution of the United States of America—Analysis and Interpretation (Constitution Annotated), S. Doc. 92–82 (1972), 1074–1086 (exclusionary rule), and 384–365, 615–623, 778–780 (habeas corpus). Habeas is treated extensively in P. Bator et al, Hart and Wechsler's The Federal Courts and the Federal System (2d ed. 1973), 1424–1538; in addition, there is a substantial body of law review material, some of which will be referred to herein.

I. THE HISTORICAL DEVELOPMENT

The writ of habeas corpus that we know is considerably changed from the common law writ known to the framers and protected from all but a limited class of suspension by Article I, § 9, cl. 2. That writ was the "Great Writ", the habeas corpus ad subjiciendum, by which a court would inquire into the lawfulness of a detention of a petitioner. The Court early adopted the common law understanding that the writ was unavailable to one convicted of crime by a court of competent jurisdiction. Ex parte Watkins, 3 Pet (28 U.S.) 193, 209 (1830). The only exceptions to the strict jurisdictional standard were claims grounded on illegality in sentencing, Ex parte Lange, 18 Wall. (85 U.S.) 163 (1873), and on conviction under an unconstitutional statute. Ex parte Siebold, 100 U.S. 371, 376 (1879). See *McNally* v. *Hill*, 293 U.S. 131, 136–137 (1934).[1]

Watkins and the cases following upon it interpreted the unilluminating grant of power in the Judiciary Act of 1789, § 14, 1 Stat. 81, to courts of the United States to issue writs of habeas corpus for prisoners in jail under or by color of authority of the United States. Thus, federal habeas jurisdiction over state prisoners did not exist except to summon them as witnesses. Ex parte Dorr, 3 How. (44 U.S.) 103, 105 (1845).[2] But by the Habeas Corpus Act fo 1867, § 1, 14 Stat. 385, Congress empowered the "courts of the United States . . . to grant writs of habeas corpus in all cases where any person may be restrained of his or her liberty in violation of the constitution, or of any treaty or law of the United States . . . ." Justice Brennan, in *Fay* v. *Noia*, *supra*, 415–417, read this broad language as evincing a congressional intent to enlarge the habeas remedy to provide a collateral method additional to and independent of direct Supreme Court review of state court decisions for the vindication of the new constitutional guarantees incorporated in the 13th and 14th Amendments. Accord: *Brown* v. *Allen*, *supra*, 488 (Justice Frankfurter concurring).[3] Whatever the Act was intended to mean by Congress, the courts did not immediately begin to expand the scope of the writ, according it pretty much the scope and meaning previously given it when the 1789 Act was being construed. In re Wood, 140 U.S. 278 (1891); In re Jugiro, 140 U.S. 291 (1891); *Andrews* v. *Swartz*, 156 U.S. 272 (1895); *Bergemann* v. *Backer*, 157 U.S. 655 (1895).

The modern expansion of the writ may be said to have started with *Frank* v. *Mangum*, 237 U.S. 309 (1915), although as viewed from today's perspective the judgment in Frank may seem restrictive. But the law of habeas prior to Frank was, as we stated above, that "if a court of competent jurisdiction adjudicated a federal question in a criminal case, its decision of that question was final, subject only to appeal, and not subject to redetermination on habeas corpus." Bator, op. cit., 483. The expansion that had occurred previously had consisted of enlargements of the concept of jurisdiction. The Frank case work a different expansion.

Frank contended that his conviction had been obtained through mob intimidation of the trial. The state appellate court had made an independent inquiry into the issue and concluded that the evidence did not support the claim. The Supreme Court affirmed a federal district court's refusal to issue a habeas writ, laying down as law this proposition: if it is found that the state tribunals have failed to provide corrective process (in the sense of giving a petitioner a fair opportunity to raise and litigate his constitutional claim) in the state courts, then the federal habeas corpus court may proceed to adjudicate the merits of that claim, but if it is found that a state court of competent jurisdiction has fully and fairly adjudicated the merits of the federal question should be claim, then that decision is immune from collateral attack and alleged error on the merits of the federal question should be reviewed by the Supreme Court on direct review. The lawfulness of the detention to be inquired into by the habeas court is to be determined not by whether, as in Frank, the conviction was procured by mob domination but whether the State's process afforded the defendant adeqaute opportunity to raise and have passed upon adequately the question of mob domination; mob domination was not the issue on collateral review but the fairness of the corrective process.[4]

It is possible that in the case of *Moore* v. *Dempsey*, 261 U. S. 86 (1923), the Court "discredited" or "repudiated" Frank's limitation on the habeas power of the federal courts and settled the power of those courts to determine a convicted defendant's constitutional claims on the merits, giving to state court judgments weight but not conclusive weight.[5] In any event, Moore arose as did Frank in a situation in which it was alleged that mob domination of a trial had procured the conviction unfairly; the appellate court in Moore, unlike the Frank court, conducted no independent inquiry of its own but perfunctorily rejected the claim of mob domination. In an opinion by Justice Holmes, who had dissented from the denial of habeas in Frank, the Court reversed and held that the federal district court was under a "duty" to examine the facts for itself and determine if the allegations of mob domination were true. The brief, ambiguous Holmes opinion will admit of either the interpretation that all federal constitutional claims are cognizable on habeas, regardless of the State's previous consideration of the issues or the interpretation that, consistent with Frank, the consideration by the state courts of the federal constitutional claims was so inadequate that federal court collateral review was appropriate.[6] When read in the context of Holmes' Frank dissent, however, the Moore opinion does seem, at the least, to be saying that, regardless of state corrective process, some federal constitutional claims are so fundamental that they are collaterally reviewable on habeas. See Hart & Wechsler, op. cit., 1469. That the opinion did not go as far as *Brown* v. *Allen*, *supra*, did is true, but that it went further than Frank appears also to be reasonably clear.

No clear rule of law emerged from the cases between *Moore* and *Brown* v. *Allen* in 1953. On the one hand, the Court expanded the "lack of jurisdiction" basis of habeas in several cases, *Mooney* v. *Holohan*, 294 U. S. 103 (1935) (use of perjured testimony to procure conviction would deny due process and oust trial court of jurisdiction and is cognizable on habeas); *Johnson* v. *Zerbst*, 304 U. S. 458 (1938) (denial of effective assistance of counsel in federal court ousts jurisdiction and is cognizable on habeas), before holding in *Waley* v. *Johnston*, 316 U. S. 101 (1942), that the use of the writ was not restricted to those cases where the judgment of conviction is void for want of jurisdiction of the trial court to render it but extends also to those exceptional cases where the conviction has been in disregard of the constitutional rights of the accused and

---

Footnotes at end of article.

where the writ is the only effective means of preserving the defendant's rights. Other cases during the period contain expressions broadening and narrowing the interpretations of Frank and Moore and the scholarly commentary is divided.[7]

In any event, in *Brown* v. *Allen*, supra, eight of the nine Justices either held or assumed that on habeas corpus federal district courts must provide review of the merits of constitutional claims fully litigated in the state court system.[8] Basis of the decision, in Professor Hart's words, op. cit., 106, is "that due process of law in the case of state prisoners is not primarily concerned with the adequacy of the state's corrective processs or of the prisoner's personal opportunity to avail himself of this process . . . but relates essentially to the avoidance in the end of any underlying constitutional error. . . ." In Justice Frankfurter's view, the result in Brown was required by the congressional enactment of the Habeas Corpus Act of 1867 by which Congress had determined not to leave the enforcement of federal constitutional rights governing the administration of criminal justice in the States exclusively to the state courts. While state courts are under the same obligation as federal courts to respect federal constitutional rights, Congress may well have considered, and continued to consider, that the enlargement of federal constitutional rights in the imposition of an expanding due process clause upon the States called for access to the federal courts as another assurance of those guarantees. *Brown* v. *Allen*, supra, 499–500, 507–508.[9]

Ten years after *Brown* v. *Allen*, the Court in its famous trilogy, *Fay* v. *Noia*, supra, *Townsend* v *Sain*, 372 U.S. 293 (1963), and *Sanders* v. *United States*, 373 U.S. 1 (1963), again considerably expanded the availability of the writ. Noia was the principal case, construing the "exhaustion" requirement in habeas and developing standards for determining when a prisoner could be said to have forfeited his right to seek the writ by failing to present his constitutional challenge to state consideration. The point of the "exhaustion" doctrine is to avoid the disruption of federal-state comity that would inhere in upsetting state court convictions without first allowing the States an opportunity to correct constitutional defects. *Darr* v. *Buford*, 339 U.S. 200 (1950).[10]

And it is not good enough that a petitioner has been to the state courts; he must have there presented the same claim he seeks to advance in his federal habeas petition. Id., 203. But once having presented the claims to a state court, as on appeal, he is not required to seek state collateral relief. *Brown* v. *Allen*, supra, 447.

Fay v. *Noia* dealt with the conceptually different but related concept of state procedural default by a prisoner; that is, whether a federal collateral attack can be made on a detention based on a state court judgment resting on an "independent and adequate state ground", i.e., on a ruling that, because of noncompliance with a fair and reasonable state procedural rule, the defendant has forfeited his right to a decision on the merits of a federal constitutional claim. Noia resolved the issues by holding that the requirement of "exhaustion" refers only to remedies still available when habeas is sought and has nothing to do with the effect of a past procedural default in the state courts. Only if it is found that a defendant deliberately by-passed state procedures in the federal courts to hold him to his choice and deny him habeas relief.[11]

Townsend v. *Sain*, supra, dealt with the issue of holding evidentiary hearings by habeas courts and propounded the rule that where the facts are in dispute, the habeas court must hold an evidentiary hearing if the habeas applicant did not receive a full and fair evidentiary hearing in a state court, either at the time of the trial or in a collateral proceeding. Sanders dealt with the question of the deference owed to a previous federal habeas proceeding and broadened the possibility of the prisoner obtaining a new hearing.

Basically, then, from this review, we can observe that the rule of the Court limited in *Stone* v. *Powell* was not a recent innovation but rather traces in full flower back to *Brown* v. *Allen* in 1953 and in substantial part back through consistent broadening of the scope of the writ in the 1930's and 1940's to the Moore decision in 1923. The history of the doctrine thus limited may therefore be quite relevant in any congressional determination to legislate with respect to Powell.

II. CONGRESSIONAL ACTIONS

The Court's decision in *Stone* v. *Powell* must also be evaluated in the context of congressional responses to the judicial interpretations of the scope of the writ of habeas corpus over the years. It is important to note that the scope of the writ, insofar as the statutory language is concerned, has not been altered since 1867.[12]

In 1948, title 28 of the U.S. Code was revised and codified. Judge John J. Parker of the Fourth Circuit was Chairman of the Judicial Conference Committee that drafted the revisions of the Habeas Corpus Act. According to Judge Parker, the object of the revisions was to "put an end to the abuse that has arisen because, under recent decisions of the Supreme Court, it has been possible for prisoners to use the writ to attack the procedure of the courts under whose judgments they are imprisoned. . . . [The decisions] opened wide the door to review by way of federal habeas corpus of every criminal proceeding, state or federal, in which a person convicted of crime was willing to make oath that he had been denied a fair trial." Parker, "Limiting the Abuse of Habeas Corpus," 8 F.R.D. 171 (1948).[13]

The changes were, however, modest. A new proceeding was instituted for persons convicted in federal courts, 28 U.S.C. § 2255, requiring such persons to move to vacate their sentences. See *United States* v. *Hayman*, 342 U.S. 205 (1952). So far as state prisoners were concerned, the revision codified the court holdings requiring exhaustion of state remedies and the absence of an adequate remedy available in the state courts. *Brown* v. *Allen*, supra 447–150.[11]

Following *Brown* v. *Allen*, the Judicial Conference of the United States, again under the leadership of Judge Parker, sought to restrict the scope of the writ. Reporting that the expansion of *habeas* jurisdiction had "greatly interfered with the procedure of the State courts," the Conference recommended that "[w]here adequate procedure is provided by State law for the handling of such matters, it is clear that the remedy should be sought in the State courts with any review . . . only by the Supreme Court. . . ."[14] The recommended bill received the support of the Conference of State Chief Justices, the Association of Attorneys General, the American Bar Association, and the Department of Justice. Twice it passed the House of Representatives (in 1956 and 1958), but the Senate never approved it.[15]

Finally, in 1966, Congress did amend the Habeas Corpus Act, largely to incorporate therein the standards established by the Court in its Noia-Townsend-Sanders trilogy. 80 Stat. 1104. See S. Rept. No. 1797 and H. Rept. No. 1892, 89th Cong., 2d sess. (1966). The amendments principally did three things. (1) They dealt with the problem of repetitious and meritless habeas petitions by prescribing, in line with Sanders, the circumstances under which district judges should exercise their discretion to decline to entertain such applications. (2) They provided that when a prisoner has had his case before the United States Supreme Court on appeal or certiorari, the Court's disposition of the case is conclusive on all legal and factual issues actually adjudicated by the Court; only when a habeas court finds a new and controlling fact which could not have been placed in the record by the exercise of reasonable diligence is the rule of conclusiveness inapplicable. (3) They enumerated and restated the Court's Townsend principles to guide the federal courts in the exercise of their discretion in determining whether to hold an evidentiary hearing.

Again, in 1968, an effort was made to constrict the availability of habeas for state prisoners, as the Senate Judiciary Committee included § 702 in S. 917, 90th Cong., 2d sess., the Omnibus Crime Control and Safe Streets Act, giving to judgments of state courts in criminal cases conclusive effect with respect to all questions of law or fact which were determined or which could have been determined in the action leading to the judgment, except for direct appeals of those judgments. After a spirited floor debate, this section was struck from the bill by a vote of 54 to 27 114 Cong. Rec. 14183 (1968).

The most recent efforts to curb the use of the writ by state prisoners was initiated by then Assistant Attorney General Rehnquist in testimony on the proposed speedy trial bill.[17] He proposed that habeas claims by state prisoners be restricted to claims involving the basic fairness of trial and suggested that petitioners be required to show that a violation of the constitutional right claimed had a substantive effect on the outcome of his trial These proposals and several others were incorporated into a bill drafted by the Justice Department and introduced as S. 567 in the 93d Congress.[18]

The bill is interesting when read in the light of *Stone* v. *Powell*. First, the bill would have limited the constitutional claims that could be raised on collateral attack in federal court by state prisoners to those (1) which were not theretofore raised and determined in a state court, and (2) which there was no fair and adequate opportunity theretofore to have raised and determined in a state court, and (3) which could not thereafter be raised and determined in a state court. The object of these provisions, Attorney General Kleindienst said, "would be to add a significant degree of finality" to state court judgments and overturn the contrary holdings of *Brown* v. *Allen* and *Fay* v. *Noia*. 119 Cong Rec 2224 (1973). Once a state court had ruled on the merits of an issue either on direct appeal or collateral attack the only possible remedy would have been direct review by the Supreme Court. The second and third provisions would have altered the waiver and exhaustion standards previously set out in such decisions as Noia so as to treat failure to utilize an available state remedy as a deliberate bypass barring federal habeas relief.

Second, the bill set out another test that a prisoner who had gotten past the first series must meet. That is, the convicted defendant would be limited to raising constitutional claims to violations of any right "which has as its primary purpose the protection of the reliability of either the factfinding process at the trial or the appellate process on appeal from the judgment of conviction". S. 567 proposed § 2254(a)(1)(iii). The Attorney General explained that this "reliability" test was derived from the standards employed by the Supreme Court to determine whether to accord retroactive effect to its constitutional decisions. If the constitutional right goes to safeguarding the reliability of the trial and appellate process, it is generally accorded retroactive effect. Those types of claims that would be barred by this provision, said the Attorney General, would be (1) claims objecting to the admissibility of voluntary confessions because of failure to comply with Miranda, (2) claims objecting to the admis-

Footnotes at end of article.

sibility of evidence obtained through a violation of the search and seizure guarantees, and (3) claims objecting to the admissibility of identifications made in line-ups conducted without counsel in violation of Wade. 119 Cong. Rec. 2225 (1973).

Third, the proposal would have further required a prisoner having gottten past the first two requirements to show "that a different result would probably have obtained if such constitutional violation had not occurred." S. 567, proposed § 2254(a)(1)(iv). This provision was designed to require that a habeas petitioner show only "a probability of acquittal on the actual charge on which a verdict was returned, or that without the violation he would have been convicted only of a lesser included offense. He would not need to show that he would also have been acquitted of all lesser included offenses or that he was in fact innocent." 119 Cong. Rec. 2225 (1973).

Congress took no action on S. 567; as an analysis of *Stone* v. *Powell* will demonstrate, the Court did.

III. STONE V. POWELL ANALYZED

In his opinion for the Court, Justice Powell did not reject the expansion of the scope of habeas corpus which he thought had been accomplished in *Brown* v. *Allen*; that is, federal constitutional claims are generally open to relitigation in collateral actions in federal courts. He did not believe, however, that during the period of expansion the Court had ever "consider[ed] whether exceptions to full review might exist with respect to particular categories of constitutional claims." *Stone* v. *Powell*, supra, slip. op. at 11. He recognized of course, that the Court had on a number of occasions accepted jurisdiction in state prisoner cases in which collateral claims of Fourth Amendment violations were made, had decided these cases on the merits, and had granted relief in some of them on the basis of Fourth Amendment violations.[19] And in *Kaufman* v. *United States*, 394 U.S. 217 (1969), the Court had held that federal prisoners could collaterally litigate search-and-seizure claims under 28 U.S. § 2255, largely on the basis that state prisoners could collaterally litigate search-and-seizure claims on habeas and the rights of the two classes should be parallel. But Justice Powell concluded that the Court had never really closely considered the question and reached an informed, principled decision on the issue; the question thus being considered an open one, he then canvassed the rationales of the exclusionary rule and the principles governing the scope of the habeas writ and announced for the Court the holding that habeas is not available to state prisoners to challenge the admissibility of evidence allegedly unconstitutionally seized, provided that the State afforded the defendant an opportunity for a full and fair litigation of his claim.

(A) The Purpose of the Exclusionary Rule: According to Justice Powell, the primary justification for the exclusionary rule is the deterrence of police conduct that violated Fourth Amendment rights. The rule is not a personal constitutional right; it is not calculated to redress the injury to the privacy of the victim of the search or seizure. The rule is but a "prophylactic" device by which the Court seeks to ensure compliance with the Fourth Amendment. This almost exclusive focus upon the deterrent purpose of the rule is one already well established in the Court's cases, e.g., *United States* v. *Calandra*, 414 U.S. 338 (1974); *United States* v. *Peltier*, 422 U.S. 531 (1975), and it furnished the basis for the Court's refusal to give retroactive effect to its search and seizure decisions. E.g. *Linkletter* v. *Walker*, 381 U.S. 618 (1965). *Mapp* v. *Ohio*, 367 U.S. 643 (1961), extending the exclusionary rule to the States, relied on deterrence but it addressed as well the "imperative of judicial integrity", suggesting that the exclusion of illegally seized evidence prevents contamination of the judicial process. Id., 659. And see *Weeks* v. *United States*, 232 U.S. 383, 391–392, 394 (1914). Indeed, it is difficult to understand the decision in *Elkins* v. *United States*, 364 U.S. 206 (1960), in any sense but a judicial concern for the integrity of the judicial process.[20]

Therefore, the incremental increase in deterrence, if any occasioned by the habeas court's utilization of the exclusionary rule was greatly outweighed in the balance by the harm done to the judicial process through enforcement of the rule. This conclusion was reached upon consideration of several factors.

(B) The Harmful Effect of the Rule: Application of the rule, Justice Powell wrote, "deflects the truthfinding process and often frees the guilty." *Stone* v. *Powell*, supra, slip op. at 23. (1) Reliability. The physical evidence seized by police which is sought to be excluded is typically re liable and often the most probative bearing on guilt. However, the evidence is obtained, it in and of itself is not suspect, not tainted, in the same way that a coerced confession is. (2) Search for Truth. Emphasis upon the admissibility of evidence turns the trial away from what should be its primary goal, the ascertainment of the truth. The evidence if excluded may prevent the attainment of this goal. (3) The question of Guilt or Innocence. Excluding re liable and probative evidence will often permit the guilty to go free; in any event, disputes over admissibility does not contribute to effectuating the goal of convicting the guilty and freeing the innocent.

While the exclusionary rule serves the vital function of enforcing respect for Fourth Amendment values, continued Justice Powell, and the Court will adhere to it in the instance of trials and on direct appeal of trial court convictions, it does not serve the interests so well that the detriment of its enforcement through habeas proceedings is justified.

Thus, one can follow many of the parallels between *Stone* v. *Powell* and S. 567. The accomplishment of the aims of the decision and the bill is attempted in somewhat different fashions but the same aims are firmly fixed. In both instances, the federal habeas role will be diminished by state provision of the opportunity for a litigation of federal constitutional claims. The bill would have precluded search and seizure claims altogether and the decision leaves the possibility that some such cases may still be brought into federal habeas courts upon contentions that the State did not afford a full and fair opportunity for litigating the issue. But what is a full and fair opportunity?

Stone v. *Powell* does not attempt to define the circumstances under which it will be deemed that such an opportunity has been provided. The Court did not, however, remand the two cases before it to the federal courts for evaluation of the fullness and fairness of the opportunity the habeas petitioners had in the trial courts, it simply reversed. Whether this constitutes approbation of the California and Nebraska procedures is unclear. In both instances, trial courts had rejected the claims of the defendants; in the California case, the appellate court had not reached the merits but had decided that the error, if any, had been harmless, while the Nebraska appellate court rejected the claims on the merits.[21] It will be remembered that in Frank the Supreme Court approved the state court's process as adequate when it undertook an independent inquiry and carefully considered the defendant's claims; in Moore, on the other hand, if it be considered consistent with Frank and not an extension of it, the state appellate court's rather perfunctory rejection of the defendant's claim on the record did not immunize the conviction from habeas attack.

The Court's analysis, it may be noted, permits further decisions along the line set out in S. 567. The reliability standard, the irrelevance to the search for truth and the question of innocence, and the purpose to deter are all present with regard to confessions obtained in violation of Miranda and to line-up identifications made in violation of Wade. See, e.g., *Johnson* v. *New Jersey*, 384 U.S. 719 (1966); *Stovall* v. *Denno*, 388 U.S. 293 (1967). The Court's analysis in *Michigan* v. *Tucker*, 417 U.S. 433 (1974), of the Miranda requirements as "prophylactic standards" not themselves rights protected by the Constitution but judicial constructions to protect the right against self-incrimination prepares the way for a *Stone* v. *Powell* holding in a Miranda case.

Whether there are not also other constitutional decisions so to be treated is a question we need not here deal with. But the analysis would not appear to be narrowly limitable.[22]

IV. CONGRESSIONAL ALTERATION OF STONE V. POWELL

Although the Court's opinion in *Stone* v. *Powell* is silent wtih regard to the kind of authority it is exercising, constitutional interpretation or statutory interpretation, and while its language with respect to the exclusionary rule is to some extent both types of interpretation, clearly its decision that a habeas court's power should not extend to hearing search and seizure claims when the petitioner has had an opportunity to raise them previously has to be based upon its construction of 28 U.S.C. § 2254, the habeas statute. True it is that Justice Powell announces that "the Constitution does not require" that state prisoners have the opportunity to present such claims under such circumstances, *id.*, slip op. at 14, but the question here is whether the Constitution permits the exercise of such power by federal courts. A long line of cases previously has required federal courts to litigate such claims, the language of § 2254 is adequately broad, and its constitutionality is so accepted by the Court that when the attorneys general of 41 States joined in an attempt to have the 1867 habeas staute declared unconstitutional the Supreme Court refused even to review the Court of Appeals rejection of the contention. *United States ex rel. Elliott* v *Hendricks*, 213 F. 2d 922 (C.A. 3), cert. den., 348 U.S 851 (1954) See *Ex parte Royall*, 117 U.S. 241, 249 (1886); *Frank* v. *Mangum*, supra, 331. Thus, Justice Powell must be understood as holding, though he did not even cite the statute nor quote the particular language, that a state prisoner convicted at least in part on the basis of evidence seized in violation of the Fourth Amendment but who has been able to raise that question at trial and on appeal, even though he lost, is not "in custody in violation of the Constitution or laws of the United States". 28 U.S.C. § 2254(a).

Indeed, the logic of the Court's opinion with respect to the exclusionary rule is that in no event does the admission at trial of evidence seized unconstitutionally violate a defendant's Fourth Amendment rights. One has a Fourth Amendment right not to have one's privacy invaded by officers not acting in accord with Fourth Amendment requirements. But the violation once accomplished is completed. It does not continue through to the admission of the evidence so obtained. Such admission works no new Fourth Amendment violation. *United States* v. *Calandra*, supra, 354; *United States* v. *Peltier*, supra, 535–539. "The primary meaning of 'judicial integrity' in the context of evidentiary rules is that the courts must not commit or encourage violations of the Constitution. In the Fourth Amendment area, however, the evidence is unquestionably accurate, and the violation is complete by the time the evidence is presented to the court.

. The focus therefore must be on the question whether the admission of the evidence

Footnotes at end of article.

encourages violations of Fourth Amendment rights. As the Court has noted in recent cases, this inquiry is essentially the same as the inquiry into whether exclusion would serve a deterrent purpose." *United States* v. *Janis*, supra, slip op. at 25 n. 35.[23]

Mapp v. *Ohio*, supra, 655–656, however, held that the exclusionary rule was binding upon the States because it is "an essential part of the right to privacy" protected by the due process clause of the Fourteenth Amendment. Congress, if it should so decide, would not be precluded by *Stone* v. *Powell* in its statutory construction from concluding that the imprisonment of one pursuant to a state conviction based at least in part on evidence seized in violation of the Fourth Amendment does mean that he is "in custody in violation of the Constitution". The Fourth Amendment guarantee is applicable to the States through the due process clause of the Fourteenth Amendment, *Wolf* v. *Colorado*, supra, and the due process clause independently imposes upon the States a requirement of fundamental fairness. Under § 5 of the Fourteenth Amendment, Congress has the power to enforce "by appropriate legislation" the guarantees of the due process clause.

As for the deterrence issue, it is primarily a question of judgment whether applying the rule in one situation will constitute a significant deterrence of Fourth Amendment violations while applying it in another would have minimal effect. When the matter turns on such judgments, Congress has a special ability to develop and consider the factual basis of a problem that the Court does not have. *Oregon* v. *Mitchell*, 400 U. S. 112, 247–248 (1970) (Justice Brennan concurring and dissenting).

An example of congressional decisionmaking in this area which extended protection beyond that found by the Court to be required by the Constitution is 18 U. S. C. § 2515, in the electronic surveillance statute, mandating the application of the exclusionary rule with respect to evidence not obtained in compliance with the statute. In *Gelbard* v. *United States*, 408 U. S. 41 (1972), the Court held, on the language of § 2515 and its legislative history, that it could be invoked by a grand jury witness as a defense to a contempt charge brought for refusal to answer questions based on information obtained from the witness' communications unlawfully intercepted through wiretapping; in *United States* v. *Calandra*, supra, the Court held that, under the Fourth Amendment exclusionary rule, a grand jury witness could not refuse to answer questions based on unconstitutionally-seized evidence, noting the statutory basis of Gelbard. While § 2515 is addressed to federal law enforcement officials and federal courts, the precedent is just as applicable to the States where Congress has the power to legislate.

Some thought might be given by Congress to the possibility that the Court will soon modify the exclusionary rule itself. One of the arguments raised by the States in *Stone* v. *Powell* was that the Court should permit a "good faith defense" to the exclusionary rule in situations where, for example, police conduct was only in technical violation of constitutional requirements or where police acted in "good faith" in believing they had a right to search. Chief Justice Burger, in a concurring opinion, and Justice White, in dissent, urged adoption of such a modification. And the Court's opinion in *United States* v. *Peltier*, supra, clearly seems to lay the basis for such a holding. Whether Congress should therefore include in any amendment of the habeas statue a mandate to the federal courts to continue enforcing a broad exclusionary rule may also be considered.

Too, Congress may wish to consider structuring the habeas statute in such a way as to limit the major abuses that have evoked so much concern in the scholarly literature and in judicial opinions. In this respect, two suggestions might be made.

(1) In *Mackey* v. *United States*, 401 U.S. 667, 675 (1971), Justice Harlan wrote a lengthy opinion arguing that the Court had gotten itself into a quagmire in its retroactivity rules and that it should instead draw a distinction between cases still open to direct review and cases where the conviction is final in the sense that only collateral relief is available. New constitutional doctrines must be fully retroactive within the former category while on *habeas* cases the courts should generally apply the law prevailing at the time a conviction became final rather than disposing of all such cases on the basis of intervening changes in constitutional interpretation. There may well be substantial merit to this argument and it would prevent the relitigation of many cases that could well be deemed closed.

(2) The problem of successive petitions by prisoners was treated most fully in *Sanders* v. *United States*, supra, and in the 1966 amendments adding subsections (b) and (c) to § 2,244. Congress might wish to consider whether the standards by which a federal habeas court declines to hear a second or successive petition needs to be and can be tightened so as to induce a greater degree of finality.

FOOTNOTES

[1] Justice Brennan's opinion in *Fay* v. *Noia*, 372 U.S. 391 (1963), undertook a lengthy exegis to demonstrate that the common law understanding was actually that "restraints contrary to fundamental law, by whatever authority imposed, could be redressed by writ of habeas corpus." *Id.*, 408. See *id.*, 399–415. But see *id.*, 449–463 (Justice Harlan dissenting). Most of the scholarly commentary is contrary to the Brennan reading of History. E.g., Oaks, "Legal History in the High Court—*Heabeas Corpus*," 64 Mich. L. Rev. 451 (1966); Bator, "Finality in Criminal Law and Federal *Habeas Corpus* for State Prisoners," 76 Harv. L. Rev. 441, 465–474 (1963) (pre-*Noia*); "Developments in the Law—Federal *Habeas Corpus*," 83 Harv. L. Rev. 1038, 1045–1050 (1970). It is unclear why Justice Brennan undertook this effort to establish the historicity of the broad proposition; it had been clearly established in *Brown* v. *Allen*, 344 U.S. 443 (1953), and arguably earlier, it was not in issue in *Noia*, and the dissenters did not call for a reconsideration of *Brown*. Hart & Wechsler, *op cit.*, 1465.

[2] This statement, and the cases, assume that a statute is necessary to confer jurisdiction upon federal courts to grant the writ. *Ex parte Bollman*, 4 Cr. (8 U.S.) 75 (1807). One scholar has argued that the federal courts have the power absent statute as a direct implication of the suspension clause. Paschal, "The Constitution and *Habeas Corpus*," 1970 Duke L.J. 605.

[3] Here, too, the scholarly opinion appears to be against a broad reading of the 1867 Act. E.g., Bator, *op. cit.*, 474–477; Mayers, "The *Habeas Corpus* Act of 1867: The Supreme Court as Legal Historian," 33 U. Chi. L. Rev. 31 (1865).

[4] This standard is, of course, that of the Court with respect to the exclusionary rule question on collateral review in *Stone* v. *Powell*. On *Frank* v. *Mangum*, see Bator, *op. cit.*, 483–487. Compare *Fay* v. *Noia supra*, 420 (Justice Brennan for the Court), with *id.*, 456–457 (Justice Harlan Dissenting).

[5] "Discredited" is Professor Hart's term, "Foreword: The Time Chart of the Justices," 73 Harv. L. Rev. 84, 105 (1959), while "repudiated" is Justice Brennan's. *Fay* v. *Noia*, *supra*, 421. For *contra* views, contending that *Moore* and *Frank* are consistent, see *id.*, 457–458 (Justice Harlan dissenting); Bator, *op. cit.*, 488–489.

[6] "We assume in accordance with [*Frank*] that the corrective process supplied by the State may be so adequate that interference by *habeas corpus* ought not to be allowed. It certainly is true that mere mistakes of law in the course of a trial are not to be corrected in that way. But if the case is that the whole proceeding is a mask—that counsel, jury and judge were swept to the fatal end by an irresistible wave of public passion, and that the State Courts failed to correct the wrong, neither perfection in the machinery for correction nor the possibility that the trial court and counsel saw no other way of avoiding an immediate outbreak of the mob can prevent this Court from securing to the petitioners their constitutional rights." *Id.*, 91. "We shall not say more concerning the corrective process afforded to the petitioners than that it does not seem to us sufficient to allow a Judge of the United States to escape the duty of examining the facts for himself when if true as alleged they make the trial absolutely void. *Id.*, 92.

[7] Compare Bator, *op. cit.* 489–499, who, while recognizing the wavering of the Court, argues that the cases are all basically consistent with *Frank*, with Hart, *op. cit.*, 104–106, who reads the cases as broadening the scope of the writ beyond that in *Frank*.

[8] Three cases were before the Court and on the merits the Court held six to three that defendants' rights had not been violated. There were in effect two opinions of the Court, one by Justice Reed, *id.*, 446, and one by Justice Frankfurter, *id.*, 488. Only Justice Jackson, id., 532 (concurring in result), disagreed with the view that federal *habeas* courts should ordinarily decide the federal constitutional issues for themselves rather than deferring to state court resolution of the issues.

[9] See, favoring *Brown*, Reitz, "Federal *Habeas Corpus:* Postconviction Remedy for State Prisoners," 108 U. Pa L. Rev. 461 (1960); Wright & Sofaer, "Federal *Habeas Corpus* for State Prisoners: The Allocation of Fact-Finding Responsibility," 75 Yale L. J. 895, 897–906 (1966).

[10] "Developments—" *op. cit.*, 1093–1103.

[11] "If a *habeas* applicant, after consultation with competent counsel or otherwise, understandingly and knowingly forewent the privilege of seeking to vindicate his federal claims in the state courts, whether for strategic, tactical, or any other reasons that can fairly be described as the deliberate bypassing of state procedures, then it is open to the federal court on habeas to deny him all relief if the state courts refused to entertain his federal claims on the merits." *Id.*, 439.

The Court has this Term in two cases limited, without addressing, *Noia*, holding in *Estelle* v. *Williams*, No. 74–676 (May 3, 1976), that the failure of a defendant to object at trial to his being compelled to stand trial in prison garb, and in *Francis* v. *Henderson*, No. 74–5808 (May 3, 1976), that the failure of a defendant to challenge the composition of the grand jury that indicted him before trial in accordance with state rules precluded both defendants from raising the issues on *habeas*.

[12] C. Wright, *Law of Federal Courts* (2d ed. 1970), 209.

[13] Judge Parker's cited cases began with *Moore* v. *Dempsey* and included the major cases of the period before *Brown* v. *Allen*.

[14] Judge Parker construed the new § 2254 considerably more restrictively than the Court proved to do. Compare Parker, *op cit.*, 175–177, with *Brown* v. *Allen*, *supra*, 447.

[15] *Hearings on H.R. 5649* before Subcommittee No. 3 of the House Committee on the Judiciary, 84th Cong., 1st sess. (1955), 89–90.

[16] 102 *Cong. Rec.* 940 (1966); 104 *id.* 4675 (1958). The bill would have permitted the issuance of the writ "only on a ground which presents a substantial Federal constitutional question (1) which was not theretofore raised and determined (2) which there was

no fair and adequate opportunity theretofore to raise and have determined and (3) which cannot thereafter be raised and determined in a proceeding in the State court, by an order or judgment subject to review by the Supreme Court of the United States on writ of certiorari."

[17] *Hearings on S. 895* before the Subcommittee on Constitutional rights of the Senate Judiciary Committee, 92d Cong., 1st sess. (1971), 94–121.

[18] An identical bill had been introduced in the Senate and a similar bill into the House near the end of the prior Congress. S. 3833 and H.R. 13722, 92d Cong., 2d sess. (1972). Senator Hruska introduced S. 567 on January 26, 1973, accompanying it with a lengthy memorandum from Attorney General Kleindienst explaining and justifying the bill that had previously been sent to the House Judiciary Committee. 119 *Cong. Rec.* 2220–2226. See Note, "Proposed Modification of Federal Habeas Corpus for State Prisoners—Reform or Revocation?" 61 Georgetown L. J. 1221 (1973).

[19] E.g., *Lefkowitz* v *Newsome*, 420 U.S. 283 (1975); *Cardwell* v *Lewis*, 417 U.S. 583 (1974); *Cady* v. *Dombrowski*, 413 U.S. 433 (1973); *Adams* v *Williams*, 407 U.S. 143 (1972); *Whitely* v *Warden*, 401 U.S. 560 (1971); *Chambers* v *Maroney*, 399 U.S. 42 (1970); *Harris* v. *Nelson* 394 U.S. 286 (1969); *Mancusi* v. *DeForte*, 392 U.S. 364 (1968); *Carafas* v *Lavallee* 391 U.S. 234 (1968); *Warden* v *Hayden*, 387 U.S. 294 (1967).

[20] *Elkins* overturned the "silver platter" doctrine under which evidence illegally seized by state officials could be turned over to federal officials for use in federal trials even though the evidence would have been inadmissible had federal authorities seized it. At the time, while the Fourth Amendment applied to state searches the exclusionary rule did not govern admissibility of the evidence so obtained into state trials. *Wolf* v. *Colorado*, 338 U S 25 (1949) The deterrent effect of excluding the evidence from federal trial was so attenuated that it is hard to believe it would have furnished a basis for decision even if the Court was at the time concerned with deterring state action. Confirmation of these conclusions may be found in *United States* v. *Janis*, No. 74–958 (July 6, 1976), refusing to bar from federal civil trials evidence unconstitutionally seized by state officers.

[21] It appears on the basis of applicable precedents that both appellate courts were wrong and the federal courts so found. But the requirement is of an opportunity, not that the state courts will correctly decide the claim. Petitioning the Supreme Court for *certiorari* is the only avenue of relief from incorrect decisions.

[22] Attorney General Kleindienst thought there were several other claims that would be precluded by the reliability standard of S. 567, including jury trial denial claims. 119 *Cong. Rec.* 2225 (1973).

[23] If the exclusionary rule is not a substantive constitutional right, the serious question is raised about the Court's power to mandate its observance by state courts. If the rule is not a necessary corollary of a constitutional right but simply a judicially created remedial device, the Court's power should be much more limited than otherwise. See Monaghan, "Forward: Constitutional Common Law," 89 Harv. L. Rev. 1, 3–10 (1975).

Stone v. Powell and the New Federalism: A Challenge to Congress

(By Ronald S. Flagg, member of the class of 1978 at Harvard Law School)

The Supreme Court's recent decision in *Stone* v. *Powell* raises serious questions about the wisdom of the Court's developing view of the federal system and the Court's competence to define the jurisdiction of the federal courts. Mr. Flagg challenges the policies underlying the Court's "new federalism" and calls upon Congress to reassert the federal interest in a broad habeas corpus review of state convictions by the federal courts.

INTRODUCTION

The Supreme Court in recent decisions has shown an increasing solicitude for state interests in cases where federal constitutional claims have been raised.[1] Last term, the Court extended its conception of a "new federalism"[2] into the area of federal habeas corpus when it decided *Stone* v. *Powell*.[3] The decision in *Stone*, as well as in many other cases that have come before the Court, reflects the judgments of the Court as to the proper balance between the jurisdiction of the federal and the state courts. In enunciating this "new federalism" the Court has foreclosed the availability of federal relief for unconstitutional or other unlawful acts by state authorities,[4] and it has usurped the power granted to Congress by the Constitution[5] to define the jurisdiction of the federal courts.[6]

Section I of this Note discusses *Stone* and the policy judgments made by the Court in restricting the availability of federal habeas corpus review. Section II examines other recent cases in which the Court has made similar judgments in restricting access to the federal courts generally in other substantive areas. Section III questions the validity of the judgments underlying the Court's opinion in *Stone* and, by implication, in other recent manifestations of the Court's "new federalism." Finally, Section IV calls upon Congress to assert its authority to define the jurisdiction of the federal courts so as to reverse the questionable judgments of the *Stone* decision.

I. STONE V. POWELL: THE POLICIES UNDERLYING THE "NEW FEDERALISM"

In *Stone*, the petitioner Powell had been convicted of murder in a California state court on the basis of testimony concerning a revolver which had been taken from him incident to his arrest for violation of a local vagrancy ordinance. The state courts, both at trial and on direct appeal, rejected Powell's arguments that the vagrancy ordinance was unconstitutional and that the search was invalid. Powell applied for a writ of federal habeas corpus pursuant to 28 U.S.C. § 2254 on the grounds that he was being held in violation of the Constitution. The District Court denied his plea, but the United States Court of Appeals reversed, holding that the vagrancy ordinance was unconstitutionally vague, that the arrest and search were unlawful, and thus that the evidence should have been excluded at trial.[7] The Supreme Court reversed the Court of Appeals' decision, holding that "a federal court need not apply the exclusionary rule on habeas review of a fourth amendment claim absent a showing that the state prisoner was denied an opportunity for a full and fair litigation of that claim at trial and on direct review."[8]

Although the Court's decision involved consideration of Powell's fourth amendment claim, the result in *Stone* was not required by the Constitution. The Court did not hold that the federal courts lack jurisdiction pursuant to § 2254 over a fourth amendment claim,[9] nor did it conclude that no violation of the fourth amendment had occurred. Neither did the Court rest its decision on construction of the federal habeas statute.[10] Instead, as in previous abstention cases,[11] the Supreme Court based its decision on its own balancing of the relative state and federal interests involved.[12]

In reaching its decision in *Stone*, the Court purported to balance the advantages and disadvantages of application of the exclusionary rule on federal habeas review. The Court found that the extension of the exclusionary rule to the states in *Mapp* v *Ohio*[13] was based "principally on the belief that exclusion would deter future unlawful conduct."[14] However, the Court found that the additional deterrence gained by applying the exclusionary rule on habeas review was small in relation to the costs.[15] The Court cited two specific costs. First, "the focus of the trial, and the attention of the participants therein, is diverted from the ultimate question of guilt or innocence that should be the central concern in a criminal proceeding."[16] Second, "the physical evidence to be excluded is typically reliable and often the most probative information bearing on the guilt or innocence of the defendant."[17]

These considerations, however, apply with equal force to the application of the exclusionary rule at trial in the state courts or on direct review by the Supreme Court, as well as on collateral review by habeas corpus. Yet the Court did not relieve the states of their obligation to apply the exclusionary rule in their criminal proceedings at trial or on appeal, but only withdrew the operation of the rule when federal district courts review those same proceedings upon a petition for habeas corpus.[18] This distinction can logically be based only upon judgments about the relative roles of the state and federal judiciaries in adjudicating the constitutional claims of state criminal defendants.

The primary judgment of the Court was that the state courts, with only direct review by the Supreme Court, protect fourth amendment rights as competently as the federal district courts. The majority opinion reasoned:

> "Despite differences in institutional environment and the unsympathetic attitude to federal constitutional claims of some state judges in years past, we are unwilling to assume that there now exists a general lack of appropriate sensitivity to constitutional rights in the trial and appellate courts of the several States. State courts, like federal courts, have a constitutional obligation to safeguard personal liberties and to uphold federal law. . . . Moreover, the argument that federal judges are more expert in applying federal constitutional law is especially unpersuasive in the context of search-and-seizure claims, since they are dealt with on a daily basis by trial level judges in both systems."[19]

The Court listed four other policies which led it to limit the application of the exclusionary rule in the context of federal habeas corpus review: "(i) the most effective utilization of limited judicial resources, (ii) the necessity of finality in criminal trials, (iii) the minimization of friction between federal and state systems of justice, and (iv) the maintenance of the constitutional balance upon which the doctrine of federalism is founded."[20]

These arguments are unpersuasive in light of the federal interest in ensuring the proper adjudication of federal constitutional claims. The Court in *Stone*, as well as in the cases to be discussed in Section II, has redrawn, on the basis of its own policy judgments, the limits of federal jurisdiction more narrowly than the statutory limits prescribed by Congress. As Section III will suggest, the existing statutory regime has already struck a workable and desirable balance between the federal interest in correct adjudication of constitutional claims and the states' interests that the Court promoted in *Stone*. Even if the Court believed that the federal habeas corpus statute did not strike the proper balance, it should have deferred to Congressional definition of the proper jurisdiction of the federal courts.

II. THE NEW FEDERALISM IN OTHER CONTEXTS

In *Stone* v. *Powell*, the Supreme Court restricted the application of the exclusionary

---

Footnotes at end of article.

rule, not by cutting back on the substance of the rule itself, but by forbidding the federal courts to apply it in cases in which those courts previously had jurisdiction under 28 U.S.C. § 2254.[21] The Court based its decision primarily on considerations of federalism and comity.[22]

In his dissent, Justice Brennan expressed the fear that the decision in *Stone* would be used to restrict further the jurisdiction of the federal courts on habeas corpus review in cases involving claims of unconstitutional detention on other than fourth amendment grounds.[23] His concern regarding the potential extension of the rationale of *Stone* is well founded, especially when one examines the wide range of cases in which the Court has relied on similar policies to restrict the access of constitutional claimants to the federal courts.

Francis v. Henderson [24] exemplifies the use of the same federalism rationale to restrict federal habeas corpus in a nonfourth amendment context. In *Francis* the Court held that a state prisoner who failed to make a timely challenge to the racial composition of a grand jury that indicted him could not, after his conviction, bring that challenge in a federal habeas corpus proceeding under 28 U.S.C. § 2254.

The case involved the indictment of Francis, a 17 year old black youth, by a Louisiana grand jury on a charge of felony murder. Two months after the indictment the court appointed uncompensated counsel for him; however, this counsel, who was in failing health and who had not practiced criminal law for several years, took no action for Francis's defense until the day before trial. He offered no challenge to the racial composition of the grand jury that had indicted Francis, and he never informed him that such a challenge was possible. At trial, Francis was convicted of felony murder and sentenced to life imprisonment; his two older accomplices, through plea bargaining, each received 8-year prison terms.

In its decision denying Francis habeas corpus relief, the Supreme Court acknowledged that, under the statute and following its decision in *Fay v. Noia*,[25] "there can be no question of a federal district court's power to entertain an application for a writ of habeas corpus in a case such as this." [26] However, the Court reasoned that "considerations of comity and federalism" [27] require that the federal courts give effect to the state interest in enforcing its criminal procedure when considering whether to overturn state criminal convictions.[28] In addition to comity and federalism, the Court cited the states' interests in finality of criminal judgments and the Court's reluctance to see federal courts "unduly interfere with the legitimate activities of the States" [29] as further reasons for its decision to prevent the federal courts from exercising the power over Francis' constitutional claim.[30]

This concern with "comity and federalism" has led the Court to restrict access to the federal district courts in other contexts in which those courts had the power to exercise jurisdiction under previous statutory interpretation.[31] One such area is civil rights actions under 28 U.S.C. § 1983, the Civil Rights Act of 1871.[32] In *Younger v. Harris* [33] the Court held that for reasons of equity, comity, and federalism, federal courts should abstain from enjoining under § 1983 a pending state criminal prosecution absent a finding of bad faith or immediate, irreparable harm.[34] The Court expressed a desire for "a proper respect for state functions, a recognition of the fact that the entire country is made up of a Union of separate state governments, and a continuance of the belief that the National Government will fare best if the States and their institutions are left free to perform their separate functions in separate ways." [35]

Recent cases have extended the *Younger* doctrine in many directions. For example, in *Miranda v. Hicks*,[36] the Court held that the principles of *Younger* precluded a federal court from enjoining a state criminal prosecution instituted *subsequent* to the proceeding in the federal court. Also, in *Huffman v. Pursue, Ltd.*,[37] the Court invoked equitable restraint to preclude the enjoining of *civil* proceedings initiated by state prosecution. In these cases, the Court denied federal injunctive relief despite the existence of jurisdiction pursuant to 42 U.S.C. § 1983.

This solicitude for the state's interest in exercising its prosecutorial and judicial functions without federal interference, regardless of the impact on a defendant's constitutional claims, also surfaced in *O'Shea v. Littleton*.[38] There plaintiff's brought a civil rights action under § 1983, alleging that a county magistrate and judge had embarked on a continuing intentional practice of racially discriminatory bond-setting, sentencing, and assessing of jury fees. Despite the evidence of past abuses, the Court held that the named plaintiffs could not show that future offenses would be committed against them specifically and therefore lacked standing to bring suit for injunctive relief.[39] In addition the Court found that, even if plaintiffs could satisfy a standing requirement, injunctive relief against defendants' actions would constitute "a major continuing intrusion of the equitable power of the federal courts into the daily conduct of state criminal proceedings" and would be "in sharp conflict with the principles of equitable restraint." [40]

Similarly, the Court has invoked the principles of comity and federalism to restrict the federal district courts from enjoining allegedly unconstitutional practices of state or local executive officials. In *Rizzo v. Goode* [41] a group of individuals and a coalition of community organizations brought actions against the city of Philadelphia and its mayor, alleging a pervasive pattern of illegal and unconstitutional mistreatment by police officers. Suing under § 1983, the plaintiffs sought equitable relief, including appointment of a receiver to supervise the police department and the establishment of civilian review of police activity. The District Court heard evidence on over forty incidents of alleged police brutality, nineteen of which the Supreme Court later assumed *arguendo* to be violations of constitutional rights.[42] The District Court found that public officials in Philadelphia consistently had refused to act to stop the violations. It directed the Police Department to draft "a comprehensive program for dealing adequately with civilian complaints," including "appropriate revision of police manuals and rules of procedure spelling out in simple language the 'do's and don'ts' of permissible conduct in dealing with civilians . . . [r]evision of procedures for processing complaints against police . . . and prompt notification to the concerned parties informing them of the outcome" of complaint procedures.[43]

As it had in *O'Shea*, the Supreme Court found that the named plaintiffs lacked the requisite standing, as they could not demonstrate that future incidents arising from inadequate police disciplinary procedures would harm them specifically rather than other members of the class.[44] The Court also held that the District Court had erred in imputing liability to superior officials for the unconstitutional conduct of individual patrolmen. The Court's opinion in *Rizzo* concluded with its reason, by now quite familiar, for limiting federal injunctive relief for the abuses of state or local officials:

"Thus the principles of federalism which play such an important part in governing the relationship between federal courts and state governments, though initially expounded and perhaps entitled to their greatest weight in cases where it was sought to enjoin a criminal prosecution in progress, have not been limited either to that situation or indeed to a criminal proceeding itself. We think these principles likewise have applicability where injunctive relief is sought not against the judicial branch of the state government, but against those in charge of an executive branch of an agency of state or local governments such as respondents here." [45]

Thus the same principles of federalism and comity on which the Court relied in *Stone v. Powell* have been used in other cases to justify restrictions on the district courts' acknowledged power. The application of these principles has prevented the district courts from vindicating the constitutional claims of state prisoners and others who allege state infringement of constitutional rights.

III. A CRITIQUE OF THE SUPREME COURT'S "NEW FEDERALISM"

An examination of the policies upon which the Court has constructed this "new federalism" reveals the impropriety of the balance the Court has struck. In addition, it suggests strong arguments calling for congressional reassertion of its constitutional power to reopen the federal courts to those claims which recent Supreme Court decisions have foreclosed.

A. *Federal Trial Court Jurisdiction Is Necessary for Proper Enforcement of Federal Constitutional Rights*

Since the Court in *Stone* left the exclusionary rule intact for purposes of its application in state trials, on direct review by state appellate courts, and by the Supreme Court, the Court's assumption must be that the state judiciary checked only by the Supreme Court's discretionary review will suffice to protect the fourth amendment rights of state prisoners. The Court has predicated its judgment on the belief that there is "no intrinsic reason why the fact that a man is a federal judge should make him more competent, or conscientious, or learned with respect to the [considerations of fourth amendment claims] than his neighbor in the state courthouse." [46] This assertion ignores the difference in the institutional setting and outlooks of the state and federal judiciaries. It also overlooks the inadequacy or unavailability of state remedies in many cases.

State judges, who are either locally elected or appointed and who serve terms of limited durations,[47] are subject to greater political pressure from the local citizenry than are federal judges. The concerns of these local constituents are likely to focus more on the guilt or innocence of a defendant than on the constitutional rights of that individual, and state judges tend unduly to reflect the substantive goals of the state criminal law in their decisions rather than the "goals of the Federal Constitution in protecting individual rights from unlawful government action." [48] Federal judges, who enjoy life tenure, however, operate in an institutional setting more insulated from local pressures and less insulated from review by the federal Courts of Appeal and the Supreme Court than their state counterparts.[49]

This distinction in the institutional pressures on state and federal judges was recognized in the debates of the Constitutional Convention,[50] in the debates over ratification of the Constitution,[51] and in the debate in Congress over the Reconstruction legislation which first broadened federal jurisdiction over state actions.[52] These assumptions concerning the bias and inadequacy of the state courts when presented with constitutional claims are a primary rationale for the existence of the inferior federal courts. In fact, state courts may not be as sympathetic to federal constitutional claims as are the

Footnotes at end of article.

federal courts.[53] Numerous instances of woeful disregard for federal law in state court proceedings can be cited; such disregard can be corrected only by federal habeus corpus actions.[54]

State remedies also may be inadequate or unavailable. In California, for example, where Powell originally was tried in the state courts, fourth amendment claims are not cognizable in the state's habeas corpus proceedings.[55] Even where available, state remedies may be inadequate or unresponsive to constitutional claims.[56]

Direct review of state court decisions by the Supreme Court provides insufficient federal scrutiny of state processes. First, the Supreme Court cannot possibly review all the state criminal convictions in which constitutional claims are raised.[57] Second, direct review by the Supreme Court will deny the defendant in a state criminal trial the benefit of a federal trial court's role in constructing a record and making findings of fact.[58] As an earlier Court emphasized, "[h]ow the facts are found will often dictate the decision of federal claims." [59] If one accepts the institutional arguments that the federal courts are more sympathetic to federal constitutional claims than state courts, then state criminal defendants should have some chance to have the facts in their cases determined in a federal forum.[60]

Finally, the federal district courts provide potentially more uniform treatment of constitutional claims than do the more numerous state courts.[61] Even before the Supreme Court speaks on a particular issue, there is likely to be a developing uniformity among the eleven Courts of Appeal. While divergences between circuits may appear on a given issue, these help to focus issues for the Supreme Court's ultimate determination. "In any event, the process is more likely to afford uniformity than any state interaction if only because there are fewer jurisdictions to reconcile." [62] Thus, contrary to the Court's assertions in *Stone*, proper adjudication of constitutional claims requires the availability of a federal forum free from the institutional constraints of the state trial and appellate courts.

B. Broad Federal habeas corpus jurisdiction is not inconsistent with "effective utilization of judicial resources"

The Court in *Stone* expressed its desire for "the most effective utilization of limited judicial resources." [63] However numerous habeas corpus petitions are,[64] they represent only a small fraction of total civil filings and consume on the average less than 1% of the federal judge's time.[65] Many petitions are disposed of without the need for a hearing; when a hearing is required, it frequently takes less than one day.[66] Moreover, Congress has responded to any overload caused by habeas corpus petitions by enacting the Federal Magistrates Act.[67] The Act provides for the preliminary screening by federal magistrates of applications for posttrial relief and the submission of a report and recommendation to the district judge to facilitate decisionmaking.[68] Congress also has limited wasteful duplication of effort between the state court and the federal district court by limiting the scope of collateral review to constitutional questions,[69] requiring exhaustion of state remedies,[70] and limiting the situations in which the federal court may redetermine controverted facts.[71]

Even supposing that habeas corpus petitions unduly burden the resources of the federal courts, the Supreme Court should not determine which substantive federal rights should be accorded enforcement priority.[72] If a rising caseload threatens to inundate the federal courts. Congress should act to provide additional resources or reexamine enforcement priorities in a systematic fashion.[73] Selective enforcement of constitutional claims by the federal courts is not an appropriate response.

C. The Interest in Finality in Criminal Trials Does Not Require Further Restriction of Federal Habeas Jurisdiction

The Court in *Stone* [74] as well as in *Francis* v. *Henderson* [75] cited the need for finality in criminal trials as a reason for restricting the habeas jurisdiction of the federal courts. While one many concede the need to establish a point beyond which state convictions will be immune from attack, where that point should be is not self-evident. In a federal system premised on the supremacy of federal law, some federal supervision of the state courts in their determination of federal constitutional claims is necessary. As final arbiter of federal constitutional claims, however, the Supreme Court is incapable of reviewing all state criminal convictions in which such claims have been raised. In order to effect some federal review of these claims, a workable division of labor between the Supreme Court and the lower federal courts is necessary. The habeas corpus statute established a regime which recognized the need for some federal supervision of constitutional claims and the Supreme Court's inability to examine all such claims on direct review.[76]

While finality of state court convictions is important, effective enforcement of constitutional guarantees must take precedence. The habeas corpus statute as previously interpreted adequately accommodated the state's interest in finality by establishing a presumption that the state hearings had been adequate and casting the burden of proving deficiencies upon the petitioner,[77] and by restricting federal collateral review to constitutional claims and violations of federal laws.[78] Thus, prior to *Stone* v. *Powell*, the habeas procedures, while recognizing the state interest in finality of criminal convictions, carried out "the manifest federal policy that federal constitutional rights of personal liberty shall not be denied without the fullest opportunity for plenary federal judicial review." [79]

D. Minimizing friction between the Federal and State judicial systems does not require the elimination of Federal habeas corpus review of Federal constitutional claims

The Court in *Stone* relied on the need to minimize friction between federal and state systems of justice.[80] The federal habeas procedures which the Court curtailed in *Stone*, however, were responsive to the need to accommodate both the state and federal interests at issue. Tension was reduced by requiring the prisoner to exhaust his state remedies prior to application for a writ, thus giving the state courts a chance to address the constitutional claim.[81] As noted above, if a federal court did entertain a habeas petition, it limited its review to federal and constitutional questions; [82] and even then the State's fact-finding process was presumed to be correct.[83]

Since the Supreme Court has appellate jurisdiction over all cases arising under the constitution and laws of the United States,[84] it is impossible to eliminate all federal scrutiny of state criminal procedings. Neither is it wise. In a system where federal law is supreme, some friction between the state and federal courts is inevitable.[85]

Moreover, the procedure which the Court created in *Stone v. Powell* holds the potential for increased intrusion by federal courts into the state judicial process. The Court's decision bars consideration of a fourth amendment claim unless the prisoner was not afforded an "opportunity for full and fair litigation" of the claim.[86] Thus the federal judge, rather than focusing in the first instance on the prisoner's fourth amendment claim, appears to be required to determine the adequacy of the state process, and then to deal with the constitutional questions should inadequacies be found. Though the content of the requirement of an "opportunity for full and fair litigation" is yet unclear, it raises the possibility that federal judges, otherwise precluded from granting redress to prisoners convicted on the basis of illegally obtained evidence, will engage in more searching scrutiny of the state judicial process than is common at present—a result likely to heighten, rather than diminish state-federal friction.[87]

IV. THE NEW FEDERALISM—A CHALLENGE FOR CONGRESS

Federalism concerns the proper relationship between the federal and state governments and thus must take into account in the interests of both. The Court, in its recent enunciation of a "new federalism," has been careful to safeguard the State's judicial,[88] executive,[89] and legislative functions.[90] However, the Court has failed to safeguard the interests of the federal government, especially the major federal interest, whether in habeas corpus petitions or civil rights actions—the enforcement of federal constitutional and statutory rights.

The federal interest theoretically can be protected by the states as well as by the federal government. The Court contends that, in fact, the state courts are equally as capable of enforcing federal rights as the federal courts.[91] The purpose of this Note has been to demonstrate, however, that the argument is far less persuasive than the Court asserts.[92] In its reasoning, the Court ignores the differences in institutional setting and outlook of the state and federal courts. It ignores the inadequacy and unavailability of state remedies, as well as the lack of responsiveness of state institutions. Finally, it ignores the basic assumptions that have led to the provision for inferior federal courts in the first instance and subsequently to the various congressional enactments defining the jurisdiction of the federal courts. The questionable assumptions of the Court's recent decisions manifest a fundamental hostility to the rights asserted themselves.[93]

By redrawing the limits of Federal jurisdiction more narrowly than the statutory limits provided by Congress, the Court has defined the extent to which it believes the federal courts should be available to vindicate constitutional and Federal claims. Congress need not accept this judgment of the Court; it has the constitutional power to define the jurisdictions of the federal courts.[94] Until it can be shown with greater certainty that state forums will give sufficient protection to federal rights, Congress should act to maintain the availability of the federal courts for vindication of those rights.

Congress should act to reverse *Stone v. Powell* by providing that any constitutional claim which can be raised on direct review also is cognizable by federal habeas corpus. Congress also should reverse *Francis* and *Davis* [95] by amending 42 U.S.C. §§ 2254 and 2255 to ensure that a habeas petition brought by a state or federal prisoner can be entertained despite procedural default in the trial court unless the prisoner has deliberately bypassed the appropriate procedures. Only the threat of habeas serves as a "necessary . . . incentive for trial and appellate courts throughout the land to conduct their proceedings in a manner consistent with established constitutional standards." [96]

FOOTNOTES

[2] As used herein, the "new federalism" is a shorthand expression for this trend in Supreme Court decisions of increasing solicitude for state interests. The term was used in a similar fashion in Note, *Muncipal Bank-*

ruptcy, The Tenth Amendment and The New Federalism, 89 HARV. L. REV. 1871 (1976).

[3] 96 S. Ct. 3037 (1976).

[4] This pattern of Supreme Court decisions limiting the availability of the federal courts to vindicate federal claims extends well beyond the cases discussed in this Note.

Although the pattern is not uniform, it is clear enough: the Supreme Court is making it harder and harder to get a federal court to vindicate a broad range of federal constitutional and other legal rights. . . .

That there is indeed a pattern, and that it is more than accidental, seems clear from the scope and pervasiveness of the phenomenon. Class actions, standing to sue, federal review of constitutional claims in state criminal and civil proceedings, attorneys' fees, [the power of the federal court to fashion] meaningful remedies—in these and other contexts, the Supreme Court has sharply restricted the federal courts' power to protect basic rights. Instead, protection of these rights has been relegated to the state courts, few of which have shown themselves responsive. Society of American Law Teachers, Supreme Court denial of Citizen Access to Federal Courts to Challenge Unconstitutional or Other Unlawful Acts: The Record of the Burger Court 2–3 (October 1976). *See also Causes of Popular Dissatisfaction with the Administration of Justice: Hearings Before the Subcomm. on Const. Rights of the Senate Comm. on the Judiciary*, 94th Cong., 2d Sess. 64–68 (1976) (statement of Aryeh Neier and Burt Neuborne on behalf of the American Civil Liberties Union).

[5] Congressional power to define the jurisdiction of the federal courts derives from Article III, section 1 of the Constitution which states: "The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish." The Constitutional Convention that met in 1787 wrestled with several plans dealing with the inferior federal courts before it settled on the plan embodied in Article III. During the debates, John Rutledge had urged that the state courts would be sufficient to secure national rights, while James Madison had argued for the mandatory establishment of the inferior federal courts. These two positions were compromised, leaving it to the discretion of Congress to establish inferior federal courts. "And it seems to be a necessary inference from the express decision that the creation of inferior federal courts was to rest in the discretion of Congress, that the scope of their jurisdiction, once created, was also to be discretionary." P. Bator, P. Mishkin, D. Shapiro, & H. Wechsler, Hart & Wechsler's The Federal Courts and The Federal System, 11, 12 (2d ed. 1973) [hereinafter cited as Hart & Wechsler]. *See generally*, Reddish & Woods, *Congressional Power to Control the Jurisdiction of Lower Federal Courts: A Critical Review and a New Synthesis*, 124 U. Pa. L. Rev. 45 (1975).

[6] Justice Brennan, dissenting in *Stone*, argued that the "interest balancing approach" used to justify the majority decision is "nothing less than an obvious usurpation of Congress' Article III power to delineate the jurisdiction of federal courts." 96 S. Ct. at 3061 (Brennan, J., dissenting).

[7] 507 F.2d 93 (9th Cir. 1974). The court of appeals concluded that, although the exclusion of the evidence would serve no deterrent purpose with regard to police officers who were enforcing statutes in good faith, it would deter legislators from enacting unconstitutional statutes in the future. 507 F.2d at 98.

[8] 96 S. Ct. at 3052 n.37.

[9] *Id.*

[10] The Court rejected the argument of the dissent that the decision concerned the scope of the habeas corpus statute and was required as a matter of statutory interpretation. "Our decision today is *not* concerned with the scope of the habeas corpus statute as authority for litigating constitutional claims generally." *Id.*

[11] Younger v. Harris, 401 U.S. 37 (1971); Huffman v. Pursue, Ltd., 420 U.S. 592 (1975); Hicks v. Miranda, 422 U.S. 332 (1975). *See* Maraist, *Federal Intervention in State Criminal Proceedings: Dombrowski, Younger, and Beyond*, 50 Tex. L. Rev. 1324 (1972); Note, *Federal Jurisdiction—The Abstention Doctrine As Amended by Hicks v. Miranda: A Legal Definition and Ominous Omissions*, 54 N.C. L. Rev. 247 (1976). *See* also text accompanying notes 32–37 *infra*.

[12] The Court noted that its decision did not mean that the federal courts lack jurisdiction over fourth amendment claims. 96 S. Ct. at 3052 n. 37. Under 28 U.S.C. § 2254(a), federal jurisdiction is only available when the petitioner is held in state custody "in violation of the Constitution or laws or treaties of the United States." The existence of jurisdiction must then mean that where unconstitutionally-seized evidence has been admitted at trial, a violation of the Constitution has occurred. Thus, it is not the Constitution which requires that fourth amendment claims not be cognizable on habeas corpus review.

However, nothing in the habeas corpus statute indicates that the federal courts have the discretion to reject a category of cases over which they have jurisdiction. Thus, one can only conclude that the Court's decision was founded upon the policy considerations it put forward. *See* text accompanying notes 13–20 *infra*.

For further discussion of why the decision cannot be constitutionally based, *see* the dissent of Justice Brennan, 96 S. Ct. at 3057–61.

[21] "[T]he application of the [exclusionary] rule is limited to cases in which there has been both such a showing [that the state prisoner was denied an opportunity for a full and fair litigation of that claim] *and* a Fourth Amendment violation." 96 S. Ct. at 3052 n.37 (emphasis added).

[22] As used in this Note, "comity" refers to the discretionary deference of the federal courts to the state courts. Comity often appears in the guise of the minimization of federal interference with state processes.

[23] 96 S. Ct. at 3062–63 (Brennan, J., dissenting). Justice Brennan's dissent was joined by Justice Marshall. Justice White filed a separate dissent.

[24] 96 S. Ct. 1708 (1976).

[25] 372 U.S. 391 (1963).

[26] 96 S. Ct. at 1710.

[27] *Id.* at 1711.

[28] The Court referred to its decision in Davis v. United States, 411 U.S. 233 (1973), as presenting an analogous concern for the federal interest in the federal rules of criminal procedure. In *Davis*, the Court held that a federal prisoner who failed to make a timely challenge to the racial composition of the grand jury that indicted him could not later seek collateral relief by federal habeas corpus pursuant to 28 U.S.C. § 2255. The Court based its decision on an interpretation of congressional intent under Rule 12(b)(2) of the Federal Rules of Criminal Procedure and 28 U.S.C. § 2255. Rule 12(b)(2) provides that a challenge to the constitutional validity of a grand jury must be made by motion before the trial. The Court held that Congress in enacting § 2255, which provides relief to federal prisoners held in violation of the Constitution, did not mean to undercut the effect of Rule 12(b)(2) by allowing federal prisoners to mount the same challenge prohibited by 12(b)(2) in a post-trial petition under § 2255. 411 U.S. at 242.

[29] 96 S. Ct. at 1711.

[30] The rationale underlying both *Davis* and *Francis* is that the right to raise federal constitutional claims on habeas corpus should be restricted to deter defendants from violating state and federal rules of criminal procedure. However, as the Court recognized in Fay v. Noia, deterrence is only an effective policy against actions done knowingly or intentionally. Prisoners who because of inexperience, poor counsel, or other reasons are unaware of their rights will not be deterred by the Court's new standard, but instead will be trapped in a needlessly "airtight system of forfeitures." 372 U.S. at 432.

[31] *See* Note, *Municipal Bankruptcy, The Tenth Amendment and The New Federalism*, 89 Harv. L. Rev. 1871, 1874–1875 (1976).

[32] 42 U.S.C. § 1983, originally part of the Civil Rights Act of 1871, today reads: "Every person who, under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress."

For historical background on § 1983, *see* Monroe v. Pape, 365 U.S. 167 (1961). *See generally* McCormack, *Federalism and Section 1983: Limitations on Judicial Enforcement of Constitutional Protections, Part I*, 60 U. Va. L. Rev. 1 (1974).

[33] 401 U.S. 37 (1971).

[50] During the debate over the establishment of the inferior federal courts, James Madison noted that an appeal from the state courts

to the Supreme Court may not, in many cases, be a remedy. "What was to be done after improper Verdicts in State tribunals obtained under the biased directions of a dependent Judge, or the local prejudices of an unairected jury?" Hart & Wechsler, *supra* note 5 at 11.

[54] Alexander Hamilton, discussing in *The Federalist* why the adjudication of federal questions should not be left to the states, wrote:

The most discerning cannot foresee how far the prevalency of a local spirit may be found to disqualify the local tribunals for the jurisdiction of national causes; whilst every man may discover that courts constituted like those of some of the states would be improper channels of the judicial authority of the Union. State judges, holding their offices during pleasure, or from year to year, will be too little independent to be relied upon for an inflexible execution of the national laws. The Federalist No. 81, at 510 (B. Wright ed. 1961) (A. Hamilton).

[52] During debate over the Civil Rights Act of 1871, Representative Coburn stated: The United States courts are further above mere local influence than the county courts; their judges can act with more independence, cannot be put under terror as local judges can; their sympathies are not so nearly identified with those of the vicinage: the jurors are taken from the State, and not the neighborhood: they will be able to rise above prejudices or bad passions or terror more easily. Cong. Globe, 42d Cong., 1st Sess. 460 (1871). *See also id.* at 653 (comments of Senator Osborn); Monroe v. Pape, 365 U.S. 167, 172–85 (1961).

[53] "[I]t is difficult to avoid concluding that federal courts are more likely to apply federal law sympathetically and understandingly than are state courts." ALI, Study of the Division of Jurisdiction Between State and Federal Courts 166 (1969). *See also Developments in the Law—Federal Habeas Corpus*, 83 Harv. L. Rev. 1038, 1060–63 (1970); Amsterdam, *Criminal Prosecutions Affecting Federally Guaranteed Civil Rights: Federal Removal and Habeas Corpus Jurisdiction to Abort State Court Trial*, 113 U. Pa. L. Rev. 793, 800–03 (1965); McCormick, *Federalism and Section 1983: Limitations on Judicial Enforcement of Constitutional Claims, Part II*, 60 U. Va. L. Rev. 250, 263–64 (1974); Chevigny, *Section 1983 Jurisdiction: A Reply*, 83 Harv. L. Rev. 1352, 1357–59 (1970); Mishkin, *The Federal "Question" in the District Courts*, 53 Colum. L. Rev. 157, 158 (1953).

[54] An amicus brief submitted to the Supreme Court by the American Civil Liberties Union in *Stone* v. *Powell* cited numerous cases in which fourth amendment claims were presented to state courts and rejected even though the applicable precedents made clear that the fourth amendment had been violated. Amicus Brief by American Civil Liberties Union at 18–21, Stone v. Powell, 96 S. Ct. 3037 (1976). Among the state cases which were reversed on fourth amendment grounds on federal habeas review in 1975 were Patterson v. Lockhard, 513 F. 2d 579 (8th Cir. 1975); Moffet v. Wainwright, 512 F. 2d 496 (5th Cir. 1975); United States *ex rel.* Coleman v. Smith, 395 F. Supp. 115 (W.D.N.Y. 1975); O'Berry v. Wainwright, 394 F. Supp. 591 (S.D. Fla. 1975); Frankboner v. Robinson, 391 F. Supp. 542 (W.D. Va. 1975).

[55] *In re* Wright, 65 Cal. 2d 652, 422 F. 2d 998, 56 Cal. Rptr. 110 (1967). *See also* Reitz, *Federal Habeas Corpus: Post-conviction Remedy for State Prisoners*, 108 U. Pa. L. Rev. 461, 465 (1960) ("The narrow common-law writ of habeas corpus which the states incorporated into their jurisprudence is totally incapable of encompassing the modern issues of due process and equal protection.").

[56] Inadequate state processes are not restricted to the settling of habeas corpus. In Rizzo v. Goode, 423 U.S. 362 (1976), the Supreme Court prevented the district court from providing injunctive relief, saying that the "federal courts must be constantly mindful of the 'special delicacy of the adjustment to be preserved between federal equitable power and state administration of its own law'." *Id.* at 378 (citations omitted).

Yet in its concern for the administration of state law, the Court left unremedied the state's failure to enforce federal constitutional rights. The district judge previously had found that the state remedies (such as Police Department complaint procedures, redress through the Commission on Human Relations or the Police Advisory Board of Philadelphia, criminal prosecution by the Philadelphia District Attorney, and private civil actions against the police) for the unconstitutional police activities at issue were inadequate or no longer in existence. COPPAR v. Tate, 357 F. Supp. 1289, 1292–94, 1319 (E.D. Pa. 1973).

In contrast, no one has ever denied the efficacy of the district court's remedy "or the fact that it effectuated a betterment in the system." 423 U.S. at 381 (Blackmun, J., dissenting). The federal courts have proven adept at meeting the problems posed by the changing nature of litigation from the traditional model of disputes between private parties over private rights to the conception of litigation as a method of carrying out public policy through vindication of constitutional and statutory rights. This facility of the federal courts is attributable partly to the liberal pleading, joinder, and class action provisions of the Federal Rules of Civil Procedure, and the flexibility of response to the problems accompanying such suits, with their concomitant size and complexity, by such means as the appointment of magistrates and masters. *See* Chayes, *The Role of the Judge in Public Law Litigation*, 89 HARV. L. REV. 1281 (1976).

[57] *See* Reitz, *Federal Habeas Corpus: Post-conviction Remedy for State Prisoners*, 108 U. Pa. L. Rev. 461, 464 (1960).

[58] *See* 28 U.S.C. § 2254(d) (1970).

[59] England v. Louisiana State Bd. of Medical Examiners, 375 U.S. 411, 416 (1964). *See also* Townsend v. Sain, 372 U.S. 293, 312 (1963).

[60] As Professor Amsterdam described the situation:

These defendants (in civil rights cases) depend on the federal constitution. . . . Its guarantees turn on questions of fact. The defendants are tried in state courts and the facts are found against them. It was known that the facts would be found against them, and they are. If this was an end of factfinding, the Constitution would be worthless. Amsterdam, *supra* note 53, at 840.

[61] *See Developments in the Law, supra* note 53, at 1061. This same argument applies to the consideration of the availability of federal court review of constitutional claims arising under § 1983. *See* Chevigny, *supra* note 53, at 1357–58.

[62] Chevigny, *supra* note 53, at 1358.

[63] 96 S. Ct. at 3050 n. 31.

[64] After an increase in the number of habeas petitions in the 1960's, the number of petitions has dropped markedly in the last few years. The number of habeas corpus petitions from state prisoners increased from 1,020 in fiscal 1961 to 9,063 in fiscal 1970. Administrative Office of the U.S. Courts, Annual Report of the Director 135, table 17 (1971). Between 1971 and 1974 the number of habeas corpus petitions has declined from 8,372 to 7,626. In 1974, habeas corpus petitions from state prisoners represented less than 8% of the total civil filings in the United States district courts. Administrative Office of the U.S. Courts, Annual Report of the Director. 221–22. tables 49–50 (1974).

[65] Habeas corpus petitions from state prisoners constitute 8% of civil filings but require less than 1% of the average judge's time. Note, *Proposed Modification of Federal Habeas Corpus for State Prisoners—Reform or Revocation*, 61 Geo. L. J. 1221, 1246 (1973). *See also* Shapiro, *Federal Habeas Corpus: A Study in Massachusetts*, 87 Harv. L. Rev. 321, 367–72 (1973).

[66] Yet it is all too easy to overstate the strain that an expanded habeas jurisdiction and expanded federal constitutional rights put on the judicial system. Most of the petitions were quickly dismissed: less than 500 reached the hearing state, and most of those hearings lasted less than one day. Nor was the burden on the states staggering: many petitions do not even require a response; less than ten percent of the state convictions attacked had to be defended in a hearing, and so few prisoners were released that the burden of retrial must be small. *Developments in the Law, supra* note 53, at 1041 (footnotes omitted).

[67] 28 U.S.C. § 636 (Supp. IV 1974).

[68] 28 U.S.C. § 636(b)(3) (Supp. IV 1974). The performance of the magistrate's function was explicitly intended "to afford some degree of relief to district judges and their law clerks, who are presently burdened with burgeoning numbers of habeas corpus petitions and applications under 28 U.S.C. 2255." S. Rep. No. 371, 90th Cong., 1st Sess. 26 (1967).

[69] 28 U.S.C. § 2254(a) (1970).

[70] *Id.* § 2254(b).

[71] *Id.* § 2254(d).

[72] Evaluating the relationship between Congress and the Supreme Court on habeas corpus, Justice Frankfurter wrote:

Congress could have left the enforcement of federal constitutional rights governing the administration of criminal justice in the States exclusively to the State courts. These tribunals are under the same duty as the federal courts to respect rights under the United States Constitution. . . . It is not for us to determine whether this power should have been vested in the federal courts. . . . [*The wisdom of such a modification in the law is for Congress to consider*, particularly in view of the effect of the expanding concept of due process upon enforcement by the States of their criminal laws. *It is for this Court to give fair effect to the habeas corpus jurisdiction as enacted by Congress. By giving the federal courts that jurisdiction, Congress has imbedded into federal legislation the historic function* of *habeas corpus adopted to reaching an enlarged area of claims.* . . .

Congress has the power to distribute among the courts of the States and of the United States jurisdiction to determine federal claims. It has seen fit to give this Court power to review errors of federal law in State determinations, and in addition to give to the lower federal courts power to inquire into federal claims, by way of habeas corpus . . . But it would be in disregard of what Congress has expressly required to deny State prisoners access to the federal courts. Brown v. Allen, 344 U.S. 443, 499–500, 508–10 (1953) (concurring opinion) (emphasis added).

[73] Senator Nelson (D. Wis.) commented during the last congressional term: In my view, the assertion of constitutional rights—and the existence of a federal forum to review those claims—is vitally important for the society, as well as for the petitioner. Our willingness to use scarce judicial resources in this way reflects again the high priority this society places on constitutional liberties and individual freedom. If this society no longer values the constitutional rights to the same degree, that judgment should be reflected by the representatives of the people—Congress—through a decision to restrict the habeas jurisdiction of the federal courts. Congress is also the only body which can address the rising caseload in the federal courts in a sys-

tematic way and make some basic judgments about how scarce judicial resources should be allocated. 121 Cong. Rec. 34695 (Oct. 1, 1976). Oct. 1, 1976).

[84] U.S. CONST. art. III.

[85] Professor Freund has commented that friction between the federal and state courts "is largely a matter of psychology which is self-determining and self-correcting. It seems to me if this is seen as really a problem of internal federal judicial **adm**inistration, there is no reason why state judges should feel offended that review is had by a district judge rather than by Supreme Court justices. If it would help any, one might think of the federal district judges sittting as delegates or masters for the Supreme Court." Freund, *Symposium: Habeas Corpus —Proposal for Reform*, 9 UTAH L. REV. 18, 30 (1964). *See also* Brown v. Allen, 344 U.S. 443, 510 (1953) (Frankfurter, J., concurring).

[94] *See* note 5 *supra*.

Congress demonstrated its concern with the continued availability of federal post-conviction remedies late in 1976. In April the Supreme Court had promulgated rules of practice and procedure for post-conviction relief under 28 U.S.C. §§ 2254, 2255. Following objections to the proposed rule by several Congressmen, eight amendments were passed which made it easier for habeas petitioners to get a federal hearing than would have been the case under the Court's proposed rules. Act of Sept. 28, 1976, Pub. L. No. 94–426, 90 Stat. 1334 (1976).

[96] Disist v. United States, 394, U.S. 244, 262–63 (1969) (Harlan, J., dissenting).

By Mr. DECONCINI (for himself, Mr. ALLEN, Mr. BAYH, and Mr. KENNEDY):

S. 1315. A bill to amend title 28, United States Code, to provide more effectively for bilingual proceedings in all district courts of the United States, and for other purposes; to the Committee on the Judiciary.

BILINGUAL COURTS ACT

Mr. DECONCINI. Mr. President, on behalf of myself and Senators KENNEDY, BAYH, and ALLEN, I am pleased to today reintroduce the Bilingual Courts Act, which the Senate has passed in the two preceding Congresses on September 30, 1974 and July 14, 1975. This legislation will guarantee to every American who is not fluent in the English language the services of a competent interpreter in any criminal or civil proceeding in a Federal court. Our citizens of Spanish, Puerto Rican, Chinese, native American and other heritages who do not adequately understand English as well as our deaf citizens who must communicate by sign language are in effect denied real justice under the law without this guarantee.

The Bilingual Courts Act establishes this guarantee in its two major provisions. The first part of the bill sets standards, based on constitutional guarantees already enumerated by the courts, for use of interpreters in the Federal courts. In any criminal or civil case, when the judge determines that a defendant, a party or witness cannot understand English sufficiently well to comprehend the testimony, the judge shall order a translation of all proceedings for that person. In a criminal case, an oral simultaneous translation is required. In civil cases, where circumstances warrant, the judge has discretion to order consecutive or summary translation rather than simultaneous. At the judge's discretion, an electronic recording of the proceedings may be kept to verify the translation for the record. When an interpreter is required, the judge shall obtain the services of a local or nearby certified interpreter from a list kept by the district courts, or if none is available, another competent interpreter.

The second part of the act assigns to the administrative office of the courts the responsibility for implementation of the new interpreter rules. The office will identify competent interpreters for lists kept by the district courts, hire full or part-time interpreters for use in districts with high need, purchase necessary equipment, set fee schedules for interpreter services, and carry out other necessary functions. The act will result in the upgrading of the quality and quantity of interpreters in the Federal courts.

In the 93d Congress the Subcommittee on Improvements in Judicial Machinery conducted 2 days of hearings and received testimony in favor of the Bilingual Courts Act from civic leaders, lawyers, judges, persons involved in the administration of justice and from representatives of the administration. J. Stanley Pottinger, Assistant Attorney General for the Civil Rights Division of the Department of Justice, testified that:

The bilingual courts bill represents recognition that a person's ability to comprehend the language of the court is an indispensable element of equality and efficiency in the courts. The Justice Department endorses this legislation.

The Bilingual Courts Act is necessitated not only by a sense of fundamental fairness in our judicial system, but by the Constitution itself. It is mandated by the sixth amendment guarantees of the right to effective counsel and the right of confrontation. Only through the aid of simultaneous translation will the party be able to communicate with his attorney to enable that attorney to effectively cross-examine those English-speaking witnesses, to test their credibility, their memory, and their accuracy of observation in the light of the defendant's version of the facts. Though case law on the subject is sparse, the U.S. Second Circuit Court of Appeals has held, in *U.S. ex rel Negron v. New York*, 434 F.2d 386 (2d Cir. 1970), that it is constitutionally required that a non-English speaking defendant be provided with a simultaneous translation of all courtroom proceedings.

The fifth amendment, providing that "no person * * * shall be deprived of life, liberty or property without due process of law", supports my belief that the Bilingual Courts Act should apply to both criminal and civil proceedings. Surely any legal proceeding that allows a party to an action to be deprived of life, liberty or property without first insuring that he fully understands what is happening at the trial lacks in basic and fundamental fairness and thus violates the due process clause.

The proposals contained in this legislation are certainly not novel. Article 2(a) of the Canadian Bill of Rights, adopted in 1960, guarantees every person the right to the assistance of an interpreter in any proceeding in which he is involved if he does not understand or speak the language in which the case is being heard. In addition, the Constitution of the State of New Mexico explicitly provides that in all criminal proceedings the defendant is entitled "to have the charge and testimony interpreted to him in a language that he understands".

Fundamental fairness, the integrity of the fact-finding process, the potency of our adversary system of justice and the Constitution demand the enactment of the Bilingual Courts Act.

Mr. President, the need is clear. The Senate has twice passed this legislation and I am confident that it will do so again in the very near future. I would hope that this year the House would see its way clear to hold hearings and then favorably act on this vitally important legislation.

I ask unanimous consent, Mr. President, to have the text of the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1315

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "Bilingual Courts Act".

CONDUCT OF BILINGUAL PROCEEDINGS

SEC. 2. (a) Chapter 119 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1827. Bilingual proceedings

"(a)(1) In any criminal action, whenever the judge determines, on his own motion or on the motion of a party to the proceedings, that (A) the defendant does not speak and understand the English language with a facility sufficient for him to comprehend either the proceedings or the testimony, or (B) in the course of such proceedings, testimony may be presented by any person who does not so speak and understand the English

language, the court, in all further proceedings in that action, including arraignment, hearings, and trial, shall order an oral simultaneous translation of the proceedings, or an oral simultaneous translation of that testimony, to be furnished by an interpreter in accordance with the provisions of subsection (b) of this section.

"(2) In any civil action, whenever the judge determines on his own motion or on the motion of a party to the proceedings, that (A) a party does not speak and understand the English language with a facility sufficient for him to comprehend either the proceedings or the testimony, or (B) in the course of such proceedings, testimony may be presented by any person who does not so speak and understand the English language, in all further proceedings in that action, including hearings and trial, the court shall order an oral translation of the proceedings to be made by an interpreter in accordance with the provisions of subsection (b) of this section. The judge shall also determine, in the interests of justice, whether the translation shall be simultaneous, consecutive, or summary in nature, except that if a party requests a simultaneous translation, the court shall give the request special consideration.

"(3) In any criminal or civil action, the judge, on his own motion or on the motion of a party to the proceedings, may order all or part of the non-English testimony and the translation thereof to be electronically recorded for use in verification of the official transcript of the proceedings.

"(4) The defendant in any criminal action, or a party in any civil action, who is entitled to a translation required under this section, may waive the translation in whole or in part. The waiver must be expressly made by the defendant or party upon the record and approved by his attorney and by the judge. An interpreter shall be used to explain the nature and effect of the waiver to the non-English speaking defendant or party.

"(5) The term 'judge' as used in this section shall include a United States magistrate and a referee in bankruptcy.

"(b)(1) The district court in each judicial district shall maintain on file in the office of the clerk of the court a list of all persons in that district who have been certified as interpreters by the Director of the Administrative Office of the United States Courts under section 604(a)(12) of this title.

"(2) In any action where the services of an interpreter are required to be utilized under this section, the court shall obtain the services of a certified interpreter from within the judicial district, except that, where there are no certified interpreters in the judicial district, the court, with the assistance of the Administrative Office of the United States Courts, shall determine the availability of and utilize the services of certified interpreters from nearby districts. Where no certified interpreter is available from a nearby district, the court shall obtain the services of an otherwise competent interpreter".

(b) The analysis of chapter 119, of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1827. Bilingual proceedings.".

FACILITIES AND PERSONNEL FOR BILINGUAL PROCEEDINGS

SEC. 3. Section 604(a) of title 28, United States Code, is amended—

(1) by redesignating paragraph (12) as paragraph (13); and

(2) by inserting immediately below paragraph (11) the following new paragraph:

"(12) Under section 1827 of this title, (A) prescribe, determine, and certify the qualifications of persons who may serve as certified interpreters in bilingual proceedings, and in so doing shall consider the education, training, and experience of those persons; (B) maintain an updated master list of all interpreters certified by him, and report annually on the frequency of requests for, and the use and effectiveness of interpreters in bilingual proceedings pursuant to the provisions of this Act; (C) provide, or make readily available to each district court, appropriate equipment and facilities for the translation of non-English languages; (D) prescribe, from time to time, a schedule of reasonable fees for services rendered by such interpreters and, in those districts where the Director considers it advisable based on the need for interpreters, authorize the employment by the court of certified full-time or part-time interpreters; and (E) pay out of moneys appropriated to the judiciary for the conduct of bilingual proceedings the amount of interpreter's fees or costs of recording which may accrue in a particular proceeding, unless the court, in its discretion, directs that all or part of those fees or costs incurred in a civil proceeding in which an interpreter is utilized pursuant to section 1827(a)(2) of this title be apportioned between the parties or allowed as costs in the action;".

APPROPRIATIONS

SEC. 4. There are hereby authorized to be appropriated to the Federal judiciary such sums as may be necessary to carry out the amendments made by this Act.

EFFECTIVE DATE

SEC. 5. The amendment made by this Act shall take effect on the date which is six months after the date of enactment of this Act.

By Mr. CULVER:

S. 1316. A bill to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973; to the Committee on Environment and Public Works.

Mr. CULVER. Mr. President, today I am taking this opportunity to introduce legislation authorizing continued Federal assistance under section 6(i) of the 1973 Endangered Species Act for State programs protecting endangered or threatened species of fish, wildlife, and plants.

When Congress enacted this important act in 1973, it was apparent that the participation of the States would be essential to the success of our national efforts to preserve fish and wildlife from extinction. Accordingly, section 6(i) of the Endangered Species Act provides funding for cooperative Federal-State agreements that maintain active programs for the conservation of threatened or endangered species. To assist States with the development of appropriate programs, $10 million was authorized under this provision through fiscal year 1977 for allocation by the Departments of the Interior and of Commerce. The Federal share of the costs of these intergovernmental projects may be as high as 75 percent.

To date, 17 States have signed cooperative agreements with the Interior Department under this section of the law and are therefore eligible for Federal assistance. The Department has helped these States to develop and implement recovery programs for over 30 endangered species, including the bald eagle, the California condor, and the American peregrine falcon. It is anticipated that another 13 States will soon participate in this arrangement.

Mr. President, I believe this cooperative effort is vitally important and provides the necessary assistance that many States have needed to enhance their fish and wildlife protection projects. Funding for section 6(i) of the Endangered Species Act expires at the end of this fiscal year, and the legislation which I am introducing would reauthorize financial aid for these State activities under section 6(i) through fiscal year 1980. A total of $3 million would be authorized for each fiscal year.

The Senate Subcommittee on Resource Protection will conduct a hearing on this bill on April 21, 1977, and I am confident we will be able to give this important measure our full and expeditious consideration.

Mr. President, I know that several Senators are concerned about various developments regarding the implementation of the Endangered Species Act. As chairman of the Resource Protection Subcommittee, I hope my colleagues will refrain from using legislation reauthorizing section 6(i) as a vehicle for addressing their particular concerns about other aspects of the act. I believe these broader issues should be examined closely, and the subcommittee will hold comprehensive oversight hearings on the implementation of the endangered species program later this summer.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1316

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6(1) of the Endangered Species Act of 1973 (16 U.S.C. 1535(1)) is amended to read as follows:

"(1) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $3,000,000 for each of the fiscal years ending September 30, 1978; September 30, 1979 and September 30, 1980.".

By Mr. MATSUNAGA:

S. 1318. A bill to permit the State of Hawaii to use the proceeds from the sale, lease, or other disposition of certain real property for any public purpose; to the Committee on Armed Services.

SAND ISLAND

Mr. MATSUNAGA. Mr. President, today I am introducing proposed legislation, identical to H.R. 12003 and H.R. 1895, my bills of the 93d and 94th Congresses, respectively, which seeks to correct an oversight in the law that currently prevents the State of Hawaii from developing 202 acres of prime State-owned land on Sand Island for much-needed industrial purposes.

One of Hawaii's most pressing problems is the shortage of industrial land on Oahu, the State's most populous island. An ideal location for the expansion of industrial activity within the city of Honolulu is Sand Island, which forms the protective seaward perimeter of Honolulu Harbor. Because of its proximity to

the State's business and industrial centers, Sand Island, and particularly the above-mentioned real property which my bill addresses, is greatly needed for the continued development of the State's transportation and commerce. Anticipated uses of the land include improved maritime facilities, bulk fuel storage for Honolulu International Airport, one of the world's busiest, and expansion of Hawaii's most successful foreign trade zone.

However, an oversight in the applicable statutes currently prevents the State from utilizing revenues from the lease or sale of the above-mentioned 202 acres for purposes other than the support of the University of Hawaii. The land, formerly part of the Sand Island Military Reservation, was transferred to the then-Territory of Hawaii by Executive Order No. 10837 in August 1959, with the above stipulation regarding the University of Hawaii. That condition was set forth in Public Law 85–756, signed by President Eisenhower on August 25, 1958, which authorized the President to convey the 202 acres to the Territory of Hawaii by executive order, an action which he carried out a year later.

Since the passage of the legislation and the subsequent executive order, Hawaii has become a State, and the University of Hawaii is now funded directly from the State's general fund. However, the restriction on the use of the 202 acres at Sand Island has not been lifted, an action which requires amendatory legislation.

Through the passage of my bill, Congress would eliminate this outdated restriction on the use of the revenues received from the land, and would give Hawaii the flexibility to use the 202 acres on Sand Island for any public purpose. I emphasize that passage of the legislation would not be to the detriment of the University of Hawaii, the funding of which is now provided directly by the State.

Previous replies from the Department of Defense and the Department of the Interior to requests for executive comments on my previous bills have specified no objections to the passage of this legislation, and I have no reason to believe that the situation has been altered since then. Accordingly, I respectfully request that the appropriate committee or committees and the full Senate undertake the expeditious passage of this corrective and necessary legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1318

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 4(a) of the Act entitled "An Act to provide for the transfer of title to certain land at Sand Island, Territory of Hawaii, to the Territory of Hawaii, and for other purposes", approved August 25, 1958, the State of Hawaii may use for any public purpose the revenue or proceeds from the sale, lease, or other disposition of the lands held by it under a transfer made by Executive Order Numbered 10833 under such Act on August 25, 1959.

By Mr. MATSUNAGA:

S. 1319. A bill for the relief of certain natives of the Philippines who served in the U.S. Armed Forces during World War II; to the Committee on the Judiciary.

CITIZENSHIP FOR FILIPINO VETERANS OF WORLD WAR II

Mr. MATSUNAGA. Mr. President, I am introducing today legislation which would grant immediate U.S. citizenship to certain Filipino veterans who fought with the U.S. Armed Forces in World War II.

Immediately following the attacks on Pearl Harbor and Manila by the Japanese Imperial Air Force in December 1941, many natives of the Philippines volunteered for service in the U.S. armed services. They fought with great valor and courage and their enlistment was welcomed by the Government of the United States. Indeed, the U.S. Government made strenuous efforts to recruit Filipinos for service in our Armed Forces.

As an inducement to enlistment, many recruiters assured the Filipinos that they would be eligible for citizenship if they served honorably in the Armed Forces during World War II. In 1942, the Second War Powers Act was signed into law. Among other things, the act waived some of the normal naturalization requirements for aliens who, like the Filipinos, fought with the U.S. forces overseas.

Many Filipino veterans did become American citizens before the Second War Powers Act expired in 1946. Regrettably, however, others were denied citizenship either because they were unaware of the provisions of the Second War Powers Act or because they were discouraged by officials of the U.S. Immigration and Naturalization Service who, allegedly, stopped processing citizenship applications before the Second War Powers Act expired in 1946. In recent years, a number of these veterans have entered the United States on temporary visas and they are seeking U.S. citizenship on the basis of their honorable military service during World War II. Sixty-eight of them, facing deportation, filed suit in the U.S. district court in San Francisco to block the deportation order. Ruling in their favor, Judge Charles B. Renfrew said:

> The court cannot ignore the heroic sacrifices made by these and other Filipinos during World War II. Their courage and valor at Corregidor, during the Bataan Death March, and throughout the Japanese occupation of the Philippine Islands, stand as the finest examples of the dedication of free men opposing and resisting tyranny."

An appeal, filed by the U.S. Department of Justice, is still pending in the Ninth U.S. Court of Appeals.

The Filipino veterans were somewhat disconcerted by the Ford administration's willingness to appeal the decision, and to pursue deportation. After all, as one of them pointed out, the United States had recently admitted more than 150,000 Vietnamese refugees and was then reviewing, on a case by case basis, the cases of American draft evaders and deserters. It is their hope that President Carter will be more sympathetic to the pleas of veterans who "fought for freedom and the American flag."

My bill is consistent with the district court decision in that it would allow Filipino veterans who are already in this country on visitor visas to have their status adjusted to that of permanent resident. In addition, the bill would waive the residency requirements of the Immigration and Nationality Act and allow those veterans and other Filipino veterans who served for at least 3 years in the U.S. Armed Forces during World War II, and were honorably discharged, to become U.S. citizens immediately if they are otherwise qualified for citizenship. Finally, the bill would grant immediate U.S. citizenship to the spouses and dependent children of such veterans.

I strongly believe that enactment of my bill would correct a grave injustice done to Filipino veterans at the end of World War II, and I urge that the measure be given early favorable consideration.

By Mr. STONE:

S. 1320. A bill to amend the Federal Election Campaign Act of 1971 with respect to the filing of reports with State officers; to the Committee on Rules and Administration.

Mr. STONE. Mr. President, today I am reintroducing a bill similar to one that I introduced last year (S. 3780), to amend section 316 (2 U.S.C. 439) of the Federal Election Campaign Act of 1971, which places certain responsibilities with regard to the public availability of Federal campaign finance reports, on the State secretaries of state. This section provides:

> (a) "Appropriate State" defined. A copy of each statement required to be filed with the Commission by this chapter shall be filed with the Secretary of State (or, if there is no office of Secretary of State, the equivalent State officer) of the appropriate State. For purposes of this subsection, the term "appropriate State" means—
>
> (1) for reports relating to expenditures and contributions in connection with the campaign for nomination for election, or election, of a candidate to the office of President or Vice President of the United States, each State in which an expenditure is made by him or on his behalf, and
>
> (2) for reports relating to expenditures and contributions in connection with the campaign for nomination for election, or election, of a candidate to the office of Senator or Representative in, or Delegate or Resident Commission to, the Congress of the United States, the State in which he seeks election.
>
> (b) Duties of State Officers. It shall be the duty of the Secretary of State, or the equivalent State officer, under subsection (a) of this section—
>
> (1) to receive and maintain in an orderly manner all reports and statements required by this chapter to be filed with him;
>
> (2) to preserve such reports and statements for a period of 10 years from date of receipt, except that reports and statements relating solely to candidates for the House of Representatives shall be preserved for only 5 years from the date of receipt;
>
> (3) to make the reports and statements filed with him available for public inspection and copying during regular office hours, commencing as soon as practicable but not later than the end of the day during which it was received, and to permit copying of any such report or statement by hand or by duplicating machine, requested by any person, at the expense of such person; and
>
> (4) to compile and maintain a current list

of all statements or parts of statements pertaining to each candidate.

As a former secretary of state of Florida, I am very aware of the problems that State officials have encountered with the State filing requirements. A number of these difficulties surfaced as long as 4 years ago when Francis Valeo, then Secretary of the Senate, wrote to 34 secretaries of state, pursuant to his authority as supervisory officer of Senate elections. The purpose of his letter was to determine the degree of compliance and the extent of the problems that State officials had encountered in administering the act. Seventeen States responded and the replies were printed in "Federal Campaign Disclosure at the State Level With Respect to Elections for the U.S. Senate in 1972."

Two problems that were mentioned frequently were the long period of time that the States were required to preserve the reports—10 years, in most cases—which was creating storage problems, and the expense involved in complying with the section.

Mr. Valeo testified about these difficulties before the Subcommittee on Privileges and Elections of the Senate Rules Committee in 1973, during hearings which the subcommittee held on proposed amendments to the Federal Election Campaign Act. While extensive amendments were made to the act, Federal Election Campaign Act Amendments of 1974, the section relating to the filing of reports with Secretaries of State remains essentially unchanged.

In October 1975, I wrote to all State secretaries of state asking their comments on section 316, with particular emphasis on the report preservation requirement. Thirty-seven States responded. Of these, 33 States expressed the desire to see the report preservation time shortened. Other problems which were mentioned were the need for Federal assistance, and the irrelevance to any one State of much of the documents filed in the States by multicandidate committees.

Shortly after I wrote to State officials, the Federal Election Commission sent a detailed questionnaire to each secretary of state or equivalent State official. As of March 2, 1976, 47 States and the District of Columbia had responded. The results of this survey support the conclusions which I have drawn from my own informal survey and they form the basis for the legislation that I am introducing today.

The first subsection of my bill allows the States more flexibility in determining where the Federal election campaign reports are filed. The FEC survey revealed that 14 of the 47 jurisdictions have one office receiving Federal election reports and another receiving State reports. The comments that I received from State officials indicate that many would like to be able to keep all of their campaign reports—Federal and State—in the office that they had established to receive State reports. However, the way the law is worded, Federal reports must be filed in the office of secretary of state or if there is no secretary of state, with the equivalent State official. This wording has created problems for a number of States which have a secretary of state but which would like to be able to send the Federal reports to the separate board or commission that they set up to handle State reports. In their survey report the FEC recommended that the States be given the discretion of selecting the location of the State office where these reports should be filed and maintained. My bill would allow the Governor of each State to designate the proper office in which to file Federal campaign reports. I note that the 1976 annual report of the FEC recommends this procedure. It is not the intention of the bill to take away from any State secretary of state the duties under the Federal law if that office is the proper one to perform these functions. However, in those States, such as Kentucky, in which the secretary of state's office would be duplicating a job already performed for State reports by a separate State commission, the Governor could designate the commission as the office in which the Federal reports are to be filed. This makes sense administratively, and it also would make public review easier as all election campaign reports would be available at the same location.

The problem of storing all of the Federal reports that have to be filed with the States is one which nearly all the States have mentioned. The present law requires the Commission to preserve reports and statements filed with it for 10 years. My bill would not change this requirement. What the bill would change is the unnecessarily long period of time during which the States are required to preserve their duplicate copies. Currently all reports and statements must be preserved by the States for 10 years, with the exception of reports relating to candidates for election to the House of Representatives, which must be kept for 5 years. Given the fact that the statute of limitations on prosecutions has been shortened to 3 years and that the FEC must preserve all of the reports for 10 years, there is little reason not to allow the States more leeway in this area. To quote from the recommendations at the end of the FEC survey report (p. 13):

> The overwhelming sentiment of most state elections offices was that the requirements for storage of federal reports was much too long. Many of the suggestions seemed to concentrate on retaining records for the term of the office sought or for shortening the Senate record retention period from 10 to 5 years. As a number of State officials have suggested, the Commission could then become the sole repository of these reports after these new time periods elapse.

The 1976 FEC annual report also recommends that the preservation times be shortened.

On the basis of my communications with the secretaries of state and the latest FEC recommendations, the bill shortens to 3 years the time that reports and statements relating to candidates for the House must be preserved. Reports and statements pertaining to Presidential and Vice Presidential candidates may be destroyed after 5 years from the date of receipt. Senate candidates' statements and reports may be destroyed after 7 years. Reports and statements would still be available from the preceding election, which was a matter of concern to a number of States which responded to my proposal for a 5-year retention period for Senate and Presidential candidates. Let me stress that this provision is permissive in the sense that if any State feels that there will be a demand for these records beyond the 7-, 5-, or 3-year period, it may keep them beyond that time. A State is not required to destroy the records, but after 7, 5, or 3 years a State will be free to destroy or retain the reports, as it sees fit.

The bill also specifically allows the States to microfilm the reports and destroy the originals as soon as they are microfilmed. The microfilmed record is then subject to the 7-, 5- or 3-year retention requirement. Twenty-eight States which responded to the FEC survey indicated that they had access to microfilm or microfiche equipment but only two States use it for their Federal reports. Many States are uncertain as to whether the statute allows them to microfilm and whether or not they can then destroy the originals. My bill would eliminate any uncertainty on this question. Allowing the States to microfilm the reports would alleviate their storage problem to a large extent.

Reports filed by multicandidate committees make up the bulk of the papers filed in the States. The FEC survey found that in 29 of the States that responded, 60 percent or more of the reports on file came from national, multicandidate committees. The FEC report concludes (p. 11):

> Most states felt that there was little, if any, interest in multi-candidate committee reports in their states. This relative lack of interest coupled with the almost two to one ratio of multi-candidate to within state reports that have to be received, processed and stored prompted a number of states to comment that the benefits of public access to these multicandidate reports were not worth the cost of maintaining processing, and storing them.

One of the regulations which the FEC proposed last year and which became effective April 13, 1977 allows a multicandidate committee to file reports relating to contributions to, or expenditures on behalf of, Presidential and Vice Presidential candidates only with the Secretary of State in the State in which the recipient and contributing committees have their headquarters. As the explanation accompanying the proposed regulation stated:

> This prevents committees which make one contribution to a Presidential candidate from having to file in every state in which the Presidential candidate files, which would serve no public purpose.

This regulation will alleviate some of the burden of multicandidate committee reports. However, the States will still receive the voluminous reports of committees which contribute to other Federal candidates even though ony one or two pages may relate to that State. Many States have expressed the opinion that these reports should be filed only at the FEC as there is little or no interest in them at the State level. But this may be

because the importance of these reports is not yet understood by the press and others who are interested in a candidate's financial support. Subsection (c) of my bill does not change the site of the filings, but it does give the States the option to sort through the reports and throw away any portions which do not relate to expenditures made in, or to candidates from, that State.

The bill authorizes an appropriation of $500,000 to reimburse the States for their expenses in administering section 316 during the next nonelection/election year cycle. To quote once again from the conclusions reached in the FEC survey (p. 12):

It should be noted that the responsibility for receiving, processing, making available for public inspection and storing these federal reports does, in fact, impose a heavy burden on most state elections offices. For the most part, state election officers have limited staff, money and space with which to perform their normal state elections functions and these federal reporting requirements present an additional burden on already overworked offices, especially during an election period.

After I introduced S. 3780 last year I wrote to the secretaries of state to find out what their expenses were in administering the reporting requirements. Their annual costs ranged from a high of $17,500 to a low of $90. Some States, such as Michigan and Pennsylvania have a full-time employee working on Federal election reports. Other expenses include filing cabinets, storage space, and miscellaneous office supplies. I think the $500,000 authorized in the bill would easily cover all expenses incurred by the States during a 2-year period. If we are serious about giving the public easy access to campaign reporting information, then we should be willing to help the States with the financial burden which it imposes on them.

Finally the bill makes a technical clarification, the need for which was pointed out in 1973 by Mr. Valeo, by adding the words "and reports" or "and statements" at various places in the section.

The Federal Election Commission and, in particular, their Clearinghouse on Election Administration which conducted the survey to which I have been referring, have been very responsive to the problems raised by State election officials. I know that they are doing everything possible within the framework of the act, to ease the burden on the States. But I think they have done as much as they can do without action from Congress. I believe that my bill will solve many of the problems that the States are facing in administering this act.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1320

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 316(a) of the Federal Election Campaign Act of 1971 (2. U.S.C. 439(a)) is amended—

(1) by inserting the words "and report" after the word "statement", and

(2) by striking out "the Secretary of State (or, if there is no office of Secretary of State, the equivalent State officer)" and inserting in lieu thereof "the Secretary of State (or the equivalent State officer), or if different, the officer of the government of each State who is charged by State law with maintaining State election campaign reports, to be designated by the Governor of that State".

(b) Section 316(a)(1) of such Act (2 U.S.C. 439(a)(1)) is amended by inserting the words "statements and" before the word "reports".

(c) Section 316(a)(2) of such Act (2 U.S.C. 439(a)(2)) is amended by inserting the words "statements and" before the word "reports".

(d) Section 316(b) of such Act (2 U.S.C. 439(b)) is amended—

(1) by striking out "the Secretary of State, or the equivalent State officer," and inserting in lieu thereof the following: "the Secretary of State (or equivalent State officer), or the officer designated",

(2) by striking out paragraph (2) thereof and inserting in lieu thereof the following:

"(2) to preserve such reports and statements (either in the original filed form or in a facsimile copy by microfilm or otherwise) for a period of 7 years from date of receipt for candidates for the Senate, for a period of 5 years from date of receipt for candidates for the President and Vice President and for a period of 3 years from date of receipt for candidates for the House of Representatives;", and

(3) by striking out paragraph (4) thereof and inserting in lieu thereof the following:

"(4) to compile and maintain a current list of all statements and reports, or parts thereof, pertaining to each candidate.".

(e) Section 316 of such Act (2 U.S.C. 439) is amended by adding at the end thereof the following new subsection:

"(c) If a report filed with the State officer under subsection (a)(2) relates to candidates for election from other States, the duty of the State officer under subsection (b) to preserve and make the report available extends only to those portions of that report which relate to candidates for election in that State.".

(f) There is authorized to be appropriated to the Federal Election Commission the sum of $500,000 for use by the Commission in reimbursing State offices during 1977 and 1978 with whom statements are filed under section 316 of the Federal Election Campaign Act of 1971, for expenses incurred in carrying out their duties under that section. The Commission shall pay a reimbursement to a State upon application made therefor by the Governor and upon proof satisfactory to the Commission that the amount claimed as reimbursement accurately reflects additional cost imposed on the State government as a result of such section 316.

By Mr. EAGLETON:

S. 1321. A bill to extend the deadline for transmittal of U.S. Commission on Civil Rights report on unreasonable discrimination based on age in programs and activities receiving Federal financial assistance, and for other purposes; to the Committee on Human Resources.

Mr. EAGLETON. Mr. President, today I am introducing a bill to authorize an extension of the filing of the U.S. Commission on Civil Rights' report to Congress on unreasonable discrimination based on age in programs and activities receiving Federal financial assistance.

The Older Americans Act of 1975 mandated a study to be conducted by the Commission and to be submitted to Congress not later than 18 months after the enactment date of November 28, 1975; thus, the report would have been due in June 1977. However, appropriations to support the Commission's study were not made available until May 28, 1976, and the project director was not hired until July 1976. Given the 6 months' delay in actual startup time for the study, I believe it is necessary to extend the deadline for the final report by 6 months.

Mr. President, there is strong indication of widespread discrimination against the aged in many of the Federal programs providing such basic necessities as employment, housing, community and health services, and transportation. Evidence of age discrimination as it relates to both hiring of older workers and mandatory retirement can be shown by the increasing number of court cases in which age discrimination is being charged. In health care programs conducted at community and family health centers, only 6 percent of the total registrants are 65 or older despite the fact that these older persons have health care needs perhaps three times greater than those of the young registrants in these programs. Only 2 percent of persons receiving rehabilitation services are 65 or older; and only 8 percent of 25 percent of social services funds expended under the Social Security Act for adult programs are spent on older persons.

This litany of discrimination against the aged is extensive but, as yet, we have no documentary evidence on which to base Federal regulations to deal with the problem. This is the goal of the study to be conducted by the U.S. Commission on Civil Rights.

Mr. President, given the delay in funding, and the extremely broad scope of the study, I urge that Congress grant this modest extension.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1321

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 307(d) of the Age Discrimination Act of 1975 (42 U.S.C. 6106(d)) is amended—

(1) by striking out "eighteen months" and inserting in lieu thereof "two years"; and

(2) by adding at the end thereof the following new sentence: "The Commission is authorized to provide, upon request, information and technical assistance regarding its findings and recommendations to Congress, to the President, and to the heads of Federal departments and agencies for a 90-day period following the transmittal of its report.".

By Mr. LONG (for himself, Mr. MAGNUSON, Mr. BAYH, and Mr. CASE):

S. 1324. A bill to amend the Regional Rail Reorganization Act of 1973 to require ConRail to make premium payments under certain medical and life insurance policies, to provide that ConRail shall be entitled to a loan under section 211(h) of such act in an amount required for such premium payments, and to provide that such premium payments shall be deemed to be expenses of administration of the respective railroads in reorganization; to the Committee on Commerce, Science, and Transportation.

Mr. LONG. Mr. President, I am introducing an amendment to the Regional Rail Reorganization Act that is designed to correct a problem that has recently arisen with respect to the life insurance coverage of certain retired noncontract employees of the railroads in reorganization. Last year, in Public Law 94-555, the Congress provided that these benefits of retired noncontract railroad workers should be provided for by the so-called "211(h) program." As many of my colleagues are aware, the 211(h) program is a loan guarantee program designed to allow payment of certain important benefits to people who have been affected by the reorganization of the northeast railroad system now rather than having to wait for the various reorganization courts to settle the affairs of the estates of the bankrupt rail carriers. Many of the people eligible for this sort of loan would otherwise have to suffer while they were denied such things as life insurance coverage, pensions, and so forth. The U.S. Railway Association guarantees a loan to ConRail, which in turn pays the eligible recipient the amount owed to him or her by the estate of the bankrupt rail carrier, acting as agent. The amount of the loan is ultimately paid back by the estate.

Unfortunately, with respect to the particular benefits in question here—life insurance coverage for retirees—the reorganization court of one of the railroads in reorganization has ruled that the benefit, is not an expense of administration. Under the existing wording of section 211, this means that ConRail is not eligible for the loan that is needed. The amendment I am introducing will correct this by mandating both that the loan should be made and that it should be an expense of administration, thus assuring repayment. This will treat these benefits in the same manner as we have treated pensions and other categories of section 211 benefits.

By Mr. PEARSON:

S. 1325. A bill to amend section 406(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1376) to provide explicit statutory authority for the payment of "flow-through" subsidy pursuant to an experimental program administered by the Civil Aeronautics Board during the period August 1, 1973, through July 31, 1975; to the Committee on Commerce, Science, and Transportation.

Mr. PEARSON. Mr. President, I introduce for appropriate reference a bill to amend section 406(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1376) to provide explicit statutory authority for flow-through subsidy payments that were made pursuant to an experimental local air service program administered by the Civil Aeronautics Board from August 1, 1973, through July 31, 1975.

Mr. President, during the 2-year period beginning August 1, 1973, the CAB conducted an experimental local air service program in cooperation with Frontier Airlines, a local service air carrier based in Denver, Colo., and with Air Midwest, a Kansas-based commuter air carrier that subsequently has been certificated by the CAB as a local service airline. Under the terms of the experiment, part of the subsidy that would be paid to Frontier Airlines for service to selected points was transmitted through Frontier to Air Midwest in return for scheduled air services performed by Air Midwest at those selected points on Frontier's certificate of public convenience and necessity. This experiment, called the flow-through experiment, was approved by the CAB in CAB Order 74-1-78.

Subsequently, the U.S. Court of Appeals for the District of Columbia Circuit invalidated the "flow through" experiment and vacated the CAB order which authorized Air Midwest to perform Frontier's service responsibilities in return for some subsidy payment. (*Air Line Pilot's Association, International* v. *Civil Aeronautics Board*, 515 F. 2d 1010 (1975)). The court simply found that the Board lacked explicit authority under section 406 of the Federal Aviation Act of 1958 to conduct the experiment.

Unfortunately, the General Accounting Office has found that the CAB is obligated, under the Federal Claims Collection Act of 1966 (31 U.S.C. 951, et seq.), and the regulations adopted thereunder (4 C.F.R. Parts 101-105), to see restitution for all payments made to Frontier for the beneficial use of Air Midwest, the carrier which actually provided the service, pursuant to the "flow through" experiment.

The mechanical application of the Federal Claims Collection Act, in this case, would result in a gross inequity and injustice to the carriers who, in good faith, participated in the Board's experiment to develop improved ways and means to provide small community air service at reduced cost to the taxpayers.

The amount of subsidy payment made to the carriers during the course of the experiment is $240,172, plus an amount withheld by the Board—but actually earned by the carriers—totaling about $22,040.

In an official opinion issued November 24, 1976, the GAO has concluded that the CAB must demand repayment in full of those amounts earned by the carriers for services rendered. The GAO opinion further states that, under existing law, the Board is not empowered to compromise the claim.

Mr. President, the CAB has suggested that legislation be enacted to alleviate these obviously inequitable and anomalous circumstances. It is my judgment that the public interest would be served by legislation that would remove the legal uncertainties that have arisen from the "flow-through" subsidy experiment that was authorized by the Board as an attempt to test the "feasibility and desirability of the flow-through concept" as a program that would have had nationwide applicability.

But for the good faith actions of the Board, an administrative arm of the Congress, this situation would not exist today. The payments were made to the subject carriers on the basis of the Board's determination that service to the local communities could only be provided through the subsidy which the Federal Aviation Act authorizes in such circumstances.

The court of appeals did not hold that subsidy was not appropriate to maintain service; the court simply held that the method of making subsidy payment, as chosen by the CAB, was not a valid exercise of CAB discretion.

Both Air Midwest and Frontier accepted the flow-through subsidy arrangement to maintain operations entirely consistent with the intent of the Federal Aviation Act. The Board's recent certification of Air Midwest as a subsidy-eligible carrier constitutes a reaffirmation that subsidy-assisted service to the subject communities is required by the public convenience and necessity.

Mr. President, the bill I introduce today would relieve Frontier Airlines and Air Midwest of any liability to repay funds earned by them pursuant to the Board's flow-through subsidy experiment. The Civil Aeronautics Board has endorsed the bill as introduced today.

Mr. President, I ask unanimous consent that the text of my bill together with a letter dated April 6, 1977 and addressed to me from CAB Chairman John Robson, an opinion issued by the General Counsel of the GAO, a letter from me to Chairman Robson soliciting views on this legislation in draft form, and the Chairman's response to my letter, all be printed in the RECORD immediately following these remarks.

Mr. President, I urge prompt enactment of this bill.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1325

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 406(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1376) is amended by deleting the period at the end thereof and by adding the following:

": *Provided*, That nothing in this section shall prohibit the Board from making payments as compensation for the transportation of mail by aircraft, the facilities used and useful therefor, and the services connected therewith, for the period August 1, 1973 through July 31, 1975, where such payments have already been provided by Board order, to the holder of a certificate authorizing the transportation of mail by aircraft, to the account or for the benefit of any air carrier designated as "air taxi operator" by the Board, which provided air transportation between points named in the holder's certificate in satisfaction of an express condition to the suspension by Board order of the holder's certificate authority to engage in air transportation between those points. In no event shall such payments differ from the amount previously provided by such Board order.".

CIVIL AERONAUTICS BOARD,
Washington, D.C., April 6, 1977.

Hon. JAMES B. PEARSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PEARSON: I am writing you in regard to the operations of Frontier Airlines, a subsidized local service carrier, and of Air Midwest, a Kansas-based commuter carrier recently certificated to provide service between eight local communities in Kansas and Colorado and to the hub airports at Denver, Wichita, and Kansas City. Because of a Court of Appeals decision invalidating a 1974 Board decision awarding subsidy through Frontier to Air Midwest, it appears that the Board is now required to demand that Air Midwest and Frontier Airlines refund

the $240,172 subsidy paid them during court review of the Board's decision. Given the circumstances, the Board believes legislation to relieve the air carriers of the refund obligation may be appropriate.

The Board's staff has consulted with the General Accounting Office on the question of the Board's obligation to attempt to recover the subsidy paid under the vacated Board order. The Acting General Counsel of the GAO issued an opinion dated November 24, 1976 (enclosed) in which he concluded that the Board must make a written demand upon Frontier and Air Midwest for repayment of the full amount of the "flow-through" subsidy. GAO reasoned that the Government has a valid claim for repayment and that the carriers do not appear to have defenses to that claim. The GAO opinion relies on the general proposition that the United States is entitled to recover public moneys which have been wrongfully, erroneously, or illegally paid by its agents, whether by mistake of law or of fact.

Moreover, the opinion states that the Board is obligated under the Federal Claims Collection Act of 1966 (31 U.S.C. 951, *et seq.*) and the regulations adopted thereunder (4 C.F.R. Parts 101–105) to attempt to collect the claim against Air Midwest and Frontier. Furthermore, the Board is not empowered to pass upon the validity of the claim or to compromise it. Accordingly, the Board is required to demand of Air Midwest and Frontier repayment of the $240,172 "flow-through" subsidy disbursed to them.

The Board, pursuant to the GAO opinion, intends shortly to make such a demand on the carriers. The purpose of this letter is to inform you of this intention and to express our view that the possible liability of the carriers for subsidy paid during court review raises the question of whether the public interest would be served by legislation relieving the carriers of that liability. The payments were made to the carriers on the basis of the Board's determination that service to the local communities could only be provided through the subsidy which the Federal Aviation Act authorizes in such circumstances (Section 406(b) of the Act, 49 U.S.C. 1376(b)). The court's decision does not hold that subsidy was not appropriate to maintain service. Both Air Midwest and Frontier, therefore, accepted the "flow-through" subsidy arrangement to maintain operations wholly consistent with the statute. The Board's recent certification of Air Midwest as a subsidy-eligible carrier constitutes a reaffirmation that subsidy assisted service to the communities is required by the public convenience and necessity.

Legislation to relieve the carriers of refund liability would assure that the carriers' financial ability to continue operations would not be impaired by the amount of the refund. If such legislation is deemed appropriate, the Board, of course, stands ready to provide any requested assistance.

Sincerely,

JOHN E. ROBSON,
Chairman.

GENERAL ACCOUNTING OFFICE,
Washington, D.C., November 24, 1976.

JAMES C. SCHULTZ, Esq.,
General Counsel,
Civil Aeronautics Board.

DEAR MR. SCHULTZ: Our advice has been requested concerning whether the Civil Aeronautics Board (CAB) has a claim for the recovery of certain "flow-through" subsidy payments made by the Board under an order which was judicially determined to be invalid. For the reasons set forth hereafter, we believe that the Board does have a claim for recovery of the full amount of subsidy payments already made, which should be pursued against either or both of the air carriers involved. Needless to say, we likewise believe that subsidy amounts withheld should not be paid.

I

The "flow-through" subsidy was purportedly authorized by section 406(a) of the Federal Aviation Act of 1958, 49 U.S.C. § 1376 (a) (1970), which provides:

"The Board is empowered and directed, upon its own initiative or upon petition of the Postmaster General or an air carrier, (1) to fix and determine from time to time, after notice and hearing, the fair and reasonable rates of compensation for the transportation of mail by aircraft, the facilities used and useful therefor, and the services connected therewith (including the transportation of mail by an air carrier by other means than aircraft whenever such transportation is incidental to the transportation of mail by aircraft or is made necessary by conditions of emergency arising from aircraft operation), *by each holder of a certificate authorizing the transportation of mail by aircraft*, and to make such rates effective from such date as it shall determine to be proper; (2) to prescribe the method or methods, by aircraft-mile, pound-mile, weight, space, or any combination thereof, or otherwise, for ascertaining such rates of compensation for each air carrier or class of air carriers; and (3) to, publish the same." (Emphasis added.)

The relevant facts are stated below.

In 1970 the CAB suspended the duty of Frontier Airlines, a "certificated" carrier, to serve three Kansas cities, on condition that substituted service be provided. This substituted service was supplied by Air Midwest, a "non-certificated" commuter air taxi operator.

On August 1, 1973, Air Midwest applied to the CAB for an allocation of subsidy funds, under section 406(a) of the Act, *supra*, to support the substituted service it was providing. Apparently recognizing that Air Midwest was not eligible for a direct subsidy due to its non-certificated status, it was proposed that the subsidy be allocated to Frontier, the certificated carrier, which would then pay over the subsidy to Air Midwest. Hence, the subsidy would "flow through" Frontier to Air Midwest. In CAB Order 74–4–77 (April 12, 1974), the Board approved the flow-through proposal, allowing subsidy payments for a 2-year period commencing retroactively as of August 1, 1973, and terminating on July 31, 1975. The CAB Order recognized the unprecedented nature of this subsidy arrangement, describing it as an "experimental program to test the feasibility and desirability of the 'flow-through' subsidy concept * * *." *Id.* at 1. It also rejected objections by several participants in the proceeding that the Board lacked authority under section 406(a) to subsidize services provided by a non-certificated carrier. *Id.* at 4.[1]

Subsequently, in response to petitions to review the CAB subsidy order, the United States Court of Appeals for the District of Columbia Circuit vacated the order. *Air Line Pilots Association, International* v. *Civil Aeronautics Board*, 515 F.2d 1010 (1975) (hereafter referred to as *ALPA*). The court first pointed out that the flow-through subsidy could not be justified as meeting a "need" of Frontier under section 406(b) of the Act, as construed in *Delta Airlines, Inc.* v. *Summerfield*, 347 U.S. 74 (1954), which requires that need be established in relation to the entire operations of a carrier:

"The Board argues that the flow-through subsidy is in literal compliance with the statute because the money is paid to the certificate holder, Frontier. It further argues that the subsidy meets the 'need' of Frontier because, unless Air Midwest is supported, it will stop flying to the three cities, and in that case Frontier will have to reinstitute service itself. In the Board's view, Frontier has a legally cognizable 'need' to be protected against the activation of its contingent obligation to provide service.

* * * * * * *

"* * * the Board erred in approving the flow-through subsidy. The Board wishes to pay Frontier not to reimburse it for expenses, but to keep Frontier from incurring expenses at all. Moreover, in calculating the amount to be paid the Board has reference only to the operating experience of Air Midwest. * * * In wholly ignoring the financial condition of Frontier, the Board violated the dictate of *Summerfield* to look to the need of the carrier to be subsidized. What Frontier's need might be does not appear from the record, but it could be that Frontier as a whole is so successful that even if it were forced to resume service to Hutchinson, Great Bend, and Dodge City, it would not be able to show a need for subsidy." 515 F.2d at 1013.

The Court went on to hold that:

"In any case, the Board has no power to subsidize Air Midwest nor any other non-certificated carrier. Even though the Board may have been correct in finding Air Midwest more efficient at serving the three Kansas cities than Frontier would be and even if, therefore, it is desirable to keep Air Midwest in that service, Congress has not given the Board power to pursue that end by giving public money to Air Midwest." *Id.*

Accordingly, the CAB order was "vacated" by the Court "and the cause remanded to the Civil Aeronautics Board with instructions to deny the request for subsidy * * *." *Id.*

As of the date of the Court's decision—July 11, 1975—flow-through payments had already been made in the amount of $240,172. The Board has withheld the remaining amounts—$22,040—which would have been payable under the flow-through subsidy program.

A memorandum dated July 25, 1975, from a CAB attorney to the General Counsel explores the question of whether flow-through amounts already paid should be recovered. The memorandum notes that under section 3(a) of the Federal Claims Collection Act of 1966, 31 U.S.C. § 952(a) (1970), the CAB "shall attempt collection of all claims of the United States for money or property arising out of * * * [its] activities * * *," and that, as a general proposition, the United States is entitled to recover public moneys which have been wrongfully, erroneously, or illegally paid out by its agents, citing *United States* v. *Wurts*, 303 U.S. 414 (1938). However, the memorandum goes on to discuss three theories which could possibly establish an exception to the requirement for recovery in this case.[2]

One of the three theories explored is that flow-through subsidy payments received prior to the judicial determination of invalidity may be retained in the same manner as payments under non-mail rate orders. See pages 3–5 of the memorandum. However, the memorandum ultimately rejects this theory on the basis that the flow-through subsidy is not analogous to an ordinary rate order for this purpose, and, in any event, the flow-through subsidy order was determined to be "void" rather than "voidable." We concur in the memorandum's discussion and

[1] See also, the Board's Order to Show Cause in the flow-through subsidy application, CAB Order 74–1–78 (January 14, 1974).

[2] The memorandum points out that CAB's authority to compromise claims is subject to the $20,000 limitation contained in 31 U.S.C. § 952(b) (1970). The compromise authority of our Office is subject to the same limitation. Accordingly, since the amount here involved exceeds $20,000, the memorandum and our response are concerned only with the issue of whether a claim exists, rather than whether there are any grounds for compromise.

conclusion on this point, and see no need to restate that analysis here. We will address our views primarily to the other two theories raised, which concern, respectively, "detrimental reliance" and "ratification by specific appropriation."

II

According to the memorandum, it might be argued that Air Midwest should be permitted to retain subsidy payments for its performance of substituted service, at least to the extent that those services were performed in reliance on the CAB order.[3] The memorandum cites, for example, *Missouri Utilities Co.* v. *City of California*, 8 F. Supp. 454 (W.D. Mo. 1934), *appeal dismissed*, 79 F.2d 1003 (8th Cir. 1935), where "the Court indicated that it would be inequitable to require repayment of United States funds even if wrongfully paid, if the recipient had acted to his detriment in reliance upon the ostensible legality of the payments." Memorandum at page 3.

The opinion in *Missouri Utilities* did suggest, by way of *dictum*, that a recipient of Federal funds in a manner consistent with a Federal statute would have the right to rely on the constitutionality of the statute, so that there might be no equitable basis for recovery should the statute be declared unconstitutional. While this case seems to have no bearing on the facts here involved,[4] we recognize that the law is somewhat uncertain concerning whether, and to what extent, theories in the nature of estoppel apply against the United States. Judicial decisions, as well as decisions of our Office and other authorities, have considered the estoppel doctrine applicable to the United States in some circumstances. *See e.g., United States* v. *Georgia-Pacific Co.*, 421 F.2d 92 (9th Cir. 1970); *Smale & Robinson, Inc.* v. *United States*, 123 F. Supp. 457 (S.D. Cal. 1954); 55 Comp. Gen. 911, 931 (1976); 53 Comp. Gen. 502, 506 (1974); see generally, 2 Davis, Administrative Law Treatise, §§ 17.01–17.04 (1958 & 1970 Supp.); Annot., 27 A.L.R. Fed. 702.

However, the great weight of authority (including many decisions which recognize the applicability of estoppel in some contexts) supports the view that estoppel cannot apply to, in effect, sanction payments which are made, or would be made, contrary to a Federal statute or valid statutory regulations. Accordingly, it is our opinion that the strict rule against estoppel in *Federal Crop Insurance Co.* v. *Merrill*, 332 U.S. 380 (1947), and related cases, precludes a defense of estoppel in the instant matter since it involves payments made contrary to statute. *See. e.g.*, 27 A.L.R.Fed. 702, *supra*, § 5; 51 Comp. Gen. 162, 165 (1971). This position has very recently been affirmed by the Court of Claims:

"It is a well-settled principle that the Government has inherent authority to recover sums illegally or erroneously paid, and that it cannot be estopped from doing so by the mistakes of its officers or agents. *See United States* v. *Wurts*, 303 U.S. 414, 415, 58 S.Ct. 637, 82 L.Ed. 932 (1938); *American Fidelity Fire Ins. Co.* v. *United States*, 513 F.2d 1375, 1381, 206 Ct.Cl. 570, 580 (1975); *Fansteel Metallurgical Corp.* v. *United States*, 172 F. Supp. 268, 270, 145 Ct.Cl. 496, 500 (1959). As this court recognized in *Fansteel Metallurgical Corp.* v. *United States*, 172 F. Supp. at 270, 145 Ct.Cl. at 500:

[W]hen a payment is erroneously or illegally made it is in direct violation of article IV, section 3, clause 2, of the Constitution. [case citation.] Under these circumstances it is not only lawful but the duty of the Government to sue for a refund thereof * * *."

Aetna Casualty & Surety Co. v. *United States*, 526 F.2d 1127, 1130 (1975) *cert. denied*, 44 U.S.L.W. 3659 (U.S. May 10, 1976).

While we thus conclude that the estoppel theory is inapplicable here as a matter of law, there is in any case an inadequate factual basis to invoke estoppel in this matter. Even where consideration of estoppel is appropriate, it seems clear that the party seeking to invoke this doctrine must establish that he acted reasonably in relying upon the actions (or inactions) of the party to be estopped. *See, United States* v. *Georgia-Pacific Co., supra; Smale & Robinson, Inc.* v. *United States, supra.*

We do not believe that the airlines can claim reasonable reliance, for purposes of estoppel, on the validity of the CAB order. As noted previously herein, (1) the Board itself described the flow-through subsidy as a novel and experimental concept; (2) the express terms of the statute refer only to payments to certificated carriers; and (3) the Board's authority to grant the flow-through subsidy was subject to legal challenges in its own proceeding and in the subsequent petition for judicial review, which was pending while most of the subsidy payments were made. In this context, it is abundantly clear to us that the airlines accepted subsidy payments with their eyes open, having full notice of the potential legal objection, and thereby assumed the risk that the Board's order would be invalidated. There is no indication that the Board concealed, misrepresented, or in any way attempted to minimize the legal questions concerning its authority. Indeed, the public record known to the airlines spoke for itself.

In sum, we consider the estoppel argument inapplicable to this case as a matter of law and fact.

III

The third theory considered in the memorandum is that the action of Congress in appropriating for section 406 subsidies, with knowledge that the Board was making flow-through subsidy payments, constitutes a "ratification" of such payments. This theory is expressed in two alternative forms: (1) that the appropriations constitute an implied repeal of section 406 insofar as it excludes payments to a non-certificated carrier under the flow-through experiment; or (2) that the appropriations ratify flow-through payments made up to the time of the judicial determination of invalidity.

The Department of Transportation and Related Agencies Appropriation Acts for the fiscal years 1975 and 1976 provide for section 406 subsidies, under the heading "Payments to Air Carriers," as follows:

"For payments to air carriers of so much of the compensation fixed and determined by the Civil Aeronautics Board under section 406 of the Federal Aviation Act of 1958 (49 U.S.C. 1376), as is payable by the Board * * *."

Pub. L. No. 93–391 (August 28, 1974), 88 Stat. 768, 778; Pub. L. No. 94–134 (November 24, 1975), 89 Stat. 695, 707.

As the memorandum points out, the House and Senate appropriation hearings for each of the 2 fiscal years contain various references to the flow-through subsidy experiment, as well as the pending judicial challenge to it. These references consist of presentations by CAB officials, and exchanges between Board officials and committee members, concerning the nature and status of the flow-through subsidy experiment. None of these references, nor anything else (to our knowledge) in the legislative histories of the appropriation acts, indicates any congressional sentiment concerning the Board's legal authority to pay flow-through subsidies.

The memorandum rejects the first alternative theory that the appropriations implicitly repeal section 406 in relation to the flow-through subsidy. We agree that this theory is without merit. As the memorandum points out, repeals by implication are not favored, citing *Committee For Nuclear Responsibility, Inc.* v. *Seaborg*, 463 F.2d 783 (D.C. Cir. 1971). The memorandum also notes that "it would be rather late in the day" to urge an argument of repeal by implication now since this argument was not even raised in *ALPA*. Actually, we believe that such an argument is necessarily precluded by *ALPA*.

The second alternative of this theory is that the appropriations serve to ratify subsidy payments up to the date of the *ALPA* decision on a *"pro tanto"* basis. The memorandum relies here on *Committee For Nuclear Responsibility, supra*, in which the court held that the enactment of authorization and appropriation legislation for a nuclear test project did not constitute a determination as to the adequacy of the environmental impact statement for the test project under the National Environmental Policy Act (NEPA). The court observed, 463 F.2d at 785–86:

"* * * Congress must be free to provide authorizations and appropriations for projects proposed by the executive even though claims of illegality on grounds of non-compliance with NEPA are pending in the courts. There is, of course, nothing inconsistent with adoption of appropriations and authorizations measures on the *pro tanto* assumption of validity, while leaving any claim of invalidity to be determined by the courts. That is the effect of the authorization and appropriations measures relating to the Cannikin test. This conclusion is established by the general principles just discussed. Nothing in the legislative history leads to a different result. On the contrary, there is an affirmative indication that at least some of the Congressmen voting for the authorization and appropriations measures specifically contemplated that the claim of illegality remained for resolution by the courts. The legislative history indicates that while the impact statement was used as reference material by both proponents and opponents of the test, Congress did not purport to make a binding determination on the issue whether the statement was in compliance with NEPA."

Based on the analysis in *Committee For Nuclear Responsibility*, the memorandum suggests an argument that:

"* * * Air Midwest should be permitted to retain the subsidy payments which it received up until the time of the *ALPA* decision, since Congress, with specific awareness of the Board's experiment, appropriated funds for subsidy payments to be made pending the outcome of the judicial challenge. Nor would the present assertion of this argument by the Board be inconsistent with the failure to interpose it as a defense in the *ALPA* case, since there the issue was the basic legality of the experiment under § 406 and not the question of the Board's *pro tanto* authorization, by Congressional ratification, to make particular subsidy payments to Air Midwest until such time as its ineligibility to receive such payments might be judicially determined."

However, it also points out that applicability of the "*pro tanto* ratification" theory here would depend on the existence of an adequate factual background from which to infer congressional ratification of flow-

---

[3] The memorandum indicates that this theory would apply only to $153,059 of the subsidy payments already paid. The remaining $87.113 of the amounts paid represents retroactive payments for which there could have been no reliance on the CAB order.

[4] In the instant case, of course, payments were made in violation of the terms of a statute, concerning which there was no constitutional challenge. *Missouri Utilities* actually supports the view that persons are charged with knowledge of *statutory* requirements.

through subsidy payments pending the outcome of *ALPA*.

As in the case of estoppel, we consider this ratification argument inapplicable, both legally and factually.

Initially, we do not believe that *Committee For Nuclear Responsibility* can be read as supporting any "*pro tanto* ratification" theory of the type described in the memorandum, *i.e., a* ratification of illegal payments made pending the determination of illegality. There was nothing illegal about the underlying purpose for which appropriations were to be used in *Committee For Nuclear Responsibility*—conduct of a nuclear test. The test could not actually take place unless and until an adequate NEPA statement was issued. However, presumably some funds were properly used in preparation for the test prior to issuance of the statement, and, once an adequate statement was issued, funding could proceed. In other words, *Committee For Nuclear Responsibility* has nothing to do with a challenge to the basic use of funds as such; nor does the opinion suggest the possibility of a *pro tanto* ratification in such circumstances.

Turning to the instant case, certainly the CAB appropriations would have been available for flow-through subsidy payments to the extent that such payments were legal under section 406, but the *ALPA* decision holds that the payments were *never* legal. As noted previously, the court in *ALPA* "vacated" the CAB flow-through subsidy order and remanded the cause to the Board "with instructions to deny the request for subsidy * * *." Clearly, therefore, the flow-through subsidy order was void from the outset and all payments made under it were illegal.

We find absolutely no indication of a congressional intent to ratify illegal flow-through payments made prior to the *ALPA* decision. The appropriations are by their terms available for payments of "so much of the compensation fixed * * * under section 406 * * * as is payable by the Board * * *." As a result of *ALPA*, no flow-through subsidy was payable by the Board at any time. In our view, the existence of appropriations for section 406 payments is an entirely neutral fact here. At most, the Congress left determination of the legality of flow-through payments to the court; and the judicial determination, once made, governed all such payments.

IV

The final point addressed in the memorandum is how, and against whom, collection should be effected, assuming that a claim exists. The memorandum indicates that a claim against Frontier Airlines could be collected by offset against other subsidy payments due to Frontier, but that there is no source for offset of a claim against Air Midwest. However, it concludes that, while Air Midwest is clearly liable for a claim, Frontier probably could not be held liable. This conclusion is based on the structure of the flow-through subsidy arrangement, "particularly as perceived by the court in the *ALPA* case," under which Frontier received payment only in nominal capacity:

"In these circumstances, a claim by the United States for money had and received would not be likely to prevail against Frontier, which—with the full understanding of the Board, Frontier and Air Midwest—did not receive these moneys for its own use but solely as a nominee for the intended recipient, Air Midwest."

While this analysis appears correct on the surface, we do not think it is quite so clear that Frontier has no liability. As the memorandum points out, at page 2, the claim is "for restitution of money had and received, to prevent unjust enrichment by the recipient of unauthorized payments of public funds." It seems to us that Frontier, rather that Air Midwest, could well be considered the party unjustly enriched. While Air Midwest at least performed services for which the subsidy was paid, there is ample basis to conclude that Frontier was a real beneficiary of the subsidy as well as the nominal payee.

Under the substituted service arrangement, which led to the flow-through subsidy application, suspension of Frontier's obligation to serve the three Kansas cities was contingent upon Air Midwest's service to those cities. Had Air Midwest been unable to continue service without the subsidy, Frontier's obligation would have been automatically renewed. Moreover, as the *ALPA* court noted, it is not clear that Frontier could have qualified for a subsidy for this service under the appropriate standard, which requires consideration of the carrier's overall operations and financial condition. The court in *ALPA* thus concluded that the flow-through subsidy could not be justified as meeting Frontier's "need" within the meaning of section 406. However, the court does seem to have recognized that Frontier was more than a nominal payee by observing that:

"* * * The Board wishes to pay Frontier not to reimburse it for expenses, *but to keep Frontier from incurring expenses* at all. * * *" 515 F.2d at 1013. (Emphasis added.)

While we cannot instruct the Board on exactly how to seek collection of the claim, we do suggest, in view of the foregoing, that further consideration be given to Frontier's possible liability.

Sincerely yours,

MILTON J. SOCOLAR,
Acting General Counsel.

U.S. SENATE,
Washington, D.C., April 20, 1977.

Hon. JOHN ROBSON,
Chairman, Civil Aeronautics Board, Washington, D.C.

DEAR MR. CHAIRMAN: I am enclosing a draft bill to amend section 406(a) of the Federal Aviation Act of 1958 in order to provide statutory authority for the Board's "flow-through" subsidy program conducted from August 1, 1973 through July 31, 1975.

This legislation is apparently necessary in view of the decision of the Court of Appeals holding that the Board had inadequate statutory authority to conduct the "flow-through" experiment.

Of course the attached language is designed to have no substantive effect except to ensure that no inequitable consequences to the detriment of the carriers involved in the experiment, or to the detriment of the communities served during the experiment, will result from the court's decision.

Because the attached draft bill has no prospective substantive effect whatsoever, I hope that the Board will be able to provide me with its views on the proposal at the earliest possible time.

Thank you for your prompt attention to this request.

With kindest personal regards,

Very truly yours,

JAMES B. PEARSON,
U.S. Senator.

CIVIL AERONAUTICS BOARD,
Washington, D.C., April 20, 1977.

Hon. JAMES B. PEARSON,
Committee on Commerce, Science, and Transportation, U.S. Senate, Washington, D.C.

DEAR SENATOR PEARSON: This will respond to your letter of April 20, 1977, requesting the Board's views concerning a proposed amendment to section 406 of the Federal Aviation Act which would provide statutory authority for the Board's flow-through subsidy program conducted from August 1, 1973, through July 31, 1975. The bill would have no prospective effect.

The Board supports the proposed legislation.

Sincerely,

RICHARD J. O'MELIA,
For JOHN E. ROBSON, *Chairman.*

ADDITIONAL COSPONSORS

S. 107

At the request of Mr. PEARSON, the Senator from New Hampshire (Mr. MCINTYRE) and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 107, a bill to avoid reductions in veterans' pensions concomitant to increases in Social Security benefits.

S. 256

At the request of Mr. PEARSON, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 256, the Natural Gas Act Amendments of 1977.

S. 414

At the request of Mr. THURMOND, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 414, to require health warning on certain labels.

S. 418

At the request of Mr. BAYH, the Senator from Minnesota (Mr. ANDERSON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Florida (Mr. STONE), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of S. 418, the Displaced Homemakers Act.

S. 514

At the request of Mr. RIBICOFF, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 514, to amend ttile XVIII of the Social Security Act.

S. 689

At the request of Mr. KENNEDY, the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 689, a bill to amend the Federal Aviation Act of 1958 to encourage, develop, and attain an air transportation system which relies on competitive market forces.

S. 834

At the request of Mr. SCHWEIKER, the Senator from Delaware (Mr. ROTH) and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of S. 834, to amend the Internal Revenue Code.

S. 939

At the request of Mr. BAYH, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 939, the Trade Adjustment Assistance Program amendments.

S. 991

At the request of Mr. RIBICOFF, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 991, to establish a Department of Education.

S. 1141

At the request of Mr. STONE, the Senator from New Hampshire (Mr. MCINTYRE) was added as a cosponsor of S. 1141, to amend title 38 of the United

States Code to assist veterans with a permanent and total service-connected disability due to the loss or loss of use of one upper and one lower extremity to acquire specially adapted housing.

S. 1246

At the request of Mr. PROXMIRE, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 1246, to amend the Housing and Community Development Act of 1974.

S. 1258

At the request of Mr. MAGNUSON, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1258, providing for the designation of the libraries of accredited law schools as depository libraries of Government publications.

S. 1290

At the request of Mr. HELMS, the Senator from North Carolina (Mr. MORGAN) was added as a cosponsor of S. 1290, to amend the peanut program.

S. 1290—WITHDRAWAL

At the request of Mr. HELMS, the Senator from Idaho (Mr. MCCLURE) was withdrawn as a cosponsor of S. 1290, to amend the peanut program.

SENATE JOINT RESOLUTION 26

At the request of Mr. CURTIS, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of Senate Joint Resolution 26, to require the Federal Government to end deficit financing.

AMENDMENTS SUBMITTED FOR PRINTING

SUPERVISORY AUTHORITY OF FEDERAL BANKING AGENCIES—S. 71

AMENDMENT NO. 196

(Ordered to be printed and referred to the Committee on Banking, Housing and Urban Affairs.)

Mr. PROXMIRE. Mr. President, I am today submitting for printing and reference to the Committee on Banking, Housing and Urban Affairs an amendment to S. 71, recommended by Chairman Burns of the Federal Reserve System. The amendment would accomplish the following:

First. Amend the summary suspension provisions of the Financial Supervisory Act of 1966 to provide the opportunity for a hearing by any person suspended from his position as an officer or director of an insured bank by a bank regulatory agency upon indictment or conviction of a felony involving dishonesty or breach of trust; and to require such agency to find that such suspension is needed to protect depositors or public confidence in the bank. The hearing procedure provided for is necessitated by the decision of the U.S. Court of Appeals in the case of Feinberg against FDIC.

Second. Make it a misdemeanor to willfully refuse to testify or produce records in response to a subpena issued by a bank regulatory agency.

Third. Conform sections 3(a) and 2(a)(5)(D) of the Bank Holding Company Act to section 4(a) of that act. The Federal Reserve would be permitted to extend from 2 to 5 years the time period within which a bank holding company must divest itself of shares in a bank acquired in the course of collecting a debt previously contracted. The 5-year time period is already law in the case of nonbank shares.

Mr. President, I ask unanimous consent that the text of this amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 196

At the end of the bill add the following:

SEC. 11. Section 8(g) of the Federal Deposit Insurance Act (12 U.S.C. 1818(g)) is amended to read as follows:

"(g)(1) Whenever any director or officer of an insured bank, or other person participating in the conduct of the affairs of such bank, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a felony involving dishonesty or breach of trust, the appropriate Federal banking agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. A copy of such notice shall also be served upon the bank. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the agency. In the event that a judgment of conviction with respect to such offense is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the bank except with the consent of the appropriate agency. A copy of such order shall also be served upon such bank, whereupon such director or officer shall cease to be a director or officer of such bank. A finding of not guilty or other disposition of the charge shall not preclude the agency from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in bank affairs, pursuant to paragraph (1), (2), or (3) of subsection (e) of this section.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a national bank less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a national bank are suspended pursuant to this section, the Comptroller of the Currency shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended, cease to be directors of the bank and their respective successors take office.

"(3) Within 30 days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the agency to show that the continued service to or participation in the conduct of the affairs of the bank by such individual does not, or is not likely to, pose a threat to the interests of the bank's depositors or threaten to impair public confidence in the bank. Upon receipt of any such request, the appropriate Federal banking agency shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the agency to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the agency shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the bank will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the bank will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the agency's decision, if adverse to the director, officer, or other person. The Federal banking agencies are authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(h)(1) Section 8(h)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818(h)(1)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (g)(3) of this section)".

(2) Section 8(h)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(h)(2)) is amended by inserting "or (3)" after "or an order issued under paragraph (1)".

(i) Section 8(j) of the Federal Deposit Insurance Act (12 U.S.C. 1818(j)) is amended by striking out "(e)(5), (e)(7), (e)(8)" and inserting in lieu thereof "(e)(3), (e)(4)".

(j) Section 8(k) of the Federal Deposit Insurance Act (12 U.S.C. 1818(k)) is amended by striking out "paragraph (1) of subsection (g)" and inserting in lieu thereof "paragraph (1) or (3) of subsection (g)".

(k) Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended by adding at the end thereof the following new sentence: "Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memorandums, contracts, agreements, or other records, if in such person's power so to do, in obedience to the subpena of the appropriate Federal banking agency, shall be guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than 1 year or both.".

SEC. 12. (a) Section 3(a) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)) is amended by inserting after the second sentence the following new sentence: "The Board is authorized upon application by a bank to extend, from time to time for not more than one year at a time, the two-year period referred to above for disposing of any shares acquired by a bank in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extensions shall in the aggregate exceed three years.".

(b) Section 2(a)(5)(D) of such Act (12 U.S.C. 1841(a)(5)(D)) is amended by add-

ing at the end thereof the following new sentence: "The Board is authorized upon application by a company to extend, from time to time for not more than one year at a time, the two-year period referred to herein for disposing of any shares acquired by a company in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extensions shall in the aggregate exceed three years.".

TAX SIMPLIFICATION AND REDUCTION ACT OF 1977—H.R. 3477

AMENDMENT NO. 197

(Ordered to be printed and to lie on the table.)

Mr. LAXALT. Mr. President, together with my good friend from Delaware, Mr. BIDEN, I am today submitting an amendment to H.R. 3477 as reported by the Finance Committee. Our amendment will facilitate the employment of the handicapped by reinserting the supplemental 10 percent "jobs tax credit" for the handicapped into the Tax Reduction and Simplification Act of 1977.

The House version of the "jobs tax credit" provided for a credit against employer income taxes equivalent to 40 percent of the first $4,200 of wages paid to additional employees for calendar year 1977 and 1978. The credit had a maximum total of $40,000 and was determined by a formula which made use of the recordkeeping which employees are required to undertake in conjunction with their Federal Unemployment Tax Act—FUTA—returns. The 10-percent supplemental credit for additional wages paid to handicapped employees was allowed for those who were referred upon completion of an individualized, written rehabilitation plan approved by one of the States under the Vocational Rehabilitation Act.

The Finance Committee replaced the Ways and Means jobs tax credit with an option to business of either a 2-percent incremental investment tax credit or a 25-percent credit for each additional employee on the first $4,200 in wages paid with no $40,000 "cap" and no supplemental credit for hiring handicapped employees.

Our amendment would provide a supplemental credit for handicapped employees to be administered in the same way as envisioned by the House. The Joint Committee on Internal Revenue Taxation has estimated an additional revenue cost of our proposal of $25 million for 1978.

A major objective of H.R. 3477 is to attain a prompt reduction in our currently unacceptable rate of unemployment. Needless to say, we endorse this objective. But, we also believe that we should be sensitive to the special difficulties which handicapped individuals face in securing employment.

Our Nation's handicapped do not want charity. They want to work and become productive, contributing members of our society. Only through such work will they attain the better quality of life and the independence to which they are entitled. The only handicap that disabled people have is getting a job—not holding one.

Mr. President, I ask unanimous consent that the text of the Laxalt-Biden amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 197

On page 81, between lines 23 and 24, insert the following:

"(d) Additional 10 Percent Credit for Vocational Rehabilitation Referrals.—

"(1) In general.—The amount of the credit allowable by section 44B for any taxable year (determined without regard to this subsection) shall be increased by the amount determined for such taxable year—

"(A) by substituting '35 percent' for '25 percent' in the appropriate paragraph of subsection (a), and

"(B) by applying such paragraph and subsection (b) separately with respect to the unemployment insurance wages paid to vocational rehabilitation referrals.

"(2) Aggregate wages must increase.—The increase in wages taken into account under paragraph (1)(b) of this subsection shall not exceed the increase in wages taken into account for purposes of that portion of the credit which is determined under subsections (a) and (b) without regard to this subsection.

On page 92, line 24, strike out "(d)" and insert in lieu thereof "(e)".

On page 93, between lines 4 and 5, insert the following:

"(4) Vocational rehabilitation referral.—

"(A) In general.—The term 'vocational rehabilitation referral' means a handicapped individual who has been referred to the employer upon completion of (or while receiving) rehabilitative services pursuant to an individualized written rehabilitation plan under a State plan for vocational rehabilitation services approved under the Vocational Rehabilitation Act.

"(B) Handicapped individual.—For purposes of subparagraph (A), the term 'handicapped individual' means any individual who has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment.".

On page 93, line 5, strike out "(e)" and insert in lieu thereof "(f)".

AMENDMENT NO. 198

(Ordered to be printed and to lie on the table.)

Mr. HASKELL submitted an amendment intended to be proposed by him to the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business taxes, and to provide tax simplification and reform.

NOTICES OF HEARINGS

NEW YORK CITY SEASONAL FINANCING ACT

Mr. PROXMIRE. Mr. President, I wish to announce that the Committee on Banking, Housing and Urban Affairs will hold oversight hearings on the New York City Seasonal Financing Act on May 16, 17 and 18, 1977. The hearings will explore the following subjects, among others:

New York City's progress in carrying out its financial plan, and the likelihood of its achieving a balanced budget in fiscal year 1978 and beyond;

The plan for repayment of the moratorium notes, and its impact on the financial plan;

The prospects for repayment of the Federal loans in fiscal years 1977 and 1978;

The city's plans for borrowing in the private markets and from the Federal Government in fiscal 1978; and

The prospects for New York City's meeting its borrowing needs in the private markets after June 30, 1978, when the Federal loan program ends.

The hearings will begin at 10 a.m. in room 5302, Dirksen Senate Office Building.

Anyone wishing information concerning these hearings should contact Elinor B. Bachrach, professional staff member, room 5300, Dirksen Senate Office Building, 202–224–7391.

PRICE POLICY FOR ALASKAN OIL

Mr. JOHNSTON. Mr. President, on April 15, in accordance with the provisions of the Energy Policy and Conservation Act, the President transmitted to Congress his report on price incentives for the production of crude oil on the North Slope of Alaska. This oil will begin to flow through the trans-Alaskan pipeline later this year. It is anticipated that additional domestic crude oil production from the North Slope of 1.2 million barrels per day will be on stream early in 1978.

The Subcommittee on Energy Conservation and Regulation of the Committee on Energy and Natural Resources will hold a hearing on the issue of pricing policy for Alaskan oil on May 3, 1977. The hearing will commence at 9 a.m. in room 3110 of the Dirksen Senate Office Building.

The subcommittee will hear testimony from the administration, from affected States and from selected private witnesses. Questions concerning this hearing should be directed to Betsy Moler or Ben Copper at 224–0611.

NOMINATION

Mr. RIBICOFF. Mr. President, I wish to announce that the Committee on Governmental Affairs will hold hearings on the nomination of Jay Solomon, of Tennessee, to be Administrator of General Services, on Thursday, April 21, 1977. They will begin at 9 a.m. in room 3302, Driksen Senate Office Building.

DISTRICT OF COLUMBIA MATTERS

Mr. EAGLETON. Mr. President, the Subcommittee on Governmental Efficiency and the District of Columbia of the Governmental Affairs Committee will hold hearings on April 27, 1977, on a number of bills. Persons wishing to testify on any of the proposed legislation should contact the subcommittee staff director Robert Harris in room 6222, Dirksen Senate Office Building by Monday, April 25.

The bills to be heard are as follows:

S. 1060, to restate the charter of George Washington University;

S. 1061, to allow continued Treasury borrowing by the District of Columbia;

S. 1062, to change the fiscal year of the Armory Board;

S. 1063, to allow the issuance of revenue bonds by the District for the building of university facilities;

S. 1101, to terminate District of Columbia borrowing authority from the Treasury for sewage works;

S. 1102, to allow District of Columbia to enter into interstate compacts; and

S. 1103, to allow other States to sue for taxes in the D.C. Superior Court.

DISTRICT OF COLUMBIA JUDGES

Mr. EAGLETON. Mr. President, the Committee on Governmental Affairs will hold a hearing on the nomination of Gladys Kessler, Robert Shuker, Robert Scott, Annice Wagner, and Paul Webber to be Judges of the Superior Court of the District of Columbia. The hearings will be held on April 28, 1977, at 9 a.m. in room 457, Russell Senate Office Building.

Persons wishing to testify on these nominations should contact either Claudia Ingram or Robert Harris at the Governmental Affairs Committee office, 3308 Dirksen Senate Office Building.

ADDITIONAL STATEMENTS

FLOOD INSURANCE

Mr. EAGLETON. Mr. President, since its passage in 1973, the Federal Disaster Protection Act has become a very controversial issue. Many of the regulations imposed by the Federal Insurance Administration make it impossible for cities and their surrounding communities to secure Federal grants and restricts lending to these cities in the designated flood plain area by lending institutions. These cities are then subject to sanctions imposed by the Administrator which will have serious and adverse effects on their economy.

The city of Cassville, Mo., is the most recent city to be affected by this act. Not only is their chance for Federal aid limited, but their very right to govern themselves is threatened by the imposition of land use planning without local participation. As an expression of concern and opposition to the program, the board of aldermen of the city of Cassville has passed the following resolution which I ask unanimous consent to have printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE BOARD OF ALDERMEN OF THE CITY OF CASSVILLE, MO.

The Board of Aldermen of the City of Cassville, Missouri, met in reconvened session at the City Hall in Cassville, Missouri on the 25th day of March, 1977.

Present were the Mayor, J. W. LeCompte, Aldermen Marlee Edie, W. C. Hailey, Gene Schlichtman, W. E. Leonard, City Attorney Joe R. Ellis and City Clerk F. O. Fields.

The proposal of the Department of Housing and Urban Development, Federal Insurance Administration, under the provisions of the Flood Disaster Protection Act of 1973 was discussed by the Board of Aldermen. The Board considered the letter of J. Robert Hunter, Administrator of the Program, dated March 14th, 1977 addressed to Mayor J. W. LeCompte. The letter advised that if the City of Cassville does not pass ordinances containing regulations required by the Federal Insurance Administration prior to April 15th, 1977, that the Administrator will place sanctions upon the City which will restrict federal grants to the City and restrict lending in the designated flood plain area by lending institutions having Federal Deposit Insurance (all area financial institutions have such insurance). Thereupon, having fully reviewed the requirements of the Administrator, the regulations to be imposed upon the City, the sanctions to be imposed and the procedures of the Administrator in developing the flood insurance program for the City of Cassville, Missouri, the Board of Aldermen, upon motion duly made and seconded passed and approved the following resolutions, to-wit:

"Resolved, that the Federal Insurance Administrator has not adequately informed the officials and citizens of the City of Cassville of the commencement of the flood study and the study itself, concerning the nature of the study itself, the general principles to be applied, the use to be made of the data obtained, the areas involved, and the manner in which the study was to be undertaken."

"Resolved, that the Board of Aldermen, the governing body of the City of Cassville, Missouri, and the citizens of the community have not been fully consulted, as required by the provisions of Section 206 of the Flood Disaster Protection Act of 1973, concerning the development of the program. It is resolved further that information relating to the development of the program has not been disseminated in the community as required, and that interested persons have not had the opportunity to bring all relevant facts and technical data concerning the local flood hazard to the attention of the Administrator."

"Resolved, that the regulations to be imposed by the Administrator and the sanctions to be imposed by the Administrator were not fully explained to officials and citizens of the City until March 7th, 1977."

"Resolved, that in the opinion of the Board of Aldermen, the regulations sought to be imposed upon the City by the Administrator will have serious and adverse effect on the economy of the City of Cassville and the surrounding community."

"Resolved, that the regulations and sanctions sought to be imposed by the Administrator will result in the taking of property rights of citizens of the City of Cassville without due process of law."

"Resolved, that the areas that are included in the flood plain map developed by the Administrator for the City of Cassville, Missouri have not historically flooded, and that the Board of Aldermen does not believe that the flood plain map accurately defines the actual flood plain within the City of Cassville, Missouri."

"Resolved, that the citizens of the City of Cassville, Missouri, have through their initiative provided a sound economy through the development of industrial projects, and support for area recreational and agricultural business; that approximately fifty percent of the corporate area of the City has been placed in the flood plain by the Administrator; that all of the industry in the community has been placed in the flood plain area, or will be placed in the flood plain area in the program of the Administrator proposed for Barry County, Missouri; that these industries employ approximately one thousand persons; that approximately seventy five percent of the business and commercial area of the City has been placed in the flood plain by the Administrator; that the program of the Administrator proposed for the City of Cassville and Barry County will affect real property in the City or in the area proposed to be annexed by the City in current annexation proceedings of a value of millions of dollars; all of which the Administrator proposed to regulate as he may deem best to the detriment of the City and it's economy."

"Resolved, that the program of the Administrator takes from the citizens of the City of Cassville, Missouri, their right of self determination, and their right to be governed in local affairs by their elected City, County and State officials."

"Resolved, that the program of the Administrator imposes land use planning without local participation and as dictated by the Administrator upon the City of Cassville."

"Resolved, that a copy of this resolution be forwarded to the elected representatives of the citizens of Cassville in the United States Congress and the United States Senate, as an expression of the opposition of the City to the program of the Administrator, and as a solicitation of support from these offices."

Passed and approved this 25th day of March, 1977.

PLANS INITIATED TO REOPEN ALASKA METHODIST UNIVERSITY

Mr. STEVENS. Mr. President, I appreciate this opportunity to submit for the record the following statement by Dr. P. Gordon Gould regarding Alaska Methodist University.

Alaska Methodist University is the only private 4-year degree institution in the entire State of Alaska. AMU is presently conducting a complete reorganization study which is unique in higher education in our Nation. While other universities have had to close their doors. AMU is the only school to initiate plans to reopen.

Dr. Gould is one of the original founders of Alaska Methodist University. This eloquent statement truly demonstrates the need for public support of AMU to benefit both Alaska and the entire Nation. In the near future, I will be calling upon my colleagues to seek their support for this university.

Mr. President, I ask unanimous consent that the statement by Dr. Gould, "Alaska Methodist University: Pioneers To Meet Human Need in Alaska Through Good Quality Education," be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ALASKA METHODIST UNIVERSITY PIONEERS TO MEET HUMAN NEED IN ALASKA THROUGH GOOD QUALITY EDUCATION

Alaska, geographically located at the apex of the North Pacific Basin and within a few flying hours from every major population area of the Northern Hemisphere is "Uncle Sam's Show Window". This "Show Window" is ideally situated between the two great world powers now contending for the mind and spirit of man. What happens in Alaska has far-reaching consequences both national and international.

Multitudes of oppressed, impoverished, exploited and beleaguered people in underdeveloped countries are hearing the assuring word of our President that the United States is deeply concerned about human rights (human-well-being-issues) in every nation on earth; that our Government would prefer our aid to these nations be used to alleviate human distress rather than expended for instruments of destruction. They look with eager longing not only for aid to be given, but also for some guidelines as to how it shall be administered that their needs be met and their hopes and dreams realized. But unfortunately the United States has no where in all the world to point to a pilot project where such guide lines are developed and might be observed and appraised.

Millions of people from all over the world now visit Alaska each year. Here they have an unprecedented opportunity to observe the performance of our Government (both national and state) in meeting these human issues in which we profess deep concern.

The purpose of a "Show Window" is to display our best wares before the public view. The world's people are looking in our "Show Window". When they return home they report what they have seen. What might they

see if our performance backed up what we proclaim?

Plainly speaking then, Alaska is a gigantic laboratory where our Government may, through its varied agencies, render the kind of aid that would make possible through research, study, planning and performance a demonstration, before the eyes of the world, of a realistic approach to those concerns voiced by our President.

Let us look at this "Show Window" laboratory so amazingly prepared for just such a demonstration before the eyes of the world.

1. As already mentioned it is ideally situated between the two major world powers now contending for the mind and spirit of man.

2. It is fantastically stocked with natural resources upon which the life of man depends. (already the eyes of hungry nations are fastened upon these resources).

3. It is large enough to prevent any easy, off-hand solution to the major issues of human well being now confronting every nation in the world. These issues broadly stated are—a. Child Care; b. Health and Well Being; c. A Wider Spread Of Economic Opportunity; d. More Opportunity For Cultural Sharing; e. Education; f. An Assured Opportunity For Spiritual Advance.

4. It is peopled with persons of varied cultural heritage who now have to learn how to blend their cultural assets and skills in creative ways to serve the common good.

5. It is now passing through what might be called a three-pronged revolution not too different from what other underdeveloped nations are experiencing.

(a) Political—Emerging from Territorial status to Statehood. From a time when all major decisions regarding it were made by others afar off, to a time when self-determination and its attending citizenship responsibilities are the stern facts of life.

(b) Industral—When the exploitation of natural resources are no longer exported for the sole benefit of absentee controllers, but are explored and exploited for the benefit (primarily) of the citizens as a whole.

(c) Social—The restless rising of the common man demanding a place in the sun, a voice in determining his destiny, and a role of integrity as a responsible citizen.

The Land Claims Settlement Act was the catalyst that brought all these things into sharp focus. The demands made by that Act not only place a heavy burden upon Alaska Natives (Aleut, Eskimo, Indian) but also have far-reaching consequences for all other Alaskans as well. There is a tremendous urgency to meet these human issues in a realistic fashion that would provide a more abundant life, not only for native people, but for all other Alaskans too. The dimensions and demands of this task far exceed the capability of any single agency to achieve single handedly. Therefore Federal Aid is urgently needed.

The founding of Alaska Methodist University is an evidence of a commitment on the part of The United Methodist Church and a willingness to pioneer in facing up to this stupendous task, not in a sectarian manner, but as an expression of humanitarian concern not only to be talked about but also to be acted upon in such a manner as would awaken Alaskans in particular, and our nation in general to the critical opportunity for serving the needs of man in a creative fashion that would result in making the abundant life available for all. Alaska's true destiny could never be achieved by imported leadership, nor by draining off its natural resources without regard to the plight of her people, it must be attained through indigenous leadership .... leadership prepared within Alaska for Alaska. Good quality education preparing youth in Alaska for leadership responsibilities seems to be the key to make Alaska become what its name signifies ... The Great Land. It is a matter of history that, in the beginning years of many of our States, the majority of the leadership in those early years came from graduates of the private colleges that were established within their boundaries.

Alaska Methodist University, though beleaguered by financial and other difficulties already has made a considerable contribution to Alaska and our nation. Graduates of the University now serve not only in Alaska but elsewhere as well. The University envisions a future role of far-reaching dimensions as it becomes a center providing good quality education that prepares Alaskans for exercising those skills most urgently required to meet the critical needs of Alaska's present and future.

NATIONAL SERVICE AND CONSCRIPTION POSE HUGE PROBLEMS

Mr. PROXMIRE. Mr. President, during the past few months I have tried to point out that the All-Volunteer Force concept has been working. Military statistics show the Armed Forces have been able to attain their recruiting quotas while improving their personnel quality standards at the same time. Military and civilian attitudes toward the military also improved as the All-Volunteer Forces supplanted the draft.

This success has not been earned without cost. Personnel costs in the Defense Department have increased enough to warrant quick action to remedy the situation. This action should take the form of cutting military frills and halting the alarming trend of grade-creep inflation.

There is no reason to believe that a return to conscription would significantly lessen the personnel costs of the military, unless, of course, we force our young men and women to serve at the terribly low military pay rates of the 1960's. Yet, none of the critics of the AVF have suggested a return to this low pay scale, a situation which was corrected before the Nation turned to the All-Volunteer concept.

Despite these facts, which indicate the AVF can be maintained with minimal policy changes, some observers have urged the abandonment of the AVF and a return to the draft or the institution of a national service requirement. Today I would like to call my colleagues' attention to two recent Washington Post articles which deal with these often-suggested "solutions."

The first article, written by Peter J. Ognibene, discusses the possibility of a "fair" conscription lottery and concludes that no lottery can remove the inherent injustice of a peace time draft. Mr. Ognibene echos my feelings perfectly when he writes:

> Any selection process that inducts some young men into the military but requires nothing of others is by its very nature unfair. Eliminating deferments and establishing a lottery did not do away with selectivity. It merely changed the way in which the few were chosen from the many.

As Mr. Ognibene states, conscription should only be used as a last resort.

The second article deals with another solution being discussed—a national service requirement. Harvard Law School Professor Charles Fried criticizes the idea of a national service for several reasons. He attacks the principle behind the national service as being contrary to our national heritage and right of liberty, while calling the practicalities of operating such a national service a "nightmare." As Professor Fried correctly points out, the costs and administrative headaches of establishing, monitoring, operating, and supervising such a national service would be beyond comprehension. The assets of such an operation would be overwhelmed by the liabilities involved, especially when one considers the service requirement is certain to be vehemently opposed as a breach of personal liberty.

Mr. President, these two articles illustrate the enormous drawbacks to both of the solutions proposed as remedies to the so-called All-Volunteer Forces problem. I ask unanimous consent that both articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 12, 1977]

A FAIR LOTTERY CANNOT CHANGE AN UNFAIR DRAFT

(By Peter J. Ognibene)

The draft was supposedly laid to rest four years ago, but the corpse keeps twitching. In his first visit to Capitol Hill after he was sworn in as Secretary of Defense, Harold Brown told the Senate Armed Services Committee that he favors a Pentagon proposal "to have a standby draft capability."

The chairman of that committee, Sen. John Stennis (D-Miss.), responded with an even stronger pitch for conscription. "Like it or not," he said, "we're going to have to go back to the Selective Service System for obtaining some of our men. The quicker we realize that and get it to the people so they know it, the better."

More recently, Sen. Sam Nunn, the Georgia Democrat who chairs that committee's panel on manpower, argued in these pages that "the All-Volunteer Force (AVF) may be a luxury that the United States can no longer afford." He contends that "the AVF has lived up to few of the expectations of its early proponents" and suggests "the government should begin now to explore possible alternatives to the AVF, such as a national service program for all our nation's young people."

Although the volunteer army does not work perfectly—what in government does?—the military has been getting sufficient numbers of volunteers for active duty. Moreover, the quality of those recruits has been steadily rising. In 1975, for example, 67 per cent of the male volunteers were high school graduates. Last year the percentage was 70.

The present "success" of the volunteer army is linked, no doubt, with the "failure" of the economy to provide civilian jobs for young people. High unemployment rates and recent military pay raises have made marching for Uncle Sam a relatively attractive proposition.

Equally important, but too often ignored by draft advocates, the armed services provide a route of upward mobility for some of society's least advantaged individuals. The military affords them an opportunity to learn skills with which they can earn a livelihood in or out of service.

But because financial incentives have helped make the volunteer army successful, some critics regard these recruits as "mercenaries." What they fail to realize is that conscription itself is an economic institution.

The draft is a tax. Indeed, that is the

central reality of conscription. It takes the labor of 19-year-olds at less than competitive wages to relieve the rest of us of a few dollars' tax burden. The government does not give businessmen patriotic appeals; it pays them the going rate for everything from fighter planes to floor wax. Should it do less for servicemen?

Because conscription is now a fading memory, it is easy to forget just how unfair the draft was. Millions managed to escape military service by getting deferments for college, critical occupations or parenthood. Although the draft lottery closed most of these escape routes, it could not eliminate the fundamental inequity: selectivity.

Any selection process that inducts some young men into the military but requires nothing of others is by its very nature unfair. Eliminating deferments and establishing a lottery did not do away with selectivity. It merely changed the way in which the few were chosen from the many.

Moreover, selectivity does not end with induction. It continues within the armed forces. While the college student may not be able to escape service when selection is by lot, he stands a relatively good chance of avoiding hazardous duty in time of war. Because he will probably score well on Army classification tests, he is more likely to wind up behind the lines as a clerk or technician. The less educated become foot soldiers.

In other words, a fair lottery cannot change an unfair draft.

Universal service is not the answer. For one thing, there is the problem of numbers. Some four million Americans turn 18 every year. The active and reserve forces can use, perhaps, 700,000 of them. What would the rest do?

Put them to work on public projects and you take jobs away from individuals with families to support. The cost, which would run into tens of billions of dollars, would swell an already large budget deficit and produce a small economic return. An underpopulated and embattled country such as Israel may need universal service to survive; the United States, fortunately, does not.

But above all, the draft violates the principle on which this nation was founded—the preservation of individual rights and liberties. Thus, conscription should be used only as a last resort. Short of an all-out war requiring huge armies in the field—an unlikely prospect when one nuclear weapon can wipe out several massed divisions—there can be no compelling case for the draft.

COMPULSORY PUBLIC SERVICE: A BAD PRECEDENT

(By Charles Fried)

Proposals for a program of compulsory public service for all young people have been making the rounds in congressional and editorial circles. One major network news commentator hailed such a program as an idea "whose time has come."

I disagree. In this, the beginning of our third century of liberty, it is shocking that so many should be ready to impose in so drastic and total a way on the liberties of a whole generational slice of the American population. And it is particularly disheartening that the liberties of our young people should be casually disposed of on such ill-conceived and essentially self-serving grounds.

The proposal, which has attracted so much favorable comment, is this: All youths—say at high school-leaving age—would be required to spend a year in some form of public service activity, but this obligation could be discharged by enlistment in one of the military services. The proposal is thought to be good in principle and good in practice. In principle, it is thought to affirm the notion of an obligation of public service. And practically it would help alleviate a problem which is showing up in the volunteer army. It appears that the volunteer army is turning out to be very expensive while still failing to attract recruits of a desirable quality. It is thought that by instituting a general obligation of service, many more will find it worth their while to discharge that obligation in the military, thereby improving the quality of the army and lessening the burden on the taxpayers.

The idea is wrong in principle and would surely be a nightmare in practice.

The idea is wrong in principle because the liberty of young people is worth no less than the liberty of middle-aged politicians and editorializers who would take from them the right to determine how to live their lives during a substantial period of time. I would not wish to denigrate the principle that we all have an obligation to serve our community, but the notion that we may be compelled to do so absent manifest necessity and some clear national emergency, is foreign to our traditions. The shoddiness of the proposal, indeed, reveals itself when we see that it really boils down to a desire on the part of the middle-aged to get something—a high quality defense manpower pool—without paying for it. If the nation needs a military establishment of a particular quality, then the nation as a whole should pay for it, and not force a small segment of the population to contribute its services unwillingly for nothing.

But if the argument of principle doesn't convince, the practicalities should. All one has to do is consider the difficulties of tens of thousands of local school boards in enforcing useful activities on high school students during some five or six weekday hours, to see how unlikely we would be to be able to provide and supervise a meaningful, compulsory year-long, 24-hour-a-day experience for every 18-year-old in the nation. (And make no mistake about it, desired effect of driving large numbers of youths into the military as a preferred alternative.)

I ask those who would casually deprive their fellow citizens of their liberty for a year of their lives, who would administer these programs? Who would determine what constituted appropriate public service alternatives? Who would enforce attendance, and discipline participants who snuck away for an hour, or a day, or a week? Who would keep order in the dormitories? Or would there be dormitories? What about drinking and drugs? Would there be exemptions for students? For persons engaged in essential activities? And so on.

I would have thought the loathing the American people have displayed for multiplication of bureaucracies and regulations would indicate that the last thing in the world the public would want at this point would be a program that turned over every 18-year-old in the nation (man and woman) to wholly undefined, non-existent set of institutions.

TAX RETURN OF SENATOR LOWELL WEICKER, JR., FOR 1976

Mr. WEICKER. Mr. President, in the interest of full financial disclosure, I ask unanimous consent that the joint tax return for 1976 of my wife and myself be printed in the RECORD.

There being no objection, the tax return was ordered to be printed in the RECORD, as follows:

1040 U.S. INDIVIDUAL INCOME TAX RETURN 1976

Lowell P. and Marie L. Weicker, Jr., Round Hill Road, Greenwich, Conn.

Your social security number: 079-26-8422.

Spouse's social security no.: 078-28-7717.

Occupation: U.S. Senator. Spouse's: Homemaker.

First names of your dependent children who lived with you: Scott, Gray, and Brian Bianchi.

Total dependents, 5.

9. Wages, salaries, tips, and other employee compensation (See Statement 1), $44,600.

10a. Dividends $8,916, less exclusion $200, balance, $8,716.

11. Interest income, $941.

12. Income other than wages, dividends, and interest (from line 37), $11,659.

13. Total (add lines 9, 10c, 11 and 12), $65,916.

14. Adjustments to income (such as moving expense, etc., from line 42), $3,000.

15a. Subtract line 14 from line 13, $62,916.

15c. Adjusted gross income. Subtract line 15b from line 15a, then complete Part III, $62,916.

16. Tax, check if from: Tax Rate Schedule X, Y or Z, $5,444.

17a. Multiply $35.00 by the number of exemptions on line 6d, $175.

17b. Enter 2% of line 47 but not more than $180 ($90 if box 3 is checked), $180.

18. Balance. Subtract line 17c from line 16 and enter difference (but not less than zero), $5,264.

19. Credits (from line 54), $11.

20. Balance. Subtract line 19 from line 18 and enter difference (but not less than zero), $5,253.

21. Other taxes (from line 62), $316.

22. Total (add lines 20 and 21), $5,569.

23a. Total Federal income tax withheld, $11,091.

24. TOTAL (add lines 23a through e), $11,091).

26. If line 24 is larger than line 22, enter amount overpaid, $5,522.

27. Amount of line 26 to be refunded to you, $5,522.

LOWELL P. WEICKER, Jr.
MARIE L. WEICKER.

April 15, 1977.

Preparer's signature: Wiendieck and Co., Greenwich, Conn.

10 Add line 8 and line 9, $27,076.

11 Divide line 7 by line 10, $0.00406.

12 Total U.S. income tax before any credits, $5,444.

13 General tax credit, $180.

15 Add line 13 and 14, $180.

16 Line 12 less line 15, $5,264.

17 Limitation on credit (line 16 multiplied by line 11), $21.

18 Foreign tax credit, $11.

Schedule D—Summary of Credits from Separate Schedules C.—

8 Foreign tax credit (line 6 less line 7). Enter here and on your tax return, $11.

EMPLOYEE BUSINESS EXPENSES

Employer's name: United States Senate, Washington, D.C.

1 Travel expenses while away from home on business:

(b) Meals and lodging, $3,000.

CAPITAL LOSS CARRYOVER

Section A.—Short-term Capital Loss Carryover.—

1 Enter loss shown on your 1975 Schedule D, $328.

2 Enter gain shown on your 1975 Schedule D, 0.

3 Reduce any loss on line 1 to the extent of any gain on line 2, $328.

4 Enter amount shown on your 1975 Form 1040, line 29a, $1,000.

5 Enter smaller of line 3 or 4, $328.

6 Excess of amount on line 3 over amount on line 5, 0.

Section B.—Long-term Capital Loss Carryover.—

7 Line 4 less line 5, $672.

8 Enter loss from your 1975 Schedule D, $13,832.

9 Enter gain shown on your 1975 Schedule D (Form 1040), line 5. If that line is blank or shows a loss, enter a zero, 0.

10 Reduce any loss on line 8 to the extent of any gain on line 9, $13,832.

11 Multiply amount on line 7 by 2, $1,344.

12 Excess of amount on line 10 over amount on line 11, $12,488.

Section A.—Short-term Capital Loss Carryover.—

1 Enter loss shown on your 1976 Schedule D (Form 1040), line 5, $209.

2 Enter gain shown on your 1976 Schedule D (Form 1040), line 13. If that line is blank or shows a loss, enter a zero, 0.

3 Reduce any loss on line 1 to the extent of any gain on line 2, $209.

4 Enter amount shown on your 1976 Form 1040, line 30a, $—1,000.

5 Enter smaller of line 3 or 4, $209.

6 Excess of amount of line 3 over amount on line 5, 0.

Section B.—Long-term Capital Loss Carryover.—

7 Line 4 less line 5 (Note: If you ignored lines 2 through 6, enter amount from your 1976 Form 1040, line 30a), $—791.

8 Enter loss from your 1976 Schedule D (Form 1040), line 13, $11,086.

9 Enter gain shown on your 1976 Schedule D (Form 1040), line 5. If that line is blank or shows a loss, enter a zero, 0.

10 Reduce any loss on line 8 to the extent of any gain on line 9, $11,086.

11 Multiply amount on line 7 by 2, $1,582.

12 Excess of amount on line 10 over amount on line 11, $9,504.

STATEMENT 1.—WAGES, SALARIES, TIPS, ETC.

Employers Name and Address: United States Senate, Washington, D.C. 20510.

Income tax withheld, $11,091.

Wages, Salaries, Tips, etc., $44,600.

BUDGET COMMITTEE ACTION THREATENS COMMUNITY DEVELOPMENT FUNDS FOR 50 STATES AND WOULD BE A DISASTER FOR HOUSING AND CONSTRUCTION JOBS

Mr. PROXMIRE. Mr. President, recently the Budget Committee in reporting Senate Concurrent Resolution 19, setting forth the congressional budget for fiscal year 1978, took two actions which will be a disaster to housing and community development if not overturned, and which will set precedents as to the proper role and jurisdiction of the Budget Committee which will greatly infringe on the rights and prerogatives of the legislative and Appropriations Committee.

FUNDS FOR EVERY STATE CUT

The Budget Committee determined that $500 million should be cut from the community development block grant funds. It further determined that funds for housing should be cut. In the latter case the effect would be cut back on about 75,000 new housing units. This would mean about 1,500 new starts on the average for each State. That in turn means about 3,000 jobs per State on the average or 150,000 jobs over the country.

WHAT GOOD ARE LEGISLATIVE COMMITTEES IF ACTION STANDS?

The Budget Committee acted in these specific ways before either the authorizing legislation had been passed by the Banking, Housing, and Urban Affairs Committee or the Subcommittee on HUD-Independent Agencies or the Appropriations Committee had determined at what levels of funding and what kinds of housing should be built.

It is one thing for the Budget Committee to set ceilings. It is quite another thing to say where the specific cuts should be made, what proportion of housing there should be in terms of the ratio between new construction and existing units, and the amounts and kinds of units to be built.

What good is the authorizing committee if the Budget Committee without hearings, without detailed testimony, and after spending only a minimum amount of time on the subject, makes these determinations?

CITY FUNDS AND JOBS AT STAKE

But far more than committee jurisdiction and personal pride is at stake here.

What is at stake is $500 million in community development block grant funds, carefully worked out by formula to meet the desperate needs of our cities and especially the needs of the older, decaying, central cities.

I ask unanimous consent that a table showing how the $500 million cut in community development funds would affect each State if the funds were taken from the entitlement cities, be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[Dollars in thousands]

State	1978 funding		
	As proposed by administration	With $500,000,000 cut	Amount of loss
Alabama	$64,095	$54,575	$9,521
Alaska	5,635	4,999	636
Arizona	26,899	22,314	4,575
Arkansas	32,743	28,648	4,095
California	323,760	275,365	48,395
Colorado	28,306	24,882	3,424
Connecticut	57,025	53,661	3,364
Delaware	8,324	6,932	1,392
District of Columbia	32,051	31,150	901
Florida	113,210	94,623	18,587
Georgia	69,819	60,262	9,559
Hawaii	13,383	11,364	2,019
Idaho	8,801	7,840	961
Illinois	203,472	171,614	31,858
Indiana	57,678	49,060	8,618
Iowa	33,116	28,540	4,576
Kansas	32,496	29,772	2,724
Kentucky	50,661	42,271	8,393
Louisiana	66,663	54,434	12,229
Maine	12,626	11,246	1,380
Maryland	54,950	46,235	8,715
Massachusetts	99,853	87,396	12,457
Michigan	149,323	127,883	21,440
Minnesota	59,523	51,598	7,925
Mississippi	40,257	34,193	6,064
Missouri	83,580	71,013	12,567
Montana	8,109	6,938	1,171
Nebraska	14,687	12,129	2,559
Nevada	4,492	3,747	745
New Hampshire	8,025	6,872	1,153
New Jersey	108,891	95,692	13,199
New Mexico	19,234	17,278	1,956
New York	393,743	339,097	54,646
North Carolina	69,134	60,291	8,843
North Dakota	7,339	6,422	917
Ohio	170,559	144,830	25,729
Oklahoma	38,258	34,291	3,967
Oregon	23,113	19,143	3,970
Pennsylvania	224,941	194,059	30,882
Puerto Rico	88,260	72,324	15,936
Rhode Island	18,916	16,670	2,246
South Carolina	33,045	27,194	5,851
South Dakota	8,710	7,642	1,068
Tennessee	63,221	54,934	8,287
Texas	198,039	167,447	30,592
Utah	15,711	12,945	2,766
Vermont	3,663	3,128	535
Virginia	63,538	56,024	7,514
Washington	46,854	38,987	7,867
West Virginia	24,792	20,193	4,599
Wisconsin	52,212	43,447	8,765
Wyoming	3,281	2,872	409

Mr. PROXMIRE. Mr. President, this is the most likely way the cut would be made. Every State would lose. Every entitlement city would lose. I also have a printout on the way the cut would affect each one of the entitlement cities. I will not burden the RECORD with this long table but it is available from the Banking, Housing, and Urban Affairs Committee or from HUD who provided it at my request.

150,000 JOBS AT STAKE

Further, Mr. President, this action will cost the country about 150,000 jobs. There are about two new jobs for each new housing start. There is one direct job in construction. There is also one indirect job for the goods and services which go with a new housing start—refrigerators, air conditioners, insulation, carpeting, draperies, water heaters, and housing and real estate services.

The action of the Budget Committee was specific. The specific funds cut would mean cutting back 75,000 units from new construction, it said. Cut the money and shift the funds from new construction to existing housing units, it said.

That is a disaster. Unemployment in the building trades is still over 14 percent—double the national average. Housing starts, even with the new figures, are 500,000 units below our national goal of 2.6 million units a year. Assisted housing starts would be about 80,000 this year and perhaps as many as 200,000 next year if the bill is not emasculated. But even those starts are 520,000 to 400,000 units short of the assisted housing goal of 600,000 units a year.

So jobs are at stake. The average State would lose 3,000 jobs as a result of the Budget Committee action.

HOUSING A TEMPTING TARGET DUE TO RIDICULOUS BUDGET METHOD

Let me make one final point. The cut made by the Budget Committee was a very tempting one because of the unique way housing is treated in the budget. The new budget authority for housing is based on the 40-year runout costs for new construction. Thus the so-called $6 billion cut in housing is largely a mirage. For example, an actual outlay of $150 million translates into $6 billion of budget authority. Or, conversely, a cut of $6 billion means a cut in outlays of only $150 million. This is why housing is such a tempting target.

If the same method were used with respect to the debt, the Budget Committee would have to raise the ceiling from $467 billion to $1.3 trillion or by almost 3 times or 180 percent. If the runout costs for the Government obligations the Treasury has sold were in the budget ceiling, in the same way that housing is included in the budget ceiling, we would have to add $800 billion to the ceiling.

I warned about this last February and I ask unanimous consent that a copy of the statement I made then be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Senator William Proxmire (D-Wis) warned Wednesday that "Because of a little-known and absurd new budget procedure housing programs of the federal government may soon take it on the chin compared with other priorities. The reason is that money in the budget for most programs is calculated on a one year basis while new budget authority for the major housing programs is now calculated on a 15-, 20- or 40-year basis.'

Proxmire is Chairman of the Senate Banking, Housing and Urban Affairs Committee and Chairman of the Subcommittee on HUD-Independent Agencies of the Senate Appropriations Committee.

"The situation is so absurd that if the obligation of the government to pay back the principal and interest on its outstanding bonds—a solemn, contractual obligation—

were treated the same way housing is treated, $800 billion would have to be added to budget authority and the Congressional ceiling for budget authority would have to be raised from $467 billion to $1.3 trillion or by almost 3 times or 180 percent.

"In the long run there is no way 40-year housing money can compete with one year money for other programs in the budget.

"It is also true that those who devised this phoney budget method of dealing with housing programs were the same people who slapped on the 1973 assisted housing moratorium or carried it out. It was their purpose to destroy the housing programs, and this ridiculous budget method was just one more nail in the coffin.

"Under the new system, which is one of the worst legacies of the Nixon-Ford Administration and its Office of Management and Budget, the odds are raised that housing will be the first program to be cut and the last to be funded. Here's why:

"Suppose the proposed new budget authority upon which Congress sets a ceiling in the Budget Resolution were $10 billion too high. The $10 billion could be cut in one of two ways. It could be reduced by a painful cut of $1 billion in each of 10 different programs—education, military pay, health research or job programs, for example. Or because housing money is calculated on a 40-year basis, a cut of only $250 million in public housing funds or funds for new construction under the rental program called Section 8 would accomplish the same $10 billion reduction ($250 million times 40 years equals $10 billion).

"Given this choice, the temptation to cut housing instead of other programs will be overwhelming. Small cuts in housing outlays can mean 40 times that amount of cuts in budget authority for other programs.

"Conversely, because an increase in most housing programs must be multiplied by 40, housing will stand at the end of the line when the priorities are determined.

"Housing should be treated like every other program—no better and no worse. But for it to be almost the only budget item to get the 15-, 20- or 40-year treatment will put it in an impossible position to compete with other needs."

Mr. PROXMIRE. Mr. President, on jurisdictional grounds alone the action of the Budget Committee should be reversed. But more important, in the name of the cities and housing and jobs, it must be reversed.

I ask unanimous consent that a copy of a letter to Members of the Senate and signed by the ranking majority and minority members of the Housing Subcommittee of the Banking, Housing and Urban Affairs Committee (Mr. SPARKMAN and Mr. BROOKE) and of the Appropriations Subcommittee on HUD-Independent Agencies (Mr. PROXMIRE and Mr. MATHIAS) be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 20, 1977.

The Honorable the UNITED STATES SENATE,
Washington, D.C.

DEAR COLLEAGUE: We are writing to you to join us in restoring the Administration's budget request for housing and community development in the First Concurrent Resolution on the Budget for Fiscal Year 1978.

As you know, the Budget Committee has reported targets that assume cuts below the President's request of $500 million in Budget Authority for Community Development and $6.2 billion for housing assistance to lower income families.

We believe these cuts are unwarranted and should be restored. They not only fly in the face of Carter Administration proposals, but also ignore the recommendations of the Committee on Appropriations and Committee on Banking, Housing and Urban Affairs. They could result in reduced funding for over 500 cities and counties, as well as the loss of 75,000 new housing starts and more than 150,000 construction and related jobs. Accordingly, we shall offer an amendment to restore the Administration's request for $4 billion in community development and $32.8 billion in housing assistance when the Budget Resolution is considered on the floor.

We urge your support for this amendment for the following reasons:

1. Our Committees have considered the Administration's request for funding for the community development program and housing assistance to lower income families for Fiscal Year 1978. The cuts proposed by the Budget Committee would seriously jeopardize the new Administration's pledge to achieve the housing goals set by Congress and to help the Nation's cities, counties and smaller communities carry out needed rehabilitation and development activities.

2. The proposed cutback in housing assistance will not reduce budget outlays for housing in either 1978 or 1979, according to estimates prepared by the Congressional Budget Office. (Unlike other Federal programs, budget authority for housing assistance to low and moderate income families is computed by multiplying the program level times the maximum number of years the contract payments may be made. For the housing assistance program, this may be as many as 40 years. This multi-year treatment grossly exaggerates the budget impact of housing programs compared to other programs.)

The proposed cutback in community development assistance will, because of the lead time required, reduce outlays by only $34 million in 1978 and by $190 million in 1979.

In short, the proposed budget cutbacks of $6.7 billion in housing and community development will reduce total budget outlays by only $34 million in 1978 and by less than $200 million per year in 1979 and 1980.

3. It was argued during the markup of the Budget Resolution that a cutback in community development funding would not be noticed because there were other program funds being made available (for example, CETA and Public Works). But this argument failed to acknowledge that community development funds were requested by the Administration to carry out a new urban initiative, which is very different from the CETA and Public Works programs.

4. It was argued that housing cuts are necessary if we are to head off massive spending commitment in 1980. But the Office of Management and Budget has given its approval to the spending request for housing and has already taken its future budget implications into account.

5. The Budget Resolution has the objective of setting ceilings for the total budget and for major functions. It is not supposed to set funding levels on a program-by-program basis. Nevertheless, the Committee has, in these actions, not only identified the programs to be cut, but, in the case of housing assistance, has even identified the type of housing that is to be curtailed in HUD's assistance programs.

We believe this action goes well beyond the Budget Committee's proper jurisdiction. We believe that the authorizing Committee has responsibility for programmatic decisions and that the Appropriations Committee has responsibility for program spending. The Budget Committee's action, if not reversed now, will establish a precedent that will weaken the entire Committee structure of the Senate.

Sincerely,

EDWARD W. BROOKE,
Ranking Minority Member.
CHARLES MCC. MATHIAS, JR.
Ranking Minority Member, HUD-Independent Agencies Appropriations Subcommittee.
WILLIAM PROXMIRE,
Chairman.
JOHN SPARKMAN,
Chairman, Subcommittee on Housing and Urban Affairs.

GOLDWATER'S ADDRESS AT TAMKANG COLLEGE OF ARTS AND SCIENCES

Mr. GOLDWATER. Mr. President, over the Easter recess when the Senate was not in session, it was my privilege and pleasure to have been invited to address Tamkang College of Arts and Sciences in Taipei, Taiwan. This gave me the chance of visiting this most astounding and unique country which has risen from nothing to one of the world's great producers in a matter of just over 20 years. When one asks the question of why, the answer is that these people are free, and one only needs to look across a relatively few miles and see the mainland of China where the people live in abject poverty, deprived of freedom, living under the tyranny of communism.

As I commented in my remarks to the students at the college, I think it is nothing short of criminal the attitude my country has relative to the free Chinese on Taiwan. Our new President and his administration have not yet acceded to the request of the Ambassador of this country for an audience with the State Department or with the President. To the contrary, both the President and the State Department seem to go out of their way to kowtow to the rulers of Red China. There is no way that I can see any benefit to our country arising outside of a little trade by the so-called normalization of relations between Communist China and the United States. They would use this normalization only to bolster their declining prestige among their own people and as sort of a threat that might be waved at the Soviets poised on their border.

I spoke about these things to the students because I could sense their very deep and immediate concern over the fact that an honorable people like the United States had been acting dishonorably and show every sign of continuing to do that relative to our treaties and obligations to friends that we have had for many, many years. I ask unanimous consent that the remarks I made before this college be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

GOLDWATER'S ADDRESS AT TAMKANG COLLEGE OF ARTS AND SCIENCES

Two years ago, I was here on a sad journey, to say farewell to a friend, a world leader, a gentleman, whose great desires for the ROC obviously are being carried forward—for-

ward in the resolute manner he would have wanted. His pride in his country and his countrymen are now yours. The young of China and your resolute adherence to his concepts of life will make better people of you and—a China you and the world will always be proud of.

My friends often ask me why I have such a respect and affection for China—Free China that is. Well it goes back a long way with us westerns, for the Chinese made great contributions to the building of our land and are still adding daily to our lives. Then when your first young men left their homeland to come to my country to learn to be military aviators it was my pleasure to have been one of their instructors at Luke Air Field in my native Arizona and I have followed their illustrous careers with great pride.

Today I am honored to once again be in Taiwan and to have the opportunity to visit with you. At the outset let me explain to you that in my country there is a law which prevents any American from performing acts of foreign policy with the leaders of other countries. But we have no law which can prevent me, an American from discussing with you concepts of our foreign policy and that is what I want to do today.

It will involve the Republic of China, Communist China and the relationship of my country with both, as it is, as it should be, and I pray, as it will be. But let me, if I can, progress through this subject with as much logic as I can muster. Your concept of living puts forward the family, respect for each other and humankind and the brotherhood of man. Also that faith is the one ingredient without which nothing can succeed. Faith in our word, and in each other. These are the natural philosophies of men dedicated to freedom. They are philosophies not even known to the Communists. The Communists is the enemy of Those Philosophies—These are the basic reasons Communism can never be a permanent substitute for freedom. The basic reason why some day the Chinese who live on the mainland will join you in freedom.

CARTER'S SON

I was amazed to read in your press last week that President Carter, my president who has loudly and consistently and rightly proclaimed his belief in Human Rights would send his son to a part of this world where those rights have not existed for years. My President should have instructed his son to stop in Taiwan on his way back to Washington to see the difference between your freedom and their dominated lives and the results. In fact all Americans who go to the lands of Communism wherever they may be, for whatever reason, should touch base with the land of freedom as they return home.

More, as I progress, let me remind you that free men, you and I, share the words of Confucius "Do not do unto others what you would not have others do unto you." As these words are basic to the philosophy of Confucius, they are basic to the concepts of Christianity and all other creeds of religion. We live by them, or try to, in my country. But are they ever heard in Red China or any other slave country? No, and they never will be.

With those basics before you, I would now like to in as clear a manner as I can proceed to the policies of my country in which you are most concerned and I know you are concerned. You are concerned that neither my President, Mr. Carter nor his Secretary of state Mr. Vance has thus far honored the request of your ambassador in Washington for an audience. And I am concerned. You are concerned not because of the neglect but because it might be an indication that the Carter administration is contemplating an action you feared on the part of President Nixon and Ford, an action which did not take place—the diplomatic recognition of Red China.

Let us look into the recent past and some solid truths to explore this threat. It will be a threat only if my country has forgotten, and let me remind you there is an old saying "What is past is prologue, study the past." If my country has learned nothing else from the recent past, we have learned that no foreign policy can be followed without strong, understanding and lasting public support. It must rest on consensus. It will come only if that policy becomes public policy, only if its broadness becomes available to open appraisal, scrutiny and approval. There is no place for mystery or secrecy in arranging the final design. My country was humiliated in Vietnam because two presidents refused the fighting man victory and were dishonest in their explanations of the design of the policy. We cannot suffer that again, for if we do, we will cease to be a power, we will be attacked by the jackals of the world.

Now a word about "normalization."

NORMALIZATION

If normalization means rejecting a friendly people with whom we have treaties and agreements, then let me tell you that America respects friends and is proud of its 200 years of honorable recognition of the metes and bounds of treaties if it means, as I believe it to mean, an approach to normal business relations then we should be told that. Americans do not treat honor lightly nor with disrespect. I suggest that it is not our responsibility to pursue normalization, whatever the term means. We did not denormalize, nor did the people on Taiwan, the way of life on the mainland. Let the Peoples Republic of China begin that process by the granting of a free way of life tied to the historic philosophy of Chinese living.

Now at this point in my remarks I remind you that I am only discussing aspects of my country's foreign policy. If these remarks and those which follow seem to advocate, they are the advocacies of one American citizen. So let us proceed.

Your original concern came from an unannounced visit of President Nixon to Peiping. I learned of it flying west from Washington to California over my two-way radio and I was asked to keep my mouth shut. I did for I felt it would form a test of the Soviet attitude. It did test them and as we say "they were shook up." That visit was followed by others by Nixon and Ford. Some 9 or 10 visits of Presidents of my country or their Secretaries of State followed and now we learn that once again we will humble ourselves by kow towing visits to that bastion of slavery, Red China.

I can understand very easily your deep and troubled concern. But let me tell you that after that first visit to Peiping and after each of the others and as late as three weeks ago, Dr. Kissinger assured me that neither the freedom of Taiwan nor the sanctity of our treaties were on the agendas nor were they even discussed, that no agreements have ever been made which would endanger our status quo. Let me emphasize this important point, that up to this minute, in the word of a friend, the former Secretary of State, nothing has altered the situation between my country and Taiwan. So I pray that the glamorous binge is over, that from here on in the load is on the shoulders of the Red Chinese to earn the respect of the world.

NO COMMITMENT

But there is another point of concern on which I will touch—The so called "Shanghai Communique" signed at Shanghai by Nixon in 1972. It is not a treaty having ever received the advice and consent of our Senate. It has no commitment in our law. It is ambiguous and does not state any goal of diplomatic relations—only two indeterminate words "understanding" and "contact" are the subject of agreement.

This "communique" having never received implementation, has in the acceptance of International Law "Fallen by the wayside." Now before concluding and I dislike using that word, a brief observation on the "Sino-American mutual defense treaty."

For a little over 100 years the periphery of the Pacific has been the central point of American Foreign Interest. Doubt that? Well, remember that when the unfortunate remark was made in my country causing doubt of that interest, the Korean war resulted. It is not yet over, but the interest of my country in the Pacific remains the same. Not mind you a territorial interest, but an interest of mutuality. An interest to provide the Pacific with our concern over Peace and Freedom. The defense treaty is but a part of that and I have heard nothing in the halls of our Congress nor from Presidents nor from Secretaries of State which indicates any desire to back away from the covenants of that treaty.

So having unburdened myself of the thoughts and concern of one American, let me make one more final observation. The total interest of Red China in whatever is meant by normalization is for their own good. There is nothing mutual in it. They rightly fear the Soviets poised on their North border. Their Government rightly fears a growing reaction of the Chinese who are forced to live under it. So they look to my country. The United States of America in effect joins them as an indication of international acceptance and internal placation.

I feel certain that I speak for the vast majority of Americans when I say "Yes" we want world peace—we want it in every quarter of the world—but we will not formally recognize the enslaving concepts of Communism nor will we engage in the dishonorable act of an abrogation of friendship and mutual respect, with the ROC.

Goodbye for the moment—but a plea from one whose affection for you is unashamedly known and shown. Carry on the teachings of Dr. Sun Yat-sen and the dedicated work of General Chiang Kai-shek.

You stand today as a monument and a tribute to what free people can do.

COURT CURTAILS FCC POWER

Mr. PROXMIRE. Mr. President, I call the attention of colleagues to a recent U.S. Court of Appeals, District of Columbia Circuit, decision involving the Federal Communications Commission. This decision set aside the FCC's rules governing the type of shows that can be broadcast over pay cable television.

This decision needs to be noted because it illustrates the problem of Government regulation of the broadcast industry, a situation which my bill, S. 22, the First Amendment Clarification Act of 1977, is designed to correct.

I introduced S. 22 in January in an effort to provide legislation which would give the United States the full benefit of a free press, electronic as well as printed. Enactment of S. 22 would repeal section 315 of the Communications Act of 1934, which contains the equal time rule and the authorization for the FCC's fairness doctrine.

By eliminating section 315, we can remove Government from where it does not belong—the news regulation and selection business. Fortunately, the courts have already begun to recognize that our current laws allow unwarranted Government regulation of the broadcast indus-

try. The FCC has had some of these unjustified powers removed by court decisions in several recent cases.

Today I am pointing out a case involving the FCC's power to restrict the number and type of television productions that can be shown by cable television. These rules restricted cable television's use of feature films and certain sports events. Ostensibly, these regulations were designed to prevent any siphoning of popular special events from regular television markets.

The court of appeals, however, did not find any evidence indicating the FCC needed any regulatory powers to prevent such siphoning. The court's opinion stated that the FCC had no evidence to support its alleged need to regulate cable television.

The court also found that the FCC had improperly allowed private comments from interested parties with a stake in the issue. According to the court, these comments from private, concerned parties removed the credibility from the FCC's decision process. Consequently, the court instructed the FCC to start over in its evaluation of pay television regulations.

The crux of this court decision is that the FCC has again been found overregulating the broadcast industry. It entered an area in which it did not belong.

Mr. President, one of the reasons I introduced S. 22 was to establish the principle that there is no inherent difference between the print and broadcast media when it comes to first amendment freedoms. We have long allowed the print media to operate without Government regulation, but we have never extended the same right to the broadcast media, despite their long record of responsible reporting, programing, and service to their respective communities.

Government regulation of the broadcast industry has impaired television and radio's ability to provide the best possible news coverage. The real loser in this situation is the American people.

An editorial in the Wall Street Journal of March 29 criticized this situation while praising the court's decision restricting FCC power. The editorial pointed out:

Few federal agencies engage in more dubious activities than the Federal Communications Commission, and that's saying a lot. In the exercise of its congressional mandate it has all too often infringed on both the antitrust laws and the First Amendment guarantee of free speech.

The editorial praised the court decision for striking down an FCC misuse of power in an area where it did not belong. The editorial and the court agreed that the FCC had indulged in overregulation of the broadcast industry.

Mr. President, this type of court decision can help to improve the situation, but it cannot solve the entire problem of overregulation. We must take the FCC out of the regulation business by eliminating the fairness doctrine and the equal time rule. Only then will broadcasters be on an equal footing with the print media under the first amendment.

I ask unanimous consent that the Wall Street Journal editorial of March 29 and a Washington Post article of March 26 describing the court's decision be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 26, 1977]

COURT VOIDS FCC RULES ON PAY TV: THREE-JUDGE PANEL CRITICIZES REASONING BEHIND REGULATIONS

(By Timothy S. Robinson)

A federal appeals court here yesterday set aside the Federal Communications Commission's rules restrictng the type of shows that can be broadcast over pay cable television.

The rules among other things, prohibit cable TV from showing feature-films more than 3 but not less than 10 years old and certain sports events such as World Series and football games shown on regular television within the previous five years. The rules also limit the number of regular season sports events and all types of series shows that can be offered.

In overturning the 2-year-old regulations, the three-judge U.S. Court of Appeals sharply criticized the FCC's reasoning behind the TV regulations, the agency's justification for policing the content of cable television, and the manner in which the specific cable TV rules were adopted.

The court found that the FCC had improperly heard private comments from parties involved in the pay cable television issue. It told the commission that its proceedings were so tainted with these secret comments that it should start anew in considering any pay television regulations.

It is unclear what immediate effect the ruling will have on the burgeoning cable television industry. The use of coaxial cables, instead of standard airwave broadcasting techniques, allows companies to provide to home television viewers, for a small monthly fee, a wide range of special events that are not available on commercial television channels.

Approximately 1 million persons already subscribe to more than 350 cable television systems across the United States, according to FCC and cable television industry representatives.

In the Washington metropolitan area, about 5,400 persons subscribe to Reston's struggling cable television company to view regular programming from Washington and Baltimore's television channels as well as local Reston programming and first-run movies.

Cable television industry representatives praised yesterday's ruling, which appears to re-open the whole spectrum of the types of programs that can appear on their outlets.

"We're elated with the decision. We think it's a true reflection with what we've said all along—the FCC should not be constraining the marketplace," said National Cable Television Association President Robert Schmidt.

An FCC spokesman declined comment on the lengthy opinion late yesterday, saying the agency's attorneys were studying it.

The stated purpose of the FCC rules was to prevent popular special events from being "siphoned" away from the regular television markets in competitive bidding situations between regular networks and pay cable television companies.

In its unsigned opinion, the U.S. Court of Appeals said there was no evidence as to such "siphoning" and that therefore the FCC had no evidence to support its alleged need to regulate the pay cable television industry.

Even if the agency had the specific authority to regulate pay cable television and the evidence to do so, it acted improperly in passing the rules to prevent "unfair competition" between conventional and cable television, the court added. The Justice Department also had challenged the FCC's rules.

The court said that "at a minimum the commission, in developing its cable television regulations, was required to demonstrate that the objectives to be achieved by regulating cable television are also the objectives for which the commission could legitimately regulate the broadcast media."

The court found further that the FCC "had in no way justified its position that cable television must be a supplement to, rather than an equal of, broadcast television. . . . We cannot fathom how the commission reached the conclusion that the balance here should be struck in favor of regulation" of the cable television industry.

The three judges—U.S. Circuit Court Judges J. Skelly Wright and George MacKinnon and U.S. District Court Judge Stanley Wiegel—also found that the rules violated the First Amendment by "serving no purpose" in prohibiting the showing of certain events.

Much of the court's opinion focused on the alleged improper contacts between parties in the case and the FCC commissioners and staff. Others not directly involved in the case—including members of Congress, members of the trade press and representatives of various performing arts groups—also made questionable contacts to discuss alone and in confidence rather than in public the merits of the rules being reviewed by the FCC, the opinion said.

[From the Wall Street Journal, Mar. 29, 1977]

CHIPPING AT THE FCC

Few federal agencies engage in more dubious activities than the Federal Communications Commission, and that's saying a lot. In the exercise of its congressional mandate it has all too often infringed on both the antitrust laws and the First Amendment guarantees of free speech.

It is thus gratifying to see that a federal appeals court in Washington has declared unconstitutional and improper certain FCC restrictions on the type of program materials cable TV companies can acquire. It is to be hoped that this will be the first step in a thorough rollback of the FCC's authority—and, more importantly, congressional interference—in the program content of electronic forms of communication.

The FCC itself has had some misgivings in recent years about how much power it should have over program content. The FCC commissioners have been in a better position than anyone to see the constitutional difficulties that arise when Congress tries to set up a mechanism for restricting the exercise of free speech in a limited area of communications. The concept that the airwaves belong to the public is a justification for technical regulation of broadcasting but wears thin as rationale for rules on program content. When it comes to cable TV there is not even the public ownership argument, except to the extent—not at issue in this case—that cable companies pull some of their programming from broadcasts on the airwaves.

The FCC restrictions on cable that the appeals court rejected are very remote indeed from the public airwaves doctrine. They are mainly designed to protect on-the-air broadcasters from direct competition from cable companies for programming material. They limit the ability of cable firms to bid for first-run movies and certain major sports programs.

In part, the decision rested upon a failure of on-the-air broadcasters to demonstrate that they would in fact be damaged by greater competition from cable TV for program material. The court held that the FCC had taken no pains to find out what the effect of open competition would be.

But it also held that the FCC rules infringed on the constitutional guarantee of free speech and this finding, to the extent that it is upheld by the Supreme Court and extended to other specific actions by the federal government, has importance well beyond the television industry.

The right of free speech is not a gaurantee to broadcasters, newspapers, magazines and the like but to the American people. As electronic communications technology advances, opening up ever more ways of communicating, it becomes increasingly infringement with the free flow of information. Cable TV offers some special opportunities for communication, as do a number of other electronic forms. Congress finds it almost irresistible to try to make its influence felt in this area. It is hoped the courts will continue to erect barriers to that urge.

FINAL FEDERAL ELECTION COMMISSION REGULATIONS

Mr. CANNON. Mr. President, on Wednesday, April 13, 1977, the regulations of the Federal Election Commission were formally promulgated as final regulations.

I ask unanimous consent that the formal notice of the Federal Election Commission, which appeared in the Federal Register on April 13, 1977, be printed in the RECORD.

There being no objection, the notice was ordered to be printed in the RECORD, as follows:

[Title 11—Federal Elections, Chaper 1—Federal Election Commission, (Notice 1977–23)]

PROMULGATION OF REGULATIONS

Agency: Federal Election Commission.

Action: Final Regulation.

Summary: This rule establishes the effective date for Commission regulations implementing the Federal Election Campaign Act of 1971, as amended, that were published earlier. The delay in setting the effective date is the result of the Congressional review period required by statute for Commission regulations.

Effective Date: April 13, 1977.

For further information contact:

Daniel J. Swillinger, Assistant General Counsel, (202–4060).

Supplementary information: The Commission, by this notice, is promulgating its regulations interpreting the Federal Election Campaign Act of 1971, as amended. The regulations were published in proposed form on May 26, 1976, June 25, 1976 and July 9, 1976 in the FEDERAL REGISTER. The regulations were adopted by the Commission and transmitted to the Congress on August 3, 1976, as required by 2 U.S.C. § 438(c), and 26 U.S.C. §§ 9009(b) and 9039(b). The regulations were published in the FEDERAL REGISTER on August 25, 1976 at 41 FR 25932. Because the 30 legislative day review period did not run prior to Congressional adjournment, the regulations were resubmitted to the Congress on January 11, 1977, containing amendments to the August 10, 1976, at 41 FR 38522 and October 18, 1976 at 41 FR 45952 and subsequently adopted by the Commission.

The 30 legislative day period having run on March 30, 1977, the Commission now promulgates the regulations as published on August 25, as amended by the notices of September 10 and October 18. Reprints of the FEDERAL REGISTER publication may be obtained from the Commission's Office of Public Information, 1325 K Street, N.W., Washington, D.C. 20463, (202) 523–4068.

VERNON W. THOMSON,
Chairman for the Federal Election Commission.

11 CFR Chapter I is adopted, effective April 13, 1977, as published on August 25, 1976 (41 FR 35932), with the following changes:

PART 102—REGISTRATION AND ORGANIZATION OF POLITICAL COMMITTEES

1. Section 102.9 is amended by revising (c)(3)(iii); the introductory text of (c)(4); and (c)(4)(ii) to read as follows:

§ 102.9 Accounting for contributions and expenditures.

* * * * *

(c) * * *

(3) * * *

(iii) The particulars of the expenditures; and

* * * * *

(4) When a receipted bill is not available, the treasurer may keep—

* * * * *

(ii) The bill, invoice or other contemporaneous memorandum of the transaction supplied to the committee by the payee containing the same information as referred to in paragragh (3) of this paragraph.

* * * * *

2. The second sentence of § 102.10 is revised as follows:

§ 102.10 Petty cash fund.

* * * If a petty cash fund is maintained, it shall be the duty of the treasurer of the political committee to keep and maintain a written journal of all disbursements, including the particulars of each disbursement from the fund. Such a change would make this section consistent with § 102.9(c)(3)(iii) as revised in subparagraph (1) above.

PART 104—REPORTS BY POLITICAL COMMITTEES AND CANDIDATES

3. In § 104.2,b)(9), the text beginning with "together with the amount, date, and purpose * * *" is deleted and the following substituted therefor:

§ 104.2 Form and content of reports.

* * * * *

(b) * * *

(9) * * * together with the amount, date and particulars of each such expenditure and the name, address of, and office sought by, each candidate on whose behalf such expenditures were made.

* * * * *

PART 114—CORPORATE AND LABOR ORGANIZATION ACTIVITY

4. Paragraph (c)(2) of § 114.4 is revised as follows:

§ 114.4 Nonpartisan communications.

* * * * *

(c) * * *

(2) A corporation or labor organization may distribute or reprint (in whole) any registration or voting information, such as instructional materials, which have been produced by the official election administrators for distribution to the general public. A corporation or labor organization may distribute official registration-by-mail forms to the general public if permitted by the applicable State law. The registration forms must be distributed in a nonpartisan manner, and the corporation or labor organization may not, in connection with the distribution, endorse, support, or otherwise promote registration with a particular party.

* * * * *

PART 134—EXAMINATIONS AND AUDITS; REPAYMENTS

5. Paragraph (c)(2) of § 134.3 is revised as follows:

§ 134.3 Liquidation of obligations; repayment.

* * * * *

(c) * * *

(2) If on the last day of candidate eligibility there are net outstanding campaign obligations, any matching funds received thereafter may be retained for a period not exceeding 6 months after the end of the matching payment period in order to liquidate those obligations. However, as of the date when the amount or amounts of matching funds received after ineligibility equal(s) the amount of the candidate's net outstanding campaign obligations, the candidate shall be obliged to repay to the Treasury that portion of any unexpended balance remaining on that date in the candidate's accounts (less the matching payments so received) which bears the same ratio to such balance as the total amount received from the matching payment account bears to the aggregate of all contributions and matching funds deposited in all the depositories through that date. Repayment shall be made within 30 days thereafter, but not later than 6 months after the end of the matching payment period.

SMITHSONIAN WINS APRIL "GOLDEN FLEECE" AWARD

Mr. PROXMIRE. Mr. President, my "Golden Fleece of the Month" award winner for April is the Smithsonian Institution, which spent nearly $89,000 of public funds in producing a dictionary of Tzotzil, an obscure and unwritten Mayan language spoken by 120,000 corn-farming peasants in southern Mexico.

To make matters worse, this dictionary records the specific dialect spoken by only about 10,000 members—or a mere one-twelfth—of this already small group.

To top it off, there are no Spanish definitions in the dictionary and thus, as acknowledged in the volume's introduction, it is essentially useless to even this tiny band of peasants.

All this adds up to spending the taxpayers' money in a way that does not make sense in any language.

Mr. President, as Senators know, I make monthly "Golden Fleece" awards for the biggest or most ironic example of wasting Federal tax funds. These monthly awards are followed by a "Fleece of the Year" winner in late December.

I should point out, too, that I am a member of the Senate Appropriations Committee, which oversees the Smithsonian Institution's budget.

An attempted justification for this expenditure of public funds includes the following statement from the dictionary's introduction:

> General dictionaries of obscure languages are not fashionable, but if the understanding of human cultural behavior is the goal of anthropology, and if language is, in a sense, a "mirror for man," the pragmatic and semantic investigation of man's socially patterned linguistic habits is surely relevant.

Yet that same introduction contains other statements which raise serious doubts about the wisdom of spending tax dollars on such a project. Let me cite some specifics.

First, the dictionary's introduction, which was written by the same person who compiled the volume, contains this passage:

> I have been asked how I secured the information in this dictionary. And aside from the techniques described for the botanical section, I have no answer. I know that sober

and drunk we laughed and groaned and chatted in "the true language" for ten days and ten years, in museums, and on mountain trails, shivering in icy San Cristobal rooms, and basking beneath a Zinacantec sun.

To say the least, this description of "research technique" makes me wonder about the worth of this volume and certainly about spending public funds to support it.

Second, the dictionary's researcher made this comment in the introduction about the absence of Spanish definitions:

My main regret is that this dictionary bears heavy witness to the school of imperialistic anthropology—lacking Spanish definitions, it could have but one use for the Zincantecs, the same alluded to discretely by Don Juan, "You know what we do with paper in Mexico."

This remark speaks for itself. I, for one, do not think we should spend public money to produce "paper" for that purpose.

And finally, the compiler of this volume, in the "acknowledgments" section, uses the phrase "soon to collect dust on library shelves" in referring to this tome. That helps me make my final point. I am not saying the dictionary is useless or without merit. But we must have a set of priorities when it comes to spending public funds. The shortcomings of this work and its limited utility make it, in my view, not worth the public money spent, however, worthy it might be as the object of funding from other sources.

I recognize, of course, that some of the statements I have quoted were made tongue-in-cheek. And I certainly appreciate the candor and sense of humor underlying these remarks. But this does not help much in justifying the Federal funds that were spent on this project.

My criticism, I should emphasize, is of the Smithsonian's lack of judgment in spending taxpayers' money for this purpose and in no way reflects adversely on the competence and skills of the scholar who produced this work.

Let me point out, too, that the Smithsonian Institution has recently been criticized by the General Accounting Office for creating two private corporations to convert millions of the taxpayers' dollars into "private money," which it then allegedly spends outside the reach of Federal restrictions. One of those corporations provided over half the grant money for this dictionary project. This strikes me as a good example of what the GAO report might have had in mind.

I do not know how to say "We've been had" in Tzotzil, but that about sums up my feelings when I learned that Federal funds had been used to help produce this dictionary. For that reason, the Smithsonian Institution is more than deserving of the "Golden Fleece" award for April.

SUPPORT OF MOREHOUSE COLLEGE

Mr. TALMADGE. Mr. President, the Georgia General Assembly, while in session in Atlanta, adopted a resolution which, for myself and my colleague, Senator NUNN, I bring to the attention of the Senate, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

A RESOLUTION

Commending and urging the support of Morehouse College; and for other purposes.

Whereas, the number of physicians and dentists in rural and urban inner city areas of Georgia are far too few for adequate health care to be given to the people of Georgia who reside in these areas; and

Whereas, existing medical schools are not producing physicians in numbers sufficient to meet the health needs of Georgia's inner city areas and rural communities; and

Whereas, it has been learned that Morehouse College is developing a program in basic medical science which will satisfy some of the requirements of the M.D. degree; and

Whereas, Morehouse College has the will and ability to develop a quality program in basic medical sciences which will substantially increase the number of physicians who will dedicate themselves to serving as primary care physicians and family practitioners in areas of greatest need; and

Whereas, Morehouse College has expressed its intention to exert every effort in the accomplishment of this goal and, further, intends to do all things necessary to develop the above-mentioned program into a degree-granting institution.

Now, therefore, be it resolved by the General Assembly of Georgia that this body hereby commends the administration, faculty and staff of Morehouse College for their concern and commitment in the area of medical education, and hereby pledges its support to the efforts of Morehouse College in the development of the needed financial resources for land acquisition, construction of facilities, curriculum development and other needs for this new medical school, which will train more physicians for our underserved poor and minority communities.

Be it further resolved that this body endorses the campaign for program, endowment and construction funds for the developing School of Medicine at Morehouse College and has evidenced such support by providing funding in the amount of $1,000,000 in the Appropriations Act for Fiscal Year 1978, which funds are contingent upon the availability of federal funding for the establishment of such School of Medicine.

Be it further resolved that appropriate copies of this Resolution be transmitted to the Honorable George Busbee, Governor of Georgia; Liaison Committee on Medical Education of the Association of American Medical Colleges; the National Medical Association; the Medical Association of Georgia; the Georgia State Medical Association; the Atlanta Medical Association; the Medical Association of Atlanta; the Assistant Secretary of Health, Education and Welfare; the Administrator, Health Resources Administration; the Chief of the Institutional Resources Branch of the Department of Health, Education and Welfare; the Subcommittee on Health, Senate Committee on Labor and Public Welfare; the Subcommittee on Health and Environment; and the House Committee on Health and Ecology.

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

Mr. HUMPHREY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that six such notifications were received between April 8 and April 12, 1977.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room S-116 in the Capitol.

S. 1303: THE LEGAL SERVICES CORPORATION ACT AMENDMENTS OF 1977

Mr. CRANSTON. Mr. President, I am especially proud to be an original sponsor of S. 1303, the Legal Services Corporation Act Amendments of 1977, introduced yesterday by the distinguished chairman of the Subcommittee on Employment, Poverty, and Migratory Labor (Mr. NELSON). The bill contains many provisions on which I collaborated with the Senator from Massachusetts (Mr. KENNEDY), another original sponsor. We are joined by those most steadfast friends of Legal Services, our chairman of the Human Resources Committee, the Senator from New Jersey (Mr. WILLIAMS) and the ranking minority member of the committee, the Senator from New York (Mr. JAVITS), as well as by our newest majority member, the Senator from from Michigan (Mr. RIEGLE).

Mr. President, I was deeply involved in congressional efforts to create the corporation, chaired the confirmation hearings for the present members of the board of directors of the corporation, and have worked to achieve a sufficient level of appropriations for the corporation to enable it to address meaningfully the task for which it was created—providing access to the legal system and equal justice under the law for 29 million low-income Americans.

The corporation's task is a profoundly important one. As Thomas Ehrlich, president of the Legal Services Corporation, stated before the House Judiciary Committee's Subcommittee on Courts, Civil Liberties, and the Administration of Justice:

Equal access to justice and equal justice under law are fundamental promises by our society to all its citizens. The obligation to live according to the law must carry with it the right of access to the institutions that make and enforce laws, and to fair treatment by those institutions. If political liberty means anything, it must mean that.

Mr. President, the history of the legal services program for the poor is a story of a struggle for survival. By 1970 it had

become clear to many of us that partisan political pressures threatened to tear the program asunder. It was equally clear that the program could no longer continue as part of the executive branch. Thus, interest increased in support of the establishment of a new, independent public corporation—not an agency of the Federal Government—to fund legal services programs. A very long and hard battle was fought. The Legal Services Corporation Act of 1974 finally emerged from that struggle.

The Legal Services Corporation that was created by that act has now been operating for almost 2 years. Although no program can operate without difficulties, I can say without exaggeration that the corporation has been a resounding success. The legal services program is no longer immersed in controversy. It is no longer under concerted attack from any source. The energies of legal services attorneys and involved bar groups have been able to be directed full-time to the goal of providing legal services for low-income Americans.

Mr. President, a basic congressional goal in creating the corporation—to insure that the legal services program remained free of partisan politics—has been realized. The corporation is accountable directly to Congress. Policy is set by the board of directors, who have proven themselves to be responsible, moderate citizens who are committed to working with the program to assure its purposes are attained. The corporation and those directly administering legal services projects are able to base their decisions regarding the use of resources on the merits. Thus, the mechanism of the corporation has brought stability and success to the legal services program.

As a result, the legal services program is now a sound and healthy one. Obviously, I do not mean to imply that equal access to our system of justice is now a reality for America's poor. The road that we must travel to achieve that goal is a very long one. But we have made a substantial beginning on our long journey, and it is a journey that we will complete. The enactment of the Legal Services Corporation Act Amendments of 1977 is the next step down the road that we must travel. The amendments proposed in this bill include three provisions designed to smooth that road. I will briefly describe them.

Mr. President, the bill contains authorization of appropriations levels of $225 million for fiscal year 1978 and such sums as may be necessary for the succeeding 4 years. Although the fiscal year 1978 authorization level of $225 million is, if fully funded, a substantial increase over this year's appropriation to the corporation of $125 million, it would provide for services to only a fraction of those eligible and in need of services; it is consistent with the increases recommended by the corporation and the administration; and it is much less than the levels recommended in the bill reported by the House Judiciary Committee to the full House, which authorizes $238 million for fiscal year 1978 and $300 million for 1979. Thus, the increase recommended by our bill for 1978 is a moderate increase for a proven, cost-effective program. In fact, the corporation has completed field evaluations of all of its programs and has found that, with few exceptions, they are operating on a sound professional basis.

In addition, Mr. President, the corporation's authorizations were extended for 5 years in order to assure the corporation, the programs it supports, and the clients it serves, of a stable, on-going program. We believe, as does the corporation, that sound planning can only take place in such a context—we have thus proposed in this bill a longer term authorization in order to remove the program from the continuing uncertainty in which it has operated. The corporation and its board of directors—as well as the Congress—recognize the need for continuing accountability to the Congress and regular review by the Congress. This need can and will be met, however, without the burden of frequent authorization proceedings.

Second, the bill removes the restriction against the corporation's issuing grants or contracts to perform training, research, technical assistance, or clearinghouse activities. This provision was requested by the corporation and is also contained in the House committee's bill. The corporation does not anticipate that this amendment will alter the basic structure of its Office of Program Support or Research Institute on Legal Assistance, the corporation's offices that now perform most of these functions. The amendment would, however, provide greater flexibility and would allow the corporation to insure that every activity it performs is carried out in the most economical and efficient way possible.

Third, the bill would mandate that three of those appointed to fill vacancies in the board occurring before July of 1978 must be eligible clients. The President will have 11 nominations to make during that period. In addition, one of the five appointments to be made before January 1, 1978, must be an eligible client. The bill would also require that the membership of the board be generally representative of the organized bar, the client community, attorneys providing legal assistance, and the general public. There are presently no members of the client community on the board and no women on the board, and we believe that it is imperative that this situation be rectified.

Finally, Mr. President, the bill clarifies that legislative and administrative representation by a paralegal supervised by an attorney on behalf of an eligible client is permitted under the present act and is governed by appropriate legal canons. The bill would also explicitly recognize the principle that legal services attorneys should be constrained by professional standards regarding solicitation of clients to the same extent—but to no greater extent—than private attorneys.

Mr. President, I believe that the Legal Services Corporation Act Amendments of 1977 make moderate and necessary improvements in the present act, and move us closer to equal access to our judicial system for all Americans. I urge the enactment of S. 1303.

THE GENOCIDE CONVENTION AND THE SENATE ETHICS CODE

Mr. PROXMIRE. Mr. President, we in the Senate have just finished passing a long-awaited code of ethics. The bill was necessary and helpful in recognizing our continuing commitment to every level of morality.

Yet we refuse to vote on a treaty—the United Nations Convention on Genocide—whose moral ramifications go far beyond the U.S. Senate. In turning away from this treaty, we are neglecting our commitment to the most fundamental level of human morality—that of a guaranteed right to existence. For over 25 years we have refused to ratify the Genocide Convention, a treaty that would make the intent to destroy a national, ethnic, or religious group an international crime.

That such a treaty is needed is unquestionable. The murder of 6 million Jews in Nazi Germany is only the most obvious example of a frightening attempt at genocide.

Mr. President, at a time in which we act to set standards for our own conduct, I would urge that we consider standards of international conduct. The Genocide Convention gives voice the world's outrage and concern over acts of genocide. In the interest of peace and safety throughout the world, in the hopes of eliminating all future crimes against humanity, I ask that my colleagues join me in support of this vitally important treaty.

HONORING BOB WILLIAMS OF CLEVELAND, OHIO

Mr. GLENN. Mr. President, on Friday, April 29, 1977, many distinguished Clevelanders will join together to honor Bob Williams, an outstanding journalist. It is most fitting that this tribute to Mr. Williams has as one goal the establishment of a scholarship fund for a minority student in journalism.

Bob Williams represents the very best of Cleveland. He joined the Cleveland Call and Post in 1942 and was a key figure at that paper until 1968 when he joined the Cleveland Press as a reporter and columnist. During his distinguished career, he won many awards, including three for outstanding achievement from the National Newspaper Publishers Association.

On behalf of the entire State of Ohio, I am most happy to join in paying tribute to this fine gentleman who has given such excellent service to the community, State, and Nation.

RHODESIA'S TIME

Mr. CASE. Mr. President, the Washington Post on April 19 carried an editorial concerning the situation in Rhodesia. The statement by the Post is, I believe, a significant one. It asks

whether an internal solution inside Rhodesia is a possible alternative of a civil war in that country among the conflicting black factions.

It has been an open secret for some time that the black factions outside Rhodesia, supported and backed by the so-called frontline African states—mainly Mozambique, Zambia, and Tanzania—are opposed to one another. Indeed, the situation is so fraught with peril that there is even a strong possibility that the leaders of these guerrilla factions, most prominently Robert Mugabe, Joshua Nkomo, and Rev. Ndabaningi Sithole, do not have the support of their own organizations. One result of a forced settlement could be a multisided power struggle that might result in a civil war with outside backers taking different sides.

The alternative of an acceptable transfer of power involving the popular Bishop Abel Muzorewa ought not to be overlooked. Given the proper backing from the West and with arrangements suitable to protection of the white minority in Rhodesia, it may be possible to work something out. The key ingredient, though, may be some positive indication of political support from both the United States and Great Britain. A recent Foreign Relations Committee staff report pointed in this direction in suggesting an American temporary mission to Rhodesia which could perform a moderating role between the black organizations there, notably Bishop Muzorewa, and the Smith government. It is not too late to consider heading in this direction.

The Post editorial deserves careful study and I commend it to my colleagues.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

RHODESIA'S TIME

The premise of the latest British effort to negotiate a settlement of the racial conflict in Rhodesia is that the situation has changed since January, when the latest effort collapsed. It's an understandable premise. True, in the battlefield, things are about the same: guerrillas are inflicting painful but far from crippling losses on the whites, who can probably hang on for some time. The British have a few new wrinkles in their diplomacy but nothing to alter the basic cause of its ineffectiveness, national weakness. There is, however, a new American President, one who, though untested, starts with a certain credibility among black nationalists. This is what lends interest to the newly announced American readiness to co-sponsor a fresh conference on Rhodesia, if the British (as expected) decide to convene one, and to participate in its actual work.

Given the evident American unwillingness to offer more than words and some money, which is what the last administration offered to no avail, it has to be asked, nonetheless, what purpose will be served by a more prominent American role. It is all very well for Washington to proclaim a commitment to Africa's wellbeing, to peaceable settlement of disputes, and to multiracialism. But will this slow down the guerrillas, who may feel that by fighting they can reap all the power rather than just a share? Will it induce Ian Smith to entrust the white community's welfare to "guarantors" far from the scene and demonstrably reluctant to act? Is it worth a trip to Geneva merely to hold the British government's coat at a new conference?

In fact, a conceivable result of the British-American approach to an "international solution," one including the guerrillas based outside the country, is an intensified drive by Mr. Smith and Bishop Abel Muzorewa to reach an "internal solution," one made with "moderate" blacks at home. Last January, Secretary of State Vance, new in office, dismissed "the so-called internal solution." But suppose Mr. Smith and the Bishop, who is not a puppet but a politician with broad popular support, hatched a quick-majority-rule plan that allowed participation in internationally sanctioned elections even by the guerrilla elements now proscribed. And what if the probable alternative was a sequence beginning with a new conference and ending in a rout of whites, a black civil war, and economic ruin?

Perhaps it will turn out for the worse whatever is now done. But we think there is ample reason to encourage Mr. Smith and moderate nationalists to try to make it come out better, if they can.

FEDERAL INCOME TAX—WHO HURTS

Mr. JAVITS. Mr. President, the income tax deadline has come and gone, and yet the flood of letters from my constituents complaining about the rate of income tax is still at record levels.

From both the macro and the micro point of view, taxes are high. The ratio of personal income taxes to GNP is expected to rise sharply during fiscal year 1978; this ratio will climb from a recent average of 8.3 percent to a full 11 percent—a 32-percent growth rate—by 1982 if our tax laws stay the same.

From the individual point of view, high marginal tax rates of 40 percent or more are paid by millions of middle-class taxpayers whose only reason for having to pay such high rates is that they are earning a living wage. In fact, according to statistics from the Advisory Commission on Intergovernmental Relations, families with average incomes have had greater percentage hikes in both their Federal personal income taxes and their total tax burden than families with twice the average U.S. income.

This fact must work as a substantial disincentive for people to save; since interest rates on savings accounts scarcely keep up with the rate of inflation before taxes. In the higher income levels and higher tax brackets—where millions of professionals find themselves in the 50-percent bracket and higher—the high marginal tax brackets restrain investment and many people have pulled out of the stock market and have opted instead for nonproductive investment vehicles: land, art, precious stones, et cetera.

In this context, I commend to my colleagues an article in the Washington Post, which appeared over the recess and illustrates the tax burden dramatically. It points out that the total tax take for a family with an average income climbed 92.4 percent between 1953 and 1975 and now totals some 22.7 percent of its total income. Although the chief culprits in this tax rise were the social security tax—it climbed 436.4 percent—and the State-local personal income tax—the figure here is 533.3 percent—the fact is that personal income taxes also climbed by more than a quarter and still take the largest bite out of pretax income.

The average family has been most hurt by tax hikes, according to the figures published in the Post. Families with twice the average income had their taxes rise 49.1 percent between 1953 and 1975, and families with four times the national average income saw their tax bills go up 46 percent. Moreover, the point is clear: we are sending more and more of our incomes to the Government, as inflation pushes us into higher tax brackets and as Government strives to keep its books in balance.

One policy recommendation clearly presents itself. We must seek a better solution in personal income taxes. This tax is the largest one directly affecting the consumer. Reducing personal income taxes on a permanent basis should increase after-tax rates of return and thus encourage consumers to spend and save more.

I ask unanimous consent that the article from the April Washington Post be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE "CHEAPEST OF ALL TAXES" STILL HURTS

(By Peter Milius)

When the House Ways and Means Committee reported out the first income tax bill under the 16th Amendment to the Constitution, it predicted:

"All good citizens . . . will willingly and cheerfully support and sustain this, the fairest and cheapest of all taxes."

The committee had every reason to believe what it wrote was true. That early income tax was only 1 per cent of the first $20,000 of taxable income and gradually rose to a maximum of only 7 per cent on all income over $500,000.

Today, however, the cheer has gone out of taxpaying. The 1 per cent tax is a thing of the past; the Internal Revenue Code has become a bulky joke. The income tax has few defenders—and this is April 15, the day the tax is due.

Yet in some respects, the income tax has a worse reputation than it deserves.

The national tax burden—the percentage of national income taken by federal, state and local taxes combined—has increased tremendously in the last 25 years. But the federal income tax has increased less than other major taxes; by some measures, it has hardly increased at all.

The Advisory Commission on Intergovernmental Relations, an agency here, has calculated that in 1953 the average family had an income of $5,000 and paid 11.8 per cent of it in direct taxes of all kinds—federal, state and local income, federal Social Security, state and local sales and local property taxes.

By 1975, according to ACIR, the average family's income had risen to $14,000—and governments were taxing away 22.7 per cent of that income directly, nearly twice what they took in the 1950s.

In percentage terms, the state and local income burden rose the most—533 per cent—followed by the Social Security tax (436 per cent) and state and local sales taxes (117 per cent). Next came local property taxes, at 81.8 per cent. The federal income tax was last, at 26.3 per cent.

In absolute or dollar terms, the Social Security tax rose the most. In second place, in roughly a tie, were the federal income tax and local property taxes.

Measured another way—for the population as a whole, as distinct from the average fam-

ily—the federal income tax burden has remained virtually unchanged for the last 25 years.

Left to itself, inflation would increase this burden. Inflation means higher incomes, which automatically move people into higher tax brackets. But Congress has periodically cut income taxes in various ways to offset this effect. Thus in 1953 federal income taxes were 10.2 per cent of total national personal income—and in 1975 they were 10 per cent.

These constant percentages mask some important distributional changes, however. The biggest income tax cuts have gone to low-income families, millions of which have been moved off the federal income tax rolls in recent years. To make up for this, income taxes on average- and upper-income families have been allowed to creep up a little.

In this sense, the federal income tax has become more progressive—but most experts say the total federal tax structure has not. This is because the Social Security tax has gone up so much, while the corporate income tax has come down, at least as a percentage of federal revenues.

The Social Security tax is generally regarded by economists as regressive—a tax that, in relative terms, falls harder on the poor than the rich. The Social Security tax in the early 1950s was 1.5 and then 2 per cent for employee and employer on the first $3,600 of each year's wages. Today it is 5.85 per cent on the first $16,500. Social Security collections were about 7 per cent of federal revenues then. They have soared to a little more than 30 per cent today.

The corporate income tax, by contrast, is thought to be borne largely by corporate stockholders, who tend to be in the upper-income regions. The corporate income tax produced 29 per cent of revenues 25 years ago and produces about 15 per cent now.

There are two other important shifts that have taken place in the national tax structure over the last 25 years.

First, state and local taxes taken together have increased almost twice as fast as federal taxes.

That is another way of saying it is not the federal government that has grown so much in this period, but state and local governments. State and local taxes were about 30 per cent of all taxes collected in the early 1950s. They are now about 42 per cent, approaching half.

There also has been a change in the mix of state and local taxes, in that income taxes have gone up in relative importance while the property tax has come down.

State and local governments also are using federal grants to finance more and more of their activities. These grants now make up about 20 per cent of total state and local revenue, as against about 3 per cent in the early 1950s.

The federal money comes mainly from the federal income tax. In this sense, state and local government today is being financed by a more progressive tax mix than in the past.

But that is a minor comfort. According to ACIR, in 1975 the average family still paid 4 per cent of its income in local property taxes—$1 out of every $25. It paid 9.6 per cent in federal income taxes, or roughly $1 out of every $10.

"The fairest and cheapest of all taxes" has become the biggest, and it hurts.

DIRECT TAX BURDENS BORNE BY AVERAGE- AND UPPER-INCOME FAMILIES, 1953 AND 1975

Type of tax	Family with average income			Family with twice average incomn			Family with 4 times average income		
	Tax as percent of family income		Percent increase, 1953–75	Tax as percent of family income		Percent increase, 1953–75	Tax as percent of family income		Percent increase, 1953–75
	1953	1975		1953	1975		1953	1975	
Total	11.8	22.7	92.4	16.5	24.6	49.1	20.2	29.5	46.0
Federal personal income tax	7.6	9.6	26.3	12.8	14.7	14.8	16.6	21.1	27.1
Social security tax	1.1	5.9	436.4	.5	2.9	480.0	.3	1.5	400.0
Local residential property	2.2	4.0	81.8	1.8	3.2	77.8	1.7	2.5	47.1
State-local personal income	.3	1.9	533.3	.9	2.9	222.2	1.2	3.7	208.3
State-local general sales	.6	1.3	116.7	.5	.9	80.0	.4	.7	75.0

Note: Estimates for average family earning $5,000 in 1953 and $14,000 in 1975 assuming all income from wages and salaries and earned by 1 spouse. Estimates for twice the average family: Family earning $10,000 in 1953 and $28,000 in 1975 and assumes that earnings include $105 (interest on State and local debt and excludable dividends) in 1975 and $25 in 1953; also assumes the inclusion of net-long term capital gains of $1,040 in 1975 and $350 in 1553. Estimates for 4 times the average family: Family earning $20,000 in 1953 and $56,000 in 1975 and assumes that earnings in $965 (interest on State and local debt and excludable dividends) in 1975 and $265 in 1953; also assumes the inclusion of net long-term capital gains of $6,400 in 1975 and $1,730 in 1953.

CHILD PORNOGRAPHY

Mr. ROTH. Mr. President, the lucrative but immoral business of child pornography exists and continues unharrassed. The wretched practice of displaying children in explicit sexual acts must, for the welfare of our children, be stopped.

To help combat the dissemination of child pornography, I have introduced S. 1011 and S. 1040 which make it a felony to cause or knowingly permit a child under age 16 to engage in specified sexual acts if the person has reason to know that the child's sexual conduct could be photographed or transported in interstate commerce. The bills also make it a felony for any person who knowingly transports or ships child pornography through interstate commerce or receives for the purpose of selling or sells any photograph or film depicting a child engaging in a prohibited act.

Mr. President, until a few months ago, I never realized the magnitude of this type of child exploitation. Unfortunately, the majority of the American public remains unaware of the subject of child pornography. Children are being bought and sold as if they were commodities instead of human beings.

A recent article in the Washington Star outlines some of the problems and traumas experienced by children who are victims of child pornography. There is no room in society for sexual entrepreneurs who lust after money at the expense of innocent children.

Mr. President, I direct my colleagues' attention to portions of this article and hope they will join in the outcry to end this mockery of public decency. Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHILD PORN: IS THE ISSUE FIRST AMENDMENT FREEDOM?

(By Michael Satchell)

"What put me to work," said Lloyd Martin, "was one picture. It was of a man about 30 and maybe an 8-year-old boy performing sex. The look on that boy's face. . . . No amount of words can describe it. It wasn't fear. It was more a look of 'somebody help me.' . . ."

Martin is the head of a special six-officer unit within the Los Angeles Police Department that deals with sexual exploitation of children. His outrage was spawned by one of the more insidious developments in an old and vexing question—when is erotic material truly obscene?

An estimated $1 billion-a-year industry that has thrived by creating new fads and demands, each more explicit and perverse than the last, pornography has now reached what many consider to be its absolute limit—the use and abuse of young children.

Unfettered by regulation, pornography has grown more varied and efforts to control it have failed. That is due to confusing obscenity statutes and to the fight by such groups as the American Civil Liberties Union (ACLU) which believe censorship of such material violates the 1st Amendment protecting free speech.

Now, with children being filmed and photographed in hardcore sex acts, a wide range of individuals and agencies is beginning to organize and fight the trend.

Several States have hurriedly introduced legislation aimed at banning child pornography. None has yet been passed. One bill has been introduced in Congress and a second is being drafted.

For law enforcement officials who have grown largely ambivalent about porn prosecution, and for liberals who abhor censorship in any form, the issue of child pornography teeters on the cutting edge of the 1st Amendment, a litmus test of what is or isn't truly obscence.

"Just a few years ago, it was straight sex between couples," said Robert Kendall, a Justice Department attorney specializing in obscenity prosecution. "Then we escalated to explicit ejaculation, then groups of three and four people, then bisexuality, S&M, bestiality, urination and defecation, then snuff.

"Now, we're going through a very bad stage. Children. In order for pornography to survive, there must be a new product. They'll do anything to make that almighty buck."

While public and judicial attention—and outrage—have largely been focused on such highly visible and well publicized smut vehi-

cles as the movie "Deep Throat" and the magazine Hustler, child porn in the past year or so has moved into the adult bookstores and porno mail order houses largely unmolested by the law. Today, it accounts for as much as 10 percent of the market by some informed estimates.

It has done so largely because of public ignorance, and the fact that obscenity laws, a gray area at the best of times, makes no distinction between kidporn or any other kind.

"The average person has no idea of whats on sale in porno shops because they never go in them" said the LAPD's Martin.

"It's such a distasteful subject that the news media generally doesn't want to touch it. We believe child porn alone is a multimillion-dollar portion of the industry and it's getting bigger. This isn't consenting adults. These are confused, frightened children. To me the crime has no equal."

Dr. Judianne Densen-Gerber, a New York psychiatrist, lawyer and social activist, has been touring the United States recently, shocking community groups by screening a child porn film and displaying hard-core magazine examples of the trend.

An unbiased zealot on this particular subject, her aim is to stir public outrage against this material, not hard to do when she opens her suitcase full of kidporn magazines and screens a film of a young brother and sister pathetically attempting intercourse and other sex acts.

"On occasion, I've recommended pornography for my patients and I've even enjoyed erotic material myself," she said. "But this stuff isn't 1st Amendment material. I'm not going to answer some limousine liberal's free speech argument. I don't think I have to.

"Common sense tells me that this goes way beyond free speech. This is mutilation of children. These aren't consenting adults. They're victims. The 1st Amendment isn't absolute, and if I have to give up a portion of my 1st Amendment rights to stop this stuff, then I'm willing to do it."

Her comments were echoed by a colleague, Fred Cohen, executive director of The Odyssey Institute, an agency founded by Densen-Gerber to help the socially disadvantaged. Odyssey, which specializes in drug addiction and child abuse, is in the forefront of the campaign against child pornography in New York.

Said Cohen: "We have come up against civil libertarians who hate what we are doing and take the adult side that there must be total freedom. We don't care what the adult reads, but what about the trauma to the children involved? The child's rights must take priority."

Authorities say tracking down those producing the books and films is extremely difficult and sometimes impossible. Police argue that if the distributors and salesmen can be quickly and effectively prosecuted, they will refuse to handle child porn, and if no one is willing to sell it, the producers will be forced to quit making it.

The 1st Amendment dilemma was put to Alan Reitman, associate director of the American Civil Liberties Union, which recently felt obliged to publish a position paper on its attitude toward child pornography.

An ACLU committee studied the question, viewed examples of kidporn and decided that while it is all right for authorities to prosecute those producing the material, the ACLU does not support prosecution of porn distributors and adult bookstores selling it.

"There is an important principle of free communication," argued Reitman, emphasizing that he personally found the material repugnant. "If you start making distinctions (between degrees of pornography), you weaken the principle and open the door to further censorship."

Asked about the contention that it is extremely difficult to track down the producers of this material, and that police are generally forced to concentrate on the national distributors and adult bookshop owners, Reitman said:

"Then the police will just have to try harder."

Authorities around the country contacted by The Washington Star said that at virtually any big city adult bookshop, and probably all porn mail order houses, one can view peepshow films or buy books and movies involving children as young as four or five. Police raids tend to push the stuff temporarily behind the counter, but it quickly reappears when the heat is off.

New York Dist. Atty. Robert Morgenthau last week assured a visiting reporter that Times Square, following a series of police raids, had cleaned its shops of child porn. Morgenthau was wrong: Three of the area's dozens of porn shops were visited randomly and each had a selection of hardcore peepshows and movies, along with books involving children.

In the District, one of the few jurisdictions with a law explicitly covering the "lewd exhibition" of children's genitals, both the Justice Department's Kendall and a D.C. police spokesman were equally confident that child pornography wasn't being sold in the capital. A quick survey of 14th street NW turned up child porn books and movies.

Elsewhere, the story is much the same. "It's wide open," complained Nick Ivarone of the Chicago police department. "I've got stuff purchased in this city involving little boys and girls that would make you sick."

Said Robert Leonard of Flint, Mich., president-elect of the National District Attorneys' Association (NDAA): "You can't believe this thing. It's fantastic. We've just formed a special nationwide task force of district attorneys to try and come to grips with it and our preliminary survey shows that it seems to be just about everywhere. I believe prosecution of pornography ought to have a low, if any, priority. But this stuff is a whole different ball game."

Not surprisingly, child porn emulates adult fare, from simple nudity to extreme perversion, with bestiality apparently the only area yet to be exploited.

Magazines such as Lollitots, Nature Boys, and Moppets and Teens purport to be of "cultural, scientific, educational and sociological" value. Prepubescent and early teenage girls and boys are photographed in awkward poses designed for maximum exposure of the genitals . . . all under the guise of being sexually healthy nudist-type publications.

Others, such as Naughty Horny Imps, Children Love, Chicken Hawks and Pre-Teens and Older Men, along with movies with similarly suggestive titles, make no such pretense. They show explicit sex acts between young children of both sexes, and between children and adults, both homosexual and "straight."

The combinations and the activities seem limited only by the pornographer's imagination and the limits to which he, or she, are willing to exploit the children. The kids themselves often seem confused, and in the movies, can sometimes be seen looking off camera, waiting for instructions on how to proceed.

Amazingly, even these items do not push the new outer limits of porn. Two books obtained by Densen-Gerber are virtual primers for incest and pedophilia, actually encouraging it.

One book contains full color photographs of a girl about seven or eight and a man represented as her father. An accompanying pseudo-sociological text extols the joys and virtues of incest "in this enlightend age" with detailed instructions on the physical techniques required to accomplish it. The child's bewildered expression throughout the magazine speaks volumes in support of Densen-Gerber's campaign.

The other publication is simply titled "Lust For Children" and chronicles, in graphic, full-page drawings and text, the adventures of a child molester who spots two young girls in a park. Written and drawn entirely from the man's point of view, it details how he buys them ice cream, lures them to his house, plays various games to win their confidence, then sexually abuses them.

One part of the story instructs the reader to ignore any struggle or protest from the children, stating that little girls are naturally promiscuous and such protest really means they are enjoying it. The message throughout is that child molesting (that expression is never employed) is harmless and fun. The book concludes with drawings of two laughing children happily accommodating their new-found "friend" in a variety of sexual activities.

Although none of those campaigning against child porn claim to have seen any definitive cause-and-effect studies, they say common sense indicates that such books as "Lust For Children" can only encourage the activity they portray.

The LAPD's Lloyd Martin agrees. "Every case (of child molesting) we've ever made out here, the guy's had this material," Martin said. "Take one man who picked up a 5-year-old girl in the park. The guy had two briefcases containing 10 rubber dolls, candy, a tube of Vaseline and a stack of books including Lollitots, Moppets and one called Daddy Loves Little Girls."

Author Robin Lloyd says that during his research for his book on boy prostitution, he collected 264 different boy and girl porn magazines being sold in adult bookstores nationwide, some so exclusive that they dealt with such things as homosexual acts between identical twin brothers.

In Los Angeles, where much of this material is thought to be produced, police conducted a study last year and concluded that over 3,000 youngsters under the age of 14 were being exploited sexually in the city.

"Children have become commodities and are bought, sold and traded for the financial gain of the involved adults," the Los Angeles report states. "Every conceivable sexual act is committed upon these young people, including acts of sado-masochism."

Police investigating the problem believe the children used in kidporn come from various sources. The younger ones, particularly girls, are provided by their parents—drug addicts, porn performers themselves, most often parents having incestuous relationships with their children.

The young teens are sometimes runaways or streetwise youngsters lured into the trade. Some are sent by unwitting parents to religious summer camps run by homosexuals. The children are drawn into the activity, then become too frightened or ashamed to tell their parents. And some children are simply victims.

"We find now that practically all child molesters take polaroid pictures of their victims for their own enjoyment, and for sale," Martin said. "Then a lot of fathers performing incest on their sons or daughters will let them be used in films, or will exchange photographs with others, and these will end up being published."

Last January, a Security, Colo., couple was charged with selling their 12-year-old son for $5,000 for sexual purposes to a Texas man who took the boy to Los Angeles. A social worker in Rockford, Ill., was jailed last year after permitting a pornographer to film his three foster sons. The fee: $150 per child.

Boys and girls from broken and problem homes, runaways or kids allowed to wander without parental supervision are often lured into the trade.

"These kids are easy targets" said Martin. "Their home situation is deplorable. Money doesn't mean much to a lot of these kids. What they crave is love and affection."

Equally depressing is the ultimate effect of this activity on the children themselves. Those studying the problem feel the children will suffer lasting harmful effects and—just like battered children who grow up to beat their own infants—will probably grow up and become sexual abusers themselves.

Said Dr. Vincent Fontana, a child sex abuse expert at New York's Foundling Hospital: "There is a great deal of psychological scarring of these kids, and God only knows where they will end up . . . drug addiction, alcoholism, sexual acting out. As these kids grow up, they're going to have real problems."

Densen-Gerber agreed. "We know psychiatrically how destructive this inappropriate sexuality is to our children. It leads them to join our deviant population of drug addicts, prostitutes, teen-age parents and criminals," she said.

Authorities say that perhaps 70 percent of the child porn market now involves young boys—"chickens" in the vernacular—and adult male homosexuals. A vast and well organized network caters to the "chicken" trade with books, movies and boy prostitutes.

Robert Leonard, the NDAA's president-elect, said investigations into well organized boy prostitution and porn rings are currently under way in Michigan, Louisiana, Tennessee, Pennsylvania, Rhode Island and Virginia.

Several of the rings have operated out of religious-type camps. In Tennessee, the Rev. Claudius Vermilye Jr., an Episcopal priest operating a farm for wayward boys, was charged recently with staging homosexual orgies with the boys and photographing the action for sale to magazines.

Off Traverse City, Mich., a phony religious group set up a camp on North Fox Island in Lake Michigan and flew upwards of 200 boys out to the island for the pleasure of well-heeled homosexuals. In New Orleans, it was a Boy Scout leader staging similar activity with members of his troop.

"On 42nd Street in Times Square and at 53rd and Third Avenue you can watch the hawks waiting to pick up the kids," said Lt. Martin Kennedy of the police public morals division. "You see kids 10, 11 years old. They come downtown from the Bronx to make a buck. These kids take an awful risk—you should see some of the creeps picking them up."

The Los Angeles police study estimated that some 25,000 juveniles under 17 are currently involved in the "chicken" trade in the city. "When we get to them, they usually break down and cry," Martin said. "They are very relieved to be out of it. They often are too scared and ashamed to tell their parents what they've been doing."

There is a distinct sense of anger and frustration among police and prosecutors over the difficulties of prosecuting porn's newest trend. Sexually abusing children is, of course, a very serious crime, but tracking down the offending book and movie producers to press such charges is monumentally difficult.

They point to the obstacles. Pornographers, especially those involved in the seamier aspects such as kidporn, are transient and anonymous. The stuff is quickly produced in private homes or rented motel rooms. Incriminating records aren't kept.

The children have little idea of who is on the other end of the camera, and often it may be their own parents. The distributors operate from a maze of constantly changing phony corporate fronts, with post office box numbers, false names and addresses and the best lawyers money can buy.

A measure of the frustration can be gauged by examining some recent court cases in the obscenity area. Larry Flynt was recently sentenced to serve between 7 and 25 years for publishing Hustler, a magazine specializing in explicit pictures of nude women that in no way approached the fare available in much of the kidporn literature.

In New York and Los Angeles, several cases involving felony distribution of child pornography are pending but three recent court decisions involving hardcore child porn illustrate the disparity in sentencing obscenity defendants.

In San Francisco, the owner of the Kearny cinema was arrested for showing a 45-minute movie, "Young Lolitas Or Youthful Lust," which featured two girls aged about seven and eight having intercourse and oral sex with adult men and women. The man pleaded guilty to a charge of contributing to the delinquency of minors and was placed on probation for two years.

New York police, tired of seeing porno book store salesmen fined $50 or $100 on misdemeanor charges, set up an elaborate undercover adult bookstore in Times Square in an effort to gather evidence against the major distributors. Among eight persons charged with felony distribution of obscene materials, which included child books and movies, was Edward Mishkin, 62, described by the New York District Attorney's Office as "New York's Porn King." Mishkin, with a lengthy record of pornography convictions, pleaded guilty to a felony charge that carried a maximum of seven years in jail. The judge ordered him to spend 25 weekends behind bars.

Chicago authorities took several bookstore owners to court for selling hardcore sex films of children and adults. A three-judge panel found the Illinois obscenity statutes too vague and the cases were thrown out of court.

Today, only six states have laws prohibiting obscene performances by minors. As the tide of child porn rises, several state legislatures are attempting to evade 1st Amendment questions and the cloudy legal aspects surrounding obscenity prosecution and write specific laws prohibiting this particular aspect of child abuse.

HOTLINE FOR INVENTORS IS A PHONE CALL TO TECHNOTEC

Mr. STEVENSON. Mr. President, the following article, which appeared in the Washington Post on April 11, 1977, touches on a critical area of science and technology policy: Matching technological developments with potential users of that technology. It is clear that economic development depends heavily on technological development, and if technology is to serve humanity as effectively as it might, such matchups must exist as early in the development of new technology as possible. A principle concern of the Commerce Committee's new Subcommittee on Science, Technology, and Space will be an examination of questions related to technology innovation and transfer. Mr. President, I ask unanimous consent that the Washington Post article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 11, 1977]

THE HOTLINE FOR INVENTORS IS A PHONE CALL TO TECHNOTEC

(By Barbara Bright Saguier)

Jim Decker of Modesto, Calif., listed an immersion freeze-heat peeling process for fruits and vegetables on Technotec, Control Data's technology exchange subsidiary. Within a few months, he had negotiated licenses for the new process in Norway, Poland, Spain, Japan and the United States.

"The Poles," said Decker, "are interested in the process to french-fry potatoes and ship them to a Western European market; a Norwegian company is interested in the process for fish."

The Technotec listing cost him only $68 and a few telephone calls. The process inventor, Decker estimates, soon will be earning $200,000 to $300,000 annually from the sales of his quick-freeze immersion machine.

Ed Harvey of Arlington, Va., an electrical engineer and a maker of wooden toys, searched Technotec for queries on woodworking. He found that a group of woodworkers in Caracas, Venezuela, were seeking a process for bending wood without its splitting or cracking.

Harvey's answer to the query required only a week's research here among literature from chemical companies and the USDA, but he provided the Venezuelans with information unavailable in Caracas and earned himself about $350 for the effort.

Matching a technological process and its potential user is the aim of Technotec, a technology transfer operation that is the first to make use of a worldwide computer network.

The technology data is banked and retrieved from the Control Data Corp.'s $1 billion Cybernet network, which has more than 5,000 computer terminals in more than 150 cities in 15 countries.

Technotec was set up a year ago to take advantage of that network and to foster Control Data president William Norris' personal interest in technology transfer. According to Ralph Sheehy, a Control Data spokesman, the purpose of communicating technologies is to prevent time being wasted by "a reinvention of the wheel."

Sheehy calls Technotec "a yellow pages of technology." An inventor of a new process or technique can list his brainchild on Technotec for a year at $100 for a 1,000 character description. Someone looking for the service can search the Technotec data bank, using a telephone or telex connection to a computer terminal, for an average charge of $8 to $10, according to the time involved.

If a searcher finds a process he believes will be useful or a query he believes he can answer, the fee is usually $50 for a contact.

In a single year of operation, Technotec has listed some 11,000 different technologies from 270 countries, according to Sheehy.

The Soviet Union has 47 listings. About 10 U.S. agencies—including NASA (with 37 technologies), the Energy Research and Development Agency, the National Science Foundation and the Maritime Administration—are users of Technotec.

The French atomic energy committee has listed descriptions in energy, chemistry, metallurgy and pollution control. Volkswagen in West Germany has described a portable solar radiation collector and a new pulse measurement instrument for medical use. India has described how to produce baby food from buffalo milk and caffeine from tea waste.

Listings on the Technotec data bank are described not as products but as processes. A search for the Technotec system using the key words "fish . . . freeze . . . food", for

example, turned up the process that Decker listed.

Control Data spokesman say they have no way of knowing how many searchers have used the Technotec system. Philip J. Bifulk, president of Technotec, said that revenues from the Control Data subsidiary are included in the company's product-line category, which last year showed a profit of $500 million. "We do not break down revenue figures below that level," he said.

According to Bifulk, more Americans are looking for foreign technology than there are foreign countries looking for American technology.

Most exchanges on Technotec are still domestic, however. Recently the technology transfer system arranged a waste exchange service in the Minneapolis-St. Paul area to match up companies that have unwanted waste products with those that have a use for the same waste products.

Zinc sludge slurry, from an electro-plating company, was the first item listed—and the next day a paint manufacturer was searching the computer data bank for a waste product he could use as a source of zinc for pigments. He found it: zinc sludge slurry.

MEDICAL CARE

Mr. JAVITS. Mr. President, as the Congress grapples with the rising costs of health care. I believe we must not lose sight of the terrible burden that these costs place on our Nation's older citizens. The causes of cost increases are highly complex and arise from a combination of factors including open-ended, cost-based reimbursement, porliferation of unproven services and technologies, lack of effective planning, rising expectations and consumer demands, and many others.

I believe it is grossly unfair, however, to ask the elderly, when they are living on fixed incomes and are particularly vulnerable to inflationary pressures, to underwrite these mounting costs out of their own pockets after a lifetime of work. I commend the efforts of my colleagues Senators CHURCH and WILLIAMS to roll back the medicare hospitalization deductibles and long-term care coinsurance rates to 1976 levels, and I favor other reforms of medicare such as requiring physicians to accept "assignment" and not bill additionally medicare beneficiaries for the care provided.

A recent commentary in the New York Times details poignantly the financial plight of the elderly and dramatizes the need for medicare reform.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 3, 1977]

MEDICAL CARE

(By Richard Phalon)

Medicare has proved to be something of a Catch-22 for people over age 65. It was originally designed to help take up some of the slack left by private health-insurance plans. Rising medical costs have so eroded the value of Medicare, however, that private health insurance has become more important than ever.

One sign of that is the number of individuals who rely on outside coverage to fill the increasingly large gaps left by Medicare. According to the Health Insurance Institute, some 12 million people over 65 carry one form of health insurance or another. That works out to about 52 percent of the 23 million Americans who carry Medicare cards.

It's easy to understand why outside health insurance has become so important. Medicare was not meant to cover all hospital and doctor bills. Over the years, however, it has increasingly picked up less of the burden in a trend that continued to gather momentum with changes in the law that became effective Jan. 1.

Both the hospital and doctor-fees segments of the coverage work on a system of deductibles and co-payments. A decade ago, for example, the deductible on hospitalization—the amount individuals had to pay before the Federal coverage took over—was $40. Effective Jan 1, the deductible went to $124, up almost 20 percent from a year earlier.

Co-payments—the amount of money individuals have to lay out as their share of hospital bills—have been rising, too. After the $124 deductible has been met. Medicine pays all the ordinary costs of a semiprivate room, covering drugs, laboratory tests, X-rays and the like, for the first 60 days in a hospital.

From the 61st to the 90th day, the patient has to make a co-payment of $31 a day, up from $26 last year and from $10 a day a decade ago.

Beyond the 90th day, a patient can draw on a once-in-a-lifetime reserve of an additional 60 days. The co-payment on those days rose on Jan. 1 from $52 to $62 each, a long, painful way from the charge of only $20 a day that applied in 1968.

Thus, even with the help of Medicare, a hospital stay of five months could mean out-of-pocket costs of $4,650.

Getting insurance to cover the gaps in Medicare is no longer so easy as it once was. Many insurers, including most Blue Cross/Blue Shield organizations, offer packages that cover the deductibles and co-payments or slip into gear after Medicare benefits have been exhausted.

The Guardian Life Insurance Company, for example, has been selling a gap-filling policy that picks up the co-payments from the 61st through the lifetime reserve days, and, among other extras beyond that point pays up to $60 a day for room and board for another year.

According to Gerald Parker, vice president for health insurance, Guardian did well with the policy until 1974, when "we began to take a real shellacking." Then costs rose so quickly that the company began to show "six-figure losses."

The New York State Insurance Commissioner approved a 25 percent rate increase in 1975 and an additional 50 percent increase last year. The annual cost of the policy—$116 in 1966—has jumped to $216 a year and the company is no longer selling to all comers.

Blue Cross and Blue Shield of Greater New York has also had to ask for rate increases to cover the higher cost of deductibles, and—like Guardian Life—has been limiting new enrollments in its Senior Care "medigap" plan to individuals who already carry standard Blue Cross policies.

That will change some time this spring, when Blue Cross plans to open its subscription books for one month to new enrollments. The date has not been set. The cost of the policy will go from $18.72 quarterly to $24.21 quarterly on March 1.

The benefits on Blue Cross medigap policies vary from state to state. The Greater New York plan, for example, both picks up the hospitalization deductible and provides help beyond the lifetime reserve days.

Very few policies of any kind, however, are designed to cover all of the costs of a catastrophic illness, and the shrinking availability of medigap coverage suggests that the best time to buy supplementary health insurance is before age 65.

RADIO FREE EUROPE AND RADIO LIBERTY

Mr. JACKSON. Mr. President, it is heartwarming for us in the Senate to receive evidence of the effectiveness of programs we support. One such bit of evidence came recently when Vladimir Bukovsky, the heroic Soviet human rights advocate, said in Munich that he had kept abreast of the events outside his prison walls by listening to Radio Free Europe/Radio Liberty, Inc., on a makeshift receiver which he secretly built while imprisoned.

While RFE/RL continue to be jammed by the Soviets and certain East European countries, the message gets through to audiences eager to exercise their right to a free flow of information as recognized in the Helsinki accords.

In this connection, Mr. President, I believe by colleagues will be interested in an April 7, 1977, story in the Washington Post by Michael Getler, and an April 9, 1977, editorial from the Washington Star, which discuss the current activities and needs of RFE/RL.

I ask unanimous consent that these two articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 7, 1977]

U.S. BROADCASTS REACH SOVIET JAILS

(By Michael Getler)

MUNICH, April 6—Vladimir Bukovsky has spent almost a third of his 34 years in Soviet prison camps and "hospitals."

In one of those camps during 1968 and 1969, the exiled Soviet dissident said in an interview here today, he was able to hear the U.S.-sponsored Radio Liberty broadcasts on a make-shift radio that had been built secretly in the camp.

The Carter administration has asked Congress for $45 million in additional funds to double the power of transmitters used by Radio Free Europe (RFE) and Radio Liberty as well as the world-wide facilities of the Voice of America.

Soviet efforts to block these broadcasts by electronic jamming "covers the big cities," Bukovsky said, "but it doesn't work so well in the suburbs where this camp was. We could hear quite well."

Bukovsky, who was freed last December in exchange for the release in Chile of jailed Communist leader Luis Corvalan, was here yesterday to talk with employees of Radio Liberty, which broadcasts to the Soviet Union, and Radio Free Europe, which beams broadcasts at five other East European Communist countries.

Bukovsky said his short visit was meant to offer advice to the stations on the content of the broadcasts. But his remarks about being able to hear an otherwise jammed broadcast in the suburbs dramatizes the complicated electronic battle being fought daily in the airwaves between the United States and the Soviet Union over these broadcasts.

The Voice, which is an official part of the U.S. government, sticks mostly to presentation of world news and explanation of U.S. government policies and is not jammed by the Soviets or its allies.

The recently combined RFE/RL operations, however, draw frequent criticism from the

Soviet Union and its allies. They broadcast in 22 local languages—news that is frequently suppressed by local censors or that focuses on the internal affairs and arguments of Communist nations.

The stations, transmitting from West Germany, Portugal and Spain, have been repeatedly denounced by Soviet Communist leader Leonid Brezhnev as a flagrant interference in internal affairs, and are strongly supported by President Carter as one of America's "most valuable instruments" in its commitment to the free flow of information and ideas.

The Radio Liberty broadcasts to the Soviet Union are heavily jammed. The RFE broadcasts to Czechoslovakia and Bulgaria are also heavily jammed as, to a lesser extent, are those to Poland. Only Rumania and Hungary do not jam them.

Most of the transmitters are some 20 years old and are widely viewed as underpowered and outmoded.

The Carter administration's plan to modernize this equipment involves replacing four old 10 kilowatt transmitters in West Germany with 250 kw transmitters and antennas and to add seven of the more powerful 250 kw transmitters in Portugal.

The idea is to help break through the areas of heaviest jamming, to carry the signal further to other areas of Eastern Europe, and to make what is a weak signal now to listeners in some areas stronger and thus more "attractive."

Increasing the power from 10 kw to 250 kw does not mean a 25-fold increase. It means, explains engineering director Earnal Campbell, increasing the original signal sent to listeners by some 15 decibels.

In simple terms, Campbell explains, a single decibel is the slightest change in sound level that a person can perceive.

Campbell says trying to counter more powerful broadcast transmissions with more powerful jamming is not a simple matter.

For one thing, it is hard to black out a large geographic area, which explains why the Communist countries try to focus on the cities. With the higher power, however, the outskirts of places like Prague, Czechoslovakia, are viewed as certain to have better reception.

In addition, at certain hours of the day, transmission from west to east has certain atmospheric advantages that cannot be fully offset by jammers trying to push electronic energy in the opposite direction at the same frequencies.

The RFE/RL broadcasts from West Germany are sent via the low-end of the shortwave radio band. Identical broadcasts are made from Portugal using the high-frequency end of the shortwave band, bouncing the signals off the ionosphere and into Eastern Europe

The high-frequency broadcasts are harder to jam than the low-frequency, and would present even more of a problem with more powerful transmitters.

RFE claims it now reaches some 13 million listeners daily and RL between 3 to 4 million. They say listener ratings have held up despite data from various monitoring techniques that shows that the currently low-powered signal has been declining in relative strength in the last 10 years in some areas as more powerful stations have come on the air.

In 1957, Campbell says, there were less than 10 transmitters of 200 kw or more. Today, he says, there are about 250.

Assuming that Congress approves the money, Campbell estimates it will then take almost three years before the first new station is operating.

The stations also face a potentially sticky situation with the Bonn government, which must approve the new transmitters near here. Bonn has always gone along in the past, but Brezhnev is expected to visit here later this year and is expected to lean on the Germans to oust the U.S.-sponsored stations, which were run with heavy CIA involvement until Congress took over support in 1971.

Strolling through the newsroom here today, Bukovsky said that as important as the U.S. stations were, "they were not perfect."

He said that at times a year or two ago he felt they pulled some punches by not broadcasting the names of arrested dissidents or backing away from discussion of Soviet problems because the State Department regarded it as interference.

"I came here to help," he said. "To tell them to mix information and diplomacy, to keep in mind they are speaking with people and not governments and not to be more timid than President Carter."

Bukovsky, perhaps inadvertently, used the same word Carter did when the President met with the Russian exile last month at the White House and told him that as president he would not be "timid" in his public statements.

Carter's proposal last month for the new equipment came on the heels of a sharp blast from Brezhnev over the President's stand on human rights, making the RFE/RL proposals even more infurating than they would normally have been for the Soviet Union.

The study that led to the proposal was begun by the Ford administration and officials here prefer to think of the timing of the Carter statement on the eve of Secretary of State Cyrus R. Vance's recent trip to Moscow, as "a historical accident."

[From the Washington Star, Apr. 9, 1977]

AMPLIFYING THE VOICE

In the mounting evidence of President Carter's seriousness about human rights, nothing is more welcome than the White House request to Congress for substantial increases in United States-sponsored radio broadcasts to the Soviet Union and Eastern Europe. The President's request is for doubling the transmitting capacity of Radio Free Europe and Radio Liberty and for enlarging Voice of America capacities some 25 per cent.

These offspring of the Cold War have had many ups and downs of popularity, both in this country and abroad, since they were established in the Fifties. To begin with, they were missionary messengers, taking the gospel of democracy to the Iron Curtain benighted, and Americans were all for them.

Then, in the early Seventies, a CIA connection came out, and enthusiasm cooled. Even before that, there had been criticism of the approach. There was too much justifying of American foreign policy, it was said, and too little objective reporting of either world news or life in the United States.

Meanwhile, countries where there were American transmitters chilled and thawed as the ideological tone of their governments changed. The chief examples were Portugal and Spain, where the acceptability of American broadcast installations changed with a succession of political upheavals.

The one constant in the situation was in the audiences. Soviet bloc governments kept protesting and Soviet bloc citizens kept listening.

Radio Liberty and Radio Free Europe have shaken off the CIA label in the last few years. They have also changed their approach to one that stresses straightforward news and news analysis rather than anything tainted with apologetics.

The Voice of America is still charged with explaining official United States policy and with helping non-Americans to understand American ways. Even in the VOA, however, the emphasis is less narrow and self-justifying now than it used to be. The point of all these broadcasting operations is no longer to sell anybody a viewpoint, but to ease tensions by an exchange of ideas.

As American overseas information officers have grown more sophisticated about their work, it has become increasingly clear to them that straight, factual accounts of what's going on in the world make their case better with closed-off Communist societies than elaborately tailored persuasion. And that merely keeping up awareness of life in the outside world for these people is a powerful nourishment to the spirit of freedom.

President Carter is to be applauded for being so perceptive about the way these programs fit in with his hope of encouraging human rights around the world. His proposal to start new such programs beamed at Africa and the Western Pacific compounds the good news.

THE FAIRNESS DOCTRINE

Mr. BAYH. Mr. President, I call the attention of the Senate to an extremely important ruling of the Federal Communications Commission made on April 7 in response to a complaint which Senator ABOUREZK, the Energy Action Committee, and I filed last August.

We contended in our complaint that the networks and several television stations had violated the FCC's fairness doctrine by repeatedly airing oil company advertisements regarding the integration of the oil companies without extending time to others to offer an opposing view. Though the FCC found only one station in violation of the doctrine, its ruling upholds the principles of our position and is of immense importance. It will put stations and networks on notice that in the future so-called institutional advertising must be examined for political content, and when such content exists, other views must also be aired.

Mr. President, many of the very important issues of public policy which will be debated in Congress in the years to come will directly affect many of the largest corporations in the world. Those corporations cannot be permitted to tip the scales of the debate on those issues by instituting self-serving media blitzes. This is exactly what we experienced regarding the oil divestiture issue, and this FCC decision will help insure that we do not have such an experience again.

Mr. President, I ask unanimous consent that articles from the Washington Star and the Wall Street Journal regarding this decision be printed in the RECORD. I also ask unanimous consent that the text of a letter from James F. Flug, executive director of the Energy Action Committee, to the presidents of the three major television networks be printed in the RECORD. This letter contains a very articulate discussion of the many serious issues which are raised by the increased incidence of oil company issue advertising and merits the attention of all Members of Congress.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Apr. 8, 1977]

TV STATION IS TOLD TO GIVE OTHER SIDE OF "OPTION" AD ISSUE

WASHINGTON.—The Federal Communications Commission put broadcasters on notice that they must also cover the other side of an issue when they air "option" advertisements.

The FCC found that a television station here violated the commission's fairness doctrine when it carried a large number of Tex-

aco Inc. ads defending integrated oil companies but didn't adequately air the views of those who want to break up the major oil companies.

The ads were challenged by the Energy Action Committee Inc. and two Democratic Senators, Birch Bayh of Indiana and James Abourezk of South Dakota. They contended that WTOP-TV, owned by a Washington Post Co. subsidiary, had broadcast 53 Texaco commercials that opposed divestiture legislation without letting the other side present its viewpoint.

The FCC ordered WTOP-TV to give proponents of divestiture legislation airtime to make their case. The commission calculated that the 53 Texaco commercials totaled 41 minutes, while the station gave only five minutes in news reports to the progress of the divestiture legislation in Congress. The five minutes of news broadcasts didn't "afford a reasonable opportunity for the adequate presentation of contrasting views" the FCC said.

At the same time, the FCC rejected challenges the Energy Action Committee had filed against the American Broadcasting Co. and National Broadcasting Co. television networks and against an NBC-owned station here. The group claimed that they had likewise, violated the fairness doctrine by carrying the Texaco commercials.

But the commission said the Texaco ads weren't carried as extensively on those networks and WRC-TV as on WTOP-TV. NBC also resented considerable news and public-affairs programming on the divestiture issue that gave balanced coverage, the FCC said.

James F. Flug, director of the Energy Action Committee, said the commission's decision gave proponents of oil company divestiture a chance to be heard on television. "Broadcasters will now be responsible for looking beyond the surface of the subtle pseudo-psychological commercials to find the real political messages they contain," he said.

A spokesman for WTOP-TV said he wouldn't comment until he read the FCC decision.

Noting that it wasn't a party to the proceedings, Texaco said, nonetheless, that it was "disappointed" by the reports of the ruling "since Texaco considered that advertisement to be a message providing information to the American public on how the company's operations serve the needs of its customers."

The FCC said that while the Texaco commercial didn't explicitly mention divestiture, it implicitly dealt with the issue by asserting that an oil company "like Texaco" could put many parts of the oil business together efficiently and economically.

[From the Washington Star, Apr. 8, 1977]

WTOP Ruled in Violation on Fairness

(By Stephen M. Aug)

The Federal Communications Commission has ruled that the Washington Post's television station here, WTOP-TV (Channel 9), has violated government fairness standards for broadcasters because of an oil company's commercials.

The ruling is being hailed by groups that want to break up the oil companies, and they say they're going to go further: They'll try to convince the major networks to take some oil company advertising off network news programs.

The FCC decision—by a 6-1 vote with Commissioner Margita White dissenting—results from a complaint filed last August by two Democratic U.S. senators, Birch Bayh of Indiana and James Abourezk of South Dakota, and the Energy Action Committee against WTOP-TV, the ABC and NBC networks and WRC-TV here.

The complaints contended that the networks and stations had broadcast repeatedly Texaco Inc. advertisements aimed at convincing the public that legislation to break up the oil companies was unwise and should be defeated.

Because the commercials advocated only one side of a controversial issue of public importance, the two senators and the energy group argued, the broadcasters were required by the FCC's Fairness Doctrine to offer time to others to give an opposing view.

The commission's decision, handed down yesterday, said that indeed the commercial advocated only one side of the issue of breaking up the oil companies, but that with the exception of WTOP-TV the commercials were broadcast only a few times.

In the case of WTOP, the FCC noted, the station had aired the commercials 53 times for a total of 41 minutes. In its defense the station said it had broadcast contrasting views. But the FCC found that this comprised about five minutes worth of network news reports which "merely discussed the divestiture issue in general terms."

As a result, the FCC said, the station had not adhered to its obligations to be fair. It gave the station 10 days "to fulfill its obligation of presenting a balance of opinion on this issue."

James Lynagh, manager at WTOP-TV, said yesterday that no decision had been made on how the station will comply with the FCC order. "We have not received anything but a copy of the press release," Lynagh said, and "until we have time to read the commission's full determination and review it I will have no comment."

The Texaco commercials in question were also broadcast by WMAL-TV (Channel 7) here, owned by Washington Star Communications Inc. However, WMAL last August agreed to air contrasting views and no complaint was filed against it.

James F. Flug, director and counsel at Energy Action, said the FCC decision "strikes an important blow for the public interest." He said, "No longer will the major oil companies be able to hide behind the facade of 'institutional advertising' as they try to sell the American people on the oil industry's point of view on controversial public issues."

Flug said his group intends to take the matter further. He said Exxon Corp. and Gulf Oil Corp. both have become major sponsors of network news and public affairs programs.

April 8, 1977.

Dear ———:

Since your network newscast Thursday night omitted any mention of the important fairness decision released that day by the Federal Communications Commission, we wanted to be sure that you were aware of it, to offer our assistance to you in implementing it fully, and to raise a broader issue of mutual concern suggested by the rising tide of oil company issue advertising on news and public affairs programming.

The new Commission ruling establishes clearly that, even though what purports to be an "institutional message" relating to the operations of an oil company does not explicitly mention a controversial public issue by name, an obligation under the Fairness Doctrine arises when the assertions in the ad address the "essence" of the issue and "espouse the view" of those on one side of the issue.

In looking at the extent of the Fairness obligation in such circumstances, the Commission drew a line between the broadcast of a "handful" of issue spots and the repeated broadcast of such advertising. In considering the fulfillment of the obligation through news and public affairs programming, it reiterated the distinction between "mere reportage of fact" and news reports that "discussed the merits and advocated" views opposed to those of the ads.

As you probably have noticed, during the pendency of the FCC proceeding regarding the Texaco anti-divestiture ad, oil industry "institutional" advertising, especially on news and public affairs programs, has increased sharply. Exxon now regularly sponsors entire network news shows and all or parts of weekend interview shows. Gulf is placing its ads on news shows on all three networks. Texaco has continued its "institutional" spots, primarily on entertainment programming.

Many of these purportedly "institutional" ads, as did the Texaco "puzzle" ad, address issues which lie at the heart of hotly debated public energy policy questions, such as strip mining, horizontal and vertical divestiture, oil and natural gas pricing, the viability of renewable energy sources, the safety of supertankers. And some of them take positions advocating one side of these issues. These are difficult and complex issues in any context. They are more so when addressed subtly—if not subliminally—and with a soft sell. It is understandable that, like the Texaco ad, they might slip through unnoticed and untagged with a Fairness flag after an "acceptability" process conducted in New York by communications lawyers unfamiliar with current energy debates in Washington and across the nation.

Although we cannot at this point forego any Fairness claims which the repeated broadcast of this advertising might already have generated, our strong preference would be to treat the circumstances of the recent past as history, to draw instruction from them, and to work together with you—and the oil industry—to establish standards and procedures that meet the needs and rights of the networks, the oil industry and the public.

In particular we suggest that you:

1. Re-assess the "institutional" ads recently placed by Exxon, Gulf, Texaco and/or other major oil companies on your network to determine whether they implicitly address controversial energy issues.

2. Provide us with transcripts of these ads so that we can also review them and assist you in identifying any controversial issues implicitly addressed.

3. As to ads repeatedly broadcast which implicitly address controversial issues of public importance, consider whether there has been adequate presentation of contrasting views, and if not, how best to do so without interfering with the news judgment of your news editors and correspondents.

4. Arrange to meet with us—in the presence of oil company representatives if you wish—to discuss how we—and they—can keep your legal or acceptance staffs apprised of current energy issues and the essential sub-issues involved, whether and how we can help you identify implicit issues in proposed ads so that you can fully assess their Fairness implications before they are aired, and how we can assist you in meeting any currently unmet Fairness obligations that you discover.

But beyond any technical questions of the Fairness Doctrine, or formal obligations under FCC rulings, the growing presence of oil company "advocacy" or "issue" ads on news and public affairs programing raises a broader set of very difficult and very sensitive questions for your industry, questions that go to the maintenance of your credibility, protection of the appearance—as well as the fact—of independence, and preservation of your rights to make your own news judgments.

It is my purpose in this area merely to raise those questions, not to prejudge them, nor to advocate answers. The television people to whom I have informally talked agree that these issues merit further and wider consideration within the networks.

Citing examples is perhaps the best way to approach them:

A network newscast sponsored entirely by Exxon, which used most of its spot time to extol the Alaska pipeline, on a night when the lead story showed the President and Secretary of State in Alaska extolling the pipeline, and another story covered the industry's point of view on the natural gas issue;

Another Exxon-sponsored newscast in which two commercial spots, and one of the filmed news stories, covered the industry's point of view on the high cost of oil and gas exploration;

A Sunday interview show with the President's energy advisor, sponsored in part by Exxon with a "message" ad giving the company's position on some of the very issues addressed by the reporters and guest;

Inauguration Day 1977, perhaps the most-watched news night of the year, when Americans could not see coverage of the event on any network newscast that evening without also seeing at least two, and in two cases three, issue-type ads from Gulf Oil;

You and I know, because we know and trust the producers and editors and correspondents on those shows, that in no way is their news judgment, their approach, their selection of material or interviewees, in fact affected by the identity or the opinions of the sponsors. In most cases they do not even known who the sponsors are or what positions those sponsors espouse in their commercials on a particular night.

Yet the news staffs themselves must feel as uncomfortable as I do for them when they encountered examples like those above. For they know that protection of their credibility requires not only the fact of integrity and independence, but, just as important, the appearance of these qualities in full strength. If there is an appearance of conflict of interest, either when an oil company is a major sponsor of a newscast or interview show covering energy issues, or when a particular oil company "message" ad relates to the subject matter of a particular news story or interview, then the credibility of the network, the show, and the correspondents all suffer, because a question may be raised in the viewer's mind as to whether the program content has been affected by the sponsor's positions, especially those advocated in its commercials.

And conversely, what can the editors and correspondents think when, in the exercise of their best professional judgment, they have constructed a story, or a series of stories, that provides a fair, balanced, objective presentation of a complex energy issue, only to find that their work appears on a show with an oil company issue commercial. In reality, proponents of one viewpoint have been able to purchase additional time (occasionally longer than the news story itself) to expound their position slickly, subjectively, and self-servingly. Should news judgments be superceded by advertising judgments?

More broadly—and more painfully—from your point of view, should Exxon/Gulf/Texaco/Shell/Mobil/Arco/Amoco, which together, the polls say, have the lowest public credibility of any institution in American life, be able to purchase a piece of—by rubbing up against—the credibility of Cronkite/Chancellor/Brinkley/Reasoner/Walters, who have the highest trust ratings in our land. And should the network newscasters be required to have their high standing diluted and sullied by their identification with thoroughly untrusted issue claims of "Big Oil." Do these circumstances contribute to public cynicism and discouragement by feeding the American suspicion that nothing is safe from the blandishments and economic power of the major oil companies.

Expressed one last way, should the American people have their access to the day's news, in its most timely and convenient form, conditioned on their willingness to see and hear repeatedly, constantly, incessantly, one industry's point of view on a whole range of debatable issues—not just as to whose motor oil is better—but as to basic facets of our lives—energy, economics, environment.

Some of these questions apply to the advertising of others besides the large, integrated oil companies, but the oil industry's current and future ad campaigns deserve special and immediate attention because:

They have, as a practical matter, unlimited resources to buy expensive TV time, and they are buying more than any other group in America to get their non-product messages across;

On April 20 there will begin an extended national debate on energy issues that may involve hundreds of billions of dollars of additional profits to these companies, major restructuring of their business, major shifts in their power and practices.

With the stakes for them and for the American people so high, we can expect the companies to use every available avenue of persuasion and propaganda to the fullest. You and the other networks will thus be placed in a difficult position—do you accept growing amounts of the lucrative advertising no matter what the potential consequences to your own stature? Or do you stop now and anticipate these sensitive ethical dilemmas, addressing and resolving them before they create further problems?

Again, I do not propose answers now. Perhaps we are talking of an "airline crash" type arrangement where energy issue ads are automatically withheld if there are energy issue stories. Perhaps we are talking about limiting the number of spots that any one sponsor can have on a news or public affairs program. Perhaps we are talking of limiting commercials on news programs to product advertising. Perhaps we are talking about a real test of the Mobil-type arrangement where the issue advertiser agrees to pay for equivalent response time, or about more free access time for all—on or off news programs. We may be talking about all, some, or none of these. But, I think it is vital that you be talking about them now—within your own network, with other networks, with the oil companies, with us, and with the public.

I stress again that in this area—beyond Fairness—you and we need not be talking to the FCC. For these questions persist even if the full panoply of Fairness rules are not triggered, and even when the total network programming over time, by Fairness standards, could not be found "unreasonably" unbalanced. These questions arise because particular newscasts or programs, or series, or ad campaigns create discomfort, dismay, and distrust that is not easily alleviated by other programming on other days or on other shows. These are concerns that are—or should be—mostly yours, but they are ours derivatively; for when your credibility and stature suffer, when your news organizations feel or look compromised, the public has one less place to go for the truth, or for a fair attempt at discerning truth.

Please give us a chance to discuss these matters further when you have had a chance to discuss them among yourselves. But please don't wait too long—April 20 is just around the bend.

We appreciate your attention to these requests and your patience at their length.

Looking forward to meeting with you.

Sincerely,

JAMES F. FLUG,
Director and Counsel,
Energy Action Committee.

UNEMPLOYMENT IN THE CONSTRUCTION INDUSTRY

Mr. JACKSON. Mr. President, on April 19, 1977, I met with several hundred of the nearly 4,000 delegates gathered here in Washington for the National Conference of the Building and Construction Trades Department, AFL–CIO. We discussed at some length the persistent problem of high unemployment in the construction industry and more specifically how the current energy situation has aggravated this already serious dilemma.

Mr. President, I would ask unanimous consent that the statements of Mr. Martin J. Ward, general president, United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada, and Mr. Roy Johnson, general president of Roofers and Waterproofers International, be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT BY MARTIN J. WARD, TO THE SENATE COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. Chairman and members of the committee, I am Martin J. Ward, general president of the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada.

My international union is made up of some 330,000 craftsmen who live and work in every State and virtually every community in the Nation. We are one of the 17 unions that together comprise the Building and Construction Trades Department of the AFL–CIO.

I am here today representing the nearly 4,000 delegates to the department's national conference some of whom are here in this room with us.

These delegates, in turn, represent over 4 million workers who belong to their local unions.

More than 17 percent of those workers are without jobs. In some parts of the country construction industry unemployment is even worse—reaching levels of 40 and 50 percent of the construction work force.

Yes, more than employees in any other industry, we have a vested interest in legislation that can put all Americans back to work and in legislation that can help restore the nation's economic health and guard against future economic disaster.

Today, it is my task to speak to your committee about one problem that demands your attention and cries out for your remedial action: the continuing energy crisis. It is a crisis that threatens to become a calamity with every passing week of inactivity and non-response.

We have been urging the development of a concerted, comprehensive national energy policy at least since the OPEC oil embargo dramatized the crisis nature of energy shortages three years ago.

I hardly need tell you gentlemen that no meaningful steps have been taken to bring about that national energy policy.

However, the new administration has proposed to move toward such a policy and has revealed its plan to consolidate energy activities into a single department. This has long been one of our recommendations and we fully support the President's proposal.

But mere consolidation will not begin to face up to all the energy-related problems we have failed to come to grips with over the past years.

Even as we meet here this morning the White House can be presumed to be busy putting the final touches on President Carter's energy message scheduled for tomorrow.

For the past week or so the papers have been filled with leaks, rumors and specula-

tion about the content of that message. Much of what I have read is encouraging and some is disturbing. But, no matter what the message will say, the burden of decisions concerning our energy future will fall heavily on the members of this committee and, ultimately, on your colleagues in the Congress.

When OPEC imposed its oil embargo three years ago the nation was stunned at the realization that we were grossly dependent upon foreign countries for much of our energy supply. Together we resolved then to strive for energy independence.

But last year when I came to this committee we were more dependent on foreign nations than ever before. And this year we are still more dependent.

During one week early this year, U.S. oil production of 8.1 million barrels compared with average daily imports of 8.2 million barrels.

Oil imports now constitute one-third of all oil consumed in this country. By 1985, if we continue to drag our feet in developing alternative fuels, that could grow to 50 percent. Even more disturbing is the fact that more and more oil is being brought in from OPEC countries. At the time of the 1973 embargo, about 16 percent of our oil was coming from that area of the world. In 1976, that figure is up to 25 percent and moving higher all the time. In terms of total oil imports, the OPEC cartel provided 48 percent in 1973. Despite our proclaimed energy independence goals, that figure climbed to 59 percent in 1975.

We continue to live in a state of economic anxiety, still not knowing when another embargo or another huge price rise will again produce desperate shortages of fuel to run our industries and our automobiles and to heat our homes.

We know we are running out of domestic oil and natural gas. Production of our own crude oil is lower than it has been for a decade. And we were given a vivid and tragic reminder of the natural gas shortage during this winter's prolonged cold weather.

Yet we continue to look to oil and natural gas for 76 percent of the Nation's energy consumption.

When are we going to stop whistling past this graveyard? When are we going to launch a meaningful national program or self-reliance?

A program of self-reliance is essentially three pronged.

First, conservation of all forms of energy particularly energy produced by our dwindling supply of oil and natural gas.

Second, the full development of nuclear power as a primary source of energy production.

Third, all measures necessary to promote the use of coal in the production of energy.

Conservation simply means the efficient use of all forms of energy. But such use obviously requires leadership from the Federal Government and wise legislation by your committee and the Congress.

Conservation means the manufacture of automobiles that get more mileage per gallon of gasoline, retrofitting of existing homes and buildings and the construction of well insulated homes and buildings that drastically reduce energy consumption, the designing and production of home appliances that use only small quantities of energy.

And conservation does not mean a no-growth policy. On the contrary, an effective conservation program should release more energy for the benefit of the economy as a whole.

But, gentlemen, while on the subject of conservation, I want to urge you to be wary of proposals to conserve energy by raising prices. Such tactics have proved ineffective for both natural gas and oil in the recent past. And where gasoline is concerned, higher prices can have devastating impact on the less advantaged of our citizens.

Conservation is essential to a comprehensive energy program. But we believe that Congress and the administration can find ways to promote conservation that will call for equal sacrifice from all our citizens.

In any event, conservation will not, by itself, come anywhere near solving the energy problem, and that brings us to coal and uranium.

The United States holds about 450 billion tons of coal reserves. This is more than 700 times the Nation's annual consumption of about 600 million tons. Forbes magazine said this coal reserve is "Ten times as much energy as is contained in Saudi Arabia's oil and 2.6 times as much as is available from the entire world's supply of oil."

The Energy Research and Development Administration has estimated that we will need at least 1.2 billion tons of coal a year to reach the goal of energy independence.

As I said last year it would be criminal for this country to allow its rich coal deposits to go unused in the face of the economic disaster that energy shortages would bring down on all of us.

We must use all available means to get the coal to the boilers of industry and to our power-generating plants.

A generation ago, coal provided 48 percent of our energy; today it's down to 20 percent. Yet coal comprises 81 percent of our domestic fuel resources.

We have the technology to mine the coal, to transport it, to burn it and to use it to decrease our dependence on foreign fuels.

But there are problems with which this committee is deeply familiar.

Strip mining will have to be performed with minimum or zero damage to the environment. Sulfur emissions must be reduced to harmless levels. Transportation techniques must be effective and economically feasible.

This Congress must enact legislation that can surmount these obstacles. The 94th Congress, in fact, made some progress but your efforts were either incomplete or blocked by Presidential veto.

We urge you to enact another strip mining bill without delay. It is clear that control of pollutants and development of transportation methods are mere abstractions until we begin to mine the coal that is needed so desperately.

Once a strip mining bill is approved, I hope this Congress will pass legislation clearing the way for the construction of pipelines to carry coal in a slurry mix from the mines to the utilities.

Railroads will not be able to handle the volume of coal that this Nation will need in the years ahead. Pipelines are a proven method of coal transportation and will provide healthy competition for other modes of transporting coal to the boilers.

If we make full use of our coal resources the job of moving the mined coal will be enormous.

Americans for Energy Independence recently cited one example. They pointed out that electric utility companies are now building coal-fired power plants in Texas, Arkansas, and Louisiana. Then they said, "To fuel only these plants after they fire up in the mid 1980's coal trains one mile long will have to leave western coal fields every hour, around the clock, every day of the year."

Gentlemen, as president of the union whose members will build these pipelines, I can assure you that they will be effective in delivering coal economically and safely. Furthermore, I am convinced that public utilities will be inspired to increase plant capacity for producing electricity once they know pipelines will be available to provide them with fuel.

Before I close by setting forth the specific energy resolutions adopted by our national conference I want to say a few things about the third of our three-pronged program of energy self-reliance—nuclear power.

As of January 1, 1977, there were 64 nuclear-powered electrical generating plants in operation. They were producing about 9 percent of our total consumption of electricity.

This productivity will increase dramatically in the decades ahead if we will finally take the steps that are necessary to decrease the lead time involved in nuclear plant construction.

There is some indication that the administration will propose measures to reduce lead time. We hope Congress will act on such legislation promptly.

In addition to the 64 plants on line, another 72 reactors are under construction, 19 have been authorized to begin limited work, and 65 are on order.

It happens that my union accounts for about 25 percent of the man-hours of work on a nuclear power plant. Along with other skilled building tradesmen, many of our men are out of work and itching for the opportunity to build these power plants.

It is in their best interest and in the nation's best interest to get on with the job.

General President Johnson will go into nuclear energy questions raised by recent announcements from the administration.

I would simply like to suggest to the committee that it carefully weigh the supposed risk in developing plutonium against its undisputed benefits to energy and the economy.

It is a hazardous material. But, in our weapons development program, hundreds of tons of plutonium have been handled with safety and security for the past thirty years.

We should not, out of unexamined fear, foreclose any of our long-range energy options.

Strong, bold leadership is desperately needed to help find solutions to our present energy crisis. Legislation for national planning of energy research and development is long overdue. To help meet our energy needs, the Building and Construction Trades Department and its affiliated international unions specifically urge:

1. That Congress adopt President Carter's plan to consolidate energy activities into a single department that would absorb ERDA, FEA, and the FPC. Such a restructuring is badly needed and would provide a more efficient mechanism for creating and implementing energy policy.

2. That Congress enact the Coal Pipeline Act of 1977 (H.R. 1609 and S. 707) to clear the way for the construction of coal slurry pipelines which are essential to the development of our domestic coal reserves.

3. That Congress adopt H.R. 38 and S. 36 to provide loan guarantees for the development of synthetic fuels. Vast coal and oil shale resources which can provide domestic supplies of gas and oil exist. Development is ready to commence if financing can be assured. Minimal governmental involvement through loan guarantees will ensure this development.

4. That Congress adopt H.R. 18 which would expedite the siting and licensing of nuclear power plants. Unpardonable delays as long as five or six years are postponing energy projects and causing large cost increases.

5. That measures be enacted which would expand the Nations uranium enrichment capacity to assure an adequate supply of fuel for nuclear power plants. Congress must assure the scheduled completion of the Clinch River breeder reactor and further develop the breeder reactor program.

6. That measures be enacted which would close the nuclear fuel cycle by developing licensable and commercially viable facilities for the reprocessing of spent fuel and the storage of radioactive wastes and recycling of plutonium.

7. That Congress adopt measures to remove the incentives which presently are encouraging American companies to build refineries overseas.

8. That Congress enact legislation to promote energy conservation in new buildings and the retrofitting of old building to achieve better thermal efficiency.

The building trades industry has been impacted more than any other by our country's failure to resolve its energy problem. This department stands ready to cooperate in any way to help find a solution. It is absolutely imperative that all Americans work together for this country's energy security and economic prosperity.

ENERGY

(By Mr. Roy M. Johnson)

Mr. Chairman and members of the Committee, my name is Roy Johnson and I am General President of Roofers and Waterproofers International.

As President Ward stated, we are here representing the approximately 4,000 delegates gathered here in Washington, D.C. for the National Conference of the Building and Construction Trades Department, AFL-CIO. While addressing myself toward energy, many of my remarks will concern Nuclear Energy.

Out of the confused debate that has developed with respect to the energy crisis, one concept seems to gain more and more acceptance. Everyone seems to agree that we should not waste our energy. As a result, a lot of folks think that we must reduce our national annual growth rate

What is not yet apparent, however, even to many sincere and concerned policy-makers, is that the total energy consumption of our nation must continue to increase in the future, even if we establish extraordinarily successful spartan conservation programs. We obviously can and must eliminate wasteful practices in energy consumption. There is a point, however, beyond which further reduction will seriously impact the job market.

There is absolutely no moral justification for policies that would cause increased unemployment because of energy shortages. So, while energy waste can and must be eliminated, we must never allow one man's concept of conservation to be the cause of another man's unemployment.

At the present time, the building industry is in a depression with unemployment over 17 percent of our total work force. We in the Building and Construction Trades Department fully realize that if there is to be a reduction in unemployment, there must be reasonable growth in the supply of energy. We need to get on with the job of building energy facilities.

As responsible citizens, sort out the facts with respect to our energy future: it becomes more and more obvious that one of the greatest strokes of good fortune this nation has experienced is to have our nuclear industry as well advanced as we find it today. It is ready now to provide much of the energy this nation will need during the next fifty to seventy-five years. If we did not have a large block of nuclear energy available to us for the coming decades, this country would be in critical danger.

Nuclear energy is the safest, cleanest, cheapest, most reliable energy source available. Our conclusions about the safety of nuclear power stations are based on the many years of operation and the large number of our members involved with nuclear power. Not one of our members has died because of radiation exposure. We have had no reports of our members receiving bodily harm from exposure to radiation or radioactive materials. Building tradesmen who construct, operate, and maintain the nuclear plants along with their families are among the population living closest to the operating power reactors. There have been no reported cases of radiation damage to our members' families.

The safety record of the nuclear power industry is excellent, despite the fact some critics continue to play the "what if" game. I simply don't understand those people who become so obsessed with hypothetical hazards of nuclear energy that they refuse to face the facts. A majority of Americans obviously agree. Anti-nuclear initiatives have been overwhelmingly rejected by voters every time they have appeared on the ballot.

Between April 1, 1974 and October 1, 1975, a total of 180,000 megawatts were postponed or cancelled. These cutbacks have impacted the construction industry particularly hard. A recent study has shown that more than half-a-million annual construction jobs will be lost over the next five years on account of these cut-backs. This represents an annual loss of as much as $7 billion in wages. If the electrical utility industry could get its construction program back on its feet, the total number of unemployed in the construction industry might be reduced by as much as 12 percent.

There are various causes for the delays in construction of nuclear power plants, such as tedious licensing procedures and intricate environmental regulations. As I previously mentioned, anti-nuclear referendums and initiatives have also attempted to slow development, but thanks in good part to the state and local Building and Construction Trades Councils, these initiatives have been defeated every time they have appeared on a ballot.

One of the biggest reasons why nuclear power plants are not under construction is that, where funds for capital investment are concerned, the public utilities are going broke. Electric utilities require more investment capital than any other industry—$4 in investment for each $1 of revenue. The bulk of the desperately needed construction cancelled or delayed over the past year was a direct result of the industry's inability to raise capital funds

The utility industry has always been highly capital—intensive and therefore catches the full effects of inflation and the skyrocketing interest rates that go with it. In a recent study conducted by the Technical Advisory Committee of the Federal Power Commission, it was concluded that an average six percent growth over the next fifteen years will require the utilities industry to somehow muster $650 billion for construction. This is more than four times its existing investment and compares with about $145 billion spent in the last fifteen years when growth was over 7 percent.

The Building and Construction Trades Department is particularly alarmed by recent short-sighted proposals to postpone the Clinch River Breeder Reactor and other experimentation on the reprocessing of spent fuel. The only proven technology for significant additional electrical energy in the period after the 1990's is the breeder reactor. Our country can only retain this option by keeping strong the organizations we shall likely have to call on to supply breeder reactors.

The Building and Construction Trades Department questions the basic assumption regarding the extent of our uranium resources in the recent report of the Ford Foundation study group. We believe the U.S. supply of uranium may be so limited that there will be a need to install breeder reactors commercially by the turn of the century if we are to continue using fission energy for addition electrical power. A prestigious committee of the National Academy of Sciences has so concluded in a just completed estimate of our assured uranium supply. Since only the future will tell us what our actual uranium resources are, prudence dictates that we take no steps now that would foreclose our option to operate breeders commercially by the end of this century. There is, in fact, no slack in our schedule for arriving at commercialization—either as regards breeder demonstration or as regards the demonstration of commercial reprocessing. Both are required before the climate will be right for utility executives to commence commercial orders of breeder reactors and from that point it will be another ten years before the first commercial breeders begin to operate.

The design, construction and operation of the Clinch River Breeder Reactor is our only vehicle over the next fews years for creating and maintaining the necessary industrial infrastructure to support a commercial breeder program. A major cutback in the CRBR Program, or a pause in it, would be exceedingly difficult to carry out without destroying the considerable infrastructure that has already been put in place over a number of years. If we were to decide later to resume our preparations for a commercial breeder, we would no longer be able to operate breeder reactors in the year 2000, should that be necessary.

In conclusion, we too are concerned about the possible proliferation of nuclear weapons states, as it could be spurred by the civil use of plutonium. We are certainly aware of the possible contribution of the U.S. moratorium on reprocessing and breeder commercialization to your negotiations abroad. We know that such a moratorium would be at very high costs to our energy future.

DUDLEY D. MILES

Mr. BAYH. Mr. President, I was deeply saddened to learn of the untimely death of Dudley D. Miles at the age of 51 on the evening of April 5 and I join my colleagues and his family in mourning his passing.

Dudley Miles began his career as an attorney in Rawlins, Wyo. He came to Washington 16 years ago to serve as legislative director on the staff of Senator Gale McGee, a position he retained for 10 years. For the past 6 years, Dudley was the chief clerk of the Subcommittee on Agriculture Appropriations and it was in this capacity that I came to know him.

My service on the Senate Appropriations Committee began in the summer of 1972 and I soon recognized that Dudley was extremely competent and well versed in the intricacies of the agriculture budget. Over the years as a member of the Agriculture Appropriations Subcommittee, I had come to rely on Dudley's experience, wise counsel, and helpfulness. Along with his demonstrated professional ability to handle the work of subcommittee, Dudley always retained a warm and cheerful disposition even when the pressures of his work were extreme.

I will miss Dudley in the coming years, and I extend my deepest sympathy to his wife and their three children for the untimely loss that they have suffered.

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business having expired, the clerk will state the pending business.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

The assistant legislative clerk read as follows:

A bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

The Senate resumed the consideration of the bill.

The PRESIDING OFFICER. The question is on agreeing to the motion to recommit, with instructions.

Mr. ROBERT C. BYRD. Mr. President, I am in no position to say what the outcome of the action on this bill will be, or when it will be concluded. I am hopeful, however, that the final action on the bill can be reached this week. I do not know whether it can be or whether it will be, but I hope that it will be.

I merely take this opportunity to say that rollcall votes are very likely daily tomorrow and Friday on this measure. Certainly if the Senate is to conclude action on it by Friday, it would mean that there would be rollcall votes Friday, and probably they would occur up until the latter part of the afternoon.

If I learn anything more definitive as the day goes on, I will attempt to bring such information to the attention of my colleagues, but for now I think the likelihood is that there will be rollcall votes Friday and that there is some hope that action can be completed on this measure Friday. If action cannot be completed on it Friday, I would still anticipate rollcall votes throughout the day on Thursday and Friday.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BELLMON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SARBANES). Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I ask unanimous consent that Mike Maloof of Senator GRIFFIN'S staff be granted floor privileges during the consideration of the tax bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I ask unanimous consent that Carey Parker of my staff be granted the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll and the following Senators answered to their names:

[Quorum No. 16 Leg.]

Allen	Byrd, Robert C.	Kennedy
Baker	Curtis	Long
Bellmon	DeConcini	McClure
Bentsen	Dole	Sasser
Burdick	Goldwater	

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of the absent Senators.

The assistant legislative clerk resumed the call of the roll.

Mr. ROBERT C. BYRD. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. APOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Washington (Mr. MAGNUSON), the Senator from Montana (Mr. MELCHER), the Senator from North Carolina (Mr. MORGAN), and the Senator from Florida (Mr. STONE), are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE), is absent on official business.

Mr. STEVENS. I announce that the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Illinois (Mr. PERCY), and the Senator from Delaware (Mr. ROTH), are necessarily absent.

The result was announced—yeas 82, nays 3, as follows:

[Rollcall Vote No. 101 Leg.]

YEAS—82

Allen	Cranston	Hayakawa
Baker	Culver	Heinz
Bartlett	Curtis	Helms
Bayh	Danforth	Hollings
Bellmon	DeConcini	Jackson
Biden	Dole	Javits
Bentsen	Domenici	Kennedy
Brooke	Durkin	Laxalt
Bumpers	Eagleton	Leahy
Burdick	Ford	Long
Byrd, Harry F., Jr.	Garn	Matsunaga
	Glenn	McClellan
Byrd, Robert C.	Gravel	McGovern
Cannon	Griffin	McIntyre
Case	Hansen	Metcalf
Chafee	Haskell	Metzenbaum
Chiles	Hatch	Movnihan
Church	Hatfield	Muskie
Clark	Hathaway	Nelson
Nunn	Sarbanes	Stevenson
Packwood	Sasser	Talmadge
Pearson	Schmitt	Thurmond
Pell	Schweiker	Tower
Proxmire	Scott	Wallop
Randolph	Sparkman	Williams
Ribicoff	Stafford	Young
Riegle	Stennis	Zorinsky
	Stevens	

NAYS—3

Goldwater	Johnston	Weicker

NOT VOTING—15

Abourezk	Humphrey	Melcher
Anderson	Inouye	Morgan
Eastland	Lugar	Percy
Hart	Magnuson	Roth
Huddleston	Mathias	Stone

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of the Senators who did not answer the quorum call, a quorum is now present.

Mr. CURTIS. Mr. President, I ask unanimous consent that Bob Lyon and Gene Larimore, of Senator THURMOND'S staff, have the privilege of the floor for the duration of the debate and votes on the tax measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I yield to the distinguished Senator from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that Judy Hefner, of my staff, have the privilege of the floor throughout the consideration of the tax bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I yield to the distinguished Senator from Wyoming.

Mr. HANSEN. Mr. President, I ask unanimous consent that Linda Gould, of my staff, have the privilege of the floor during the consideration of this measure and votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I yield to the distinguished Senator from New Mexico.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Caroleen Silver, of my staff, have similar privileges.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that Ed Beck and John Brooks, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, I make the same request with respect to Aubrey Sarvis, of my staff, and Chester Smith, of the staff of the Committee on Rules, Administration and Standards.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. HASKELL. Mr. President, I ask unanimous consent that Samantha Senger and Robert Liberatore, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Mike Rausch and Ed King, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, I ask unanimous consent that Ed Ryan, of my staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I yield to the distinguished chairman of the Committee on Finance, Mr. LONG.

Mr. LONG. Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CURTIS. Mr. President, I wish to speak briefly on the pending motion.

There is in the bill before us an extension and increase in the investment credit. There is also a new provision referred to as a job credit. These proposals are designed to create additional jobs in the United States. If they fail to create any jobs, the cost will be zero.

It happens that I was not an early advocate of the investment credit. Any proposal has some distinct questions and problems involved, but I have seen it operate, and I believe that it is a very useful weapon in promoting our economy and providing jobs for people.

This is how it works: If a businessman or a farmer or a company wished to buy new equipment, he would get a certain tax credit, 10 percent, for having purchased that equipment.

If a weekly newspaper in the State of Nebraska decides to buy a new printing press, yes, they get a tax credit for that. But who gets the benefit, the real benefit? The workmen who are called upon to produce the raw material that goes into a printing press, the workmen who manufacture and design the printing press, the workmen who transport it, and the workmen who install it. Yes, some more activity will be created in the financing and the insuring of this new machine.

If the investment credit does not work, if it is not a sufficient incentive to set these things in motion, no credit is allowed.

When we spend money on other types of projects, we hope for results. In this, one is assured of favorable results or no credit is given; no money flows out of the Treasury.

In the bill before us, this investment credit is increased by two points, from 10 percent to 12 percent.

At this time, I am not going to discuss all the details as to the definition of equipment, and so on, but that is what is at stake here.

The motion of the distinguished Senator from Arkansas (Mr. BUMPERS), which is cosponsored by the distinguished Senator from Massachusetts (Mr. KENNEDY), would strike this from the bill. Make no mistake about it: This is not a provision for the benefit of the taxpayer alone. Coming back to the illustration I stated, if a weekly newspaper buys a new printing press, they have to pay for the printing press. They may have to finance it and pay over a long period of time. This is a little inducement to get them to do that because it will put people to work and promote the economy.

It is true that it is an artificial stimulus, in a sense; but with the high tax rates, Government regulations, and all the roadblocks thrown in the way of enterprise, sometimes we have to resort to these things.

There is another provision, which is new, that we are trying out for 1977 and 1978, and that is called the job investment credit.

It provides that any company that will create a new job, that will add a new employee, will get a credit for it. It is based very much on the same philosophy as the investment tax credit. It has been brought into being because there are some industries that are labor-oriented and not oriented very much to machines. Those companies that cannot expand and buy new machines are sort of left out of the investment credit idea, and this jobs credit relates primarily to businesses and industries that are labor-oriented.

The bill also is written so you cannot have both. You have to choose between the additional investment credit and the jobs credit.

I do not know whether it is going to work. I think it will. There has been evidence submitted by many small businessmen over the country that they would hire additional people if they could get a little credit on their tax. As a matter of fact, I believe it is correct that this proposal originated with organizations of small businessmen, is that not correct, may I ask my chairman?

Mr. LONG. Mr. President, if the Senator will yield——

Mr. JACKSON. Mr. President, will the Senator yield for a unanimous consent request?

Mr. CURTIS. I yield.

Mr. JACKSON. Mr. President, I ask unanimous consent that Mr. Keith Martin, of my staff, be granted the privileges of the floor during the consideration of H.R. 3477, and I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Now, I yield to my distinguished chairman.

Mr. LONG. Mr. President, one of the small business organizations, the National Federation of Independent Businesses, which is the largest of the group, and the other small business organizations are very enthusiastic about this proposal for the jobs credit for employers who hire more people in their businesses.

As I indicated yesterday, I have received postcards from businessmen who wrote in to say they would hire more people if they had this jobs credit. I will discuss that at greater length later on.

Here are 115 responses from businessmen. There were 2,077 form letters mailed out and 115 replied, which, I think, is a pretty good response to a form letter, a 5 percent response. Most people who mail out form letters and hope people will send a card back do not expect anything close to that high a response, but 115 wrote back and about 95 percent of those who wrote back said they would hire more people.

I undertook to have people in my office call these people; to go on down the list and call them. On the average these small businesses said they would hire two additional people, and they told us what they would hire them to do.

Mr. CURTIS. I would like to ask the Senator a question.

Mr. LONG. Yes.

Mr. CURTIS. Suppose their plans fall through and they do not hire someone. Does the Treasury lose?

Mr. LONG. If they do not hire anybody it does not cost the Treasury one red cent.

Mr. CURTIS. Does the distinguished Senator agree with me that the pending motion is to strike from this bill something whose primary purpose is to give jobs to people who do not have a job now?

Mr. LONG. That is the whole idea of it. Most of these jobs would be in small businesses. They would go to people who have little hardware stores—here is a letter from a man with a hardware store who would hire one new employee, for example. Here is a fellow who has a lumber supply yard, and he says he would hire one more. So it goes on down. Some of them would hire as many as 10. Here is a fellow, for example, in the tire supply business. He says he would hire between four and five employees, and so it goes. It averages out to two and a half persons per those employers who wrote in. This is just a small sample.

Mr. CURTIS. I have here the endorsement of the Associated General Contractors, a labor-intensive group, that would hire a lot of people, and they favor this.

Mr. LONG. Keep in mind that most of the people who would be getting these jobs are either on the unemployment rolls now or else on the welfare rolls.

Mr. CURTIS. Yes.

Mr. LONG. Or else they are getting food stamps, so it is not a net cost to the Government. The Government would save money and make money by these people being employed in the small businesses.

Mr. CURTIS. I thank my distinguished chairman.

Mr. BENTSEN. Mr. President, will the distinguished Senator yield for a comment?

Mr. CURTIS. I would be happy to yield.

Mr. BENTSEN. I recall in the debate yesterday one of the proponents of this motion to recommit was saying that an employment tax credit would have an inflationary impact on the economy. Nothing could be further from the truth because what you are talking about is a tax credit to lower the cost of labor. You put people back to work at the same time. You help increase productivity. The investment tax credit provides more modern machinery, more up-to-date capacity to produce products.

We are saying that we should give a tax credit to the labor-intensive companies.

I heard one of the arguments that this results in the hiring of people of a lower wage scale. What is wrong with that? Are not those some of the people we are having the toughest time finding jobs for? These are some of the people who are the least skilled. That is really who we would like to be helping in this situation because we are seeing a lot of them who would much rather have a productive job than be on welfare.

I think one of the most denigrating things you can say to an individual in this country is that society has no productive role for him to fill. But here we have a balanced tax package where we take care of the capital-intensive company and we take care of the labor-intensive company, in trying to put people back to work.

I have supported public service jobs. It costs from $8,000 to $12,000, but too often those are dead-end jobs and do not really add to productivity. But here is a job where you do it through the private enterprise system, where that often leads to further advancement and to a permanent job. I think it is a much better way to approach the problem.

Mr. CURTIS. I thank my distinguished friend.

He has mentioned something that I think merits a bit of emphasis. He points out that this will lead to jobs for people of low income and minimum skills. Now, if someone will give a person who has never had a job, who has never been trained, who has had no experience in reporting for work, a job, and he gets a little credit on his tax bill for it, it is very possible that that individual who is employed and whom the employer takes time to instruct and help, will lead into a position where he is a productive employee, and many jobs will open up to him.

Mr. President, I am about to yield the floor, but this point I want to make as this debate proceeds in the next day or two in reference to this motion, and that is this: We are making a big mistake if we are carried away by a lot of debate and allegations that this is a loophole. It is not. It is a straight-out plan to spend a little money to put people to work in the private enterprise section at a per capita cost many times below what it would cost to put them in a Government-created job.

Mr. President, I yield the floor.

Mr. HASKELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HASKELL. Mr. President, I shall speak briefly on the motion made by the distinguished Senator from Arkansas. What he seeks to do, of course, is to refer the bill, as I understand it, to the committee with instructions to report it out, deleting both the investment tax credit and the jobs credit sections.

Reluctantly I have to oppose my friend from Arkansas on this matter, and I shall briefly state my position.

Mr. President, it seems to me that the economic problem facing the country today is really not one of lagging business activity. All we have to do is look at the annual reports and the quarterly earning statements of listed companies that are being issued and see that business activity, indeed, is very good for those people.

The problem is really one of persistent unemployment at a time of high business activity, and this has been a problem now for more than 28 months, with unemployment in excess of 7 percent. As a matter of fact, it is now 7.3 percent, which means there are 7 million-plus people looking for jobs who cannot find them.

This may well be a new factor in our economic history, this concurrence of high business activity with persistent unemployment, and if it is I think we have to attack the real problem. The problem is unemployment.

I opposed early the administration's economic package since I believed that what they were doing was trying to stimulate general business conditions which I thought was the wrong approach.

I do not believe, really, that the big companies need any additional assistance; therefore, if the Senator from Arkansas had sought merely to delete the 2 percent investment tax credit I certainly would be on his side. But I cannot join him when at the same time he seeks to eliminate the jobs credit.

Mr. President, before the Senate at the moment is a bill from the Finance Committee which would give a credit of a little over $1,000 for a new employee hired but does not provide a so-called cap to limit the total amount of credit any one company can take. The purpose of a cap is to be sure that the very large companies of the Nation do not get a disproportionate amount of the credit. Right now, as the business provision of this bill is structured, the biggest corporations in the country by increasing unemployment could still benefit by taking the optional investment credit.

It is my view that, by and large, the tax code has favored large business at the expense of both middle-sized and small business.

As a matter of fact, I think I am correct when I say the effective tax rate of corporations with assets in excess of $100 million is something in the neighborhood of 34 or 35 percent as opposed to the statutory rate of 48 percent. The small business, on the other hand, being labor intensive and not being able to take advantage of the various and sundry benefits that an equipment intensive business takes, pays the full statutory rate.

The jobs credit, as I intend to seek to amend it, would do two things. It would give a substantial credit for putting someone to work. A substantial credit would be $2,100. This would be a real inducement to people to put people to work.

We have over 7 million people out of work, and we need an inducement for the private sector to do what we are doing in the public service jobs program in the public sector. At the same time I would put on a cap; that is, a company could not take more than $100,000 in credit.

That will eliminate the very large companies from taking full, unlimited advantage, and it will give more advantage to the smaller companies.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. HASKELL. I certainly will yield.

Mr. LONG. Is it not true that most of these people whom we are hoping to put to work are people who are unemployed at the present time?

Mr. HASKELL. The Senator is correct.

Mr. LONG. So if they are unemployed they are either drawing food stamps or unemployment insurance payments or drawing welfare payments. Am I correct?

Mr. HASKELL. The Senator is correct.

Mr. LONG. Some of these poor souls, of course, are youngsters, many of them less privileged, who never had a job in their lives. We hope to get them their first job. With regard to all those people, is it not true that when we have to pay them to hold hide and hair together, anyway, we have to pay some kind of a welfare payment, food stamps or something to help keep them going along, and that it would be cheaper to pay them a subsidy to put them to work rather than pay them for dong absolutely nothing?

Mr. HASKELL. I certainly agree with the distinguished chairman of the Finance Committee that by getting people off the unemployment rolls we are getting economic benefit from their efforts which we are not getting when they are unemployed.

Mr. LONG. Can the Senator think of any worse injury one could do to young people in their formative years, young people who are not able to go through college or who went a year or two in college and for some reason could not keep it up and dropped out, than to have them going on year after year trying to find a job somewhere and being turned down? What does it do to these people's morale? What does it do toward their view of society when they have never really known what it is to get a job and bring home a paycheck even though they have tried?

Mr. HASKELL. Of course, it is devastating and, as I am sure the Senator will agree, it is equally devastating for a man or a woman with a family to support to be out of a job, unable to get a job, and depending upon unemployment insurance.

Mr. LONG. Rather than a person receiving, let us say $2,000, to try to live on welfare, is it not far better for that person to get a job where he or she is making $4,000 or $5,000, low paying job though that may be?

Mr. HASKELL. It certainly is.

Mr. President, the Senator is absolutely correct. If a person can be gainfully employed and receive a living wage, it is much better than receiving a substandard subsistence-maintenance level welfare payment. And that is the Senator's point, as I see it.

Mr. LONG. And it also conditions those persons both in their attitude toward their neighbor and their feeling toward themselves; it gives them a little confidence to think they can make it, that they have a chance to make something out of themselves in this great free enterprise system of ours.

Mr. HASKELL. The Senator is correct.

Mr. LONG. I thank the distinguished Senator.

Mr. HASKELL. I thank the chairman of the committee very much for these observations and questions.

AMENDMENT NO. 198

Mr. President, I point out that the amendment that I shall propose does have a cap of $100,000 and does give the $2,100 credit for each new employee.

I ask unanimous consent to have printed in the RECORD at this point a copy of the amendment which I submit for printing.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 198

On page 90, line 19, strike out "25 percent" and insert in lieu thereof "50 percent".

On page 91, line 2, strike out "25 percent" and insert in lieu thereof "50 percent".

On page 91, between lines 14 and 15 add the following and reletter (c), (d), and (e) accordingly:

(c) TOTAL CREDIT LIMITATION.—The amount of the credit allowable by section 44B for any taxable year shall not exceed $100,000.

Mr. HASKELL. We are not discriminating against middle-sized business because, for example, with my $100,000 cap a firm employing 2,500 people could have a 5 percent growth in employment and still get the maximum. So we are not cutting out, by my proposed amendment, a great segment of American business. We are only cutting out the very large ones.

I echo what the distinguished chairman of the Finance Committee has said previously, that this jobs credit is supported not only by those who are unemployed—obviously it is supported by them—but it has the tremendous support of all small business organizations with which I am familiar.

It is for this reason, because I think we can make of the jobs credit something substantial and something the country needs, I am forced to oppose the distinguished Senator from Arkansas.

I thank the Chair.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, yesterday's action by the Senate deleting the $50 tax rebate for American consumers, but retaining the special tax incentives for business raises a simple question of equity for the average citizen and the good faith of Congress in maintaining a proper sense of proportion between individual and corporate taxes.

I also have serious reservations about both the economic justification for the business tax incentives and the merits of the two provisions themselves—the new jobs credit and the investment credit increase.

But the issue before the Senate now is primarily the equity issue. Simply put, it is not fair to kill the rebate for millions of average taxpayers and families, while enhancing the lucrative tax breaks already available for business. In the present posture of the bill, the Senate would be smashing the Easter eggs we had promised the average citizen, but offering a new golden Easter egg to business. That is not fair, and I hope that the Senate will pull back from its present course by adopting the motion that Senator DALE BUMPERS and I have proposed to delete the business tax breaks from the present bill.

To proceed with the business tax cuts at this time would be especially inflammatory for another reason—the growing burden of Federal taxes on individuals in recent years would be increased still more drastically. Once again, Congress is being asked simply to cut business taxes, while leaving individuals to the increasingly heavy share of Federal taxation they have had to bear.

As the figures indicate, two factors are involved—the sharp decline in the corporate share of the Federal income tax, and the massive increase in social security taxes borne by workers. The figures tell the story. Over the past two decades the ratio of corporate to individual income taxes has steadily declined from 71 percent in 1954 to 31 percent in 1976. During the same period, the ratio of social security taxes on individuals to corporate income taxes has mushroomed astronomically—from 34 percent in 1954 to 224 percent in 1976. Retaining the business tax cuts in the present bill would exacerbate this undesirable trend and send an unfortunate new signal to the hard-pressed average taxpayer.

Mr. President, I ask unanimous consent that a table showing the historical ratio of the corporate income tax, the individual income tax, and the social security tax may be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Declining corporate share of Federal taxes

Fiscal year	Indiv. inc taxes $B	Corp. inc. taxes $B	Soc. Sec. Taxes $B	Ratios (percent) (3):(2)	(4):(2)
1954	29.5	21.1	7.2	71.5	34.1
1960	40.7	21.5	14.7	52.8	68.4
1968	68.7	28.7	34.6	41.8	120.6
1976	131.6	41.4	92.7	31.5	223.9

Mr. KENNEDY. Mr. President, although the primary issue in the current debate is the issue of fairness to the average citizen, there are also substantial reasons for rejecting the business tax incentives in the current bill on the basis of economic arguments and the dubious merits of the provisions themselves. For example:

Economically, it is difficult to argue that the economy no longer needs the stimulus of the rebate, but continues to need the business stimulus. The latest Commerce Department survey indicates that capital spending will increase by 12 percent in 1977. As many experts have suggested, the level of business investment in recent years has a good deal less to do with the increase in the investment credit from 7 percent to 10 percent and now to 12 percent, than with the overall state of business confidence in the economy. In this view, investment has been held back lately because of the rebate and associated business fears of inflation. To this extent, the decision to drop the rebate will itself be a stimulus for investment, restoring business confidence and making the 12 percent investment credit redundant.

As a member of the Joint Economic Committee, we heard from Dr. Arthur Burns in the early part of this year, warning about the dangers of the tax rebate in terms of its inflationary signal. The message went out very clearly from Dr. Burns to the business community that if Congress enacted a tax rebate, there would be significant additional pressure for inflation in this country. I did not agree with the substance of Dr. Burns' point, but the alarm he sounded was heard by business. Many of us think that the alarm was a self-fulfilling prophecy, so far as business psychology was concerned. We have now taken steps to effectively dampen those fears of inflation, by eliminating the rebate. So, we have eliminated a significant psychological block for the business community, and I would expect a corresponding improvement in business attitudes and morale, which are likely to be reflected in business investment decisions.

The fresh confidence of the business community in this particular area, based on the relief that it has now received from the inflationary pressures of the tax rebate, will allow business to move forward without the need for additional tax cuts.

In addition, many economists also feel that increased consumer demand, rather than an increase in the investment credit, is the key to increased investment. Unless the demand for goods goes up, firms will be reluctant to increase their capacity to produce.

The strengthening of the economy in the first quarter this year—a key factor in the decision to drop the rebate on the ground that a consumer stimulus is no longer needed—is also persuasive evidence that the proposed business tax incentives are no longer needed either, since strengthening consumer demand will itself be an adequate business incentive.

On the merits, there is little evidence to justify proceeding with either the jobs credit or the investment credit at this time. In this situation, the wisest course would be to refer action on such incentives until they can be examined as

part of the administration's forthcoming comprehensive tax reform proposals, especially the proposals for capital formation. To prejudge these issues now would be a step in the wrong direction.

I think all of us are very sensitive to the importance of developing appropriate mechanisms for new capital formation. It is one of the most important and serious questions that we are facing in this country. It relates to the entire competitive situation of our industries. As the chairman of the Subcommittee on Antitrust, I know that there are few factors which have a greater impact in terms of the growth of competitiveness in our economy than the availability of new capital. Obviously, the investment credit has as one of its important justifications the formation of new capital. But I think it is appropriate that we also consider alternatives for the development of new capital, especially since the results of the boost in credit from 7 percent to 10 percent in 1975 are so unclear. There is no real case for a further boost to 12 percent, which would simply be piling on new and unwarranted tax relief for business at this time.

I also recall the extensive study by the Library of Congress in 1976, which laid out very clearly what is lost through tax expenditures and what results are achieved in new capital formation from various tax incentives. The investment credit is extremely inefficient, producing only 40 cents of new investment for each dollar of revenue loss. An incremental investment credit, with the incentive based upon expanding investment over prior years, has a much more constructive and positive impact on new capital formation according to the Library of Congress study, with up to $2 of new investment produced for each $1 of revenue loss.

We are also asked in this proposal to accept the current investment credit, without the opportunity to consider the concept of a refundable credit. I have had a chance to talk with the chairman of the Committee on Finance about that concept, and, perhaps later in the debate, we can talk about the refundable credit.

With respect to the jobs credit, the extraordinary complexity of the credit and the low level of the credit itself suggest that it is an unwise addition to the Internal Revenue Code. Since the credit is worth only about $600 to a firm hiring a $10,000 worker, it is simply a windfall to firms that are hiring for other reasons. In addition, the 103 percent employment growth factor as a test of eligibility—the credit is available only for employment growth of more than 3 percent above the prior year—means that the credit will be of dubious value in declining or less rapidly growing regions of the Nation.

We talked about that yesterday in terms of the various regions of the country. The Northeast region averaged 1.5 percent employment growth over the past decade. It fails to survive the 3 percent cutoff in order to qualify for the jobs credit. Certainly, there will be some firms in New England that will be able to take advantage of this proposal, but on the whole, they will not.

In terms of the Middle Atlantic States, the average growth is .8 percent. The Midwest has a similar problem, with growth in the 1 to 2 percent range. Yet, in the southern part of this country, the average is 3.2 percent. So they will be able to take advantage of the jobs credit. But large parts of East and Midwest will not.

The jobs credit program, therefore, has important implications in terms of its regional impact. How can we say we are going to provide some important new incentives for jobs? Should we not be sensitive to some of these other factors, particularly when the credit does not help regions of the country that are experiencing the most serious problems of unemployment and the recession? Certainly, that is a matter that ought to be considered.

Mr. BUMPERS. Will the Senator yield for a question?

Mr. KENNEDY. Yes, I am glad to yield for a question.

Mr. BUMPERS. In recent weeks, I am sure the Senator is aware that there has been a great deal of talk in the country by various interest groups with the President about the depressed television industry or the depressed garment manufacturing industry and the shoe industry. Of course, to that, we can add at least American Motors as far as the automobile industry is concerned.

Industries like that, which have been on the decline, that are not investing in capital equipment, and certainly laying off people rather than hiring them, are the industries that need help more than any in the country. Can the Senator tell me what help they would get under this provision?

Mr. KENNEDY. I cannot see any help whatsoever, I say to the Senator. Certainly not in the shoe industry. We have seen heavy loss of employment over the past few years. We have seen serious reversals in other areas, in textiles, in television production, in my own State.

There is little in this particular proposal, Mr. President, that would be beneficial to those industries.

(At this point Mr. MATSUNAGA assumed the Chair.)

Mr. KENNEDY. I do think if we move toward making the investment credit refundable, it would have some advantage to more rapidly growing and newer industries, and it would have obvious advantages to older industries that have been struggling through the economic recession.

As the Senator from Arkansas has pointed out, the investment credit, the great bulk of it, goes to the largest corporations. The jobs credit program is also, basically, a windfall proposal for firms, especially the largest firms, that will receive it, particularly as it has been altered from the House proposal. So I must say that I agree with the implication of the question of the Senator from Arkansas. I really cannot see how this is going to benefit employment situations in my own State, and I doubt very much whether it will benefit any other part of New England.

Mr. BUMPERS. If the Senator will yield further, this is not in the form of a question but just an observation for informational purposes.

Yesterday we heard about what a great benefit this is going to be to the small service station operator and the corner drug store, the small furniture dealer, and so on. I have a table here which indicates that in 1975, if this additional 2 percent investment tax credit had been in effect—I do not know how the costs were extrapolated. We are talking about a cost of about $2.4 billion. I think the Senator would find it interesting that if this 12-percent investment tax credit had been in effect in 1975, 10 percent of that additional 2 percent would have gone to four corporations; namely, A.T. & T., Exxon, General Motors, and U.S. Steel. Based on their 1975 investment tax credits, they would have gotten about 10 percent of the total amount that we are getting ready to dole out to industry if this motion is defeated.

Mr. KENNEDY. Under the present law, I believe A.T. & T. received $750 million in the investment credit for 1975. They are the largest recipient of the investment credit. I think General Motors is No. 2, with $95 million, Exxon is No. 3 with $59 million, and U.S. Steel is No. 4 with $51 million.

It is interesting that we hear a great deal about how this jobs credit is going to help small business, how it will help the small service firms. But when you look at who it really is that we are talking about with the jobs credit, we are talking about Sears, Roebuck, we are talking about Montgomery Ward, and other giant firms. They will not be hiring new workers because of this jobs credit, but they will not mind receiving the windfall in their tax returns.

I think it is appropriate that we lay out exactly what the facts are in this situation. I welcome the chance to do this with the Senator from Arkansas.

With respect to the investment credit, there is no evidence of the effect on investment of the 1975 increase in the credit from 7 to 10 percent. In this situation, Congress would simply be shooting in the dark by increasing the credit to 12 percent at this time.

It is interesting that in the debate yesterday, there was very little discussion about how the investment credit worked in 1975, as a way of justifying the increase to 12 percent in 1977. The limits on the credit and the fact that it is not refundable means that many firms are unable to use it, especially the small firms, the new firms, the rapidly growing firms, and the firms whose profitability was undermined by the recent recession. I personally believe the investment credit would have an entirely different impact if it were refundable.

In addition, as the level of the credit rises, increasing numbers of firms become ineligible for its benefits. Thus, because of the limits on the credit and the fact that it is not refundable, many firms are unable to use it, especially small firms, new firms, rapidly growing firms, and firms whose profitability was undermined by the recent recession.

By whatever measure—equity for taxpayers and consumers, the state of the economy, or the details of the proposed incentives—the business tax reductions in the pending bill have no justification.

I also wish to bring to the attention of my colleagues in the Senate the new figures announced this morning about the state of our economy.

The first quarter GNP, I note this morning, showed real growth of 5.2 percent. In the fourth quarter of 1976, it was 2.8 percent. So the GNP growth rate has gone from 2.8 percent to 5.2 percent.

There are some cautions, obviously, by economists that 5.2 percent may not be as glittering as it looks at first glance. But it is certainly a sign of better growth than anyone had expected.

It is an encouraging sign for the future, and it is in that atmosphere, in that climate, that we are asked to retain these tax incentives for business.

Mr. President, I think that the basic issue we are facing this afternoon is equity. We cannot lose track of that issue, we have repealed the $50 rebate for the 87 million Americans, on the ground that there is now no economic justification for the rebate. But we know that countless people could have used it, especially the low income families who paid extraordinary energy bills over the winter.

In my part of the country they have paid energy bills 35 percent higher because of the harshness of this winter over a year ago. There is the same kind of increase in Ohio, and in Illinois, the heartland of this country.

People who have experienced the burdens of unemployment and recession, who are faced with a difficult time, were promised the $50 rebate. Yet in a matter of moments yesterday, the Senate of the United States wiped that out. It wiped that out, and it wiped out the hopes for all those individuals for this modest sum. And at the same time we debated for hours yesterday afternoon whether to continue the tax breaks for business and industry. I think we have our priorities reversed.

At the end of last year and in the early part of this year, there was no one suggesting that the economy needed incentives for industry. No. We proposed a balanced program for business and consumers. But what we are facing here today, by failing to vote in favor of the Bumpers-Kennedy motion, is an unbalanced program for business alone.

That is the issue, no matter how we disguise it, no matter how many small businessmen and women we talk about taking advantage of the jobs credit program, no matter how we talk about increased productivity through the investment credit. There is only one issue and that is the issue of equity.

I wonder how the Members of this body are going to tell their constituents saying, "Mr. Citizen, you are not going to get your $50 rebate, but we are going to provide an investment credit to the wealthiest corporations and companies in this Nation."

I hope that people are going to be able to justify their votes to their constituents, how their vote reduced the corporate taxes of this country, while increasing taxes to the American public.

That is effectively what we are saying if we do not vote for the Bumpers-Kennedy motion, because as a result of this particular measure the amount of taxes to be paid by individuals is going to increase, and the amount that is going to be paid by corporations is going to decrease.

If we look at how that balance has gone over the period of the last few years, people in my State are saying, "That is enough, why should we keep paying more and more and more in Federal taxes, while in most instances the major companies or corporations, the most powerful ones, are bearing a lighter load."

Mr. President, this situation that we are faced with now, with the continuation of the business incentives, is basically inequitable.

It does not make sense from an equity point of view, it does not make sense from an economic point of view, and it does not make sense from a tax expenditure point of view. It just does not make sense.

I am extremely hopeful that this motion will be carried here this afternoon.

Mr. President, let me summarize again briefly, because so much attention has been given to the jobs credit in this debate, the six major arguments against it:

The employment tax credit provisions passed by the House and approved, in modified form, by the Senate Finance Committee are defective because both the House and Senate versions are incremental credits; employment must increase over the prior year's level by at least 3 percent to qualify an employer for the credit. This incremental feature would:

First, in and of itself, exclude nearly one-half of all employers and 35 percent of the total labor market from the benefits of the program;

Second, discriminate against businesses which for any reason cannot expand their employment;

Third, deny the employment stimulus effects to slow growing regions—such as the Northeast and Midwest and slow-growing industries;

Fourth, provide rapidly growing companies and new companies with a competitive advantage in hiring labor and in selling products;

Fifth, tend to be destabilizing in the economy, since taxes are reduced when the economy is expanding and increased when the economy is contracting; and finally

Sixth, make it possible for some substitution of part-time for full-time employment to occur; the result will be no increase in total hours of employment, but merely a sharing of the work. A firm could fire one $10,000 a year full-time worker, and hire two $5,000-a-year part-time workers, and get the advantage of the credit.

For all of these reasons, I hope the jobs credit will be rejected.

Mr. President, let me sum up by a literary reference. In Coleridge's famous poem, the Ancient Mariner sinned by killing an albatross, and had to wear it around his neck in penance. The business tax incentives have become an albatross around the neck of Congress, and they should be deleted by the Senate.

Mr. BENTSEN. Mr. President, a lot has been said here about a big bonus being given to business without any attention being given to the individual. But we ought to look at the facts in this bill.

We have $14 billion in tax cuts for the individuals in fiscal 1978. We have $2.4 billion in tax cuts for business in fiscal 1978.

Forty-seven million taxpayers in this country get a tax cut through the increased standard deduction. We also simplify the tax returns for millions of U.S. taxpayers.

We raise the standard deduction for individuals to a flat $2,200. We raise it for the married couple to $3,200. This is a substantial tax cut for the American people.

What has happened in the last 3 months that caused the change of position on the proposed tax rebate?

Consumer spending is up. What we are concerned with today is unemployment and inflation. They are twin problems, and we should not neglect one for the other.

What we tried to do with the employment tax credit is to encourage labor intensive companies to hire people.

What we tried to do with the investment tax credit is to encourage American business to modernize its manufacturing capacity.

Where is one of the most industrialized parts of our country? In the Northeast.

Where do we have some of the most antiquated manufacturing capacity? In the Northeast.

What should they be trying to do about it? Modernizing, so they can become competitors in the world markets to hold those jobs and to create jobs.

When they talk about growth and the employment tax credit, and the figures that are cited, they are overall employment figures. But where will most of these people be hired? They will be hired in service industries. And what has happened to the growth of service industries in a State like Massachusetts? Last year there was an increase of 3.3 percent in that State.

What are we talking about in terms of costs for the American taxpayer? We are talking about public service jobs. We are talking about $8,000 to $12,000, often a deadend job.

I voted for public service jobs because I would rather pay a person for working than to pay him for not working. I think one of the last things we can do to a person is tell him society has no productive role for him.

I would much rather do it by the private enterprise system, if we can; where, hopefully, they will have a permanent job and add to productivity.

What we are talking about is trying to fight inflation. If we go back to 1973 and 1974, we saw some of the same things that are beginning to happen here. Today they are talking about the manufacturing capacity having moved up from 78 percent to 82 percent. That does not tell the whole story. That is the overall average. That does not tell you individually what is happening in this industry or that industry.

However, back in the fall of 1973 and in the spring of 1974, we began to see bottlenecks appear in this industry or

that industry and then the leapfrogging of prices from one industry to the other. Yet, you could cite percentages of productive capacity that were certainly far below 100 percent of what had been utilized.

Some of the archaic production that was not competitive should be replaced. American business has not done its job in replacing the antiquated capacity in this country. One of the problems has been cash flow, and that is happening around the rest of the world. How are they doing in replacing their manufacturing? Far and away above what the United States has done. We are the lowest of any major industrialized nation in the world today in replacing productive capacity in this country.

This is a bill that has equity, and this is a bill that gives most of the rewards and the tax cuts to the individual consumer; but at the same time it makes a long-term commitment in the way of investments for American business to do the job it should do and to be competitive in the world: $14 billion in tax relief for individuals in fiscal 1978; $2.4 billion in tax cuts for business in fiscal 1978.

The permanent increase in the standard deduction will result in a revenue loss of $7.6 billion in fiscal 1978. An extension of the individual tax cuts results in a revenue loss of $6.8 billion in fiscal 1978.

I might add that that increased standard deduction benefits about 47 million taxpayers as a permanent tax cut, while the business provisions are only temporary. The increased standard deduction will make about 3.7 million taxpayers nontaxable. It is clearly a great relief to the individual.

The increase in the investment tax credit and the new jobs credit will help moderate inflation. I heard it said earlier that this actually was going to add to inflation by giving an employment tax credit. Think about that. We are talking about a tax credit for hiring an employee, above the 103 percent base. Follow this line of reasoning—that that is going to add to cost. How do you follow that? If you say to American business, to small business, "We are going to cut the costs of your labor," how does that add to cost? It seems to me that that cuts cost; and in a competitive society, that is passed on to the consumer.

If we say to American business, "We are going to give you an investment tax credit so you can lower the cost of your machinery by 12 percent, the cost of production," that is passed on to the American consumer in a competitive society. That lowers cost.

Let us look at this employment tax credit. If this were not so, then I say that we have a panacea here, because we have a way to finance the Treasury. We have a way to take care of all the deficits, if this does not lower costs, by giving this kind of tax credit.

What we should do is put a $600 surtax on the hiring of any employee, because that must work the other way. That is what must really cut inflation, if you follow their line of logic. Since it does not cut inflation or does not affect inflation to lower costs, then let us add a surtax on every employee who is hired, and let us finance the budget that way. But obviously that is not the case. That shows how illogical some of this argument is on the part of the opposition.

The cruelest tax we have today—and it has been said time and time again—is the tax of inflation. That is what we are trying to combat, and we are trying to help small business.

I heard the argument made that the investment tax credit was not going to be utilized properly by service stations and by mom and pop stores, and I think that is right. That is why we have given them an alternative here with an employment tax credit.

I heard some of the people from the Treasury Department argue against the employment tax credit. They said it is going to mean that people of lower incomes are going to be hired. I am delighted. Those are the kinds of folks for whom we have trouble getting jobs, because generally they have been people with lower skill and training. If we look at the classified sections of newspapers, we see many jobs open. But they are skilled jobs; they are jobs that require a lot of training; they are technical jobs. That is not so true in the service industry. In the service industry, there is a tendency to hire more people of lower skills. This means that a lot of people can stand taller, can get off welfare, can lead productive roles, can support their families.

I think this bill is a major step forward and is a balanced bill.

I recently returned from Mexico, where I met with the President of Mexico and the Secretary of Commerce. We talked about business investments, trying to help create jobs there, trying to solve the flow of illegal aliens into our country. We were talking about what it costs for a stove, what it costs for a refrigerator. Those items were two or three times the cost to the American consumer. Why? Because they are not competitive in their manufacturing capacity, because they have raised the tariffs and the barriers to foreign competition, to U.S. competition. That kind of competition is one of the real disciplines on business.

For our business to be able to compete, they have to have the cash flow, and that means an investment tax credit or employment tax credit, so that they can be competitive in world trade, so that we can see that our balance of trade is protected, so that we can see that our dollar is protected.

Mr. President, I believe the arguments are strong in this regard, and I hope that the Senate will overwhelmingly defeat this motion to recommit.

Mr. President, the Finance Committee bill provides substantial tax relief for individuals through the increased standard deduction and the extension of the general tax credit.

In fact, the Finance Committee bill provides over $14 billion in tax relief for individuals in fiscal 1978 as a result of the increased standard deduction and the extension of the existing tax cuts. This compares to only $2.4 billion of tax cuts for business in fiscal 1978. The permanent increase in the standard deduction will result in a revenue loss of $7.6 billion in fiscal 1978 and the extension of the individual tax cuts results in a revenue loss of $6.8 billion in fiscal 1978.

I might add that the increased standard deduction which benefits about 47 million taxpayers is a permanent tax cut while the business provisions are only temporary. In fact, the increase in the standard deduction will make about 3.7 million taxpayers nontaxable. Thus, it is clear that a great bulk of the relief in this bill goes to individuals.

The increase in the investment tax credit and the new jobs credit will help moderate inflation.

The cruelest tax of all these days is inflation. What we are trying to do with the business tax cuts is help small business, and we are trying to help make our manufacturing capacity more competitive in the world so that prices can be lower and we can hold down inflation.

What you are seeing in an increase in the investment tax credit and adoption of an employment tax credit is not something that contributes to inflation. It is something to try to bring about more productivity; to try to bring about more efficiency, to make us more competitive in world trade and to try to make the dollar sounder. That is a better solution, really, than a public service job. I would rather see a fellow paid for working than for not working, but too often public service jobs are dead-end jobs and not productive jobs. But these jobs that we get people into in the service industry are productive jobs and most of those will be by small business. And that is why small business has fought so hard for this concept.

I just came back from Mexico where we met on trade problems with the President of Mexico and the Secretary of Commerce, and they are telling me they had to pay several times what we pay for a stove or refrigerator. One of the reasons is that they are not competitive in world markets. They have built up trade barriers to try to protect local manufacturers. We have the same temptations in this country to build up barriers to protect local manufacturers.

One of the problems you have in this country is that we have been putting a very small percentage of money back into manufacturing capacity compared to other industrial nations in the world, and the country next to us is England, and you can see what kind of trouble they are in today.

Now, there is talk about having 82 percent of our manufacturing capacity utilized today. That really does not give you a true representation because that other 18 percent is the least efficient, the most unproductive; that is the part they put aside first. Business has been dragging its feet on modernizing its manufacturing capacity in this country.

Back in 1973 and 1974 we noticed bottlenecks developing in our economy, in our manufacturing capacity, and there was an immediate increase in inflation.

That is my concern today. When we get above 82 percent capacity, unless we get manufacturers in this country to modernize and increase their manufacturing capacity we are going to see those bottlenecks develop again. Who is going

to pay for it? The consumer is going to pay for it by increased inflation, and that is the sort of thing we ought to be fighting to prevent today, and why I strongly support what I think is a really balanced tax package.

In the past decade there has been a significant increase in the rate of growth of the labor force—the people who either have jobs or are looking for them. Between 1966 and 1976, the labor force grew by 19 million workers, compared to an increase of 9 million between 1956 and 1966. This growth in the labor force has not been matched by a corresponding increase in the rate of growth of the amount of plant and equipment; therefore, the growth rate of the amount of plant and equipment available for each employee has declined significantly. This has reduced the growth of labor productivity—the amount produced per hour worked—and the decline in the growth rate of productivity has reduced the growth rate of real wages.

It is desirable to increase investment to forestall a repetition of the shortages which occurred in certain capital-intensive industries in 1973 and 1974 and which contributed to the high rate of inflation in those years. The affected industries included chemicals, steel and paper along with other industries producing materials used as input by other industries. A high rate of investment in the next few years will help prevent the recurrence of this problem.

In recent years our economy has grown more slowly than that of most other industrial nations. A recent economic study of eight industrialized nations indicates that between 1960 and 1973, annual growth rates ranged from 3.8 percent in the United Kingdom to 10.9 percent in Japan, Canada, France, West Germany, the Netherlands, and Italy all experienced growth rates between 4.8 and 5.9 percent. The U.S. growth rate was only 4.1 percent.

Mr. President, I ask unanimous consent to have printed in the RECORD a table illustrating these very disurbing figures:

There being no objectiion, the table was ordered to be printed in the RECORD, as follows:

Comparison of economic growth rates

[In percent]

Country	Rate of economic growth 1960–73	Rate of growth prior to 1960
United States	4.1	[1] 3.6
Canada	5.1	[1] 5.2
France	5.9	[2] 4.9
West Germany	5.4	[2] 8.2
Italy	4.8	[3] 6.0
Japan	10.9	[3] 8.1
Netherlands	5.6	[4] 5.0
United Kingdom	3.8	[5] 3.3

[1] 1947 to 1960.
[2] 1950 to 1960.
[3] 1952 to 1960.
[4] 1951 to 1960.
[5] 1955 to 1960.

Source: Laurits Christensen, Dianne Cummings and Dale Jorgenson, "Economic Growth, 1947 to 1973: An International Comparison," Harvard Institute of Economic Research, discussion paper No. 521 (processed).

Mr. BENTSEN. Mr. President, one of the reasons for this poor rate of growth in the United States is the low level of investment. The growth rate of capital input in these eight industrialized nations has been lowest in the United States—4.0 percent and highest in Japan—11.0 percent.

Mr. President, I ask unanimous consent to have printed in the RECORD a table on these rates of investment.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Role of capital accumulation in economic growth, 1960–73

[In percent]

Country	Growth rate of capital input	Contribution of capital accumulation to economic growth
United States	4.0	1.6
Canada	4.9	2.2
France	6.3	2.6
West Germany	7.0	3.6
Italy	5.4	2.3
Japan	11.5	5.0
Netherlands	6.6	3.4
United Kingdom	4.6	2.2

Mr. DANFORTH. Mr. President, will the Senator yield for a question?

Mr. BENTSEN. I am happy to yield to the distinguished Senator.

Mr. DANFORTH. If we were to strike the investment tax credit and the employment tax credit from the bill, what would be left in the bill with respect to tax incentives for the private sector or private business?

Mr. BENTSEN. I think that all we would have left would be the extension of the increased surtax exemption which we now have.

Mr. DANFORTH. We would be exactly on the same plane we are on now, would we not?

Mr. BENTSEN. That is correct—for business.

Mr. DANFORTH. And it would be just a question of drifting along with exactly the same provisions in the Internal Revenue Code for business that we have right now, when we have what I think everybody would concede to be an unacceptably high rate of unemployment. Is that correct?

Mr. BENTSEN. That is correct.

Mr. DANFORTH. I think the Senator from Texas was present when Charles Schultze testified before the Committee on Finance. Does he recollect that testimony?

Mr. BENTSEN. I recall being there when he testified. I am not sure I recollect his testimony.

Mr. DANFORTH. He was testifying, of course, about the investment tax credit, not about the jobs credit. But he did point out that it was very important for the private sector to know that there was at least something in the stimulus package for business and for private investment.

Mr. BENTSEN. That is correct. I remember that very well.

Mr. DANFORTH. And without these two provisions, if we just were to strike them, there would be absolutely nothing; is that not correct?

Mr. BENTSEN. That is correct.

Mr. DANFORTH. About 85 percent of the employment in this country right now is private sector employment, not public employment?

Mr. BENTSEN. That is right.

Mr. DANFORTH. My objection to the bill, as a matter of fact, is that it does not go far enough, that it does not have enough in it for the private sector. You and I could perhaps debate that with each other, but if we were to strike this it would be absolutely nothing. We would say that for the 85 percent of the jobs that are provided by the private sector absolutely nothing would be helped by Government.

Mr. BENTSEN. In fiscal 1978 you are talking about $14 billion in tax cuts for individuals; you are talking about $2.4 billion in tax cuts for business.

Mr. DANFORTH. A very, very modest provision as it is.

Mr. BENTSEN. I certainly agree with that.

Mr. DANFORTH. Does the Senator understand any of the arguments in favor of striking these two provisions?

Mr. BENTSEN. I think the logic is overwhelming for keeping the provisions in.

The PRESIDING OFFICER (Mr. METZENBAUM). The Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. BENTSEN. I am delighted to yield to the distinguished Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, the question has been raised here by the movers of the motion to recommit the bill to the committee with instructions to strike out the investment tax credit and the employment tax credit as to what benefits the poor will get out of the bill as it now stands.

This was the very intent of the bill, to care for the poorest of the poor, the unemployed, the 7 million-plus men and women who have been unemployed, some of them for over 2 years now. To them the $50 rebate would have meant nothing at all for the reason that they have no tax rebate in the first place. They have been so long unemployed that they have not even been paying taxes.

The employment tax credit will, according to the experts who testified before the committee, create as many as 750,000 to 1.5 million jobs.

According to the administration's report it is encouraging that the economy has been improving to a point where the unemployment rate is now down to 7.3 percent and will be down to 7 percent by the end of the year. But certainly this is not an acceptable unemployment rate. We condemned the previous administration for accepting 7 percent as a tolerable unemployment rate, and here again we

are drifting into an attitude of accepting a 7-percent unemployment rate as being tolerable—tolerable to 7 million-plus men and women who are out of work not knowing where their meal is coming from. Is that tolerable? Mr. President, this body certainly ought to be able to do better than that.

The 2-percent additional investment tax credit, they say, will benefit only the big concerns.

As was so ably pointed out by my colleague from Texas (Mr. BENTSEN) we are trailing so badly in our productive capacity the other developed nations of the world, and we are trailing so badly because we have not replaced our archaic equipment, machinery, with modern machinery. The investment tax credit will give this incentive.

Now, we heard complaints here on the floor earlier, questions being thrown at the managers of the bill, as to what good is this bill going to do "in my State where foreign-made shoes are closing down shoe factories in my State."

It is because of the decrease in the productivity due to archaic equipment and machinery that we have not been able to produce as cheaply as our foreign competitors.

The investment tax credit will permit our shoe factories to replace their old equipment with new so that we can produce at much cheaper cost than our competitors, and once again our factories will begin to hum, we will begin to reemploy those who have been unemployed.

Mr. BENTSEN. Mr. President, I yielded the floor to the distinguished Senator from Hawaii.

The PRESIDING OFFICER (Mr. BUMPERS). Does the Senator from Hawaii wish to retain the floor?

Mr. MATSUNAGA. Yes, I wish to retain the floor. I am just taking over from the Senator from Texas.

The PRESIDING OFFICER. Does the Senator from Hawaii yield to the Senator from Ohio?

Mr. MATSUNAGA. I apologize, Mr. President, for the shift here, but the Senator from Texas had to leave the floor temporarily, and he asked me to speak from here.

The PRESIDING OFFICER. The Senator may proceed.

Mr. MATSUNAGA. I thank the Chair.

Mr. President, in my State of Hawaii the unemployment rate far exceeds that of the national average. It is as high as 8 percent. Most of those who are now unemployed were last employed in the retail, the service, trades or in the construction industry.

(At this point Mr. DECONCINI assumed the chair.)

Mr. MATSUNAGA. The bill as it now stands would provide incentives to small business, particularly the service and, yes, even the construction industry, to employ those who are most in need of work.

I have received many telegrams and letters from my constituent small businessmen in Hawaii, as did the chairman of the Committee on Finance, the Senator from Louisiana, and we have received assurances on the part of small businessmen that if the proposal to give a tax credit for employment goes through they will hire two or three and even more employees in addition to what they now have.

So that to say that this bill does nothing to help the poor and will help only the rich is not in consonance with the facts and with the representations made by those who are awaiting action by Congress on this bill.

Mr. President, I urge that our colleagues not forget the original intent of the bill, that is, to help to stimulate the economy and to create jobs, jobs for the millions of unemployed who have too long been unemployed and who are searching for the opportunity to work again, make a living, get off the unemployment roll, get off the welfare roll, and once again live in dignity.

Mr. President, I yield the floor.

Mr. METZENBAUM and Mr. SCHMITT addressed the Chair.

Mr. MATSUNAGA. Mr. President, the Senator from New Mexico (Mr. SCHMITT) has been asking for some time to be recognized, if the Senator from Ohio will yield.

Mr. METZENBAUM. Mr. President, I may say to the Senator from Hawaii that I took the Chair in order to accommodate the Senator from Hawaii and did come to the floor so that I might speak. I would appreciate being accorded the opportunity to be heard at this time.

Mr. SCHMITT. I am happy to await my turn and let the Senator from Ohio proceed.

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. METZENBAUM. I am very grateful to the Senator from New Mexico as well as the Senator from Hawaii.

Mr. President, yesterday and today many distinguished Senators, including the distinguished Senator from Hawaii, the distinguished Senator from Texas, and others, spoke eloquently on the merits of the employment tax credit. I do not rise to address myself to the job credit proposal. As a matter of fact, I could support that part of the bill. My concern is not with that part of the tax measure but with another aspect that of increasing the investment tax credit by 2 percentage points—to 12 percent—until 1980. While the employment tax credit is designed to encourage added hiring in labor-intensive businesses, the second option—that of increasing the investment tax credit to 12 percent—is simply not needed.

For much of my life I have been active in the business community. The company I headed was listed on the New York Stock Exchange, employed over 4,000 people, and was a profitmaking entity in the American business community. In my years of business experience, I can recall no occasion in which our company or any other business corporation expanded its business as a result of an investment tax credit.

Mr. President, Treasury Secretary W. Michael Blumenthal has clearly indicated that the administration no longer believes the business tax reductions proposed in this bill are necessary. I shall quote from his letter to Senator BUMPERS:

> . . . the administration concluded that . . . the business tax reductions should not be enacted in view of the improvements in the current economic situation. It is our view that since the Senate has deleted the rebate you should also delete the business tax reductions in this bill. Neither is now needed in view of the improvements in the economy. In addition, we believe it is important that the business tax relief be removed in order to make it possible to develop a better balanced tax program this fall.

In explaining the administration's position on the tax stimulus measure, the Treasury Department cited the following figures:

First. Unemployment has dropped from 7.8 percent in December to 7.3 percent in March.

Second. Housing starts for March were up 49 percent over the same period last year.

Third. The gross national product for the first quarter showed a 5.2 percent real increase.

Fourth. The wholesale price index rose at a 10.2 percent annual rate for the first 3 months of 1977.

How can anyone realistically say that business needs tax relief wher all of the indicators for our country show that business is doing particularly well at this moment?

Based upon these figures, the administration concluded that neither the rebate nor the investment tax credit should be enacted. I agree.

Further, this week's Business Week states that—

> . . . the economic recovery is gaining new momentum that will carry it well into 1978. . . . Retail sales climbed 2.4 percent in March to $59.6 billion, led by a 4-percent jump in durable goods and a 5-percent gain in auto sales . . . furniture and home furnishing stores scored a 3-percent increase.

There is, however, a more important reason why the business tax credit should not be included in the stimulus package, and that is the question of equity, the question of fairness. How can we on one hand take away $50, and in some cases as much as $200 per family, from the individual taxpayer and then turn around in the same week and grant business an investment tax credit that will benefit the business community by as much as $1.4 billion a year?

In short, the investment tax credit is a misnomer. It is a giveaway. According to a 1976 Library of Congress study, the investment credit will only produce between 35 cents and 45 cents of new investment for every dollar lost to the Treasury.

With 20 percent of the Nation's productive capacity idle, and approximately 7 million persons out of work, more equipment is not the answer. As a matter of fact, if the investment tax credit actually does what its proponents suggest it will do—increase purchases of equipment—unemployment will not decrease but rather increase. Let us take the example of A.T. & T.

A.T. & T. has embarked on a multibillion dollar effort to computerize its service equipment to reduce the need for individual operators and service personnel. That means less employment, not more. But for this, for this reduction in

the number of people that it is going to be able to employ, what did we do for A.T. & T.? We gave A.T. & T. an investment tax credit in 1975 amounting to almost three-quarters of a billion dollars.

This same problem is true in every industry where the installation of new machinery will result in a loss of manpower.

On the one hand, we have in this legislation a provision which ostensibly will help to create jobs; on the other hand, we have a tax giveaway which will actually result in putting in more technological improvements to cause a greater loss of jobs.

A well-run firm will not be induced by tax reductions to invest in additional equipment unless it will be profitable. There is not one businessman in the entire country who would state to the contrary. Where demand is great, market incentives—not Federal subsidies—will cause firms to invest. Businesses do not invest in new equipment when the economy is sluggish and when additional equipment is unnecessary. When they need the equipment, they buy it, because with the new equipment they can make more money.

Mr. President, only yesterday the distinguished chairman of the Finance Committee, Senator LONG, stated that the investment tax credit is that portion of the stimulus package that helps larger companies. I agree with him.

The investment tax credit is targeted to a narrow segment of the economy—capital intensive industry. It does not apply to investments in the housing sector, durable goods, plant or building expansions, real estate, intangible investments in research and development, or manpower training programs. Furthermore, the investment credit formula places many small businesses at a competitive disadvantage. Small businesses, or those operating at either no profit or a loss, must still compete with those competitors who are now able to buy their equipment cheaper.

The practical effect of this tax credit has been that it primarily benefits only the very largest capital intensive corporations. In 1975 more than 70 percent of the investment tax credit benefits went to corporations with assets of more than $100 million. Four corporations—A.T. & T., Exxon, General Motors, and United States Steel—received almost 20 percent of the total investment tax benefits claimed.

In addition to its limited scope, the investment tax credit greatly contributes to the continuing erosion of the Federal tax base. In 1966 the corporate share of the Federal income tax burden was 35 percent. Today it is only 24 percent. The corporate share of the total Federal budget receipts fell from 23 percent to 14 percent in the same 10-year period. This means that increasingly the tax burden has shifted from corporations to the shoulders of the average American family.

The entire question of the investment tax credit serves to further highlight the need for Congress to carefully analyze the interrelationships between tax policy and Federal expenditures.

It is well-known that Congress annually authorizes expenditures of over $400 billion for various Federal programs, but it is less apparent that Federal tax laws indirectly cost the Federal Government approximately $100 billion per year in lost revenues. While much attention is given to balancing the budget by reducing Federal spending, all too little attention is given to the revenue losses caused by our tax policy. There is little difference between a dollar spent and a dollar of income lost.

If we are to achieve President Carter's goal of a balanced budget in 1981, a goal which I support, both Federal expenditures and Federal tax policy must be made to reflect our national priorities.

Mr. President, a careful look at the current economic situation clearly illustrates that increasing the investment tax credit is not in our best national interest. The major problems confronting our economy are unemployment, inflation, and a rising Federal deficit. Clearly, any Federal expenditures should be aimed toward solving these problems. By withdrawing the $50 tax rebate for average American taxpayers, the President pointed to favorable economic indicators and cautioned against the inflationary aspects of the proposal. During my recent visits to Ohio, I found that despite their disappointment, most Ohioans accepted the President's reasoning and were willing to do their share to hold down inflation. If the American people are being deprived of a tax rebate because of economic factors, I believe it is only fair to require our largest corporations to do likewise.

The drain on the Federal Treasury caused by the 10 percent investment tax credit is estimated to be $8.76 billion this year alone. The 2-percent increase will cost the Treasury an additional $1.2 to $1.4 billion. It would drain almost $10 billion from the Treasury—or about one-sixth of the present Federal deficit. We talk about balancing the Federal budget—we talk about tax equity—we talk about tax loopholes. Now I think it is time that our talk be supported by our actions. I, therefore, strongly urge that we eliminate this unwarranted increase in the investment tax credit.

Mr. President, I yield the floor.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. METZENBAUM. I yield to the Senator from Hawaii.

Mr. MATSUNAGA. As I understand the Senator's position, the Senator is opposed to the investment tax credit, but supports the employment tax credit. Do I understand the Senator's position correctly?

Mr. METZENBAUM. The Senator from Hawaii correctly states my position.

Mr. MATSUNAGA. Then may I suggest to the Senator from Ohio that he ought to oppose the pending motion to recommit, for the reason that the motion to recommit would strike out the employment tax credit as well, that portion which the Senator from Ohio supports?

I would strongly urge that the Senator join us in opposing the motion, and offer an amendment to strike out the additional 2 percent investment tax credit.

Mr. METZENBAUM. I advised the chairman of the Committee on Finance earlier today that I would have no difficulty in opposing the motion to recommit on the present basis, provided that the Finance Committee chairman could indicate his support for eliminating the investment tax credit. The chairman of the Committee on Finance did not indicate that he could give me that assurance in the event I made that kind of motion, and I am frank to admit to the Senator from Hawaii that absent that kind of support and assurance, I do not believe that kind of an amendment would be agreed to. It therefore is my view that in order to make my point that the investment tax credit should not be increased, the only possible procedure available to me is to support the motion of the Senator from Arkansas to recommit this measure to the committee.

Mr. BUMPERS. Mr. President, a parliamentary inquiry.

Mr. MATSUNAGA. Will the Senator yield further?

Mr. METZENBAUM. I certainly will.

Mr. MATSUNAGA. The Senator from Ohio is certainly concerned, as I am and as the Senator from Arkansas is, about the high unemployment rate today. The Senator spoke of this measure costing as much as $1.4 billion for the investment tax credit and $2.4 billion for the unemployment tax credit. The figures that the Senator cited may not be exact.

The Senator knows that the bill, as originally introduced and as reported by the Finance Committee, is intended to decrease unemployment by as much as 2 percent in the next 2 years. Assuming that we reduce the unemployment rate by 1 percent, the Senator knows that it will mean an additional $16 billion to the Federal revenue. That means that we will be making a profit, Treasury-wise rather than losing.

In addition, we will be eliminating, for every 1 percent of decreased unemployment rate, about $4 billion in welfare and unemployment payments which we now make. It would add up to a $20 billion gain as opposed to about $4.8 billion, or some say $6 billion. The taxpayer, in effect, would be gaining by the passage of his measure.

Once again, I urge the Senator from Ohio to reconsider. Because of his long and wise support of the unemployment tax credit, I urge him to vote against the pending motion and offer an amendment to strike out just the investment tax portion.

Mr. METZENBAUM. Will the Senator from Hawaii yield for a question?

Mr. MATSUNAGA. I yield.

Mr. METZENBAUM. The Senator from Hawaii is a member of the Finance Committee. In the event the Senator from Ohio should decide to vote against recommitting, including the jobs provision and the tax credit, would the Senator from Hawaii be prepared to offer the motion to reduce the investment tax credit to 10 percent?

Mr. BUMPERS. Before that answer is given, will the Senator yield for a parliamentary inquiry?

Mr. METZENBAUM. I yield.

Mr. BUMPERS. Mr. President, I have a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. What will be the parliamentary situation as to the ability of any Senator to offer such an amendment in the event this motion is defeated? In other words, would the committee amendments have to be agreed to en bloc as a substitute before the amendatory process would be in order?

The PRESIDING OFFICER. The answer is no. If the Senate votes no on the motion, then the committee amendments would be taken up seriatum as they appear in the bill. Each committee amendment would be amendable when it is before the Senate.

Mr. BUMPERS. Would the amendment to strike the investment tax credit and jobs portion of this bill be in order prior to the agreement by the Senate for the consideration of all the committee amendments?

The PRESIDING OFFICER. No. If this motion failed, the committee amendments would be taken up one at a time as they appear unless there was a unanimous consent to vary that procedure.

Mr. BUMPERS. But an amendment, the substance of which is the same as this motion, would not be in order until all the committee amendments have been considered; is that not correct?

The PRESIDING OFFICER. Since it is a committee amendment that the Senator is trying to get at, an amendment to it would be in order when the committee amendment is pending.

Mr. BUMPERS. Such an amendment would then simply become an amendment in the second degree; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BUMPERS. I thank the Chair.

The PRESIDING OFFICER. The original House language would remain in the bill unless it was knocked out.

Mr. METZENBAUM. As I understand, the increase from 10 to 12 percent is one of the seriatum committee amendments; is that correct?

The PRESIDING OFFICER. It is a Senate committee amendment that increases it from 10 to 12 percent. The question would come on the committee amendment.

Mr. METZENBAUM. And it is separate and apart from all other amendments?

Mr. BUMPERS. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. Mr. President, what the Chair just announced seems inconsistent to me. Let me phrase the question this way: If the committee amendment is stricken, then does that not then leave the House language in the bill?

The PRESIDING OFFICER. That is correct.

Mr. BUMPERS. And the House language also contains the 12 percent investment tax credit?

The PRESIDING OFFICER. The Chair is advised that it does not.

Mr. BUMPERS. The House has the 4-percent credit on social security tax, is that correct?

Mr. MATSUNAGA. No.

Mr. METZENBAUM. One further parliamentary inquiry. It is not a fact that the committee amendment is a joint one including both the jobs credit and the increase in investment tax credit, all one and the same?

The PRESIDING OFFICER. That is correct. An amendment to strike part of that amendment would be in order while the amendment is pending.

Mr. METZENBAUM. Therefore, my inquiry to the Senator from Hawaii: Since the Senator from Hawaii is a member of the Finance Committee and knowing the usual procedures on the floor of the Senate, would the Senator from Hawaii, as a member of the Finance Committee, be prepared to offer an amendment to eliminate the increase in the investment tax credit from 10 to 12 percent, assuming that the Senator from Ohio was persuaded that the motion of the Senator from Arkansas to recommit should not prevail?

Mr. MATSUNAGA. In response to the Senator from Ohio, let me say this: I was initially opposed to the additional 2 percent investment tax credit. However, during the hearings, having had experts before the committee, I was convinced that the additional 2 percent was necessary in order to increase the investment in the capital intensive businesses to increase productivity, for one thing, and to increase employment. I was convinced that the additional 2 percent would be an incentive to create more jobs. Figures ran as high as 900,000 jobs. Well, they range anywhere from 500,000 to 800,000 jobs. The employment tax credit estimates ran from 750,000 to 1.5 million.

So I was convinced then that the investment tax credit would be a good thing.

Mr. METZENBAUM. Do I understand the Senator from Hawaii to say that somebody said that by increasing the investment tax credit from 10 to 12 percent it would add 700,000 to 900,000 jobs in this country?

Mr. MATSUNAGA. Yes. That was the testimony before the committee.

Mr. METZENBAUM. I am not certain as to whether the Senator from Hawaii was on the floor at the time I was speaking, and I could well understand his absence. But I pointed out at that time that A.T. & T. in 1975 received almost three-quarters of a billion dollars in investment tax credit, much of it by reason of the fact that they were installing automatic computerized switching equipment which would actually cause a reduction in the amount of employment rather than an increase. I point out to the Senator from Hawaii that much of the time, when business makes installations of new equipment in this day and age, it is a kind of equipment that is labor-saving, that eliminates jobs rather than producing jobs.

Mr. MATSUNAGA. But jobs are created. I remind the Senator from Ohio, in making the new equipment.

Mr. METZENBAUM. Let me point out that that is a one-time kind of job that may be created in making the equipment, but thereafter, hundreds of thousands of people lose their employment.

Let me further point out to the Senator from Hawaii a comment that I made at the inception of the speech I just concluded. That is that I have never met a businessman who told me that he bought a piece of equipment or invested in new capital equipment because he was going to get a tax reduction. As a businessman myself, I bought equipment when I could make a profit out of it. That, in my opinion, is the only basis on which businesses buy new equipment, regardless of the kind of business.

I believe that all this amounts to is a price to be paid in order to get through the jobs credit bill. I do not believe that we ought to take investment tax credit, that started off at 3 percent as a so-called incentive and stimulant to business in 1962, then was taken off for a few years, then came back at 7 percent, then came back again at 10 percent and now at 12 percent. All this amounts to is one more instance of a tax giveaway to the large corporations of America, not even to the small businessmen. What we are doing is saying to the people of this country, "We forgot about you. Forget about the $50 tax rebate. That we took care of yesterday. Today, here is another handout for the large corporations, who certainly do not need it, because their businesses are doing particularly well and their profits are at an all-time high."

Mr. MATSUNAGA. The Senator from Ohio is very convincing and persuasive. I am inclined to believe that if the Senator votes against the motion to recommit and then offers the amendment to strike out the additional 2 percent investment tax credit, he may be able to convince a majority of the Members of the Senate and carry.

I am suggesting that, inasmuch as the Senator from Ohio has indicated his strong support for the employment tax credit, he would be defeating his own end if he were to support the pending motion to recommit.

The suggestion which I make, I think, is one which ought to be accepted by the Senator from Ohio.

Mr. METZENBAUM. If the distinguished Senator from Louisiana, the chairman of the committee, or the distinguished Senator from Hawaii would offer that amendment, then I could well understand and could very well consider not voting to recommit the bill. But absent that, I think my nose counting is good enough to tell me that the elimination of the investment tax credit alone does not have much of a chance. If the chairman of the committee were to indicate his support for it, or if the fight were led for it by a member of the Committee on Finance, then I think it might stand a chance of passage. But with the entire Committee on Finance now voting against cutting it back to the 10-percent figure, I do not believe that, realistically, it would have any chance at all. Therefore, the only way to make my point is to vote to recommit this bill in the hope that somewhere along the line, perhaps we can work out that kind of compromise to make it possible to eliminate the investment tax credit as a price for obtaining the jobs credit.

Mr. BUMPERS. Will the Senator yield for another parliamentary inquiry, if I

may, because there still seems to be a little confusion at this point?

Mr. METZEMBAUM. I yield.

Mr. BUMPERS. I ask the Chair, first of all, if it is the intention of the author of this amendment to delete both the Senate provision, which raises the investment tax credit, and the jobs incentive provision and also, simultaneously, delete the House jobs incentive language?

The motion to recommit is designed to do both of those things. My question is, if this amendment is defeated, the only way to accomplish that same purpose, as I understand it—and I should like the Chair either to agree or disagree on that—is, No. 1, to defeat the committee amendment and then, No. 2, offer an amendment to strike the House language also?

The PRESIDING OFFICER. The Senator is correct.

Mr. BUMPERS. I thank the Chair.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. MATSUNAGA. The Senator has the floor.

Mr. LONG. Mr. President, the motion that is being proposed is not, in my judgment—and I am confident I am right about this—the proper way to proceed to do what even the Senator from Ohio would like to do. All one would have to do is simply vote down the committee amendment which would provide the jobs credit and vote to strike that part of the House bill which would provide a jobs credit, and vote down the committee amendment that would provide the investment tax credit. That would be the orderly legislative procedure. It would not be necessary and should not be necessary to move to recommit and report back in a certain fashion.

The motion to recommit and report back should not be made if the objective can be achieved by a simple amendment. Oftentimes, in fact, usually, the motion to recommit and report back is made when no other option is available to achieve the same objective, such as the situation that occurs when a bill has been amended and is no longer subject to amendment. At that point, one has no choice but to move to recommit and report back in the fashion that he would like to have the bill reported back because he has, at that point, been prevented from putting the bill in the condition that he would like to have it by way of amendment.

What the Senator is seeking to do is not orderly legislative procedure. I ask the Senator, does he have the bill drafted the way he would like to have it read now?

Mr. BUMPERS. Let me answer that question with a question: Would the Senator from Louisiana agree to a unanimous-consent request that, if this motion were withdrawn, he would agree to an amendment to take care of both the Senate provision and the House provision in one vote?

Mr. LONG. Mr. President, I do not feel like prejudicing my rights or the rights of any other Senator to insist on a division. I would not be surprised if we could ask for a division and motion—let me ask the Parliamentarian. Is that motion that stands there now divisible?

The PRESIDING OFFICER. Since it is not an amendment, it is not divisible unless it is done by unanimous consent or unless there is an amendment to the instructions.

Mr. LONG. But it would be subject to amendment?

The PRESIDING OFFICER. The instructions are subject to amendment, not the motion itself.

Mr. METZENBAUM. A parliamentary inquiry, Mr. President.

Mr. LONG. Let me say this to the Senator. I think it would be highly improper to agree to a unanimous-consent request that a Senator could not ask for a division of an amendment when not many Senators are here on the floor, because any Senator, as the Senator from Arkansas so well knows, has the right to ask for a division of an amendment. It does not require a majority vote; any Senator can insist that an amendment that is subject to division be divided. The Senator knows that.

Mr. BUMPERS. Is a committee amendment divisible, to strike out an insert?

Mr. LONG. One can divide a committee amendment any way he wants to divide it. One can strike out a single word if he wants to.

Mr. BUMPERS. Let me first ask the Chair, is an amendment to strike out and insert divisible,

The PRESIDING OFFICER. Under rule XVIII, it is specifically nondivisible.

Mr. BUMPERS. All right. Now, my next question is: This procedure which I have chosen to use as mechanism to get at this I do not really understand the objection to. The Senator talks about going at it in an orderly way. We have debated the merits of the investment tax credit and the jobs incentive bill here. The debate would be precisely the same. This way, we reach both the Senate provision and the House provision in one vote. Everybody understands precisely what they are voting on, so I fail to understand what the objection to this procedure is.

Mr. MATSUNAGA. Will the Senator yield for a parliamentary inquiry?

Mr. LONG. The Senator could propose an amendment to strike and insert. As far as the Senator from Louisiana is concerned, I think that it would be orderly legislative procedure to do that.

Mr. BUMPERS. Before the Senator arrived, the Senator from Ohio and the Senator from Hawaii were engaged in debate about that very problem. That was dividing the issue between the investment tax credit and the jobs incentive. The Senator from Ohio has said he favors the jobs incentive provision but is opposed to increasing the investment tax credit.

Now, the motion to strike and insert would not be divisible along that line.

Mr. LONG. A Senator could very well just offer his amendment at that particular place in the bill, just where the investment tax credit appears, just move at that point to strike the investment tax credit and substitute the jobs credit.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry, please.

The PRESIDING OFFICER (Mr. HATHAWAY). The Senator will state it.

Mr. METZENBAUM. I am not clear from the previous responses to the parliamentary inquiries from the Senator from Arkansas and the Senator from Louisiana. Would it be possible when the committee report is made, which has the combined jobs credit tax in it as well as the investment tax credit in it, upon the request of any single Senator, will those two portions be divisible?

I believe there are separate sections, as I understand it; is that correct?

Mr. MATSUNAGA. That is right.

Mr. METZENBAUM. May I have a response?

The PRESIDING OFFICER. Under rule XVIII, it is not divisible, because it is a strike and insert, by the committee.

Mr. MATSUNAGA. Mr. President, will the Senator yield for a parliamentary inquiry?

The PRESIDING OFFICER. The Senator will state it.

Mr. MATSUNAGA. Assuming that the motion to recommit is defeated, any Senator may offer an amendment to strike out the investment tax credit; is that not correct, without involving——

The PRESIDING OFFICER. While the committee amendment is pending, the Senator is correct.

Mr. MATSUNAGA. Right. So that there is no question of rule XVIII coming into play at that point.

The PRESIDING OFFICER. The Senator is correct.

Mr. METZENBAUM. That would require the affirmative offering of an amendment to strike.

The PRESIDING OFFICER. Right. So the Senator could, in effect, get division by motion to strike part of it if the committee amendment is susceptible of such a motion.

Mr. LONG. All one would have to do if he did not want the investment tax credit is just vote against it and defeat the committee amendment which proposes to add the investment tax credit. That is all one has to do.

That has not been agreed to. That is just a committee amendment to be voted on by the Senate and one that does not want the investment tax credit has only to vote against that part of it.

Let me say to the Senator that the investment tax credit is not going to become a part of this bill unless it be the view of the Senate that by a majority vote it should be a part of this bill.

I, for one, would like a direct vote on it when we get to it, may I say to the Senator, because I want to know what the view of the Senate is on the investment tax credit, as one who expects to be a member of the conference between the Senate and the House. I want to be able to report to the House of Representatives, if this provision is in the bill, whether this is a weakly held view or a strongly held view in the Senate of the United States, with regard to the investment tax credit.

I do not fully agree with what the Senator from Ohio said about the effectiveness of the investment tax credit. I had my severe doubts about it when it was first proposed. It was my amendment

that reduced the depreciation by the same number of points as the investment tax credit when it started out as a 7-percent investment tax credit. I believed that the basis for depreciation should be reduced by 7 percent on the theory that people should not be permitted to depreciate something they never paid for in the first instance.

That is how it stayed for the first couple of years it was in effect. Thereafter, on the urging of President Kennedy and President Johnson, who succeeded President Kennedy, I eventually relented and went along with the investment tax credit as it now stands, and, later on with the increase.

The reason I did was the experience with that proposal when it was being used to induce business to buy new equipment and stimulate the economy. It not only stimulated the economy, but it overheated the economy. It was absorbing so much of the funds available for investment that it seemed to this Senator that we did not have enough capital available for home building, and things of that sort.

But it really provided jobs and no one can contend that while we had that in effect we did not have reasonably full employment, because during that period we seemed to have more people working every month than we did the month before.

Strangely enough, instead of losing revenue, as some would have anticipated when we vote a tax cut, we gained revenue by about the same amount. We thought we would lose about $5 billion. Instead, we gain $5 billion in corporate tax collections alone.

Then later on under President Nixon, we repealed it. It was overheating the economy and we thought that we ought to repeal the investment tax credit, and we did.

Within a year, the economy was in a slump. The President asked us to reinstate it, and we did, and it played a major part in the recovery that then followed.

So the investment tax credit has been exceedingly effective in stimulating the economy. I do not think we can cite anything that has been done in the fiscal area to try to either stimulate the economy or slow it down that has had more effect than the enactment, the repeal, the reenactment, the rerepeal, the reenactment of the investment tax credit.

Mr. METZENBAUM. Will the Senator from Louisiana yield?

Mr. LONG. Surely.

Mr. METZENBAUM. Is it not a fact that every time the investment tax credit was put on or increased, first by the 3 percent, then 7 percent, then 10 percent, that the stimulus——

Mr. LONG. It has always been 7 percent.

Mr. METZENBAUM. Was it never 3 percent?

Mr. LONG. Seven, always at least seven.

Mr. METZENBAUM. I stand corrected.

Mr. LONG. When it first was enacted, it was a 7-percent investment tax credit. But it was my amendment that provided businesses could not depreciate the 7 percent that they had not paid for. That is why the Senator may have the impression that it was 3 percent, because my amendment had the effect of reducing the tax advantage of that credit.

Mr. METZENBAUM. I appreciate the clarification. Is it not a fact that if there has been a reinstating of the investment tax credit, or the initial passage of the law, that there was a lag period of several years—I think about 2 or 3 years—before the economy started to move up, and that there truly is no cause-and-effect relationship that can be shown by any economist as pertains to this subject? I have done some research in this area and do not find any direct relationship.

It is true our economy has its up and downs. But it is also true, as I previously stated, that I never found an employer, never found a corporation, never found a businessman, who said he hired anybody or bought a piece of equipment because he was going to get an investment tax credit.

I believe it is a fact that, sure, we have had our ups and downs, but that does not mean it came about by reason of the passage of the investment tax credit.

In answering my question, I would be grateful to the distinguished Senator from Louisiana if he would clear up a question I have in mind in the event there is a direct up and down vote on the investment tax credit of reducing it through the 10 percent it presently is. I appreciate his thoughtfulness in suggesting he would like instructions. The Senator from Louisiana has great stature in this body, and the way the Senator from Louisiana indicates he feels often results in Members of the Senate following his leadership.

Am I correct in assuming from the Senator's previous comments on the subject that he would be prepared to indicate to Members of the Senate that whatever way they vote is perfectly agreeable to him and that he is looking for instructions from the other Members of the body, or will he be indicating to them that he feels committed to increase the investment tax credit to 12 percent?

Mr. LONG. If it be the will of the Senate that the 2 percent investment tax credit should be stricken from the bill or that the committee amendment should not be agreed to, I will accept that verdict cheerfully. It is a matter for which I voted. It is a matter to which I became committed when President Carter recommended it. I believe that I had been advocating it even before President Carter recommended it.

For the Senator from Louisiana, at this late date, after having gone out and made speeches to people all over the country saying that this is a good idea and that I think it should be done, to reverse myself makes no sense. That is the kind of thing a politician should do only if it is absolutely necessary, and I do not think that is necessary. The Senate can inform me that it is a good idea or not, and it is a matter of no great moment to me whichever way the Senate votes on the investment tax credit. My view is that we should retain it, and that is the attitude I will take.

I would also like very much to try to see what happens when you provide the kind of incentive that the House provided especially to small concerns, companies that are labor-intensive, to see if they can put people to work. I could cite a thousand examples of that, I believe. Let me indicate one or two that are obvious to me.

In my hometown, one of the main cafeterias is part of a chain across the country, a successful chain. There was a time that when you would get through the line, someone would take your tray, take it to the table, and unload the tray for you. That was a very nice service and a nice convenience. Usually, you would tip them something, but they would be paid in addition. That service has been discontinued.

Nowadays, if you are disabled or not able to handle the tray very well because you have small children with you, for example, they will ring a bell and some little lady who ordinarily would clean up the table after you have left will come and help you with the tray. But you have to ask for the service, to have someone help you with the tray, in the best cafeteria in my hometown, which is a town of about 300,000 people. They have a chain of places like that.

It would be nice if the service could be restored. I would not be at all surprised if this jobs credit might make it possible for a concern such as that to provide the service again, to have somebody help a lady or a gentleman with the tray, to unload the food on the tray after they go through the line.

There was a time when a lady would go shopping, and a young man would help put the groceries in the sack and carry the groceries out to the car. That service seems to be gone nowadays.

It is the same with curb service. That is a phrase that has disappeared from the American vocabulary. There was a time when you could drive up someplace and someone would provide service at your automobile. Perhaps some of those services could be restored if we had the tax incentive.

Here are 115 people from Louisiana who wrote in. They filled out a little card; 2,000 letters were sent out. They were invited to send the card back if they wished; 3 or 4 percent, perhaps 5 percent, said that they did not see any point in this jobs credit. But more than 95 percent said that they would hire more people—some 1 person, some as many as 10 or more; the average was better than 2—if they had the additional incentive that is provided in the House bill.

I find myself thinking more and more, in view of the fact that we have taken out the $50 rebate, that perhaps we would be well advised to beef up this provision, to go as high as the House did. But we should be more careful in drawing it, because the House had a windfall advantage beyond anything we want to recommend. They would not have recommended it if they had given it as much thought as we have. That is, we had the opportunity to second-guess them. So we think we can improve on their handiwork. Under the circumstances, this is something that deserves to be

tried, and we do not think it should be stricken from the bill.

We also should have some experience with this jobs credit, because when we start looking at the welfare problem, we are going to be asking ourselves this question: If you pay about the same amount of money that that welfare check would cost the employer, to encourage him to hire somebody, one, would the employer hire the person and, two, would the person take the job?

We can have some valuable information if we just experiment with what the House is trying to do here. I point out that the House was not in any doubt about their position when they debated the matter and voted on it. Their position was taken on a 4-to-1 margin. This was offered as a substitute for two of the administration's favorite recommendations. This was offered in the House as a substitute for the investment tax credit and for the new proposal by the administration of a 4 percent credit against the payroll tax.

Even though the administration position as well represented by those who agreed with the administration, it was overwhelmingly defeated because people thought there should be an experiment with the jobs credit.

Looking at what was done in that respect, I would think that people would definitely want to see what we can do to make more jobs available and to make the jobs more attractive. How better could we do that than by giving the House effort a trial, to see to what extent these unemployed people could be put back to work?

Mr. President, as I indicated, this little effort that was made by the National Federation of Independent Business, in my judgment, convinces me beyond any reasonable doubt that if the jobs credit proposal is made sufficiently attractive, as the House attempted to do and as we should do in the Senate—the House bill may have resulted in as many as 200,000 to 400,000 jobs—that the estimate will prove to be conservative.

If Senators have any doubt about the matter, here are the names of people in Louisiana who got a letter—just a form letter that most people will not even answer.

Here are the individuals, here are places of business, their names, and just in case someone would like to check on it, here are their telephone numbers, including the long distance calls. Go call them. I have had my staff call them—and I have a memorandum here of what they said. Many of these people are very enthusiastic about their potential of hiring more people in the event this jobs credit goes into effect.

Here is just one response. Here is Mr. T. W. Anthony, president of the Schuylkill Metals Corp., Baton Rouge, La., my hometown, telephone No. 504–775–3040. Here is what he said, he will hire at least 10 new employees. He said:

Now I am either letting work go or working people overtime.

He continues by saying:

But if you put that credit into effect I will hire 10 more people.

Here are many others, more than 100 of them, who responded. That is a pretty good response to get from a form letter. We sent out 2,000 form letters. Five of them responded negatively—let us be fair—about five of them say they think it is a silly idea and they are not going to do anything about it. The other 110 say they will employ somewhere between 1 and 10 people. Now, it averages about better than two people per employer for these small businesses.

You can go call them yourself. Here are the telephone numbers, and they will tell you the same thing they are telling my staff when we called them, these people think they would be hiring more.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CURTIS. If someone hires an individual and he receives this credit, considering that the credit does come out of the Treasury, how much does it cost the taxpayers to put that one person to work?

Mr. LONG. Well, if you should assume that that person is probably on the unemployment rolls now.

Mr. CURTIS. I am going to come to that. But how much in the credit alone?

Mr. LONG. Well, the House figure is the most you could expect would be $1,680. Now, the Senate figure is $1,050.

Mr. CURTIS. All right.

Suppose we took another route and provided public employment, public projects, whose objective is to provide employment. What would that cost?

Mr. LONG. $8,500 or more.

Mr. CURTIS. Yes.

I want to ask something else: If the expenditure of this $1,700 puts the individual to work will that individual be paying any tax?

Mr. LONG. Of course, he would pay tax on his wages.

Mr. CURTIS. If he has dependents and other deductions so that he is not in an income tax bracket, he would still pay social security taxes; would he not?

Mr. LONG. Of course.

Mr. CURTIS. Yes. So the saving over public employment is substantial, several times over.

Mr. LONG. Yes.

Mr. CURTIS. We can expect some tax return from every employee because there will at least be the social security tax, and some of them may get paid enough or their family situation is such that they will be paying some income tax.

Now, in addition to that, what are the chances, in the Senator's opinion, that these individuals who get a job because of this Government incentive may work into a permanent job?

Mr. LONG. Well, Senator, most of these people we are talking about here would very likely be permanent jobs. In other words, one of the responses we had was that of a man who said he had, let us say, two filling stations, and he said, "All right, if I could get this jobs credit I would like to open another filling station, but right now I just do not feel like taking the plunge, taking that risk. If you would do that, that would just be the deciding factor, a litle extra to make me do it."

Here is a man who says he has employees working overtime. At the moment he does not feel like taking the plunge to add more people, but if you would give him this little advantage he would hire more people.

Mr. CURTIS. However, the tax incentive does not go on forever, does it?

Mr. LONG. No.

Mr. CURTIS. How long does it go on?

Mr. LONG. Two years.

Mr. CURTIS. Not fully 2 years, this calendar year and the next one.

Mr. LONG. That is right. It is actually less than 2 years.

Mr. CURTIS. Yes.

Now, suppose this is enacted and no one hires a single person, what is it going to cost the Treasury?

Mr. LONG. Well, it would cost them something.

Mr. CURTIS. I mean under this program here. If no one goes to work it is not going to cost anything so far as the taxpayer is concerned.

Mr. LONG. We would have to assume there would be some situations where someone would hire a person anyway—you have to assume that.

Mr. CURTIS. Yes.

Mr. LONG. So there would be some situations where an employer would have hired someone anyway and where there would be some modest cost to the Government.

But, generally speaking, there will be very little cost, only a minimal cost, unless more people are put to work.

But, Senator, there is one more thing here that really has not been discussed, and that is this: How would you really know whether, by giving a tax advantage to an employer measured against the payroll, that man would put more people to work or not, how would you really know if you never tried?

Mr. CURTIS. That is right.

Mr. LONG. We need to know before we get into the welfare reform area, and the President is going to come down with a welfare proposal, and if he acts as ambitiously to help the poor as I know that man to believe, he is going to come down with a welfare proposal one of these days which will cost vastly more than what it costs with this jobs credit. We are going to be asking the question then, we are going to say, "Well, now, look, do you not think you might be able to help these people more if you would provide some kind of help, either a direct payment or a tax advantage?"

If you are a tax-writing committee, you are going to think first in terms of a tax advantage for an employer to hire somebody and to take these same people who otherwise might be on the welfare rolls and put these people to work, so they would have twice as much income, admittedly they would be working for it, but they would also have the benefit of their pride and the respect of their loved ones for the fine job they are doing in trying to improve their condition as well as the condition of society.

Now, we would like to know whether if you make it sufficiently attractive: First, these people could be persuaded to hire

those hardcore poverty cases or these people who never had a chance to work in a job at all; and second, whether if the job were offered the person could be persuaded to take it.

Now, if we go ahead with this we will have some experience to work from as to whether this type of approach might work. Maybe it will not work but, at least, we would know at some point.

Mr. CURTIS. Is it limited to the balance of this year and next year?

Mr. LONG. That is all.

At some point you would be willing to pay for knowledge, especially if it is the answer to the $64 question, or the $64 billion question really, if you are thinking in terms of the magnitude of the problem.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Joseph Merriman be permitted the privileges of the floor during the consideration and debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I am one of those who, as a member of the Committee on Finance, supported the $50 rebate which the President initially proposed to us, and I would like to say that, it seems to me, the poor and working people of this Nation needed that rebate then and, as far as I am concerned, they need it still, and I cannot see the reason for the argument presented to us in a letter which has been distributed from Secretary Blumenthal, who says that—

> It is our view that since the Senate has deleted the rebate you should also delete the business tax reductions in this bill.

I think, in the first place, sir, it is technically the case that the Senate has deleted the rebate, but we did so at the behest of the Secretary of the Treasury.

Mr. LONG. Yes.

Mr. MOYNIHAN. Two points, Mr. President: first, this has been described as a business tax reduction. But is it not the case that no businessmen will get a penny of tax expenditure under this legislation until an American citizen has a job?

Mr. LONG. That is right.

Mr. MOYNIHAN. This is, this tax expenditure as we now technically call it, is directly dependent on putting people to work?

Mr. LONG. The Senator is correct.

Mr. MOYNIHAN. In additional new jobs?

Mr. LONG. That is correct.

Mr. MOYNIHAN. A second point: if I may ask the distinguished Senator from Louisiana, who has been for many years involved with questions of public welfare and efforts to create employment through job training and through macroeconomic stimulus and through subsidies of various kinds, is it not the case that this is the first time that Congress will have gone out to employers and given then a direct, precise, and concise incentive to add an employee; that this is the first time we have said to the employer, "If you do, if you add a new job, you get a benefit from the Federal Government"?

Mr. LONG. The Senator is correct, and we have talked before in terms of saying, "We will give you a tax advantage if you will buy some more equipment or build a new plant." But we have not said to them before, "If you will put another man on the payroll, we will give you a tax advantage."

Mr. MOYNIHAN. This is after more than a decade. I began my career in Government in the Department of Labor under President Kennedy when we adopted the Manpower Development and Training Act of 1962 and began the manpower report to the President. We are now 15 years into those enterprises and, in the main, the level of what has been seen as normal levels of unemployment have gone up and up and up. Today we are facing an administration which in great good faith is hoping to bring the level of unemployment in this year down below 7 percent—that is what the Assistant Secretary of the Treasury said to us yesterday—below 7 percent as a goal. When I began in this enterprise 7 percent unemployment would have been considered a social disaster; it would have been reminiscent of the great depression. This is what we desire to attain. After 15 years of experimenting and billions of dollars of expenditure, is a 2-year experiment with a direct incentive for adding workers to payrolls not within the range of a reasonable measure of social experiment and position policy?

Mr. LONG. I could not agree more. I do not know about others, but when I see 7 percent of our people out of work that is a matter of deep concern to the Senator from Louisiana. Especially when I think of all these young people, who never had a chance in life and who still do not have a chance, especially the young blacks, but as to the young whites it is tragic enough even there, young people who were raised in poverty, whose families lived in ghettos, who did what they were told to do and tried to be good citizens and have been out for years trying to find a job and still cannot get the job. For Congress to take the attitude, "Now we have only 7 percent unemployed, enough has been done," what have we done? All we have done is just give the people some talk. Now we are going to propose to say enough has been done. Nothing more will be done. We will wait for a tax reform bill. And when are we going to vote on that? We will see the recommendations in October, after the committee gets through with it. That will be a real exercise. And we cannot pass something like that in less than 9 months. So we will get around to voting on that, let us say, come about the following October. So here we will be 2 years and we say, "Well, things look a little better. When we got in unemployment was 7.5. Now we got it down to 7.3. It looks like things are fine. Enough has been done. Meanwhile let us talk about energy."

So then if we had what we thought we were going to seek, not only has the $50 rebate been dropped, and that was subject to a great deal of controversy, but we have been told that nothing is to be done, just forget about it; just forget the whole thing.

I must say that is going from one extreme to the other. How about all these people out of work?

What is the percentage of young people unemployed?

Mr. HUMPHREY. Nineteen percent.

Mr. LONG. I must take issue with my dear friend from Minnesota who said there was 19 percent. What I have here might be a little out of date or a little more up to date, but the latest information I have is that the unemployment rate for teenagers has been running 18 percent.

Mr. HUMPHREY. About 18.8 percent.

Mr. LONG. We are just a percentage point apart. All right.

And the unemployment rate for blacks has been 12 to 13 percent.

Mr. MATSUNAGA. That is adults.

Mr. HUMPHREY. That is adults.

Mr. LONG. That is all blacks, I believe. But for young blacks it has been a lot worse than that.

Mr. HUMPHREY. Forty percent young people.

Mr. LONG. The Senator tells me it is 40 percent.

Here we had all this talk about what we are going to do for these young blacks. Forty percent. Those poor souls, raised in poverty, never knew what it was to have the best of anything, been out of jobs for years, never had a job at all, many of them are still looking. What are we told? It looks like the situation now has improved enough so we can say nothing more need be done.

Mr. HUMPHREY. Mr. President, will the Senator yield at this point?

Mr. KENNEDY. Will the Senator yield?

Mr. LONG. I yield to the Senator from Minnesota.

Mr. HUMPHREY. I love to hear the Senator from Louisiana. When he gets moved and tied into a subject, he is eloquent, brilliant, throughtful, and compassionate. I mean that very sincerely.

Let me say I testified this morning before the Human Resources Committee on the youth employment bill. As we know, the Joint Economic Committee for the past 4 years has conducted intensive studies in youth manpower and the problems of it. We have really gone into it all around the country in field hearings as well as going to the top specialists to get a good picture of what has happened. Youth unemployment in this country is 50 percent of the total unemployed. Almost 50 percent of all unemployed people in the United States are between the ages of 16 and 24. There are young people today who have come into their twenties, who are now 22 or 23, who never had a job. They cannot get unemployment compensation because they never had a job. And they are either living off some form of welfare or ultimately driven to street crime.

We have records that show that the rate of youth unemployment and the rate of youth crime are parallel, just like that. They simply go up and down together. When we get youth unemployment down youth crime comes down.

When youth unemployment goes up, youth crime goes up and they live off the street in what we call the shadow economy.

The worse part of youth unemployment is in the 1980's and 1990's we will happen to have a large number of people who are then middle-aged who never had a chance to learn a work skill and never had a chance to become productive citizens. They get accustomed not to working.

We have ways and means through the economy, of jobs, tax reform, whatever it takes, to get these people to work, not only because we need their production, not only because it helps cut down on the social disturbances that come because of youth unemployment, but because, may I say, it gives them a chance to amount to something, with a sense of dignity, a sense of self-respect.

The Senator was at the meeting, I think, the other day with the President over at the Cabinet room in the White House, when we were talking about the costs and the budget. The biggest problem with the budget deficit is the unemployment in this country compounded by inflation. But as to unemployment, the Senator from Louisiana knows as well as I do that for every 1 percent of unemployment the Government loses about $14 billion in income revenues. For every 1 percent of unemployment the costs to State, local, and Federal Governments added up are another $5 billion in social costs. So for every 1 percent of unemployment it adds up to $19 billion.

If we could reduce unemployment by 3 percent or 2.5 percent, 2.5 percent, we would cut that budget deficit almost down to where it was insignificant and most likely it would have resolved it because if we could put 3 million people back to work, adults and youth, 3 million and put them back to work where they were earning, let's say, even a minimum income of $8,000 to $10,000 a year, the tax revenues that would be generated plus the income that they would receive would do more to repair the budget and its deficit than anything we can do. And for us to go along and pretend everything is just jolly simply because the economic indicators indicate things are better is just to close our eyes to reality; it is just plain closing our eyes to reality. We are political ostriches with our head in the sand and our tail widely exposed. And someone ought to take sharp aim at it and maybe will.

I thank the Senator for his constant concern on this problem, and I mean that, Senator LONG: You are one of the most compassionate Members of this body, and it is not only compassion that is involved here, it is equity and justice for everyone else. For the taxpayer today who is worried about the budget the best thing he can do is to find ways and means to put these young people to work. That will cut our budget. That will improve our revenues. That is the way to get business on Main Street. That will stop the mugging of the elderly and do more than all the cops we can put on the beat.

I remember I used this little example: In my little home town we had serious problems with youth vandalism. A little country town: Crime is not all among the blacks in cities, you know. These were all nice whites, in a little rural village, with two nice big churches, a fine little community, but with a serious problem of vandalism.

Then we got some EDA funds, some community funds that were State funds, some private voluntary funds, and some summer youth program funds, and they put those kids to work developing a lake shore park, building a couple of tennis courts, building a place to park campers along the lake shore, and do you know what happened? Our youth crime problem disappeared. Where we used to run them up every week and put them in the county jail over at Buffalo, Minn., the sheriff said:

We do not have the problem anymore.

Why? Because they had work. I do not care whether they are black, white, thin, tall, purple, or short, if they stand around with nothing to do the chances are they will get in trouble. There used to be an old phrase——

Mr. LONG. "The idle mind is the devil's workshop."

Mr. HUMPHREY. The devil's workshop. And idle hands are even worse. I think whatever we can do to put people to work will be helpful. The public is tired of paying out money and getting nothing out of it. They want to see something that is constructive. They want to see something that is visible. And the individual who gets that check would like to have something he can point to, that "I worked on."

I was down here in Florida. It is an interesting thing to think about the intracoastal waterway, built by the WPA.

The WPA. You know, they did not have any big welfare program under Franklin Roosevelt. They had a work program. You got some commodities, a few potatoes, and so forth, but what little welfare program they had was from the county seat, a little county program. But they had a work program, and it put millions of people to work, and all over America courthouses, parks, water programs, roads, farm-to-market roads, trees were planted, the shelter belts, soil conservation projects—people went to work.

What has gotten into this country? Do you think we are going to repair this country by just printing checks, and saying to people the biggest work that they can do is going to the post office, or maybe just waiting for the postman, and complaining about the delivery?

That computer check system; they ought to have to write them out by hand. If everyone that puts out one of these Government checks had to write them out by hand, they would want to get something back. As far as I am concerned, I would be willing to pay a man $100 or $200 a week doing something, rather than $75 a week sitting on his duff. I would be willing to go along with tax programs to provide incentives to get people jobs, because we will get far more revenue in that way than by their doing nothing.

When I came in, I heard the distinguished Senator from New York (Mr. MOYNIHAN) discussing this matter, and I think it is time for us to bite the so-called bullet and fish or cut bait. Use whatever phrase you want; but we have to do something to put people in this country back to work.

I was not too much interested in that $50 rebate; the Senator knows that. My interest in the rebate was party loyalty. At the time we were discussing the rebate, conditions were much more severe than they are now. At the time of the press confrence, I made it clear that I was reluctantly supporting the rebate. When I got away from here, and had a chance to do a little thinking by myself, I called the President and told him I was not for the rebate.

But I am for work, and lots of it. And I will tell you something: This country is not going to go bankrupt fixing up roads, building up water and sewer systems, improving parks, improving campsites, planting trees, soil conservation, street repairs. The railroads of this country need repair. We have so many things to do that there is an unlimited list. I feel confident that if we have something to do with our money, let us pay people to do something that needs to be done, and have a tax program that gets our business going, modernizes it, makes it effective. That is the only way we are going to cut down on inflation. You cannot play games with it. Increased productivity cuts down inflation. You decrease unit costs when you increase productivity. When you have low productivity, you have high costs, inefficient production, and inflation.

I thank the Senator from Louisiana for his leadership in these matters.

Mr. LONG. Mr. President, it warms my heart——

[Applause from the galleries.]

Mr. HUMPHREY. Charlie Schultze must have heard me.

Mr. LONG. Mr. President, it warms my heart, and it seems like old times, to hear the Senator from Minnesota say what he just said a moment ago. I could not agree more.

As the Senator well knows, we are going to provide some jobs. We are going to provide some jobs, which might not be quite as efficient as a full-time, constructive job, but we hope to provide some jobs on a countercyclical basis in all these cities, in line with the traditions of Franklin D. Roosevelt, to get the people doing some things, building parks and roads and various and sundry things. Some of these will be marginal jobs, and some of the jobs we create here will be marginal jobs, too. If they do not give increased incentive, they are not going to be creative.

But people are not looking at alternatives. If we do not give these people a chance to work for a living, we are going to have to pay to keep them alive, anyway, to pay for their food, to pay for some kind of housing, meager though it may be. We are going to have to pay for hospital care of these people. We cannot allow them to starve; we have to accept at least that much social responsibility. So we will have to pay one way or the other—if not with employment then with welfare costs, and the Senator added a cost that is a hidden one, but

it is there and you cannot deny it, the cost of these people getting into trouble, getting into crime, getting their lives off on the wrong road, because this Government and this society failed to give them an opportunity to make use of their resources.

Mr. President, there is on every Senator's desk——

Mr. KENNEDY. Mr. President, will the Senator yield?

(Mr. STEVENSON assumed the Chair.)

Mr. LONG. I will yield in just one moment.

There is on Senators' desks a message from the Secretary of the Treasury addressed to Senator BUMPERS. It has Senator KENNEDY's name at the top; I guess it is distributed by Senator KENNEDY. The message is that Secretary Blumenthal does not think either the 2 percent investment tax credit—which he recommended—would do any good, nor the jobs credit the House voted him down on by a 4-to-1 margin.

Mr. Blumenthal told me in somewhat different words that he used here that he did not think there would be a single job added by these credits. I wish he would come and answer by telephone, the calls from people calling to say they would employ people. In response to a survey, they got a 5-percent response from Louisiana alone. That is a high return on a form letter. So we called them, and they said, yes, they would employ these people, and specified exactly how they would use them and exactly why they needed these people.

That is why I believe the estimate was conservative when they said this would result in as much as 200,000 to 400,000 jobs. I think it would result in more than that.

When a witness for the National Association of Independent Businesses appeared before the Finance Committee, I asked them if they would poll their members, by letter or however they wanted to do it, and see what responses they got from the people in States represented by members of the Finance Committee.

Here are the kinds of responses they got:

In the State of Colorado, 434 employers said they would employ 1,148 people.

In Alaska, 84 employers said they would employ 251. In Connecticut, 140 employers said they would employ 376. In Delaware, 28 employers said they would employ 94 people. So on down the line it goes. In Wisconsin, for example, 499 employers said they would employ 1,269 people.

Just with Finance Committee people, of the members who wrote in, the kind we have confirmed, they said without a doubt they would employ people.

There are 5,651 employers who said they would employ 15,219 people. Those are just the people who are members of this little association who responded to a form letter. Our tally is that they are ready to do it. The last 15,000 the Secretary of the Treasury can call himself. I will be glad to cooperate and get their telephone numbers if he does not want to bother locating them.

This is something which started out without an administration recommendation. It had some bugs in it. There were some shortcomings in it. I know how people like to say, "Our idea is the best idea and your idea is wrong." The Treasury officials ridiculed first one little thing and then the other about the House measure. Those problems were easy enough to correct. As those matters were corrected, they still continued to pick it apart here and there. In due course, every criticism they could find has been corrected. We now have a provision which the Treasury people themselves would agree that, if we are going to have something of this sort, this is the most workable way to do it.

I yield to the Senator from Massachusetts.

Mr. KENNEDY. I thank the Senator.

We covered some of this ground earlier today and also yesterday.

I must say there are few people who have given as much thought as the Senator from Minnesota to the whole question of the state of our economy. He is a member of the Joint Economic Committee. My respect for him and for his recommendations about how to get people off welfare rolls and onto job rolls is virtually unlimited.

The fact of the matter is what is being described as the result of the investment credit and job credit is not going to do the kind of thing that the Senator from Minnesota either believes it will do or that the Senator from Louisiana suggests his business friends feel it will do.

It just amazes me to keep hearing about those 115 businessmen in Louisiana who are going to go out and employ all these workers.

In effect, what the Senator is doing is asking the business people in Louisiana if they want a tax break. That is what they are being asked. I am surprised that only 5 percent said yes. I am very surprised that only 5 percent would say yes, that is what they want. And those 5 percent would be surprised to learn that what they are supporting now is a pale imitation of what they were asked in the survey. The Senate bill has drastically slashed the benefit of the credit compared to the House bill, but the responses were based on the House bill.

It is interesting to hear the Senator from Louisiana say that what we are talking about is putting people on the job rolls, getting them off the welfare rolls. Who are the principal spokesmen for the working people of this country? The AFL–CIO, the United Automobile Workers? Where do they stand? They oppose this.

It is interesting to note that the Senator from Louisiana says he is representing the interest of those who want to put more people on the work rolls, yet the principal spokesmen for working people feel that these incentives are worthless, a new tax bonanza for business with no effect on jobs.

Mr. LONG. Mr. President——

Mr. KENNEDY. I know the Senator has the floor, but I hope he will let me finish my comments on this point. I know he has the right to take the floor.

Mr. LONG. Could I respond to just one point the Senator made? He might want to respond to that part of my statement as well.

Mr. KENNEDY. Very well.

Mr. LONG. What these people said was if there is a $1,700 job credit, they would expect to hire more people. It is not the employer who gets the money; it is the employee who gets the benefit of it because he is the one who gets the job.

Mr. KENNEDY. I cannot understand why the Senator from Louisiana keeps talking about the people who favor the House provision, when actually we are talking about the Senate provision. There is a dramatic difference. There is three times as much benefit in credit in the House provision compared to the Senate provision. An employer gets a $1,680 credit under the House bill, but only $600 under the Senate bill. I suspect his 115 respondents in Louisiana might feel the rug has been pulled out from under them.

The Senator keeps talking about the replies he received. But when one asks, "Do you want a tax credit?" who will say they do not want one?

It is extraordinary to me that we delude ourselves into thinking that this is something helpful to the unemployed. The principal spokespersons for working people do not want. Quite frankly, they think it is a tax bonanza for business.

That happens to be what the principal spokespersons for the working people of this country have said.

One can say the AFL–CIO does not speak for the working people or the UAW does not speak for the auto workers, or various other organizations do not speak for working people. But the fact of the matter is, their position is clear from their corespondence. The spokesman for the AFL–CIO—and I will make it a part of the RECORD—said:

> We feel there will be no added jobs stimulus from the business tax cut.

Mr. President, I ask unanimous consent that the letters we have received from the AFL–CIO, the UAW, and Public Citizen may be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

APRIL 20, 1977.

Hon. EDWARD M. KENNEDY,
U.S. Senate, Russell Office Building,
Washington, D.C.

Hon. DALE BUMPERS,
U.S. Senate, Dirksen Office Building,
Washington, D.C.

DEAR SENATORS KENNEDY AND BUMPERS: The AFL–CIO strongly supports your motion to strike the $2.4 billion in new business tax breaks contained in H.R. 3477, now before the Senate.

From the standpoint of equity alone, it is scandalous that serious consideration is being given to initiating new "sweeteners" to businesses while taking away $50 payments to the poor, the aged and the low and moderate income Americans. Certainly if there is no longer any claimed justification for the rebate, as President Carter says, there is also no justification for the additional business tax cuts.

The AFL–CIO opposed the rebate and the business tax sweeteners both in the House and the Senate because we felt the funds could be better spent in direct job-creating programs. We still feel that way because of persistently high unemployment.

We feel that there will be no added job stimulus from the business tax cuts. The 2

percent additional tax credit will provide few if any new additional jobs—just as there has been no clear proof that the present 10 percent investment tax credit created jobs. We also feel that the job tax credit will provide few, if any jobs as companies experiencing growth in the market place—such as General Motors—will receive the government subsidy, while companies in trouble—such as American Motors—will receive nothing.

A full examination of individual and corporate taxes is necessary, and will be undertaken later this year. That is the time for serious consideration of business taxes, individual taxes, and the entire internal revenue code.

We strongly support the Bumpers-Kennedy recommital motion to set aside the $2.4 billion in new business tax breaks.

Sincerely,

ANDREW J. BIEMILLER,
Director, Department of Legislation, AFL–CIO

APRIL 20, 1977.

Hon. DALE BUMPERS and Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATORS BUMPERS AND KENNEDY: The United Auto Workers supports strongly your amendment to delete the business tax reductions from the pending tax bill.

Even before the President's decision to request deletion of individual income tax rebates from the pending legislation, the UAW had expressed its opposition to tax relief for business. It was, and remains, our position that a tax savings based on a company's payroll would result in lost revenue far greater than any potential gain from such a measure. Also, the UAW has long had reservation about the effectiveness of the investment tax credit. The increase in the investment tax credit from seven to ten percent in 1975 cost the Treasury $2.5 billion in fiscal 1976 without any discernible impact on investment.

While the UAW did oppose these business tax reductions as a matter of policy while the individual $50 rebate was still under consideration, we believe the decision to abandon the rebate makes it all the more imperative to defeat the business tax savings.

The gross inequity of maintaining tax breaks for business while denying tax rebates to individuals, when they began as part of a single stimulus package, would heighten—with good reason—the high degree of public distrust of our tax system. You are both very sensitive to the cynical attitude with which the American people view the tax structure. Sadly, much of that cynicism is justified by the perpetuation of gross inequities in our tax system, despite constant lip service to the principle of tax reform. It would be ironic and tragic if, instead of moving toward tax reform, the Congress moved in precisely the opposite direction by approving business tax breaks of no value to the economy while agreeing with the President's decision to abandon the rebate. The UAW commends you for taking the initiative to strike the tax breaks for business from the pending tax bill and shall urge your colleagues to support you in this effort.

Sincerely,

HOWARD G. PASTER,
Legislative Director, UAW.

APRIL 20, 1977.

DEAR SENATOR: We urge you to support the motion by Senator Bumpers to recommit the Tax Stimulus bill with instructions to delete the temporary business tax cuts of Title III. Clearly fairness requires that elimination of the rebate for most Americans be coupled with elimination of the investment credit for corporations.

The business and financial community has waged an all-out publicity campaign to kill the rebate for the average person. Treasury officials testified before the Finance Committee that a principal reason for dropping the rebate was the fact that businessmen perceived that it would enlarge the deficit and thus aggravate inflation and push up interest rates, which expectations can become self fulfilling. Any such concerns about the deficit apply equally to a package of business tax credits totalling $2.4 billion per calendar year.

The other principal reason for the rebate's demise is, of course, that the renewed surge in the economy made it unnecessary. The same applies to the investment credit. Businessmen will increase their capital spending when warranted by consumer demand, low enough interest rates and the absence of excessive inflationary fears. If the recent boost in the investment credit from 7 percent to 10 percent hasn't been sufficient to spur investment another boost to 12 percent certainly won't help.

In the face of the worst unemployment crisis since the great depression the Congress has had to exercise considerable budgetary restraint in voting funds for badly needed direct job creation programs. Now it is about to deny a tax rebate which can amount to several hundred dollars for average families. Many have, in effect, already spent their rebate to pay increased fuel bills or to meet the ever increasing cost of living. Surely another boost in the investment credit, which even most businessmen have conceded will have little impact, should be of a lower national priority.

Indeed the investment credit was added to the stimulus package only as an afterthought. It was intended as a message of psychological reassurance that Washington would not approve substantial individual tax cuts without a sweetener for business. The irony of dropping the bulk of the individual tax cuts while retaining the "add-on" for large corporations will not be lost on the general public.

By the same token the Senate should resist the temptation to take advantage of the budgetary leeway for tax cuts by enacting other hastily considered or ill-advised measures which various Senators may propose. Various proposals to grant special rates of accelerated depreciation to some areas of the country provide especially costly examples of the kinds of unfair and ineffective measures which should be rejected.

Sincerely,

ROBERT M. BRANDON,
WILLIAM PIETZ,
Public Citizen.

Mr. KENNEDY. Mr. President, I do not deny there will be benefits to all those businessmen who will take the jobs credit. But, as I said, I cannot understand why there are so few. Who would ask a Louisiana businessman to look a gift horse in the mouth? Obviously, they will say they would like a tax break.

Mr. LONG. Let me be sure we understand what the Senator is trying to strike out of the bill. Could we understand that the provision he seeks to strike is that in order to get the benefit of this provision a man would have to hire not only more, but he would have to hire 103 percent of what he had in his 1976 base year, last year; that he has to hire 3 percent more than he had last year before he gets any benefit; that it is only then that he gets the benefit, and that benefit is limited to a fraction of what he is paying in wages? In any event, he would have to pay a lot more in wages than he is getting in tax advantage.

Does the Senator understand that is what he is trying to strike?

Mr. KENNEDY. That is exactly what I am saying. The tax break is a windfall. He will hire a new worker for good reasons, having nothing to do with the tax break. And then he will claim the credit as an afterthought. Does the chairman of the Finance Committee believe that any business person in this country are going to invest $10,000 for the salary of a new worker, solely to get back $600 under the jobs credit? That is what the Senator is trying to sell. That is saying it in a different way. The House provision would have offered a larger credit of $1,680, but even that credit would not really affect a hiring decision.

Another potential loophole is that an employer could fire one full-time individual and hire two part-time workers, and be able to take greater advantage of the jobs credit, without increasing the total work roll. There are all kinds of different complexities and potential abuses in terms of that provision.

I think it is unrealistic to believe that industries are going to go out and say, "Because we could get $600 back, we are going to invest $10,000," in a new worker, unless, of course, they planned to do it in the first place. The fact of the matter is, they are going to need a good percentage of that $600 to pay for the accountants and lawyers needed to decipher the complexity of this provision. The Senator from Louisiana knows that as well as I.

Mr. BENTSEN. Will the Senator from Louisiana yield on that point?

Mr. LONG. I yield.

Mr. BENTSEN. I would say to the Senator from Louisiana and the Senator from Massachusetts, that point was carefully considered in the Finance Committee. We paid a lot of attention to it. As the jobs tax credit is now formulated, the vast majority of small businesses will need practically no additional accounting work. They will be able to use figures from the Federal unemployment tax forms which they already submit to the Government. That is what they will be able to make their compilations from. It will be a very simple thing for most businessmen to accomplish.

In addition to that, I ask the Senator from Massachusetts, if the House position were accepted, if we had a larger incentive, would the Senator from Massachusetts accept it?

Mr. KENNEDY. I have indicated before the Committee on Finance that I could not, for the reasons that I outlined then. I do not think a tax credit is really meaningful in addressing the critical problem of unemployment. It is extremely complex, and not an effective job incentive. The House bill is bad enough, but the Senate bill is even worse, so far as a job incentive is concerned.

The 103-percent employment threshold is a special problem for New England. I see from the tables that average employment has increased in Texas by 4 percent. But Massachusetts fails to meet this threshold—our average growth is only 1.2 percent.

Mr. BENTSEN. I want to tell the Senator from Massachusetts that in all the service industries in Massachusetts, it

has increased by 3.3 percent. So in Massachusetts——

Mr. KENNEDY. In Massachusetts, the overall average total is 1.2 percent. In the State of Texas, it is 4 percent. That is a very clear signal. I understand why the Senator from Texas is so strong a supporter for that particular provision. But the fact of the matter is—I do not know what the unemployment rate is in the State of Texas at the present time. What is the level now?

Mr. BENTSEN. 5.7 percent.

Mr. KENNEDY. We would love to be that low in the State of Massachusetts. The areas which have the most persistent and consistent unemployment problem in this country are New England and the Middle Atlantic States and the Midwest. Yet they would be the areas least likely to take advantage of the jobs credit.

The fact of the matter is that, in New England, the average job growth is 1.5 percent. In the Middle Atlantic States—in New Jersey, New York, and Pennsylvania—it is 0.8 percent. We have devised a formula that is not going to be helpful in achieving even the limited goals that have been established. The Senator from Louisiana mentioned that the Senate Finance Committee had worked to get the bugs out of the House bill. But I think he has cut the heart out of the House bill, so far as a jobs incentive is concerned, because they have reduced its impact by two-thirds for firms that take advantage of it.

Mr. BENTSEN. Will the Senator yield for a comment?

Mr. LONG. I yield to the distinguished Senator.

Mr. BENTSEN. The most industrialized part of this Nation is New England. Some of the most outmoded manufacturing capacity is in New England. It does not do us any good just to wring our hands over these problems. We ought to be taking some affirmative action. We are talking about an increased investment tax credit that will encourage industry to modernize its manufacturing capacity to make it more competitive today. We are talking about trying to do something about unemployment by putting a carrot out there, an incentive for private enterprise to hire additional workers, something above what they would normally increase employment by. That is the purpose of the 103 percent base. That is the normal increase in the amount of employment. So there is a carrot out there.

I frankly think that is the better way to do it than the public service jobs. It is often a dead-end job, where there is no promotion, where there is no permanent employment. If we put them in the private enterprise system, we help them increase productivity, we help to lower costs. If we lower the cost of employment, that passes on to the consumer and what we are doing is fighting inflation and helping keep prices down.

Here is what we ought to be concern-in ourselves with, unemployment and inflation. Here is one of the rare times that we come up with something that works at both and is productive in attacking both problems, lowering costs and putting people back to work at the same time, a lot cheaper than a public service job.

Public works jobs—I support those. But they are talking about public works jobs today that will cost $30,000 per employee. There are some advantages to it. We have permanent investments to help the future of our country. I am going to continue to help support public works jobs. But here is the cheapest way I know to get people back to work, to try to increase productivity, to lower unemployment, to try to fight inflation. It is a unique solution. I think we ought to give it a fair change.

I know the Secretary of the Treasury came up and testified against it. I think he is a bright and a very able man, but I do not think that he has not talked to the many small businessmen that we have talked to who say, give us that incentive and we will add the extra worker or the extra two workers.

We have a lot of young people out of work in this country today. Here is one of the ways to help put them back to work. Look at the classified pages and see how many jobs are available. Lots of jobs. But what kind of jobs? Skilled jobs. High training is needed for those jobs.

The Secretary of the Treasury testified that the kind of people they are going to be hiring with this employment tax credit will be those with lower wages, lower income. What is wrong with that? Those are the people we are trying to get back to work and trying to get off the welfare rolls.

I think this is productive legislation to try to accomplish both objectives at the same time, fighting inflation and unemployment.

Mr. LONG. I thank the distinguished Senator.

Mr. President, the eloquence of our able friend from Massachusetts, if I might have the Senator's attention, has really convinced me of one thing: that this is not a big enough jobs credit. It ought to be a larger amount. I apologize for the fact that it is not more than that. The reason, from my point of view, that I voted to make it a low figure was that we are trying to stay within budgetary limitations.

But since the $50 tax credit has been deleted, we have an $11 billion savings and we have more slack in the budget. Therefore, I personally feel more inclined to support the kind of thing that our distinguished friend from Hawaii (Mr. MATSUNAGA) has been advocating. That is that we try to be as generous in the incentive that we provide to the employer who is hiring a new employee as the House of Representatives was in their proposal. Perhaps the Senator from Hawaii would like to describe how he would like to amend the proposal so that it could be even more attractive than what the committee recommended.

Mr. MATSUNAGA. If the Senator from Louisiana will yield, for the information of the Senator from Massachusetts, I do intend to offer an amendment which will raise from 25 percent to 50 percent the tax credit which will be allowed for each new employee employed. The chairman of the committee has agreed to it and so did the author of the committee amendment which is now in the bill as reported by the committee, the Senator from Texas (Mr. BENTSEN). So the impact will be even greater than that which is provided in the House bill, which provides only for a 40-percent credit.

Mr. KENNEDY. May I ask the Senator how much that is going to cost?

Mr. MATSUNAGA. This will cost an additional $1.1 billion added to the $2.4 billion, which will bring it up to $3.5 billion.

This is the thing I must emphasize, that for every 1 percent of unemployment we reduce, it will mean additional revenue of $16 billion and also a saving of about $4 billion annually in terms of welfare payments and unemployment compensation. So that will mean a total savings and earnings to the Federal Treasury of $20 billion, as compared to an expenditure of $3.5 billion.

So, in effect, this could be accomplished without any cost to the taxpayer.

The statement made earlier by the Senator from Massachusetts that we are giving a bonanza to the businessmen is not in fact true, for the reason that under the employment tax credit, the employer gets no tax credit until and unless he employs new employees, and take those unemployed off the unemployment roll.

This is the real essence of the unemployment tax credit. It is something which has not been tried in the United States. It is something which has been tried in Europe and which has worked. So that I think we ought to dare to try something new.

Mr. KENNEDY. It looks like even more of a business bonanza. The jobs credit in the committee bill cost $1.2 billion a year. The Senator says that by doubling the credit, the revenue cost will be another $1.1 billion, or double the current cost.

But how can that be? If the cost is only doubled, it means that no more new workers will be hired at 50 percent than would have been hired at 25 percent. The revenue loss from hiring workers with the 25-percent credit is simply doubled. Either the revenue estimate is mistaken, or the estimate is based on what I suspect, that the jobs credit is not a jobs incentive at all.

If I may ask a brief question, with the additional billion dollars, does not that violate the budget resolution?

Mr. MATSUNAGA. No, it does not, for the reason that we have, as the Senator knows, withdrawn the $50 rebate which would have amounted to $10 plus billion.

Furthermore, I say to the Senator from Massachusetts that we are not bound by any restrictions this time around, that we will be bound, of course, after the Budget Committee sets in the ceiling in May.

Mr. KENNEDY. I believe that since the $50 rebate affects only the 1977 resolution, the withdrawal of the rebate gives no leeway for the Senator's proposal, which affects the 1978 resolution. That resolution is currently awaiting Senate action, after being reported by the Budget Committee. We are not bound yet, but the Budget Committee and the Finance Committee have cooperated in proposing limits for 1978, and I doubt that there is

room for such a large additional revenue loss.

Mr. McCLURE. Will the Senator yield on that question?

Mr. LONG. On the budget resolution, we would not be bound by the 1978 figure until it has been agreed to. It is my understanding that we are not bound even by the 1978 budget resolution until we have the second resolution.

Mr. KENNEDY. I understand it has been reported, it is on the calendar.

Mr. LONG. We cannot violate something that is not the law, the Senator knows that.

Mr. KENNEDY. Would the Senator agreed it would violate the limit if the budget resolution is accepted?

Mr. LONG. I assume that if we pass this, we will amend the budget resolution—this is the same Senate.

Mr. McCLURE. If the Senator will yield on the question of the budget resolution, I think it should be said that if the action applies to 1977, it would come under the third concurrent resolution.

I think there is room under that with the subtraction of the rebate scheme, because there was about $6-and-a-fraction billion on the revenue side and $2-and-a-fraction billion on the outlay side contemplated in that $50 rebate.

So there is some room to make some shifts in the Third Concurrent Resolution.

As far as the First Concurrent Resolution, the 1978, it has been voted out of the Senate Budget Committee, but not acted on by the Senate, certainly subject to whatever action the Senate might wish to take.

I do not think we ought to shy away from it on the basis of a budgetary limitation at this time. I do not think that is real.

Will the Senator yield briefly on a couple of other points?

Mr. LONG. Yes.

Mr. McCLURE. I want to comment about the Senator from Minnesota's concern about youth unemployment because a great many of us from liberal to conservative, Republican and Democrat alike, are focusing on that question. I have introduced legislation along the same lines that many others have dealing with that question.

If we look at the young people in our country today, the age group of 16 to 19 is only 10 percent of our labor force, but comprises 25 percent of the unemployment.

The age group expanded from 16 through 24 is only one-fourth of our labor force, but it is almost half of the unemployment of the United States.

I think we must deal with that question, and I hope we will. But when we look at the question of how we deal with gross statistics, not individual, or not individual groups within our society, how are we going to create the necessary jobs between now and 1980?

I think if we just look at the composition of the labor force, it is very obvious that between now and 1980 we must create at least 12 million new jobs. Where are they going to come from? Who is going to pay for them? Will they all be public employees? Will they all be public service jobs? Or will there be a place for them in the arrangement that provides 8 out of 10 jobs now, and that is the private sector? And if they are to be in that, at what cost?

If we are to create 12 million jobs at the current rate of investment behind each job in the economy, it will take $1.5 trillion of investment.

Certainly, our tax system ought to consider what it takes to trigger, or induce, or encourage, the investment of $1.5 trillion to create those necessary jobs between now and 1980. If we do not do that, the unemployment rate we are all concerned about is going to go up, not down.

I commend the Senator from Louisiana for his leadership and understanding of this relationship in our economy. I wish others did, too.

I hear some comments made about the beneficiaries of an investment tax credit being a corporation. It seems to me that Sears, Roebuck is not just a name on a facade. It is a group of people that work. They are a group of people that work in that store, they are a group of people who work to supply the goods that move through it. I cannot understand the insensitivity of people who say we must not help Sears, Roebuck in spite of the fact that it is people that are helped.

I hold no stock in Sears, Roebuck, but there will be no jobs unless various business enterprises have the opportunity to invest and create the job opportunities for people. It is not just Sears, Roebuck or Montgomery Ward or Exxon or General Motors. It is the people that work for them, the people that work for their suppliers, the people that work in the steel mills, the people that work in the rubber companies. They are the ones who will be benefited if we create investment opportunities for the businesses of this country.

There is no alternative for it, if the business does not make those investments, except public service jobs or welfare. That is the choice we are confronting.

I agree with the Senator from Minnesota that I would rather put people to work than put them on public welfare. That is our choice.

I do not understand these people who fail to perceive, even though they may make loud speeches, that jobs are created only when somebody can invest.

Mr. LONG. Mr. President, I agree with the Senator.

Now, with reference to a letter we have here which the Senator from Massachusetts so generously distributed to us, this letter from these great labor organizations, I admire those people. They are very fine people. I admire them for who they are and what they do.

But let us understand, what is the program?

They did not want to put anybody to work by giving a businessman an incentive. When George Meany came before our committee a year or so ago, he said:

I want to make it clear that we favor the 12 percent investment tax credit.

George Meany told us that. I almost fell out of my chair. What was George Meany doing saying that?

I said:

Why would you favor this, haven't you always been against the investment tax credit for business?

He said:

Well, we made a deal, we agreed that if business would go along with us on something we wanted, and what we wanted is in the bill, we would ask you to vote for the 12 percent investment tax credit.

Frankly, if I do say it, that is the AFL's attitude toward putting somebody to work by way of a tax advantage. In other words, if they could make a deal with us so that they are going to get something they want, they will go along with it. But they feel something should be in it for them when we do that.

I think we are going to do right by those fellows. We are creating jobs, and some of them of a make-work nature, costing us more than $8,000 a job to put their fellow to work.

We are not turning them down cold. We are buying a lot of their programs. But at the same time, we do not have enough money in this country to put all these people to work on make-work jobs at $8,500 a job. That would truly bankrupt us and put us down at the bottom of the ocean.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. McCLURE. If we can indeed create productive enterprise, create these jobs so that they are producing more wealth for the country rather than the leaf-raking jobs which are the deadend public service jobs, then there is a greater opportunity to share in this wealth throughout the entire economy. All workers in this country will share if there is greater productivity. But if all you do is create public service jobs that do not create greater productivity, the only people who benefit from that are the ones who are actually holding jobs. The others have no chance to benefit from the increased economic activity.

Mr. LONG. That is correct.

Furthermore, the American Federation of Labor does not speak for the kind of people for whom we are trying to provide these jobs—not these little people who work in the mom and pop grocery stores and the little cafeterias and restaurants and television repair shops and filling stations, the various little service stores around this country, the little wholesale establishments.

I am talking about little Main Street, USA. I am not talking about big Main Street. I am talking about little Main Street, across the United States. Of course, there are a lot of jobs in the larger cities. They do not have these people. I wish they did, because that would be an indication that these people at least had one good job at one time in their lives when they could afford to pay union dues. I would like to see them join a union and have the kind of job the average member of organized labor has. Regretfully, organized labor is not in a position to speak for these people. They have sympathy for these people, ordinarily. Frankly, when we try to speak for these people, organized labor has its own ideas about this.

In the first place, they want the mini-

mum wage paid to everybody, then they have the prevailing wage, then they want them to join the union. That is all right so far as this Senator is concerned, but it is sometimes hard to comply with because sometimes an employer cannot afford to pay that much.

If the employer cannot afford to pay $4,000 in a marginal job, maybe we can make it sufficiently attractive by a tax advantage so that his cost is covered against other taxes that he owes and, therefore, he would have the capability of employing that person. That is not the kind of thing organized labor ordinarily is interested in.

Mr. McCLURE. I understood the Senator to say a moment ago that there is a letter from the Secretary of the Treasury in which he indicates that the investment tax credit is not being effective in creating new jobs.

Mr. LONG. Yes, there is a letter from the Secretary of the Treasury. I assume that it has been placed in the RECORD. He says:

As you know, the Administration concluded that the $50 rebate and the business tax reductions should not be enacted in view of the improvement in the current economic situation. It is our view that since the Senate has deleted the rebate you should also delete the business tax reductions in this bill. Neither is now needed in view of the improvements in the economy.

I wonder whether we are in that good shape. I thought things had turned a little for the better, but I did not know that the recession was all over. I thought the situation was still pretty grim.

Mr. McCLURE. I say to the Senator from Louisiana that the Secretary of the Treasury turned from an economic stimulator to an inflation fighter in 48 hours. He might similarly change his mind about this particular incentive as well.

Whether it is the investment tax credit or the wage credit provision, it seems to me that we still have a problem of high unemployment rates. We should be dealing with the question of high unemployment rates. Even if the economic situation is bettering, let us talk about the people who are involved in a 7.9-percent rate, and let us do something directly and immediately to solve that problem, or at least work on that problem in the short run, while the economy improves in the long run, to take care of the unemployment rates in 1978, 1979, and 1980.

Certainly, there is a short run problem as well, and it seems to me that the wage tax credit will work on the short run. That is all it is designed to be, as I understand it, under the House proposal. As the Finance Committee has suggested, it is an experimental program of short duration, to see how it will work.

If the economy is recovering, as many of us hope it is, and some indications are that it is, then this will phase out at exactly the time the economic recovery takes over and supplants the need.

Mr. LONG. I will read the last sentences of the Secretary's letter, because I find this amusing:

Neither is now needed in view of the improvements in the economy.

Does anyone think that the Secretary had in mind the 40 percent of young blacks who never had a job in their lives, or the old people, when he said that neither is needed?

I will read the remainder of it:

In addition, we believe it is important that the business tax relief be removed in order to make it possible to develop a better balanced tax program this fall.

If you remove it, what do you have? You have $6 billion for people who do not itemize. So that is zero for the business community in the bill; zero to provide incentives to hire somebody. For all the poor souls who do not make enough money to pay any tax, including the 40 percent of young blacks, many of whom never had a job in their lifetime, it will be great news to them to know that this is a balanced bill. They do not have anything now, and they are not going to get anything, including a job, in the future.

For certain taxpayers, mainly middle-income people who have the good fortune to have a job, have fairly simple lives, so they can just take the standard deduction, have no particular business problems that cause them to have to itemize, the result is that they get a tax cut.

One might ask, for the good Lord's sake, why? Just for the purpose of simplification. If that is the case, why can we not postpone the whole fool thing and let it wait for the tax reform, for which recommendations are to come in October? Maybe they should save the whole thing and get a sweetner for the so-called tax reform bill.

If you want to create a job, why not provide some tax incentive or tax reward for someone who puts people to work? That is what those of us on the committee are contending in saying that we would like to reward a fellow who actually employs somebody.

Mr. McCLURE. The tax credit might provide additional jobs, as the wage tax credit might. Certainly, the increase in the standard deduction is of no benefit to the person who is unemployed. He has no income against which it can be taken, so there is no benefit to that person.

I hope we can move in this direction. I am not wedded to the precise language in this bill or this particular provision. Perhaps somebody has a better idea. I know that the Senator from Kansas (Mr. DOLE) had a wage subsidy proposal which has been endorsed by several of us who support that. I think this wage tax incentive is largely in the same direction as the one the Senator from Kansas had in mind. But it is important that we move to work on the margins of employment now, to get a job for some people who otherwise will remain unemployed or will remain on the welfare rolls, while various people study alternatives.

There is about an $18 billion swing for every 1 percent change in the unemployment rate. That $18 billion in our budget could be put to far better use than simply paying welfare and having reduced income to the Federal Treasury.

Again I commend the Senator from Louisiana and the Finance Committee for at least working on this matter, instead of trying to ignore it and assuming that it either does not exist or that it will go away.

It was suggested by the Senator from Minnesota that we should not have our heads in the sand because that exposes a certain part of our anatomy that makes a great target for somebody who might shoot at us.

It was also suggested by someone that we had to rise to the occasion and we ought not to have our feet set in concrete.

Well, I would say that if you have your feet set in concrete and your head in the sand, it is awfully hard to rise to the occasion. [Laughter.]

Mr. LONG. I thank the distinguished Senator.

I believe we have covered this subject fairly well today. But let me just summarize this one point. This little poll to which I made reference, taken by the National Federation of Independent Businesses, was mailed out to approximately 70,000 employers. That was just a sample because we, on the Committee on Finance, said we would like to know how many of their members would write in and actually make a commitment to hire somebody if they would write them.

All right. So of those 70,000 polled, 5,651 employers said yes, they would expect to hire somebody and, to be specific, they would expect to hire 15,219 employees.

But that takes into account all of these many businesses who are not going to bother to fill out a card and send it in to some little association, but who, if the opportunity were provided and the incentive were provided, when they make their plans and look at that situation, would decide they would by all means take advantage of this, particularly when they see their neighbor, in competition, providing additional service to the customers of that business.

So that there is great potential in using the tax system to reduce the cost of hiring an additional employee and to put more people to work.

I do think, Mr. President, that if we are going to reduce taxes by $6 billion in ways that tend to simplify the law, but have no assurance that it will do anything of a substantial nature in putting people to work, then we ought to have passage of this provision in the bill that would definitely add additional employees to the rolls.

I think, Mr. President, we will probably want to vote on this matter sometime tomorrow, and I have discussed this with Senators, and I think that sometime early tomorrow afternoon would be a good time to vote and, perhaps, at that time we might reach an agreement.

Mr. BUMPERS. Let me say to the distinguished Senator from Louisiana I talked to the majority leader earlier and suggested that we vote at a time certain tomorrow. We will come in at 12:30 tomorrow, and morning business should be over by 1. I am agreeable to voting, say, at 2 o'clock tomorrow afternoon.

Mr. LONG. That would be all right with the Senator from Louisiana.

I would like, if there be no objection, to propose a unanimous-consent agreement to that effect. I would like to ask the acting Republican leader what he thinks about that matter.

Mr. CURTIS. I would not want to do that without conferring with the leadership here. My guess is we can vote sometime tomorrow, but to fix it right now I cannot do that. It was my understanding that we were not coming in until 2 o'clock. We will be in session very late tonight.

Mr. LONG. Well then, I would suggest that we more or less agree, without a unanimous-consent agreement, to have a tentative agreement that we will try to vote in the early part of tomorrow afternoon, around 2 o'clock.

The motion is subject to a motion to table, but I think the Senator would prefer to have a straight vote on his motion, and we can vote on it, and I think sometime about 2 o'clock will be fine.

Mr. BUMPERS. If it is agreeable with the Senator, unless there is some objection to a unanimous-consent request, let us leave it to the majority leader, with the understanding that we will vote at 2 o'clock tomorrow afternoon. In his unanimous-consent request last night he carried the orders over to tomorrow, as I recall, and he said he would come in at 12:30 tomorrow. That is already in the RECORD. That would give us another hour to talk about it.

Mr. CURTIS. I would rather not have an order entered this evening.

Mr. LONG. I am informed there would be objections to entering a unanimous-consent agreement at this time, but I would suggest that Senators make their plans to vote early tomorrow afternoon on this matter.

INCREASING THE INVESTMENT TAX CREDIT: AN IDEA THAT HAS COME, AND GONE

Mr. HUMPHREY. Mr. President, I have always viewed our Federal tax system as a fragile beast of burden. If we abuse it, or make it unfair, the people will react in kind by withdrawing their faith and their participation. If we nurture it, it shall serve us well.

That is why we in Congress must respond with sobriety and full awareness of what is at stake as we consider whether or not to enact an increase from 10 to 12 percent in the investment tax after having eliminated the $50 per person tax rebate.

In my mind, and in that of most Americans, there is no doubt that the rebate and the investment tax credit increase were two sides of the same coin—a coin designed to stimulate the economy out of a sluggish recovery.

When President Carter first proposed a special temporary stimulus component for consumers and industry to the tax bill, there was widespread agreement as to need. In the subsequent quarter, however, the recovery has perked up significantly; we are all familiar with the statistics on industrial production, personal income, capital investment, and housing starts, to name a few examples. Some of us are still unsatisfied with the rate of progress, particularly with regard to unemployment, but there is a general consensus that our economic recovery has perked up. In the interest of balance, President Carter wisely recognized that a tax cut designed to increase consumer spending should be complemented by a modest increase in the tax incentive to stimulate investment. But, now that the changes in the pace of economic recovery have convinced the President and Congress to eliminate the tax rebate, I believe that we should follow through completely and eliminate the proposed increase in the investment tax credit.

While the equity and balance arguments are convincing to me in and of themselves, I believe that a strong case for its elimination can be made on purely economic grounds. The investment tax credit is one of the largest tax expenditures currently included in our tax laws. It amounts to about $10.5 billion in this fiscal year alone.

Mr. President, I have supported and continue to support the investment tax credit. I believe it is especially useful as a countercyclical measure during times of deep recession when capital spending decisions are being deferred. However, the whole rationale for abandoning the rebate was that our economy is bouncing back. If this is true for the rebate it is also true for the proposed increase in the investment tax credit. With so many indicators pointing upward, I believe that investments will be made without providing any additional tax incentive. The 2-percent increment to the investment tax credit we are considering will, in my opinion, be a windfall to business, taking roughly $2.4 billion from the pockets of our taxpayers and producing virtually nothing in terms of investment that would not have occurred otherwise.

I believe we should also be aware of the potential impact of the increased investment tax credit on employment if it does in fact, increase investment. This is particularly crucial in view of the fact that the production recovery that is underway is by no means an employment recovery. Our unemployment rate today is virtually the same as it was a year ago. A recent study by Dr. Robert Caen, a University of Chicago economist, reported last year in the Wall Street Journal, found that an investment tax credit "hikes unemployment marginally for at least 3 years after it is instituted, because it lets companies substitute more automated equipment for workers." Certainly this analysis should encourage us to take a very skeptical view toward increasing the investment tax credit in our high unemployment economy.

Furthermore, even under the most optimistic assumption, $2.4 billion in tax stimulus to business is not going to have much impact once it has trickled down through our $1.5 trillion economy. This is particularly true when there is not even a pretense that this tax reduction will be targeted at additional capital that would not be invested without this economic sweetener.

Recent economic developments have also convinced me that we do not need to add to the $10.5 billion we will spend for the investment tax credit this year. Business investment plans are up markedly since early winter when the President framed his original proposal.

Private surveys show a remarkable increase in planned capital expenditures. Typical is the survey conducted by Rinfret Associates, Inc., which reported last fall that real capital expenditures would rise in 1977 by 2 percent in real terms, according to the respondents to our survey. This rise in capital expenditures in 1977—is enough to assure continued economic expansion but not enough to assure a robust or vigorous economic expansion. But RAT's latest survey released March 19 concluded that—

> In real terms (nominal adjusted for inflation) private capital expenditures are slated to increase eight percent in 1977. Capital expenditures were a laggard in the economic recovery. They are no longer.

The most recent Commerce Department estimates confirm this dramatic shift in investment plans. It now projects a 7-percent increase in real plant and equipment spending in 1977 over 1976.

Finally, let me point out that the majority of American business people feel the change in the investment tax credit will not be important in their investment decisions. According to the latest "Outlook Survey" of the Nation's Business magazine, 57 percent of the business executives interviewed said the investment tax credit under consideration would not be important to their investment decisions and 22 percent said it would be of little importance. In fact, 93 percent of the executives interviewed did not feel it would have a very significant bearing on their investment decisions.

Mr. President, if the economy does not need it, if it has the potential of reducing employment, if it raises basic questions of equity among consumers, if the administration feels it is unnecessary, and if 80 percent of our business executives say it will have little or no impact on their investment decisions, why in the world are we even debating the proposal?

Mr. President, I have looked long and hard at the Finance Committee's desire to keep the business portion of the tax cut in the revised bill. But from no perspective that I can find is such a course justified.

PERMANENT TAX CUTS NEEDED

Mr. ROTH. Mr. President, I applaud the President's decision to withdraw his $50 tax rebate proposal. I think it is extremely refreshing to have a President who is flexible and candid enough with the American people not to try to push a $10 billion mistake through the Senate.

However, I strongly disagree with the President that no further action is needed. While we have recovered from the depths of the 1975 recession, our economic growth is still sluggish and unemployment is at intolerable levels. We must take action now to stimulate the economy and reduce our high levels of unemployment.

The best way to stimulate long-term economic growth and create permanent new jobs is through a permanent tax rate reduction. The administration says that we should wait until October or January of next year to consider permanent tax cuts. But I believe that we cannot afford to wait until next year to put America back to work again.

According to the Congressional Budget

Office, the permanent tax cut that I am proposing would increase GNP by $43 billion and create 920,000 taxpaying jobs by the end of next year—if we act now. This permanent tax cut approach will provide the economic growth needed to create real jobs in the private economy, not temporary, make-work public service jobs.

I believe the President is making a serious mistake by opposing these efforts to create almost 1 million jobs in the private economy, and I urge him to reconsider his position on permanent tax cuts for the American people.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. JACKSON:

S. 1326. A bill to designate the Thaddeus Kosciuszko Historic Route, and for other purposes; to the Committee on Environment and Public Works.

By Mr. JACKSON (by request):

S. 1327. A bill to amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HATHAWAY:

S. 1328. A bill entitled "The Career Education Implementation Incentive Act of 1977"; to the Committee on Human Resources.

By Mr. LEAHY:

S. 1329. A bill to amend the provisions of the Federal Advisory Committee Act; to the Committee on Governmental Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. JACKSON:

S. 1326. A bill to designate the Thaddeus Kosciuszko Historic Route, and for other purposes; to the Committee on Environment and Public Works.

THE THADDEUS KOSCIUSZKO HISTORIC ROUTE

Mr. JACKSON. Mr. President, I am introducing for appropriae reference a bill to designate the Thaddeus Kosciuszko Historic Route.

The Thaddeus Kosciuszko National Memorial, located at 301 Pine Street, Philadelphia, Pa., was established in 1972 by Public Law 92-524. This memorial recognizes the great Polish patriot and soldier whose genius as a military engineer contributed materially to the collapse of British strategy and the success of the American Revolution.

Mr. President, the purpose of the measure I am introducing today is to recognize further the accomplishments of General Kosciuszko by designating the Kosciuszko Historic Route.

The route would extend from upper New York State, including Fort Ticonderoga, Saratoga, and West Point and through Philadelphia to Ninety-Six and Savannah, Ga. The route would be identified by markers or other appropriate means and would recognize those sites where military victories and accomplishments are credited to the military genius of Gen. Thaddeus Kosciuszko of Poland. Establishment of the historic route is both a proper and logical means of honoring a man whose talents helped the cause of American freedom and independence.

By Mr. HATHAWAY:

S. 1328. A bill entitled "The Career Education Implementation Incentive Act of 1977": to the Committee on Human Resources.

THE CAREER EDUCATION IMPEMENTATION ACT OF 1977

Mr. HATHAWAY. Mr. President. I am introducing a bill today to provide Federal incentives to States, and to local educational agencies and other public and private nonprofit educational institutions, to develop and implement comprehensive career education programs and activities.

This bill, which is called the Career Education Implementation Incentive Act, allocates money to States for the purpose of encouraging the implementation of career education programs and activities in elementary and secondary schools, and in institutions of postsecondary education. The bill authorizes $25 million for the fiscal year 1979, the first year in which it takes effect, and $50 million in the fiscal year 1980, $100 million in fiscal 1981, $50 million in fiscal 1982, and $25 million in fiscal 1983. Since the purpose of the program is to provide seed money as an incentive to State and local agencies and institutions, it is clearly intended that the categorical grants authorized in this bill will not be extended beyond the end of fiscal 1983. This is in keeping with my feeling that too many categorical incentive programs—including some which were clearly beneficial when first enacted—are permitted to live on long after their usefulness has ended. If career education has been incorporated into State and local educational goals and programs by the time this program terminates, it will have done its job, and further seed money will no longer be necessary. If it has not, then it will be time to reevaluate the utility of this approach.

The Federal/State matching requirement is also drawn with that goal firmly in mind. For the first year of its existence the program will pay up to 100 percent of the cost of planning and implementing the provisions of the bill. In subsequent years the State matching requirement will gradually increase until, in the final year of the authorization, the Federal Government will have become the junior partner in the arrangement, paying no more than 25 percent of the cost of the program.

In order to insure that various types of educational institutions are able to share equitably in these career education incentives, States will be required to pass through at least 60 percent of their allocations the first year, and at least 70 percent in subsequent years, to local educational agencies, and at least 15 percent in each year to public and private nonprofit institutions of postsecondary education.

In addition to the State grant program, this bill will set aside money for model and demonstration grants, and for evaluation and training programs, administered at the Federal level by the Office of Career Education. The bill also authorizes a set-aside for career education information gathering, storage and dissemination functions identical to those authorized for fiscal 1978 in the Education Amendments of 1976 (P.L. 94-482).

A more complete section-by-section analysis of this bill will be included at the end of my remarks.

Mr. President, this bill has its origins in a measure which I sponsored in the Senate last year as a separate title of S. 2657, the Education Amendments of 1976. At the suggestion of Chairman CARL PERKINS of the House Education and Labor Committee, however, the Senate title was reduced by the Conference Committee to a single-year authorization of $10 million, for the fiscal year 1978, for State career education planning and Federal information gathering purposes. Chairman PERKINS and his House colleagues made that request because the House did not have a career education bill of their own in conference, and they wanted the opportunity to work on such a measure themselves in the Education and Labor Committee. They have now done so in exemplary fashion, as is demonstrated by the fact that their resulting legislation, H.R. 7, passed the House by the overwhelming vote of 398 to 14 just before the Easter recess.

Because of the strong House support for H.R. 7, I have waited until their action was final to introduce a companion measure in the Senate, in order to be able to incorporate certain of its elements into this bill.

I did so because it was clear to me last year that the career education goals of Congressman PERKINS are substantially the same as my own, and thus it seemed advisable to avoid unnecessary duplication of effort wherever possible.

Still, there are several key differences between my bill and H.R. 7, and it would be useful to point them out at this time.

Perhaps the most significant difference between my bill and H.R. 7 involves the extension of career education incentive programs to institutions of postsecondary education. Under H.R. 7, federally supported career education is to be limited to elementary and secondary schools. However, I believe that such a limitation ignores one of the central problems career education is seeking to solve: that too many graduates or leavers of our entire educational system, up to and including postsecondary, are quite simply ill prepared to enter the world of work. And while applying career education to postsecondary settings can admittedly be more difficult to accomplish than at the elementary or secondary level, some of our best and most com-

prehensive experimental career education programs to date have been developed in postsecondary settings.

In addition, the effective years and authorization levels in this bill are somewhat different from those of H.R. 7. For example, H.R. 7 does not apply to specifically designated fiscal years, but rather to a floating 5-year period which begins in the first year in which funds are appropriated. My bill refers specifically to the fiscal years 1979 through 1983, since current Office of Education planning authorizations for Career Education will run out at the end of fiscal 1978. Also, while I agree with the House approach of reaching a high authorization level relatively quickly, then phasing out the Federal commitment to this incentive program, the highest level is reached more gradually in this bill than in H.R. 7, since as a practical matter, budget and appropriations planners in the administration and in Congress are likely to be reluctant to provide large sums of money at as early a stage as is contemplated in H.R. 7.

The bill I am introducing today also includes additional authority for the Commissioner to make model and demonstration grants, conduct evaluation studies, and perform information gathering and dissemination functions, which authority is not specifically contained in H.R. 7.

HISTORY OF CAREER EDUCATION

"Career education" in the form we know it today had its inception as a formal educational program in the late 1960's. At the beginning of this decade, it was given a high priority among federally funded educational research programs by Commissioner of Education Sidney P. Marland.

In enacting the Vocational Education Amendments of 1968 (20 U.S.C. 1241 et seq.) Congress first emphasized the need to bridge a gap that was felt to exist between education and work. Early in 1971, Commissioner Marland coined the term "career education" and elevated it to the status of major educational reform.

The Education Amendments of 1972 established the National Institute of Education—NIE—as separate from the Office of Education—OE—and both departments adopted career educaiton as a priority item. In the case of NIE, career education research was written into its enabling legislation. In OE, the first career education research and development programs were funded under Parts C and D of the Vocational Education Act, and new statutory authority was created by the Special Projects Act as part of the Education Amendments of 1974 (20 U.S.C. 1865), which authorized additional demonstration programs and created within OE an Office of Career Education.

FUNDING HISTORY OF CAREER EDUCATION

Federal funds allocated for research and demonstration under the various statutory authorities are as follows:

THE VOCATIONAL EDUCATION ACT

Prior to its recent amendment in Public Law 94–482, part C of this act authorized projects for research and training, and part D authorized model programs and projects. Under these authorities, over 100 research and model career education projects have been established at local education agencies—LEA's—in the 50 States. A recent GAO study could find no apparent distinctions between projects funded under part C and those using part D dollars.

During fiscal years 1972–75, OE obligated approximately $36 million to the States under part C and about $38.5 million under part D for career education programs. In fiscal year 1976 these programs were cut back considerably, with no funds spent under part C and only $8 million under part D for career education.

NIE EXPENDITURES

Beginning in mid-1971, OE initiated four multiyear career education projects under the authority of the Cooperative Research Act. In August 1972, these were transferred to NIE. Through fiscal year 1975, NIE estimates that approximately $42 million of its appropriations were allocated to the four projects.

In addition, NIE has taken on several projects initially started up by OE under its educational laboratory and research and development center programs, spending $7.6 million through fiscal year 1975. Finally, NIE had originated 85 new career education projects of its own through the end of fiscal year 1975, spending another $7.6 million. Approximately $14 million was spent on all NIE career education projects in fiscal year 1976, and an equal amount is estimated for fiscal year 1977.

OFFICE OF CAREER EDUCATION

The third major source of Federal career education funding has been the Special Projects Act, enacted in the Education Amendments of 1974. Those amendments authorized $15 million each year for career education, of which approximately $10 million has been spent in each fiscal year since the enactment of those amendments.

NON-FEDERAL SPENDING

Projects and programs funded under each of these authorities have varied widely, and few generalizations can be made about successes or failures from the Federal perspective. However, it is important to note that State and local governments have contributed considerable resources of their own in this area. Part C and D funds referred to above have been matched on a dollar-for-dollar basis. And many States and LEA's have enacted legislation and/or initiated additional career education programs of their own.

As of the end of fiscal year 1975, for example, OE had cited nine States as having made significant progress in career education. Even a State as small as Arizona had set aside over $22 million of its own education funds for this purpose.

NEW AUTHORIZATIONS

Finally, the Education Amendments of 1976 (P.L. 94–482) contains a new authorization, for fiscal year 1978 only, of $10 million to be used for comprehensive State planning for career education, and for Federal information gathering, storage, and dispensing. Up to $2 million may be set aside for this latter purpose. The balance is to be distributed to the States, with at least $100,000 going to each State and the remainder distributed on the basis of population.

NATIONAL SUPPORT FOR CAREER EDUCATION

Career education has managed to create for itself a broad base of support across the educational and ideological spectrum. Strong support was communicated to the Carter transition team from the National Conference of State Legislators, the American Personnel and Guidance Association, the U.S. Chamber of Commerce, the National PTA, the Southern Superintendents for Educational Progress, the National Association of Elementary School Principals, the American Society for Training and Development, the Council of Chief State School Officers, and educational representatives of the cities of Baltimore, Dallas, New Orleans, and the State of Illinois.

In other forums, career education has received strong support from the National Education Association, the American Vocational Association, the NAACP, the American Association of Secondary School Principals, the American Association of Junior Colleges, and numerous other institutional and individual educators and associations. A recent Commissioners Conference on Career Education held in Houston, Tex., drew an astonishing 8,500 participants.

CAREER EDUCATION ISSUES AND PRIORITIES

Issues and priorities considered important by groups and interests which support career education include the following:

First. Career education is necessary because many individuals leave the educational system today without the basic academic, occupational, and decision-making skills, as well as the work attitudes, necessary to adapt to the changing economic and social world outside that system. A figure commonly used is "2–3 million leavers per year at all levels" who lack such skills. Also cited by many is a recent HEW-commissioned survey indicating that perhaps as many as one in five adults today are functionally "illiterate" in basic coping skills necessary to perform simple daily tasks.

Second. Even within the schools, many students fail to see meaningful relationships between what they learn and what they will need to do when they leave. American Personnel and Guidance Association cites poll data indicating that 78 percent of 11th grade students claim to need more career guidance than they currently receive.

Third. These serious deficiencies can only be remedied by a virtual revamping of our educational system to give more emphasis to career awareness, exploration, and preparation skills, from the elementary level through college, and by changing much of our basic educational curriculum so that even basic skills—the "three R's"—are taught where possible through references to real-world experiences.

Fourth. In too many educational settings, an unhealthy dichotomy has grown up between academic skills and manual skills, with primacy given to the former

and the latter relegated to second-class status. As a result, many students pursue education for skills for which no job opportunities exist, invest too many public and private resources in their education, and become overqualified for the majority of available jobs.

Fifth. Education has become too isolated from the community where its "product" will have to work and live—and members of that community must therefore be brought into the educational system—and conversely, students brought into the community—through comprehensive programs of career education.

Sixth. The growing need for and presence of women in the work force has outdistanced our educational responsiveness to the needs of that group, including the need to avoid sex stereotypes. Career education has the potential, as a new approach to overall work and life preparedness, to overcome such stereotypes.

Seventh. Nor does education respond to the needs of the poor or the minority students, giving precedence instead—and lavishing far more attention on—the middle class, more generally college-bound student. Career education is needed for all students to break down the barriers that separate our system into multiple tracks, relegating the preponderance of individuals in certain social and economic classes to an inferior status, and too often insulating those in the "academic" track from the experience they will need when they leave school and enter the real world.

NEED FOR THIS BILL

Current levels of funding support are significant, but diverse. Adding the section 406 money to the NIE resources and the vestigial vocational education funding, a total of over $30 million in Federal funds are being spent on career education in the current fiscal year, with prospects of up to $10 million more under the new fiscal year 1978 planning authority.

But while there is a relatively large aggregate amount spent by various branches of HEW each year on career education, very little of that is actually within the control of State and local governments, thereby frustrating the efforts of many to initiate or replicate career education projects on their own. While the seed money previously available under part C and D of the Vocational Education Act was relatively unstructured in this regard, that money is rapidly drying up and will soon be unavailable, if current trends continue, leaving all major creative efforts in the hands of Federal administrators, researchers and other employees. If we expect States effectively to implement career education programs and activities they have developed to date under model and demonstration grant authorities, there must be some additional incentives available.

In addition, the GAO, the American Institutes for Research, and other program analysts have delineated several areas of immediate concern which are not being adequately addressed in most current career education projects, and which will also require the availability of new resources.

Included in this list are better evaluation techniques; better training of teachers, counselors, and other education personnel to take advantage of, and develop, career education resources—particularly in secondary and postsecondary institutions, where researchers have found greater resistance to career education than in elementary schools; additional development of career education curriculum in college-level teacher training programs; need for better information and materials gathering, storage, and dispersal techniques at the Federal, regional, and local levels, including information about the techniques of career education, as well as about trends and developments in the labor marketplace. In that regard, while some individuals and organizations have complained of inadequate materials, indications are that an abundance of information and materials is available or is being constantly developed for most aspects of career education. The problem seems more to be one of effective access to such information than any lack thereof.

Finally, to the extent current Federal research and development, including WIE research, is to lead to on-line implementation of techniques and materials found to be effective, additional resources will have to be made available to familiarize States and local education agencies and schools with results of such research, and to provide the incentive for such implementation. We should include here the reality of fiscal problems faced in school financing in most jurisdictions, which rarely leave room in the State or local budget for new projects funded entirely out of State or local resources. If the results of major NIE research efforts in such areas as school-based or experience-based career education prove to be worthy of implementation, Federal authorizations should be available to provide the incentive to do so.

Mr. President, I ask unanimous consent that the text and section-by-section analysis of my bill be printed in the RECORD immediately following my remarks.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 1328

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Career Education Implementation Incentive Act of 1977".

STATEMENT OF CONGRESSIONAL FINDINGS

SEC. 2. The Congress hereby finds and declares that—

(1) a major purpose of education should be to prepare every person to pursue a career suitable to that person's maximum potential ability;

(2) it is the obligation of all educational agencies and institutions, including but not limited to agencies and institutions of elementary and secondary education, higher education, adult education, employment training and retraining, and vocational education, to make available such preparation to all persons;

(3) each State or local agency or institution of education should therefore be encouraged to expose every person to the widest variety of career options through programs of career education.

PURPOSE

SEC. 3. It is the purpose of this Act to provide federal incentives to States, for five years, to enable state and local education agencies and institutions to develop and implement career education programs and activities for individuals of all ages, and to improve and expand existing programs and activities, in order to improve the awareness, exploration, planning and decisionmaking skills of such individuals with regard to career opportunities and career development throughout the lifetimes of such individuals.

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. (a) There are authorized to be appropriated for the purpose of this Act $25,000,000 for fiscal year 1979, $50,000,000 for fiscal year 1980, $100,000,000 for fiscal year 1981, $50,000,000 for fiscal year 1982, and $25,000,000 for fiscal year 1983.

(b) (1) From the sums appropriated pursuant to this Act, the Commissioner shall reserve—

(A) an amount not to exceed 1 per centum thereof for the administration of this Act, for making model program grants pursuant to section 8 and for the support of such other special or demonstration projects as he deems necessary to carry out the purposes of this title, and

(B) an amount not to exceed $2 million per annum for the purpose of carrying out section 9 of this Act.

(2) From the remainder of the sums appropriated under this Act, the Commissioner shall reserve such amount, not to exceed 1 per centum thereof, as he may determine necessary and shall allot such amount among the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands, according to their relative need for assistance under this title.

(3) From the remainder of the sums appropriated, the Commissioner shall allot to each State an amount which bears the same ratio to such sums for such year as such State's population, aged twenty-one or younger, of all the States, except that no State shall be allotted from such sums less than $100,000.

(C) (1) Any funds allotted to a State under subsection (b) (3) for which a State has not applied or for which a State application has not been approved shall be reallotted by ratably increasing the allocations of each of the States which have approved applications.

(2) If the sums appropriated for any fiscal year are not sufficient to make the allotments of the minimum amounts specified in subsection (b) (3), such minimum amount shall be ratably reduced. If additional sums became available during a fiscal year for which such allotments were reduced, such allotments shall be increased on the same basis as they were reduced.

STATE APPLICATIONS

SEC. 5. Any State desiring to receive the amount for which it is eligible for each fiscal year under this Act shall submit to the Commissioner an annual application for such funds, which shall include assurances that—

(1) the State will designate a State officer or agency for the purpose of administering funds expended pursuant to the provisions of this Act;

(2) without in any way interfering with the curriculum decision-making authority of local educational agencies or public or private non-profit institutions of postsecondary education in the State, the State will encourage all such agencies and institutions

to develop or expand career education programs and activities, in order to integrate career education into the regular education programs of such agencies and institutions;

(3) from among the agencies and institutions so encouraged, the State will identify all such agencies and institutions which desire to develop or expand their career education programs and activities, and the State will develop a plan to allocate funds and provide necessary technical assistance to such agencies and institutions for that purpose;

(4) of the amount received pursuant to this Act for the fiscal year 1979, the State will pass through no less than 60 percent to local educational agencies and no less than 15 percent to public and private institutions of postsecondary education for carrying out the purposes of this Act, and of the amounts received pursuant to this Act for the fiscal year 1980 and for each subsequent fiscal year, the State will pass through no less than 70 percent to local educational agencies and no less than 20 percent to public and private institutions of postsecondary education for carrying out the purposes of this Act;

(5) the State will expend, from its own sources, for any fiscal year for which funds are received under this Act, an amount equal to or exceeding the amount which such State expended for career education during the preceding fiscal year;

(6) the State officer or agency designated to administer this program will employ such staff as are necessary to provide for the administration of this Act and programs of career education funded under this Act including a person or persons experienced with respect to problems of discrimination in the labor market and stereotyping effecting career education (including bias and stereotyping on account of race, sex, or handicap), and including at least one professional trained in guidance and counseling who shall work jointly in the office of the principal staff person responsible for such administration and coordination and in the office of the State educational agency responsible for guidance and counseling, if any such office exists;

(7) such agency will continuously review the plan submitted under section 6 and will submit such amendments thereto as may be deemed appropriate in response to such agency's experience with the program;

(8) not less than 15 percentum of that portion of a State's grant for any fiscal year which is not reserved pursuant to section 8(b)(1) will be used for programs described in section 7(a)(3)(B); and

(9) the funds received under this Act will be used in accordance with the provisions of section 7.

STATE PLAN

SEC. 6. Each State desiring to receive funds appropriated pursuant to this Act for the Fiscal Year 1980 and subsequent fiscal years, shall, at the time of submission of its annual application for the fiscal year 1980, submit to the Commissioner, a State plan which shall—

(1) set out explicitly the objectives the State will seek to achieve by the end of each fiscal year up to and including the fiscal year 1983 in implementing the purposes of this Act:

(2) set out the methods by which the State will seek each year to achieve these objectives with all recources available, and describe the methods by which the funds received under this Act will be used, in accordance with section 7, to implement the overall objectives of this Act; and

(3) set forth policies and procedures which the State will follow the assure equal access of all students (including the handicapped and members of both sexes) to career education programs carried out under the State plan; and

(4) provide proposed criteria to the Commissioner for evaluation of the extent to which the State will achieve the objectives set out in the State plan.

USE OF FUNDS

SEC. 7. (a) Subject to the provisions of section 8, funds received under this Act may be used by a State only for the following activities:

(1) employing such additional State educational agency personnel as may be required for the administration and coordination of programs assisted under this Act;

(2) providing State leadership for career education, either directly or through arrangements with private and public agencies and organizations (including institutions of higher education), in—

(A) conducting inservice institutes for education personnel;

(B) training local career education coordinators;

(C) collecting, evaluating, and disseminating career education materials on an intrastate and interstate basis;

(D) conducting statewide needs assessment and evaluation studies;

(E) conducting statewide leadership conferences;

(F) engaging in collaborative relationships with other agencies of State government and with public and private organizations representing the business-labor-industry-professional community and organizations representing the handicapped, minority groups, and women; and

(G) promoting the adaptation of teacher-training curricula to the concept of career education by institutions of higher education located in the State;

(3) making grants to local educational agencies and to public and private nonprofit institutions of postsecondary education for the purpose of—

(A) Improving the career awareness, exploration, planning, and decision-making skills of individuals through the adaptation of career-oriented concepts to curriculum design and classroom techniques;

(B) developing and implementing comprehensive career guidance, counseling, placement, and followup services utilizing counselors, teachers, parents, and community resource personnel;

(C) developing and implementing collaborative relationships with organizations representing the handicapped, minority groups, and women and with the business-labor-industry-professional-government community, including the use of personnel from such organizations and that community as resource persons in schools and for student field trips into that community;

(D) developing and implementing work experiences for students whose primary purpose is career exploration, provided that such work experiences are related to existing or potential career opportunities and do not displace other workers who perform such work;

(E) employing coordinators of career education in local educational agencies or in combinations of such agencies;

(F) training of local career education coordinators;

(G) inservice education of teachers, counselors, school administrators, and other education personnel aimed at helping them to understand career education, and to acquire competencies essential for carrying out their roles;

(H) conducting institutes to acquaint school board members, community leaders, and parents with the nature and goals of career education;

(I) purchasing instructional materials and supplies for career education activities;

(J) establishing and operating community career education councils;

(K) establishing and operating career education resource centers serving both students and the general public;

(L) adopting, reviewing and revising local plans for coordinating the implementation of the comprehensive program; and;

(M) conducting needs assessments and evaluations; and

(4) reviewing and revising the State plan

(b) Grants to local educational agencies and public and private nonprofit institutions of postsecondary education pursuant to subsection (a)(3) from funds received under this Act shall be made on the basis of applications approved by the State educational agency, and shall, to the extent practicable, be made in accordance with equitable distribution criteria established by the State educational agency, having due regard for the special needs of agencies and institutions serving large numbers of disadvantaged students, and of agencies and institutions serving sparsely populated areas or serving relatively few students.

(c) To the extent consistent with the number of children enrolled in private nonprofit elementary and secondary schools within the State, as regards services provided under paragraph (2) of subsection (a), and within the school district, as regards a grant made to a local educational agency under paragraph (3) of such subsection, after consultation with appropriate private school officials, provision shall be made for the effective participation on an equitable basis of such children and the teachers of such children in these services and in the programs funded with these grants.

MODEL PROGRAMS

SEC. 8. From funds reserved under section (4)(b)(1)(A) of this Act, the Commissioner is authorized to make grants directly to State and local educational agencies, institutions of postsecondary education, and other nonprofit agencies and organizations to support projects to demonstrate the most effective methods and techniques in career education and to develop exemplary career education models.

SEC. 9. (a) The Commissioner shall provide, either directly or by grant or contract, for—

(1) the gathering, cataloging, storing, analyzing, and disseminating of information related to the availability of, and preparation for, careers in the United States, including information concerning current career options, future career trends, and career education;

(2) the ongoing analysis of career trends and options in the United States, using information from both the public and private sectors, including such sources as the Bureau of Labor Statistics, the Department of Commerce, the Tariff Commission, economic analysts, labor unions, and private industry;

(3) the publication of periodic reports and reference works using analysis prepared pursuant to this section and containing exemplary materials from the career education field, including research findings, results and techniques from successful projects and programs, and highlights of ongoing analyses of career trends in the United States; and

(4) the conduct of seminars, workshops, and career information sessions for the purpose of disseminating to teachers, guidance counselors, other career educators, administrators, other education personnel, and the general public information compiled and analyzed under this section.

(b) In carrying out the provisions of this section, and to the extent practicable, the Commissioner shall (1) make use of existing offices, centers, clearinghouses, and research capabilities, (2) coordinate among the offices, centers, clearinghouses and research capabilities in carrying out his career information responsibilities, and (3) use the

career information capabilities of the Education Division.

PAYMENTS

SEC. 10. (a) The Commissioner, upon receipt of an application for the fiscal year 1979 and each subsequent fiscal year which the Commissioner finds to be in compliance with section 5, and upon finding the State to be in compliance with sections 6 and 7 for the fiscal year 1980 and each subsequent fiscal years, shall pay to the State the amount which it is entitled to receive for each such year under this Act.

(b)(1) Any State receiving funds for the fiscal year 1979 under this Act may reserve not more than 20 percent of such funds for services performed pursuant to section 7(a)(2) and not more than 5 percent for the purposes of paragraphs (1) and (4) of section 7(a). Not less than 60 percent of such funds shall be distributed to local educational agencies and not less than 15 percent of such funds shall be distributed to public and private institutions of postsecondary education for carrying out the purposes of this Act.

(2) Any State receiving funds for the fiscal year 1980 and for susbequent fiscal years may reserve not more than 10 percent of such funds for services performed pursuant to section 7(a)(2) and not more than 5 percent for the purposes of paragraphs (1) and (4) of section 7(a). Not less than 70 percent of such funds shall be distributed to local educational agencies and not less than 15 percent of such funds shall be distributed to public and private institutions of postsecondary education for carrying out the purposes of this Act.

(3) In the fiscal year 1979, funds available under this Act to a State may be used, subject to the provisions of paragraph (1), to pay the entire cost of carrying out programs under this Act. In subsequent fiscal years, subject to the provisions of paragraph (2), funds available under this Act may be used to pay (A) not more than 75 percent of such costs in the fiscal years 1980 and 1981, (B) not more than 50 percent of such costs in the fiscal year 1982, and (C) not more than 25 percent of such costs in the fiscal year 1983.

FEDERAL ADMINISTRATION

SEC. 11. (a)(1) The Office of Career Education created pursuant to section 406 of the Education Amendments of 1974 shall be the administering agency within the Office of Education for the review of the State plans, applications, and reports submitted pursuant to this Act. In addition, the Office of Career Education shall perform a national leadership role in furthering the purposes of this Act.

(2) In reviewing the plans, applications, and reports submitted pursuant to this Act, the Office of Career Education shall provide technical assistance to those States having plans, applications, and reports needing improvement. The Office shall also provide technical assistance, as requested by the States, to all participating States, Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(b) The National Advisory Council on Career Education created pursuant to section 406 of the Education Amendments of 1974 shall perform the same functions with respect to the programs authorized under this Act as it is authorized to perform with respect to the programs authorized under that section.

(c) The National Institute of Education shall continue its complementary efforts in career education, including product and program development, evaluation, and research. The Office of Education shall cooperate with the Institute in identifying research and development priorities and, either directly or through arrangements with private and public agencies and organizations (including institutions of higher education), in disseminating the products and findings of research and development undertaken by the Institute.

(d) Section 406(g)(1) of the Education Amendments of 1974 is amended by striking out subparagraph (B) and inserting in lieu thereof the following:

"(B) not less than twelve public members broadly representative of the fields of education, the arts, the humanities, the sciences, community services, business and industry, and the general public, including (1) members of organizations of handicapped persons, minority groups knowledgeable with respect to discrimination in employment and stereotyping affecting career choices, and women who are knowledgeable with respect to sex discrimination and stereotyping, and (ii) not less than two members who shall be representative of labor and of business, respectively. A majority of the members selected pursuant to subparagraph (B) shall be engaged in education or education-related professions."

DEFINITIONS

SEC. 12. For purposes of this Act the term—

(1) "career education" means educational programs and activities through which educational agencies and institutions, and individual educators, counselors, and other individuals, seek to improve the awareness of students of all ages of career opportunities which are, or may in the future become, available to them, and to improve the ability of such students to take advantage of such career opportunities. "Career education" includes, but is not necessarily limited to, activities which involve career awareness, exploration, planning, and decision-making, which activities are free of or are designed to eliminate bias and stereotyping (including bias or stereotyping on account of race, sex or handicap).

(2) "handicap" or "handicapped" means mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, orthopedically impaired, or other health impaired persons, or persons with specific learning disabilities, who by reason thereof require special education and related services;

(3) "State" shall mean the States, the District of Columbia, and the Commonwealth of Puerto Rico;

(4) "State board of education" shall mean the governing board or boards designated pursuant to State law for the administration, or for the supervision of administration, of elementary and secondary education in local educational agencies and other agencies in each State; and

(5) "local educational agency" has the meaning given it by section 403(6)(B) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 244(6)(B)).

SECTION-BY-SECTION ANALYSIS

Section 1. This section provides that the short title of the bill will be the "Career Education Implementation Incentive Act of 1977".

Section 2. This section sets out a statement of Congressional findings regarding the need for career education.

Section 3. This section provides that the purpose of his act is to provide Federal incentives to States for five years to enable State and local education agencies and institutions to develop and implement career education programs and activities for individuals of all ages, and to fulfill a number of other needs having to do with career education.

Section 4. This section authorizes appropriations for this Act, according to the following schedule: $25,000,000 for the fiscal year 1979, $50,000,000 for the fiscal year 1980, $100,000,000 for the fiscal year 1981, $50,000,000 for the fiscal year 1982, and $25,000,000 for the fiscal year 1983. This section also authorizes the Commissioner to reserve up to 1 percent of the appropriation in any fiscal year for making model and demonstration program grants, and up to $2 million in each fiscal year for the purpose of gathering, storing and disseminating information about career education and careers. This section also sets out a formula for the allocation of State grants based upon the population of each State aged 21 and younger, provides for a minimum grant of $100,000 to each State, and provides for a ratable reduction of such grants in any year in which the appropriation does not permit such minimum grants.

Section 5. This section requires States desiring to receive funds under this Act to file annual applications for such funds, including assurances that the State will designate an appropriate administrative entity, will encourage all local education agencies and other appropriate agencies and institutions to participate, without interfering in the curriculum decision-making authority; will pass through certain minimum percentages of the funds received to such agencies and institutions, pursuant to the requirements of section 10; will ensure that at least 15% of the grant will be devoted to career planning and guidance functions; and other assurances.

Section 6. This section sets out the requirements for State plans for career education, which are required to be submitted with the annual application for each year commencing with the fiscal year 1980. The plan must set out the objectives the State hopes to attain, and the methods to be used to attain those objectives; set forth policies for assuring equal access for all students to career education programs; and provide proposed criteria for the evaluation of the State's own effort.

Section 7. This section sets out a comprehensive list of the uses to which States may put funds received under this Act. This section also requires due regard to the special needs of agencies and institutions serving disadvantaged students, and of agencies and institutions serving sparsely populated areas. This section also sets out criteria for meeting the career education needs of children enrolled in private elementary and secondary schools.

Section 8. This section authorizes the Commissioner to make direct grants to State and local educational agencies and institutions to develop model and demonstration career education projects.

Section 9. This section authorizes the Commissioner to provide career education information services, identical to the services already authorized to be performed in the fiscal year 1978 by the career education provisions of the Education Amendments of 1976 (Public Law 94-482).

Section 10. This section authorizes payments to States under the provisions of this Act, and requires States to pass through at least 60 percent of those funds the first year, and 70% in subsequent years, to local educational agencies, and requires that at least 15% in each year be passed through to public and private institutions of postsecondary education.

Section 11. This section authorizes the administration of this program by the Office of Career Education, authorizes that Office to provide technical assistance to the States, and authorizes the National Advisory Council on Career Education to give advice regarding the implementation of this Act. This section also authorizes the National Institute of Education to continue to play its complimentary role in career education.

Section 12. This section defines several terms used in the Act, including the term career education.

AMENDMENTS SUBMITTED FOR PRINTING

TAX SIMPLIFICATION ACT OF 1977—H.R. 3477

AMENDMENT NO. 199

(Ordered to be printed and to lie on the table.)

Mr. LEAHY submitted an amendment intended to be proposed to the bill (H.R. 3477) to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

NOTICE OF HEARINGS

THE CIVIL RIGHTS COMMISSION AUTHORIZATION FOR FISCAL YEAR 1978

Mr. BAYH. Mr. President, on behalf of Senator EASTLAND, I wish to announce that the Committee on the Judiciary will hold a hearing on S. 1231, to raise the limitation on appropriations for the U.S. Commission on Civil Rights, in room 2228 Dirksen, the Judiciary Committee hearing room, at 2 p.m. on April 27, 1977. All persons desiring to submit statements should contact Nels Ackerson or Ben Dixon of the staff of the Subcommittee on the Constitution, 102B Russell Building, 202/224-8191.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. I ask that morning business be closed.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TAX REDUCTION AND SIMPLIFICATION ACT OF 1977

Mr. ROBERT C. BYRD. Mr. President, what is the pending question before the Senate?

The PRESIDING OFFICER. The clerk will state the pending business.

The assistant legislative clerk read as follows:

A bill (H.R. 3477) to provide for a refund of 1976 individual income taxes, and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform.

The PRESIDING OFFICER. The clerk will state the pending motion.

The assistant legislative clerk read as follows:

A motion by Mr. BUMPERS, for himself and Mr. KENNEDY, that H.R. 3477 be recommitted to the Committee on Finance with instructions to report it forthwith with the House-proposed section 302 and the Senate-proposed substitute for the House proposed section 302 stricken.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow at the hour of 1 p.m. the Senate resume consideration of the pending motion by Mr. BUMPERS and Mr. KENNEDY to recommit with certain instructions and that the committee report back forthwith, that there be 1 hour of debate on that motion tomorrow beginning at 1 p.m., with the time equally divided between and controlled by Mr. LONG and Mr. BUMPERS; and that at the close of the hour a vote occur on the motion up or down, with a motion to lay on the table at that time to be in order.

Mr. BAKER. Mr. President, reserving the right to object, the majority leader has previously announced, and I only wish to reiterate, that the request as stated has been cleared with the distinguished senior Senator from Nebraska, the ranking Republican member of the Finance Committee, and there is no objection on our side.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia. The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. This would mean, then, Mr. President, that at the hour of 2 o'clock p.m. tomorrow, a vote would occur on the motion to recommit. It would be an up-or-down vote unless a Senator moves to table, in which event such tabling motion would occur at that time, at 2 o'clock p.m.; am I correct?

The PRESIDING OFFICER. The Senator from West Virginia is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are various matters here that have been cleared on both sides of the aisle. I ask unanimous consent that the Senate go into executive session to consider three nominations which were reported from committees earlier today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. The Committee on Energy and National Resources reported two nominations, which I understand have been cleared on both sides.

Mr. HANSEN. Mr. President, if the distinguished majority leader would yield, let me observe that I was at the committee meeting this morning to which the distinguished majority leader has referred, and those nominations were both reported out unanimously.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Wyoming.

The PRESIDING OFFICER. The clerk will state the first nomination.

FEDERAL ENERGY ADMINISTRATION

The assistant legislative clerk read the nomination of David J. Bardin, of New Jersey, to be a Deputy Administrator.

Mr. BAKER. Mr. President, reserving the right to object, there is no objection on this side to this nomination or the next succeeding nomination.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

DEPARTMENT OF THE INTERIOR

The assistant legislative clerk read the nomination of Joan Mariarenee Davenport, of New Jersey, to be an Assistant Secretary of the Interior.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Mr. ROBERT C. BYRD. Mr. President, the third nomination has been reported by the Committee on Banking, Housing, and Urban Affairs. I understand it is cleared on both sides of the aisle.

Mr. BAKER. Mr. President, there is no objection to the confirmation of this nomination.

The PRESIDING OFFICER. The clerk will state the nomination.

The assistant legislative clerk read the nomination of Chester Crawford McGuire, Jr., of California, to be an Assistant Secretary of Housing and Urban Development.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate resume the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate tomorrow.

Mr. HANSEN. Mr. President, may I observe that the Committee on Energy and Natural Resources, I think, proposes not to reconvene until next Tuesday. If there were any change in plans, I would have to respectfully object that that unanimous-consent proposal exclude the Committee on Energy and Natural Resources, because I would like to be present on the floor.

Mr. ROBERT C. BYRD. Very well. Mr. President, I change my request to authorize that all committees of the Senate with the exception of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate tomorrow.

Mr. HANSEN. I do not think there will be any meeting.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? Without objection, it is so ordered.

ADDITIONAL FUNDS FOR HOUSING ASSISTANCE

Mr. ROBERT C. BYRD. Mr. President, on behalf of the Senator from Wisconsin (Mr. PROXMIRE) I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 3843.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 3843) to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. ROBERT C. BYRD. Mr. President, on behalf of Senator PROXMIRE, I move that the Senate insist upon its amendment and agree to the request of the House for a conference, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. PROXMIRE, Mr. SPARKMAN, Mr. WILLIAMS, Mr. BROOKE, and Mr. GARN conferees on the part of the Senate.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene this evening at 8:30, at which time there will be a quorum call. At the hour of 8:42 p.m., the Members of the Senate will proceed in a body to the Hall of the House of Representatives to hear an address by the President of the United States before a joint session of the House of Representatives and the Senate.

Following that address, the Senate, under the order previously entered, will automatically stand in recess until the hour of 12:30 p.m. tomorrow.

After the two leaders have been recognized under the standing order on tomorrow, there will be a period for the transaction of routine morning business not to extend beyond the hour of 1 o'clock p.m., with statements therein limited to 5 minutes each.

At the hour of 1 o'clock p.m., the Senate will resume consideration of the Bumpers-Kennedy motion to recommit with instructions to the committee the tax bill, and there will be 1 hour of debate. At the close of the 1 hour, at 2 o'clock p.m., the vote will occur either on a motion to table the motion to recommit, or up or down on the motion to recommit. That will be a rollcall vote. Other votes will occur during the afternoon tomorrow on amendments to the bill if it is not to be recommitted, or if it is recommitted and reported. Votes will also occur on motions with relation to the measure. It is possible that the Senate will stay in until a reasonably late hour tomorrow, and also on Friday there will be rollcall votes on the same measure.

RECESS UNTIL 8:30 P.M.

Mr. ROBERT C. BYRD. Mr. President, if there be no further business at this time before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 8:30 p.m. today.

The motion was agreed to; and at 5:49 p.m., the Senate took a recess until 8:30 p.m., whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. STONE).

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, for the information of Senators, following the address of the President the Senate will automatically stand in recess until the hour of 12.30 tomorrow afternoon. However, the doors of the Chamber will remain open in the event any Senators wish to return to the Chamber for coats or hats, and so forth.

JOINT SESSION OF THE TWO HOUSES—MESSAGE OF THE PRESIDENT OF THE UNITED STATES

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate now proceed to the Hall of the House of Representatives to hear the President's address.

The motion was agreed to, and, at 8:42 p.m., the Senate, preceded by the Sergeant-at-Arms, Frank N. Hoffmann, the Secretary of the Senate, J. Stanley Kimmitt, and the Vice President, proceeded to the Hall of the House of Representatives to hear the address by the President of the United States.

(The address by the President of the United States, this day delivered by him to the joint session of the two Houses of the Congress, appears in the proceedings of the House of Representatives in today's RECORD.)

RECESS UNTIL 12:30 P.M. TOMORROW

At the conclusion of the joint session of the two houses, and in accordance with the order previously entered, at 9:41 p.m. the Senate recessed until tomorrow, April 21, 1977, at 12:30 p.m.

NOMINATIONS

Executive nominations received by the Senate April 20, 1977:

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. John Quint Henion [redacted], U.S. Army.

IN THE NAVY

Vice Adm. Robert E. Adamson, Jr., U.S. Navy, for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 20, 1977:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Chester Crawford McGuire, Jr., of California, to be an Assistant Secretary of Housing and Urban Development.

DEPARTMENT OF THE INTERIOR

Joan Mariarenee Davenport, of New Jersey, to be an Assistant Secretary of the Interior.

FEDERAL ENERGY ADMINISTRATION

David J. Bardin, of New Jersey, to be a Deputy Administrator of the Federal Energy Administration.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Wednesday, April 20, 1977*

The House met at 3 o'clock p.m.

The Chaplain, the Reverend Edward G. Latch, D.D., offered the following prayer:

The Lord is my Shepherd.—Psalms 23: 1.

O Thou singing Shepherd of our seeking souls, who hast promised to lead us in the paths of righteousness for Thy name's sake, lead us this day in Thy wholesome ways that we may guide our Nation along the roads of peace, justice, and good will.

Grant strength and wisdom to our President and his Cabinet, to our Speaker and the Members of Congress, to our Chief Justice and members of the Supreme Court. Bless the moral and military leaders of our country and may those who are the directors of business and labor learn to get along together walking in the ways of righteousness and working for the highest good of our beloved land.

Grant us the courage to develop a sound energy program for the good of all and may our people respond with willing hearts to make the program work.

Hear Thou our prayer, O Lord, and grant us strength and wisdom as we work this day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On April 12, 1977:

H.R. 4800. An act to extend the Emergency Unemployment Compensation Act of 1974, and for other purposes.

On April 18, 1977:

H.R. 5717. An act to provide for relief and rehabilitation assistance to the victims of the recent earthquakes in Romania.

On April 19, 1977:

H.R. 3365. An act to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate insists upon its amendment numbered 1 to the bill (H.R. 1828) entitled "An act relating to the effective date for the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG, Mr. TALMADGE, Mr. RIBICOFF, Mr. HARRY F. BYRD, JR., Mr. HANSEN, and Mr. DOLE to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1269. An act for the relief of Camilla A. Hester.

RESIGNATION AS MEMBER OF COMMITTEE ON INTERNATIONAL RELATIONS

The SPEAKER laid before the House the following resignation as a member of the Committee on International Relations:

WASHINGTON, D.C.,
April 19, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I hereby resign my seat on the House Committee on International Relations.

Sincerely,

BERKLEY BEDELL.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

ELECTION OF HON. WYCHE FOWLER, JR., AS A MEMBER OF COMMITTEE ON INTERNATIONAL RELATIONS

Mr. FOLEY. Mr. Speaker, as chairman of the Democratic Caucus and by direction of the Democratic Caucus, I offer a privileged resolution (H. Res. 501) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 501

Resolved, That Wyche Fowler, Jr. of Georgia be, and he is hereby, elected to the Committee on International Relations, to rank number 22d thereon; and to the Committee on Small Business.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING ESTABLISHMENT OF OFFICE OF PARLIAMENTARIAN OF HOUSE OF REPRESENTATIVES

Mr. WRIGHT. Mr. Speaker, I send to the desk a resolution (H. Res. 502) and ask unanimous consent for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 502

Resolved,

ESTABLISHMENT

SECTION 1. There is hereby established in the House of Representatives an office to be known as the Office of the Parliamentarian, hereinafter in the resolution referred to as the "Office".

PARLIAMENTARIAN

SEC. 2. The management, supervision, and administration of the Office shall be vested in the Parliamentarian, who shall be appointed by the Speaker of the House of Representatives without regard to political affiliation and solely on the basis of fitness to perform the duties of the position. Any person so appointed shall serve at the pleasure of the Speaker.

STAFF

SEC. 3. (a) With the approval of the Speaker, or in accordance with policies and procedures approved by the Speaker, the Parliamentarian shall appoint such attorneys and other employees as may be necessary for the prompt and efficient performance of the functions of the Office. Any such appointment shall be made without regard to political affiliation and solely on the basis of fitness to perform the duties of the position. Any person so appointed may be removed by the Parliamentarian with the approval of the Speaker, or in accordance with policies and procedures approved by the Speaker.

(b)(1) One of the attorneys appointed under subsection (a) shall be designated by the Parliamentarian as Deputy Parliamentarian. During the absence or disability of the Parliamentarian, or when the office is vacant, the Deputy Parliamentarian shall perform the functions of the Parliamentarian.

(2) The Parliamentarian may delegate to the Deputy Parliamentarian and to other employees appointed under subsection (a) such of the functions of the Parliamentarian as the Parliamentarian considers necessary or appropriate.

COMPENSATION

SEC. 4. (a) The Parliamentarian shall be paid at a per annum gross rate established by the Speaker but not in excess of the rate of basic pay determined from time to time under subsection (b) of section 3 of the Speaker's salary directive of June 11, 1968 (2 U.S.C. 60a note).

(b) Members of the staff of the Office other than the Parliamentarian shall be paid at per annum gross rates fixed by the Parliamentarian with the approval of the Speaker or in accordance with policies approved by the Speaker, but not in excess of the rate of basic pay set forth in subsection (a).

EXPENDITURES

SEC. 5. In accordance with policies and procedures approved by the Speaker, the Parliamentarian may make such expenditures as may be necessary or appropriate for the functioning of the Office.

EFFECTIVE DATE

SEC. 6. This resolution shall take effect as of March 1, 1977, and shall continue in effect until otherwise provided by law.

Mr. WRIGHT (during the reading). Mr. Speaker, I ask unanimous consent that the resolution may be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Speaker, this resolution establishes an office of Parliamentarian. While the duties of the Parliamentarian are set forth in law, the existence of the office has heretofore been recognized only in annual appropriation measures. This resolution, when made permanent law, will constitute the authorization for future appropriations.

The resolution does not change the present nature, size, or duties of the office. All functions prescribed in existing law remain the same. Appointment of the Parliamentarian by the Speaker and the nonpartisan nature of the office will continue as before.

Present practices regarding employment of personnel in the office will continue. All employees in the office have traditionally been appointed with approval of Speaker. The resolution also permits a deputy to sign vouchers and other necessary papers in absence of the Parliamentarian.

In 1968 the pay of the Parliamentarian was fixed at a rate which was specifically limited in application to the incumbant, Lewis Deschler. Presently there is no authority in law for the Speaker to raise pay above that amount which existed at time of the resignation of the former Parliamentarian in 1974. This resolution would rectify that situation.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS TO SIT TODAY DURING 5-MINUTE RULE TO MARK UP H.R. 6112, HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1977

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs may be permitted to sit today during the 5-minute rule to mark up H.R. 6112, the Housing and Community Development Act of 1977.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

OFFICIAL OBJECTORS FROM DEMOCRATIC SIDE

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time to announce the official objectors from the Democratic side.

For the Consent Calendar, the Democratic official objectors for the 95th Congress will be the gentleman from Utah, Mr. McKAY; the gentlewoman from Maryland, Ms. MIKULSKI; and the gentleman from Texas, Mr. GAMMAGE.

For the Private Calendar, the Democratic official objectors for the 95th Congress will be the gentleman from Massachusetts, Mr. BOLAND; the gentleman from Minnesota, Mr. OBERSTAR; and the gentleman from Pennsylvania, Mr. ERTEL.

NINTH QUARTERLY REPORT OF COUNCIL ON WAGE AND PRICE STABILITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Banking, Finance and Urban Affairs:

To the Congress of the United States:

In accordance with section 5 of the Council on Wage and Price Stability Act, as amended, I hereby transmit to the Congress the ninth quarterly report of the Council on Wage and Price Stability. This report contains a description of the Council activities during the fourth quarter of 1976 in monitoring both prices and wages in the private sector and various Federal Government activities.

JIMMY CARTER.

THE WHITE HOUSE, *April 20, 1977.*

RESIGNATION AS MEMBER OF NORTH ATLANTIC ASSEMBLY

The SPEAKER laid before the House the following resignation as a member of the North Atlantic Assembly:

WASHINGTON, D.C.,
April 18, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Earlier I had agreed to attend the North Atlantic Assembly meetings in Brussels because of my continuing interest in the Assembly. However, I now find that because of other commitments, I just cannot make the trip in May.

I do hope to attend future North Atlantic meetings whenever possible because I have become deeply involved in the work of the Assembly.

Sincerely,

JACK EDWARDS.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

APPOINTMENT AS MEMBER OF NORTH ATLANTIC ASSEMBLY

The SPEAKER. Pursuant to the provisions of section 1, Public Law 689, 84th Congress, as amended, the Chair appoints as a member of the U.S. group of the North Atlantic Assembly, the gentleman from California, Mr. DEL CLAWSON, to rank after the gentleman from Illinois, Mr. FINDLEY, to fill the vacancy thereon.

PERMISSION FOR SUBCOMMITTEE ON LEGISLATION AND NATIONAL SECURITY OF THE COMMITTEE ON GOVERNMENT OPERATIONS TO SIT TODAY AND TOMORROW DURING 5-MINUTE RULE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Legislation and National Security of the Committee on Government Operations may be permitted to sit today and tomorrow while the House is operating under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the gentleman from Texas can tell us whether the minority side concurs in this request?

Mr. BROOKS. I did not discuss it with them, but they are right now in the committee room.

Mr. BAUMAN. Does the gentleman know of any problem?

Mr. BROOKS. No; I do not.

Mr. BAUMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

NEED FOR A NONPARTISAN EVALUATION OF PRESIDENT'S ENERGY PROGRAM

(Mr. TREEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TREEN. Mr. Speaker, President Carter will address us tonight on the energy crisis. His program deserves a fair, reflective, and impartial response by the Congress and the American people. It also deserves and, I believe, will receive a nonpartisan evaluation by those of us on the Republican side of the aisle.

It will be tempting to immediately attack that part of the President's program which we do not like; to score points back home by condemning aspects of the program which may adversely impact our constituents.

The energy crisis is real, it is serious. How we deal with it will have enormous consequences. The President's program will be controversial. It will incite furious public debate. We, Members of Congress, have a special responsibility to encourage a calm and deliberate reaction by the American people so that a rational debate may ensue, and hopefully, so that parochial interests will be submerged by national interests.

This is not to say that we should not critically examine the President's proposals nor offer our own. That is our prerogative and our duty. We should not, however, shoot from the hip or get ourselves publicly committed without an opportunity for serious and careful study of the President's program. Immediately following the President's speech tonight, we will be besieged by the media for an instant analysis, the kind of analysis for which we often criticize the news media.

Mr. Speaker, my plea is simply this: The energy problem is far too serious and much too complex for superficial treatment by either the Congress or the American people. In this situation we simply must avoid a rush to judgment.

UNVOTED-FOR INCREASES IN EXPENSES

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, I think the Members of the House will be interested to know that the collection of unvoted-for increases in expenses to the taxpayers of this country has been increased today by another $450,000, and 27 net position increases in employees of the House of Representatives.

These increases continue a House tradition. They follow our $13,000 pay increase, our $5,000 increase in official office allowances, the $47,000 salary limit of our staff aides. Now, Mr. Speaker, we have created all these new positions, including nine additional page positions with one page overseer, five additional doormen, and one deputy doorkeeper who will be paid between $33,000 and $42,000.

I know that all of the Members will be delighted that the Democrats on the House Committee on Administration are continuing to spend the taxpayers money without the need for Members to vote on it.

THE PUBLICATION OF "DESCHLER'S PRECEDENTS"

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, just before we recessed for Easter an event occurred of great importance to the integrity of the legislative process of this House. Notwithstanding our having waited patiently no less than 40 years for the occasion, the event has gone virtually without notice.

I refer to the publication of Deschler's Precedents," the first volume of which was quietly delivered to each Member's office. I am sorry that "Judge" Deschler, our distinguished former Parliamentarian, did not live to see his work in published form so he could personally autograph and deliver the first volume to Members as he no doubt would have wanted to do.

The precedents are essentially the rulings of the Speaker or Chairman of the Committee of the Whole in the interpretation of the established rules of the House. They are an attempt to expedite

business and protect the minority in its rights, and at the same time enable the House to take action in accordance with the will of the majority. The publication of the precedents provides Members with the tools to become more effective legislators and makes the knowledge of parliamentary procedure and techniques accessible to all and not just a few.

This is why I attach such importance to the publication of "Deschler's Precedents." I should like to commend our present Parliamentarian, William Holmes Brown, and his assistants, Charles Johnson and Peter Robinson, for their invaluable contribution to this project. Without their tireless efforts Mr. Deschler's dream may never have materialized. Bill Brown is himself a great parliamentarian, and it will be under his guidance that the remaining volumes of "Deschler's Precedents" will be published.

We thank Bill Brown not only for this contribution but also for the immeasurable assistance he gives to all our Members.

"DESCHLER'S PRECEDENTS" AND THE PARLIAMENTARIAN'S OFFICE

(Mr. RONCALIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RONCALIO. Mr. Speaker, I have been waiting for lo these many years to rise in avid support of the eminent minority whip, the gentleman from Illinois (Mr. MICHEL), and I am happy to find an occasion to do so today. I, too, wish that Lew Deschler were alive to enjoy the results of his many, many years of devotion to this institution. I share the observations made regarding officials in the Parliamentarian's Office.

PROVIDING FOR CONSIDERATION OF H.R. 5840, EXPORT ADMINISTRATION AMENDMENTS OF 1977

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 493 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 493

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5840) to amend the Export Administration Act of 1969 in order to extend the authorities of that Act and improve the administration of export controls under the Act, and to strengthen the antiboycott provisions of that Act. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, this is the normal open rule with 1 hour of debate. The only exception to the normalcy is that it provides for the bill to be read by titles instead of by sections.

I know of no opposition. We had none in the Rules Committee or before the Rules Committee. I know there is some controversy on the bill it brings up.

Therefore, I reserve the balance of my time.

Mr. LATTA. Mr. Speaker, I agree with the statement just made by the gentleman from Missouri that there is no controversy about this rule but there is some controversy about the bill.

I hasten to point out this afternoon the only controversy that we are going to talk about, the Arab boycott of Israel, will probably cause us to overlook a very important part of this legislation to which I think the House should pay some attention. I have reference to sections 116 and 117 providing for a special report on multilateral export controls.

Several years ago I was privileged to serve on a committee of this House which went into the problem of attempting to limit the export from this country of certain strategic materials. Since that time I am sad to say we have had a continuing shrinking of the number of items on the strategic list and today I wonder what items are remaining on it. Certainly if we have this investigation, we ought to be able to find out whether this COCOM list really exists in fact at present and what good it is doing.

Hopefully they can upgrade it rather than remove more items from the list. Hopefully they will upgrade it and make it more meaningful, because I am not one who favors the export of strategic materials to nations who may or may not be our friends in the future.

Mr. Speaker, I have no request for time and reserve the balance of my time.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. LATTA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 399, nays 2, not voting 32, as follows:

Mr. Yatron with Mr. Milford.
Mr. Roe with Mr. O'Brien.
Mr. Steed with Mr. Skubitz.
Mr. Edgar with Mr. Tucker.
Mr. Bowen with Mr. Martin.
Mr. Duncan with Mr. Derrick.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO HAVE UNTIL MIDNIGHT, FRIDAY, APRIL 22, 1977, TO FILE REPORT ON H.R. 2

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until midnight, Friday, April 22, 1977, to file a committee report on H.R. 2, to provide for the cooperation of the Secretary of the Interior and the States with respect to the regulation of surface coal mining operations and the acquisition and reclamation of abandoned mines, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

EXPORT ADMINISTRATION AMENDMENTS OF 1977

Mr. ZABLOCKI. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5840) to amend the Export Administration Act of 1969 in order to extend the authorities of that Act and improve the administration of export controls under that Act, and to strengthen the antiboycott provisions of that Act.

The SPEAKER. The question is on the motion offered by the gentleman from Wisconsin (Mr. ZABLOCKI).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5840, with Mr. EVANS of Colorado in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Wisconsin (Mr. ZABLOCKI) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. WHALEN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill before us, H.R. 5840, a measure to extend the Export Administration Act of 1969 and to make improvements in that act, is a very serious and important piece of legislation. The Export Administration Act, as the Members know, safeguards the national interest by providing authority to restrict exports under certain conditions.

The act expired last September 30 because parliamentary maneuvering prevented the calling of a conference to resolve the differences between the Senate and House versions in the last session, and since September 30 the Department of Commerce has been using the Trading With the Enemy Acts to carry out the Export Administration's functions.

Since the Committee on International Relations has the responsibility for acting on this legislation, the committee has made a special effort to investigate fully the various problems and questions that have been raised regarding export controls.

Mr. Chairman, the committee has requested several studies from the Congressional Research Service. Two of our subcommittees held hearings on specific aspects of export control issues.

The full committee then held 8 days of hearings on the Export Administration Act in 1976 and 5 days in 1977.

H.R. 5840 thus reflects hard and serious work by the committee. We have produced what we believe to be a very worthwhile bill.

True, there are sections that are controversial; but we have tried to make it as noncontroversial as possible.

The first 18 sections of H.R. 5840 are aimed principally at improving the export licensing process. Included in these sections are:

A 2-year extension of the act, through September 30, 1979; provision for a specific authorization for appropriations after fiscal year 1977; fiscal year 1978 and 1979 authorizations totaling $14,033,000; an increase in the penalties for violation of the act; a clarification of congressional access to information collected under the act; a directive to consider means to simplify the U.S. control list; strengthening of the intent of Congress that licenses be processed within a 90-day period.

Many of these 18 sections were developed, for the most part, pursuant to hearings before the Subcommittee on International Economic Policy and Trade. The full committee owes a vote of thanks for the hard work and thought the subcommittee and its chairman, the gentleman from New York (Mr. BINGHAM), have put into these amendments.

Mr. Chairman, title II strengthens the existing policy statement in the act that declares it to be U.S. policy to oppose boycotts of countries friendly to the United States. The committee strongly favored this strengthening of our resistance to the Arab boycott of Israel through prohibiting U.S. compliance with secondary and tertiary boycotts.

Mr. Chairman, this antiboycott section prohibits any U.S. person from taking any action in support of a boycott against a country which is friendly to the United States and which is not itself the object of an embargo by the United States. The prohibited actions include:

Refraining from doing business with the boycotted country or its nationals or with any other U.S. person;

Refraining from employing or otherwise discriminating against any U.S. person;

Furnishing information with respect to business relationships with the boycotted country;

Honoring or processing a letter of credit containing a condition compliance with which would be prohibited by this law; and

Using a foreign person to circumvent the prohibitions of this law.

However, to avoid interference with a primary boycott, these prohibitions do not apply to specific actions regarding, for example, compliance with boycotting country import rules prohibiting the importation of goods or services produced by the boycotted country or the shipment of goods on boycotted country ships or, two, compliance with import and shipping documentation regarding positive statements of origin, the name of the carrier and route, and the name of the supplier (negative certificates of country of origin can be complied with during the first year after the issuance of the rules and regulations); further, compliance with transshipment requirements;

compliance with the designation, "unilateral selection" by the boycotting country of a product or person to be involved in a specific aspect of a transaction, unless the person has actual knowledge that the sole purpose of the designation is to implement the boycott; and finally, the refusal of a U.S. person or an organization such as a bank to honor a letter of credit in the event the beneficiary fails to comply with the conditions thereof, unless those conditons are in support of a foreign boycott.

Mr. Chairman, this section is highly technical, and I would suggest that we look at it very carefully and at the specific language. However, I must point out that this section further specifies that the President may waive requirements of this law in instances where those requirements would require a U.S. person resident in a foreign country to take an action in that country which would be prohibited by the act.

Mr. Chairman, these provisions do not supersede or limit the U.S. antitrust laws.

Rules and regulations implementing these prohibitions shall not take effect until 120 days after enactment of this bill, and shall provide a grace period through and until December 31, 1978, for contracts entered into as of April 1 of this year. The grace period can be extended, Mr. Chairman, to an additional year in cases where a U.S. person has attempted to remove offending clauses from a contract, and a U.S. person receiving a request to take any action prohibited by this bill shall report that request to the Secretary of Commerce. The Secretary shall have the authority to require the reporting of other boycott-related actions as the Secretary deems appropriate. Such reports shall be made public, except that information of a proprietary or of a confidential nature shall not be disclosed.

Mr. Chairman, I have outlined the major provisions in this bill.

Mr. Chairman, this bill represents nearly a year's work by the Committee on International Relations. Having considered the various interests involved in export control policy, and having gone through this legislation and an informal conference last year, we feel that this is a good bill.

I urge the House to support it.

Mr. SISK. Mr. Chairman, will the gentleman yield for a question?

Mr. ZABLOCKI. Mr. Chairman, I would be delighted to yield to the gentleman from California for a question.

Mr. SISK. Mr. Chairman, I appreciate my colleague, the gentleman from Wisconsin (Mr. ZABLOCKI) yielding to me.

The gentleman recalls, of course, the questions that were raised in the Committee on Rules at the time this matter was before us regarding the matter of charges, which I am sure my colleague is aware of, currently, about the substantial loss of jobs as results of this legislation.

I am not making that as a charge, of course, but, at that time a number of my colleagues and I had indicated that we would hope that the gentleman from Wisconsin and the members of his committee would be prepared to give us some fairly good figures, or the best figures possible, in connection with the possible loss of jobs in connection with this legislation.

Let me ask the gentleman from Wisconsin this particular question, Mr. Chairman:

Did the CIA set a figure—and, of course, the gentleman from Wisconsin does not have to answer if I get out of line there—but did the CIA testify as to their findings in connection with any matter concerning the possible loss of jobs due to the language in title II?

Mr. ZABLOCKI. Mr. Chairman, as the gentleman from California knows, the CIA is responsible for the collection of foreign intelligence. Therefore the CIA has not testified to the committee or its subcommittees as to the number of jobs that would be lost domestically. Neither has it testified concerning the allegations that jobs would be lost if this bill were passed.

But I might add that indeed I am concerned and all of the members of the committee have always been concerned as to the effect of the proposed legislation on our national economy and on our employment situation.

I must say that I have heard and I have read that this legislation would cause the loss of 500,000 jobs. Now, no one who testified before the committee claimed that it would involve the loss of 500,000 jobs.

We have had the Secretary of Commerce and we have had other executives testify before us. The total of 500,000 jobs as the advertisement that appeared in the Wall Street Journal several days ago stated is sheer nonsense and the worst sort of scare tactics. I would submit the 500,000 jobs is probably the total number of jobs that resulted from all U.S. trade with all of the Arab nations, and no one is claiming that this bill will terminate U.S. trade with the Middle East and with the Arab nations in total. So even if all trade did cease, then and only then would 500,000 jobs be involved.

But I might say that the judgment of the committee and the gentleman in the well has been that there could be some small job losses. When I appeared before the Rules Committee, I said we would come in with a figure and, indeed, we tried to obtain a figure. This proved to be impossible. However, as I said the other day, there are those who will testify that there will be losses of jobs which, therefore, would add to unemployment. On the other hand there are those who testified that, indeed, this legislation will enhance trade and will create jobs.

To give the gentleman an answer as to my best judgment, the possible loss of jobs would appear to be something substantially less than the amount that was in the newspaper, possibly no loss at all—maybe several hundred jobs, but in no case would any job loss be more than several thousand. That is my best judgment, in answer to the gentleman's question.

Mr. SISK. Mr. Chairman, let me say that I deeply appreciate the comments of my colleague, the gentleman from Wisconsin. I know how dedicated he is. Let me say, Mr. Chairman, that I, for one, have supported the general position taken by title II. I am totally opposed to yielding to the boycott threats of any nation, so I have a great deal of sympathy. Yet, on the other hand, there is a great number of charges being tossed about here and there.

I know my colleague, the gentleman from New York (Mr. BINGHAM) has been on his feet here possibly to comment. We have had some indication that there had been some testimony, and that is why I raised the question, to the effect that normally, let us say, a billion dollars of trade was calculated into 120,000 or 125,000 jobs. I do not know.

Did the gentleman have any testimony that indicated such figures? There again we are talking simply about what the impact would be, let us say, if per se there were substantial losses of trade? I understand that our trade last year was somewhere in the neighborhood of $9 billion to $10 billion in the petrochemical area, but, if we calculate that out, it would look like there could be—assuming, of course, that in fact we lost the business—a big loss of jobs.

I am inclined to agree with my friend that I know of no real substance to some of these statements that have been made, but I do think we have an obligation here on the record to try to make it clear that in fact regarding present unemployment, we do not propose to create a worse situation.

Mr. ZABLOCKI. Let me assure the gentleman and my colleagues on the committee that if I thought this bill would cause substantial job loss in the United States, I would not be supporting the bill. But if the gentleman wants a specific answer to the formula that was referred to by the gentleman from New York, I yield to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. I thank the gentleman from Wisconsin, the chairman of the committee.

We have researched the hearings, and there is no basis on which a precise estimate can be made of any probable or likely job loss as a result of title II, any more than there is as a result of the export controls that are imposed under the Export Administration Act itself, that is, the refusal to sell certain strategic goods to the Communist countries. There is a relationship that was indicated in some of the Commerce Department testimony that the loss of $1 billion in trade would result in the loss of about 10,000 jobs, but there is no indication whatever that there would be a loss of $1 billion in trade as a result of this measure. There is good reason to believe that the enactment of this legislation would open up additional trade in the Arab world as the boycott became less effective, and that would result in an increase in jobs. So the result might very well be no net loss.

I would just like to add that, just as the Chairman has stated he would not support the bill if we expected any substantial job loss, Mr. George Meany, who would certainly be concerned about jobs, is on record in strong support of this legislation.

Mr. SISK. Mr. Chairman, I appreciate the comments of my colleague, the gentleman from New York. I thank the gentleman for his contribution.

Mr. WHALEN. Mr. Chairman, I yield myself 8 minutes.

Mr. BROOMFIELD. Mr. Chairman, will the gentleman yield?

Mr. WHALEN. I yield to the distinguished gentleman from Michigan, the ranking minority member of the International Relations Committee.

Mr. BROOMFIELD. Mr. Chairman, I support this legislation.

Mr. Chairman, during my long service on the House Committee on International Relations, I can hardly recall a single piece of legislation that was as closely lobbied, debated, analyzed, compromised, and as carefully written at H.R. 5840.

The bill before the House represents the committee's best effort to legislate in a very difficult and controversial area. The fact that it was reported out of committee unanimously suggests, to my mind, that we have succeeded in meeting the legitimate concerns of all parties involved. Of course there have been compromises, Mr. Chairman. I am sure there are Members on the floor who would prefer to see even more stringent provisions against compliance with a boycott directed against a country friendly to the United States. And there will be others who maintain that H.R. 5840 goes too far in its present form. Such honest differences of opinion are, however, inherent in our legislative process.

As we consider H.R. 5840, I think it is important to bear in mind that this legislation is the end product of long and careful deliberation. The committee has made a conscientious effort to hear and accommodate all parties—the administration, Members of Congress, business groups, the American-Jewish community—with a stake in the boycott issue.

The bill that has emerged is evidence of our determination to combat the insidious practice of secondary and tertiary boycotts directed against friendly governments. It is a clear statement of our refusal to permit American commerce to be held hostage to the political whims of foreign nations. At the same time, it is an effort to achieve these commendable ends without unduly jeopardizing our position in the international marketplace.

I think the gentleman from New York (Mr. BINGHAM) is to be commended for identifying this issue, sponsoring this legislation, and working so hard to bring about a broadly acceptable, effective, and responsible piece of legislation.

As my colleagues on the floor are aware, the Export Administration Act—which has in effect become the anti-Arab Boycott Act—has been a difficult and contentious issue for well over a year. The primary problem has continually been how to deal with an issue that is repugnant to American ideals—the secondary and tertiary Arab boycott of Israel—without placing unreasonable and punative restrictions on American industy.

I would also add, Mr. Chairman, that this bill has been fine tuned through lengthy negotiations by the interested parties. I would hope the House can avoid any amendments that might tend to unravel the language and balance that has been achieved in committee.

Finally, at a time when this country is increasingly concerned with human rights and the dignity of man, I do not see how Congress could fail to appreciate the odious nature of the economic warfare being waged against Israel. H.R. 5840 is a clear statement that the United States not only refuses to participate in discriminatory economic practices, but will also actively oppose them with every means at its disposal.

Mr. WHALEN. Mr. Chairman, I too rise in support of H.R. 5840. This particular measure, as has been pointed out, has two titles. The first title extends the Export Administration Act and attempts to improve it. The second title deals with foreign boycotts. H.R. 5840 extends the Export Administration Act, which expired last September 30, to September 30, 1979. At the same time it authorized $14,033,000 to enable the Commerce Department to administer this particular act.

The two titles to which I have referred seek to identify problems in international commerce and to provide remedies for these problems. Let me take each title in turn.

Title I deals with four major problems in connection with the operation of the Export Administration Act. First, since the first Export Control Act was passed in 1949, its provisions have become blurred and, as a result, its objectives now are unclear. This act contains three provisions designed to make the objectives more precise: First, it states that exporting is a right, not a privilege; second, it changes the focus of the law from purely recipient countries to commodities as well; and third, it changes the designation of recipient countries from merely Communist nations to any country whose receipt of strategic materials may endanger our own national security.

Second, the Bingham subcommittee received complaints from businessmen that there have been undue delays on the part of the Commerce Department in either accepting or rejecting export license applications. This bill would provide a 90-day limitation within which the Commerce Department must act upon license applications.

Third, there also have been complaints from businessmen that decisions on the part of the Commerce Department have been arbitrary due to the absence in the law of communication requirements. This bill does two things to correct this: First, it requires that the Commerce Department, in denying an application, state the reasons for this denial, subject of course to security limitations; and second, it also requires that the Commerce Department report twice yearly to the Congress. In this way this bill gives the opportunity to the appropriate committees to engage in responsible oversight activities.

Fourth, there have been complaints that the informal agreement with which the United States is involved with other major Western nations has been operated inequitably. I am referring of course to the so-called COCOM. American business firms contended in subcommittee hearings that items for which they have been denied export licenses by this country have been granted to foreign competitors by other members of COCOM. What this bill does is require of the Commerce Department that it undertake a study of the operation of COCOM and report its findings to Congress not later than December 31, 1978.

Next, let us examine title II of the bill which deals with foreign boycotts. The committee in bringing out H.R. 5840 recognizes that a primary boycott is a valid and legitimate instrument which may be used by one country against either actual or perceived enemies. We recognize that in no way does this fall under the jurisdiction of U.S. law. We also recognize that we cannot force a foreign country to do business with a company in our country with which it does not want to engage in commerce. The problems that this title deals with is those instances where foreign countries impinge on U.S. domestic policy by requiring an American individual or an American firm, in order to obtain business from those countries to discriminate against other American citizens or other American business firms.

There are eight proscribed actions which this bill details. I am not going to outline them for the Members. If anyone wishes to refer to them, they are found on pages 22, 23, and 24 of the bill.

However, Mr. Chairman, let me touch on three of the more difficult issues with which the committee dealt. The first issue was the question of certificates of origin.

Now, in the past many of the boycotting countries have asked American firms to certify that the goods which they were shipping were not produced in the boycotted country. This is known as a negative certificate of origin. Most Arab states have gotten away from this practice and now are requiring a positive certificate of origin which simply requires that the American firm state the country or countries in which the commodity or good was produced. H.R. 5840 provides that negative certificates may be continued for 1 year only. In the policy section of this measure we have urged the administration to do everything it can to negotiate with the remaining countries that engage in this practice so that it will be discontinued. Then at the end of the year all negative certificates of origin are are barred by the bill.

The second problem deals with unilateral selection. That occurs where a boycotting country prescribes certain components from a contractor or supplier in the United States. This is often normal business practice, even within our own domestic economy. This procedure is permitted by the bill with this exception; the exception being when the supplier from the United States has actual knowledge that the sole purpose of the selec-

tion is to further the boycott. I repeat: Actual knowledge that the sole purpose of this selection is to further the boycott. It seems to me that this gives a great deal of latitude, a great deal of flexibility to the supplier.

If enacted, this measure would be enforced by the Commerce Department. It seems to me if there are any charges made against a company for allegedly violating the unilateral selection provision, it would be up to the Commerce Department to prove that the American company, indeed, did have actual knowledge.

The third issue has to do with the application of conflicting laws—our own laws, and those of the host country. Recognizing that U.S. citizens residing in a boycotting country may be confronted with this problem, the committee provides that the President shall have authority to adopt regulations waiving the provisions of this bill in instances where American citizens are caught between conflicting laws.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. WHALEN. Mr. Chairman, I yield myself an additional 2 minutes.

Mr. Chairman, let me make one final comment. This has to do with the question of jobs. As the chairman, the gentleman from Wisconsin (Mr. ZABLOCKI) has pointed out, we cannot tell with any precision how many jobs might be gained or might be lost as a result of the adoption of this measure. I think we have to remember three points, however. First, many Arab States ignore their own boycott provisions.

Second, America is the world's technological leader, that being the case, the United States will continue as a natural source of supply to Arab countries, as it has in the past.

Third, as a result of passage of this bill, it is very possible that some jobs might be gained in particular areas: By those companies, for example, who no longer fear selling to Israel or by those companies who may be removed from the blacklist, in which case they might be in a position to sell to certain Arab States.

Finally, Mr. Chairman, the point we must remember is that we are dealing with a principle.

That is, we are seeking to avoid unwarranted intrusion in our own domestic economy by foreign purchasers who require American firms as a condition of doing business to discriminate against other American citizens and other American firms.

Mr. Chairman, I urge that this body adopt H.R. 5840.

Mr. ZABLOCKI. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Chairman, H.R. 5840 would extend the Export Administration Act through September of 1979, make certain needed refinements in the procedures for licensing of exports that are restricted for national security purposes, and strengthen U.S. laws regarding compliance by U.S. firms with foreign boycotts.

This bill has been subject to an unusually long and thorough process of consideration by the Subcommittee on International Economic Policy and Trade, which I have the honor to chair, and the full International Relations Committee. That process extends back into the 94th Congress, when the Subcommittee on International Trade and Commerce, as it was then called, and the International Relations Committee held hearings over several months on both the export control and antiboycott aspects of legislation similar to that now before the House.

The 94th Congress, many of you will recall, passed by a large majority a bill similar to H.R. 5840. That bill, however, died at the end of the 94th Congress because an objection was raised in the Senate to the appointment of conferees. An informal conference was held, however, and agreement was reached between the Senate and House on a bill. Nevertheless, the Export Administration Act expired on September 30, 1976 and the authority to carry out export controls for national security purposes and to require reporting of foreign boycott requests have since been carried out under Executive order pursuant to the Trading With the Enemy Act.

The informal House-Senate compromise bill worked out but not enacted by the 94th Congress served as the basis for legislation I introduced at the beginning of this Congress, H.R. 1561, which is the predecessor to H.R. 5840. H.R. 5840 is a clean bill reflecting revisions made by the International Relations Committee in H.R. 1561. Additional hearings were held by the full committee on H.R. 1561 prior to committee action.

In this unusually extensive consideration, every opportunity has been available for individuals and groups interested in any aspect of this legislation to make their views known to the committee and to appear as witnesses. In the course of its hearings, the committee and subcommittee heard from dozens of industry, administration, and other witnesses.

Mr. Chairman, some aspects of this bill are rather complicated and controversial. Extensive effort has been required to work out language which is workable and which satisfies as many of the concerns of those that will be affected as possible. I want particularly to thank Mr. WHALEN, the ranking minority member of the Subcommittee on International Economic Policy and Trade, Mr. HAMILTON, Mr. ROSENTHAL, and Mr. SOLARZ for their efforts to improve and refine this legislation. The result is, I think, a better bill than the one we brought to the floor last year.

I will not take the time of the House, Mr. Chairman, to describe all the provisions of this bill. The Members have the report of the committee, and the gentleman from Wisconsin, the distinguished chairman of the full committee (Mr. ZABLOCKI) and others have described the intent and effects of the various provisions.

Let me emphasize, however, a few important aspects of this legislation. First, Title I of the bill for the first time specifically authorizes funds for the carrying out of the export control function.

As the committee report indicates, the Commerce Department in the past has gone directly to the Appropriations Committee for funds for export controls without any specific or periodic authorization. The export process is an extremely important one both to our national security and to our economy and our business community. It is a complicated process which, despite persistent efforts at efficiency by the Commerce Department, continues to encounter problems. The committee felt it could better exercise its oversight and legislative responsibilities over the export control process and bureaucracy by periodically authorizing funds for this purpose. Furthermore, specific authorization of funds brings this area of expenditure into full compliance with clause 2 of rule XXI of the rules of the House.

The committee report explains in detail the basis of the $14,033,000 proposed to be authorized for fiscal years 1978 and 1979. Suffice it to say here that this is a figure worked out with the close cooperation of the Congressional Budget Office and represents a figure which the committee feels is the minimum necessary to carry out all of the provisions of this program including increased attention to any compliance by U.S. firms with foreign boycotts which is prohibited by this legislation.

Another provision of title I—section 103—makes several adjustments in the policies governing U.S. export controls. The most important of these are clarification of the weight to be given to the fact that a product which the United States may wish to restrict from export for national security reasons may be freely available elsewhere, and the removal of the notion from the act that export controls should apply exclusively to Communist countries.

In hearings that the Subcommittee on International Economic Policy and Trade has held on export controls, we have found that U.S. products have sometimes been withheld from export even when freely available in other countries. We have, of course, a multilateral coordinating body that meets in Paris to try to coordinate our export controls with those of the major European nations and Japan. But such coordination is not possible, and when products are being sold by other countries no purpose is served by prohibiting those very same products to be exported by American firms. The Export Administration Act contained conflicting language on foreign availability, and we have attempted to clarify it.

The Communist nations have long felt that our export controls discriminate against them. This is an issue that they will undoubtedly raise in Belgrade this summer when the Communist and free world nations meet to discuss progress that has been made by all parties in trying to live up to the final act of the Conference on Security and Cooperation in Europe—the so-called Helsinki agreement. Strict national security controls on exports, of course, continue to be needed and imposed with respect to our

trade with Communist nations. They will be continued under this legislation. But by removing specific reference to Communist countries, we have removed the notion that Communist countries are the only nations with respect to which export controls may be needed and imposed, thereby removing the aspect of the export control legislation which might be regarded as discriminatory.

Mr. Chairman, quite clearly title II, which contains prohibitions against American compliance with foreign boycotts, is the aspect of this legislation that is of most interest and, in some cases, concern to the Members, and I have several things to say about it.

First, there is no doubt that the Arab boycott of Israel is a very real thing—that it imposes real and concrete constraints on American business. Boycott requirements show up in thousands and tens of thousands of trade documents every year. We know that as a fact from the reports which American firms are required to file with the Commerce Department when they receive any boycott request.

There are, of course, particular Arab countries, particular transactions, and particular American companies that are never or rarely involved in the boycott. This fact, however, adds to its insidiousness and its disruption of American business relations since one firm may have a problem with it while his competitor may not.

The boycott, Mr. Chairman, has been directed by the Arab countries against Israel since the very founding of the Jewish state. It differs from other economic boycotts, such as our own against Cuba, in that some Arab countries in some circumstances require companies in third countries such as the United States to abide by the boycott as a condition for doing business in Arab territory.

H.R. 5840 does not attempt to intrude upon the direct Arab boycott of Israel. It is clearly the right of any sovereign nation directly to boycott another nation. What this legislation attempts to do is to remove American firms from the web of the boycott by requiring them to refuse to comply.

Mr. Chairman, a requirement by any nation that American firms boycott another country friendly to the United States violates the principle that we have long maintained and protected—namely, that American firms should be free to do business wherever they wish without outside political pressures and constraints.

But not only does the Arab boycott affect the freedom of American foreign trade, it even injects a discriminatory aspect into our domestic trade. Some Arab countries, for example, require the American firms with which they do business directly to refrain from doing business with other American firms that deal with Israel. This is known as the tertiary boycott.

Mr. Chairman, one criticism that has been made of title II of this legislation is that it would impose and attempt to enforce American laws upon the Arab nations. Yet the Arab boycott, to the extent it is implemented by the laws of the Arab nations, is an imposition of Arab laws on American commerce.

I want to emphasize that the antiboycott provisions of H.R. 5840 now before the House are, in my judgment, considerably improved over the proposal that was brought before the House and approved in the last Congress. It is improved especially in that it is more precise in prohibiting compliance with the secondary and tertiary aspects of foreign boycotts, and in avoiding any possible interference with the primary aspects of foreign boycotts.

I think, also, Mr. Chairman, that this bill is improved in that it is clearer and somewhat more detailed in spelling out what Americans are prohibited from doing. This is certainly necessary and desirable in a bill that involves potential criminal penalties for violation, though experience with the Export Administration Act indicates that administrative penalties are used far more frequently than criminal prosecutions.

The business community has continued to criticize this legislation for being too vague, but I suspect it would never be possible to achieve language clear enough to satisfy the opponents of this legislation. They complain that the prohibitions of the act will force them to exercise extreme caution in entering into business arrangements with boycotting countries. Such caution, of course, should be exercised to avoid compliance with boycott requirements and possible violation of the prohibitions proposed in this legislation.

Finally, Mr. Chairman, it has been charged that this legislation will result in the loss of large volumes of United States-Arab trade and American jobs. I think these estimates and charges are grossly exaggerated. I will have more to say on this issue at a later point. But I would emphasize here that as recently as a few weeks ago AFL–CIO President Meany endorsed the strongest possible legislation prohibiting American compliance with foreign boycotts. Certainly we are all concerned about any possible loss of American jobs. But certainly no one is more concerned than Mr. Meany, and I'm certain that Mr. Meany satisfied himself completely that there would be no substantial loss of American jobs before he endorsed this kind of legislation.

Mr. Chairman, I am proud to have been one of the initial sponsors of antiboycott legislation in the Congress, going as far back as 1965 when I was a member of the Banking and Currency Committee which then had jurisdiction over such legislation. We have waited long enough for the State Department to try to end this intrusion on U.S. commerce by quiet diplomacy. That diplomacy has had little success. Particularly since 1974 the scope and impact of the boycott on Americans, to say nothing of Israel, has greatly increased rather than subsided. I strongly believe that it is time that we end this instrusion into our freedom of trade. I believe the time for this leigslation prohibiting American compliance with foreign boycotts has come.

Briefly, Mr. Chairman, title II of this bill would prohibit any American willfully from taking certain actions, or agreeing to take certain actions to comply with a foreign boycott. Specifically, those actions refraining from doing business with any other American or foreign person; refraining from employing or otherwise discriminating against any person on the basis of race, religion, sex, or national origin; furnishing information about the race, religion, sex, or national origin, or about the business or charitable relationship of any person; and using any foreign person to circumvent these prohibitions.

Importantly, however, these prohibitions are tempered and refined in this year's bill, H.R. 5840, with a number of exceptions designed to permit reasonable and common trade practices to continue, and to take account particularly of the special problems that might be faced by U.S. subsidiaries and affiliates actually located in boycotting countries.

The exemptions include compliance with import and export restrictions of boycotting countries, and compliance with unilateral requests by boycotting countries for particular subcontractors or product components provided such request is not solely for the purpose of enforcing a boycott.

Both the prohibitions and exceptions would apply both to U.S. companies and U.S.-controlled subsidiaries and affiliates abroad. Wherever an American subsidiary or affiliate, however, might come into conflict with a specific foreign law, provision is made for a Presidential waiver of the requirements of this proposed law to allow compliance with the foreign law.

Mr. Chairman, this legislation would preempt all existing laws having to do with foreign boycotts—a very important improvement over last year's bill since at least six States now have strong antiboycott laws which have raised great uncertainty in business circles. H.R. 5840 would provide us with a uniform policy on foreign boycotts rather than varying State policies which would greatly inhibit trade.

Finally, Mr. Chairman, a grace period until December 31, 1978, is provided in this bill to permit companies to renegotiate existing contracts that may include boycott provisions and bring them into compliance. A grace period of 1 year from the enactment of this legislation is provided for the use of negative certificates of origin, after which only provision of positive certificates of origin will be permitted.

Mr. Chairman, I believe this is a clear bill, a workable bill, and a fair bill. I believe it takes maximum account of the views and needs of the Congress, the administration, and the business community. All of these groups undoubtedly have certain dissatisfactions with it, because it consists of a great many compromises. But I believe it will greatly reduce American compliance with foreign boycotts without unduly inhibiting trade with the Middle East or costing American jobs, and that it will improve our complicated export licensing system with full preservation of our national security. I urge my colleagues to join me in support of H.R. 5840.

Mr. WHALEN. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, I disagree, substantially, with the comments that have been made up to now concerning title II of this bill. During the 5-minute rule I hope I will have an opportunity to explain why I feel that title II is, first of all, unnecessary and, second, very harmful to the short-term and long-term interests of both the United States and the State of Israel.

I take this opportunity, instead, to devote my attention and, hopefully, draw the attention of other Members to an important part of existing law; and, in connection with my statement, I would like to ask, later on, a question of the gentleman from Wisconsin (Mr. ZABLOCKI), the chairman of the Committee on International Relations, in order to clarify some legislative intent on this important language.

The language I refer to relates to controls on the export of agricultural commodities.

We are all aware, I am sure, of the increasing importance of agricultural exports to our Nation's trade balance and to our ability to pay for certain imports, oil and otherwise.

We are also aware of the destructive impact of the brief soybean embargo in 1973 and the protests from the agricultural community over restraints on grain sales to the Soviet Union and Poland in 1975.

While section 4(f) of the act provides that the authority of the section with regard to agricultural commodities cannot be exercised without the approval of the Secretary of Agriculture, it also states that he cannot approve the exercise of such authority when a commodity is in excess supply except to the extent the President determines the exercise of such authority is required to effectuate the clauses in the declaration of policy pertaining to furthering the foreign policy and national security of the United States. So it seems to me that the question we face is: How do we determine whether a control is essential to the foreign policy and national security of the United States? Should we restrict the export of an agricultural commodity for anything short of an overriding foreign policy or national security interest?

My review of the legislative history of this act sheds very little light on what the Congress originally meant by these phrases.

My review of the February 17, 1949, House debate on the Export Control Act of 1949 indicates that the foreign policy and national security clauses were not considered high priority issues at that time. There is an almost total absence of any legislative history.

In the original debate, Mr. Cole, of Kansas, said, in part:

> I may say to the gentleman that in the hearings before the committee, evidence was produced that this bill was necessary, according to its proponents, to protect the domestic economy from excessive drain. The latter two provisions of the declaration were not given much consideration. . . .

The latter provisions that Mr. Cole referred to were clauses B and C of the Declaration of Policy concerning foreign policy and national security.

Mr. Chairman, I include at this point an excerpt from the declaration of policy in the hearings previously referred to:

DECLARATION OF POLICY

SEC. 3. The Congress makes the following declarations:

(1) It is the policy of the United States both (A) to encourage trade with all countries with which we have diplomatic or trading relations, except those countries with which such trade has been determined by the President to be against the national interest, and (B) to restrict the export of goods and technology which would make a significant contribution to the military potential of any other nation or nations which would prove detrimental to the national security of the United States.

(2) It is the policy of the United States to use export controls (A) to the extent necessary to protect the domestic economy from the excessive drain of scarce materials and to reduce the serious inflationary impact of foreign demand, (B) to the extent necessary to further significantly the foreign policy of the United States and to fulfill its international responsibilities, and (C) to the extent necessary to exercise the necessary vigilance over exports from the standpoint of their significance to the national security of the United States.

Mr. Chairman, one indication of the historical view of controls can be found in the December 23, 1969, House debate on the conference report on the bill to extend the authority of the Export Administration Act. On that occasion our colleague, the gentleman from Ohio (Mr. ASHLEY), said:

> The conferees wish to make clear the intent of Congress that an item which is available from free world nations other than the United States shall be freely exportable from the United States without licensing requirements unless overriding national security considerations still require that the item be controlled.

It seems reasonable to me to assume, based on the history of congressional debate and President Carter's statements of last year about export controls, that exports of agricultural commodities should be restricted only in the case of the most overriding foreign policy and national security concerns.

Mr. Chairman, may I ask the distinguished chairman of the Committee on International Relations, the gentleman from Wisconsin (Mr. ZABLOCKI), if he agrees with my interpretation of this language, inasmuch as I feel that interpretation is vital to legislative history to provide guidance to the President of the United States.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. FINDLEY) has expired.

Mr. WHALEN. Mr. Chairman, I yield 1 additional minute to the gentleman from Illinois (Mr. FINDLEY).

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the chairman of the committee.

Mr. ZABLOCKI. Mr. Chairman, I would like to state that in general I am in accord with the remarks of the gentleman from Illinois.

I think it is one thing to impose export controls on agricultural products for short supply situations and another thing to impose them for foreign policy reasons.

Imposing export controls for domestic short supply reasons should be done only under the most pressing circumstances, and consideration should be given to the impact such controls would have on the long-term interests of U.S. foreign agricultural sales.

As for imposing export controls on agricultural commodities for reasons of U.S. foreign policy, I think even tougher standards should be applied. It is not with whim that the Government should interfere with the normal process of marketing U.S. agricultural products abroad. There should be a clear and overriding national security or foreign policy interest—substantially overriding the interest of U.S. agricultural sales—before such controls should be contemplated and imposed.

I feel that section 105 of this bill reflects this attitude and puts the executive branch on notice that the Congress will look with a skeptical eye to controls placed on agricultural exports for foreign policy purposes. The President needs flexibility to impose such export controls if necessary, but he should be cautious of using this authority.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. FINDLEY) has again expired.

Mr. ZABLOCKI. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, I urge support of H.R. 5840, the Export Administration Act amendments. As a member of the International Relations Committee, I am aware of the time and energies that went into this bill. It is the product of many hearings and lengthy discussions in markup sessions.

I am particularly pleased to have had substantive input into title I. In committee, we sought to simplify, to bring some commonsense, to the administration of U.S. export policies. I think we succeeded. Let me cite two examples from title I.

Section 104 of the bill establishes a simple procedure that would allow farmers and other agricultural exporters to make firm sales commitments to foreign governments. Currently, farmers can contract with foreign governments for food sales, but the U.S. Government can effectively cancel those contracts by declaring an embargo on the particular food item before the food is shipped. Under this bill, farmers could apply to the Commerce Department for permission to store foodstuffs in the United States for future shipment overseas. Once that permission was granted, the contract would be binding, and the shipment could not be halted by any subsequent embargoes.

Second, section 107 of the bill directs the Commerce Department to conduct a study to determine if the international exchange of technical information by the scientific and academic communities poses any threat to national security. Originally, the bill required such a study, but it also required American colleges and universities to immediately begin informing the Commerce Department of

all projects and exchanges of technical data. It may be that such exchanges do threaten national security, but I do not think it is advisable to ask educational institutions to spend time and energy providing this type of information until we are sure that the problem exists and the information is needed. The committee has altered the language to mandate a study to identify the scope of the problem before trying to legislate a solution.

These examples demonstrate that considerable effort has been made in H.R. 5840 to "streamline" the administration of our export policies and to open up the export-licensing procedures. I urge approval of this constructive legislation.

Mr. WHALEN. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. LAGOMARSINO), a member of the committee.

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of H.R. 5840, amendments to the Export Administration Act.

You and my distinguished colleagues are well aware of the great care with which the Committee on International Relations examined the question of foreign boycotts. Persuasive arguments were made for a strict law which would prohibit any activity which could be interpreted as supporting a foreign boycott. Equally persuasive arguments were presented for a more moderate approach to prohibit foreign boycotts, but to do so in such a way as to prevent an unacceptable or dampening effect on the American economy. I believe this bill, H.R. 5840, represents a significant achievement in supporting the interests of both sides.

It is a compromise and, as such, does not completely fulfill the wishes of either one side or the other. Yet, it addresses the needs of both. It prohibits discrimination by one U.S. person against another U.S. individual on the basis of that individual's race, religion, sex, ethnic, or national origin in order to comply with or support a foreign boycott. It also reaffirms the legitimacy of a U.S. person's obligation to comply with the local laws of the country in which he is a resident, as those laws apply to his activities within that country. This provision is essential to permit American business interests to continue their legitimate activities in other countries. However, it is not intended as a means whereby that company can circumvent the boycott prohibitions of this measure.

Unilateral selection is one of the most delicate issue in the amendments to the Export Administration Act. It is permitted in his bill except where the U.S. person has "actual knowledge" that the sole purpose of such a selection is to implement a boycott. The joint statement by the Business Roundtable and Antidefamation League of B'nai B'rith offers support for allowing unilateral selection under these conditions. Their position provides that it is acceptable to permit unilateral selection of goods that in the normal course of business are identifiable by source.

Again, the compromises reached in this bill do not satisfy everyone completely. But H.R. 5840 does attack the worst aspects of discrimination against Americans, while at the same time preserves our important diplomatic and economic relations with the Arab States.

An equally important provision of this bill, especially to business people within the State of California, is that which provides for Federal preemption of State laws prohibiting certain types of boycott-related activities. This single, uniform law will insure that regulation of foreign commerce will be consistent for American business in whichever State a company might be located.

Mr. Chairman, it is my firm belief that the United States can and must be a moderating and stabilizing influence in the Middle East. To do that, I believe we must maintain our relations with both Israel and the Arab nations on a nondiscriminatory basis. I feel that with passage of H.R. 5840 we will reinforce our close ties with Israel and avoid an economic confrontation with the Arab states.

Mr. Chairman, I urge passage of H.R. 5840.

Mr. ZABLOCKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Chairman, I rise to speak in support of H.R. 5840, which extends the authority of the Export Administration Act of 1969.

This bill has two main purposes—to improve the export licensing process and to strengthen the U.S. policy against foreign boycotts. It is that second purpose which I would like to address today.

Title II strengthens the antiboycott policy in the Export Administration Act. While this policy statement is aimed at all foreign boycotts of countries which are friendly to the United States, the urgency for strengthening the policy at this time is the Arab boycott of Israel.

The Arab nations have been conducting an economic boycott of Israel since the first days of the Jewish state in 1948. The purpose of the boycott is to prohibit commercial relations with any person which is substantially involved in commercial intercourse with the state of Israel.

In 1965, the U.S. Congress wrote into the Export Administration Act an antiboycott policy. That stated that it is U.S. policy to oppose restrictive trade practices or boycotts fostered by foreign countries against other countries friendly to the United States and that it is U.S. policy to encourage U.S. concerns to refuse to take any action which has the effect of furthering or supporting such boycotts.

Having set forth its policy on this matter, the Congress turned its attention to other issues, and the policy statement languished in the bureaucracy. The failure of the executive branch actively to attempt to implement the policy was not a serious matter during the latter 1960's, because at that time U.S.-Middle East trade relations were, for the most part, a one-way street—the shipment of oil to the United States—so there was not substantial opportunity for the boycott to be applied against U.S. concerns. However, this situation dramatically changed with the quadrupling of world oil prices in 1973. Business opportunities in the Middle East suddenly shot skyward, and the impact of the Arab boycott of Israel on the activities of U.S. companies suddenly became a real threat.

Even with this turn of events, however, the executive branch did little to carry out the antiboycott statement in the Export Administration Act. For that reason, beginning in 1975, various congressional committees initiated hearings on the effect of the Arab boycott. These included lengthy hearings during 1975 and 1976 before the Subcommittee on International Trade and Commerce, chaired by Congressman JONATHAN BINGHAM, and during 1976 and 1977 before the Committee on International Relations. It was not until numerous hearings and the introduction of various bills that the executive branch in 1976 finally moved to beef up the reporting requirements and the rules and regulations regarding compliance with boycott requests. But even these efforts were half-hearted, so the Congress has had to consider additional legislation to establish a strong U.S. antiboycott policy.

The Arab boycott of Israel takes various forms. In its most far reaching form, it would require a person who wants to have commercial relations with an Arab nation to not have commercial relations with Israel. It has also taken the form of requiring firms to discriminate in their employment practices, but there are only a handful of documented cases, and this form does not appear to be one of the intended aspects of the boycott. Probably the most serious impact from the U.S. point of view arises from the requirement that companies not deal with "blacklisted" companies.

Title II of H.R. 5840 is aimed at stemming the secondary and tertiery aspects of foreign boycotts. It is not aimed at affecting a primary boycott, which is a recognized tool of international economic warfare. In pursuit of this goal, this legislation would prohibit a U.S. person, pursuant to a request or requirement of a foreign boycott: To refrain doing business with the boycotted country or its national, or with any other person; to discriminate in employment practices; from furnishing information with respect to business relations with the boycotted country; and, using a foreign subsidiary to circumvent the law.

In order not to interfer with a primary boycott and to minimize the impact this legislation may have on U.S. business interests in the Middle East, the bill provides for various exceptions to these prohibitions. These prohibitions include: Compliance with boycotting country import rules regarding the importation of goods or services produced in the boycotted country; compliance with positive statements of origin, the name and nationality of the carrier and route of shipment, and the name of the supplier and nationality of the carrier and route of shipment, and the name of the supplier of the shipment; compliance with "unilateral selection" of the product to be involved in a particular aspect of a transaction, unless the U.S. person has actual knowledge that the sole purpose of the selection is to implement the boycott.

In addition to these explicit exceptions to the prohibitions, title II provides for the option of a Presidential waiver to prevent a U.S. person operating overseas to be caught between this law and the laws of the country in which it is resident. However, this waiver is not intended to be used to grant blanket exemptions from the prohibitions of this law.

For contracts entered into as of April 1, 1977, the rules and regulations issued pursuant to title II do not go into effect until January 1, 1979. The purpose of this grace period is to provide time for many existing contracts, which were signed before it was illegal to comply with boycott requests, to expire. For those that run for a longer period of time, the purpose is to provide sufficient time for the U.S. person to attempt through negotiations to remove any provisions that are in conflict with this law. For persons unable to successfully achieve such renegotiations, the law does give the Secretary of Commerce the authority to extend the grace period of 1 additional year.

Some six States have enacted anti-foreign boycott laws. Because this is an area of foreign policy and foreign trade, it is properly under Federal jurisdiction, and this bill would preempt all State laws aimed at stemming the impact of foreign boycotts.

Mr. Chairman, I have touched only on the most important aspects of the anti-boycott legislation. There are many other issues dealt with in the legislation which I do not have time to go into here. However, I hope I have demonstrated to the Members that: First, this is a very complex area which requires precisely worded and carefully drawn legislation, and, two, that the Committee on International Relations has spent the better part of a year developing what is a good piece of legislation. Much work and thought has gone into the drafting of this bill. We have consulted with all interested parties, and, while none may be totally satisfied with this bill, the major participants in the discussions are supporting it.

Much effort and some compromise has been put into title II of H.R. 5840, and I urge the Members to support it as reported by the committee.

Mr. ZABLOCKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana (Mr. HAMILTON).

Mr. HAMILTON. Mr. Chairman, I rise in support of H.R. 5840, a bill to amend the Export Administration Act of 1969. A major focus of these amendments to the act concerns measures to strengthen its antiboycott provisions. They are contained in title II of H.R. 5860.

This bill passed the Committee on International Relations by unanimous vote. This vote was possible in part, because of a series of successful amendments to title II of the bill which were based on extensive and productive negotiations among several members of the committee, including the chief sponsors of the original version of title II, and representatives of the White House, State Department, and Commerce Department.

I believe that in a cooperative spirit we have reached a workable compromise, one we can support, one which tries to minimize confrontation at home and abroad and one which promotes the national interest.

Competing interests will prevent many groups from enthusiastically endorsing this compromise but we believe we have made a reasonable accommodation among groups with sharply conflicting interest and that further efforts to change the language of title II in any substantial way should be avoided.

Mr. Chairman, I fully support this legislation. One disturbing, although apparently not widespread, feature of the Arab boycott of Israel is that it has come to include, in some cases, discrimination against persons or firms on the basis of race or religion or national origin.

The bill we have before us categorically prohibits any American person from discriminating in this manner. There are no exceptions, no deferred effective dates and no Presidential waiver, and there should be none.

A second very disturbing feature of the Arab boycott of Israel is the attempt to force U.S. companies to direct their business away from Israel and blacklisted firms.

This bill in its present form also prohibits general boycotts by U.S. firms of friendly countries and blacklisted persons.

I think all of us here enthusiastically support these efforts to legislate provisions to deal with discrimination and to deal with other important practices relating to the secondary and tertiary boycotts.

Mr. Chairman, I supported this legislation in the last Congress. But I believe that H.R. 5840 is an improved piece of legislation.

One reason it is improved is because of the cooperative spirit with which the Secretary of State and Secretary of Commerce have approached the legislation in recent hearings before the committee. Another reason is that the bill's chief sponsors have tried to perfect the language and they have succeeded in part.

The points of issue in this bill are not over how the discriminatory aspects of the boycott are dealt with, but over the extent to which this law will inhibit American business and political relations in the Middle East.

H.R. 5840 tries to address these concerns. It does not in any way conflict with the principal goals of this legislation. Rather, it refines sections of the bill which in the judgment of many could have proved counterproductive and could have the unintended effect of worsening relations with states in the Middle East, sharply cutting our trade there and even adversely affecting the atmosphere we hope can be preserved this year to help promote peace negotiations for a settlement of the Arab-Israeli conflict.

Mr. Chairman, this bill recognizes—

The need for the executive branch and the Commerce Department to have a degree of flexibility in interpreting sections of the bill which are written broadly and whose ramifications are largely unknown at present;

The desire to try to make more of a distinction between active compliance with boycott procedures and passive action which might, in and of itself, be construed as compliance;

The need to create procedures that are firm against the secondary and tertiary boycotts but which are not so cumbersome and imprecise that small businesses are scared out of the market. Larger firms and those with a dominant market position can usually find ways to keep business going. None of us want to support legislation that has the effect of discriminating against small firms;

The desire to seek compromise and avoid confrontation among many groups all of whom have persuasive arguments on their side;

And finally the need to disrupt U.S. trade as little as possible and, therefore, hold to a minimum the shift of jobs and sales overseas.

Mr. Chairman, everyone working on this issue on this committee and in the executive branch and even in parts of the Middle East have, over the last few weeks, tried to reduce the confrontational aspects of this legislation. They all recognized the far-reaching implications of this bill, and I think we have succeeded, in part at least, in reducing the confrontations this bill presents.

I believe that this bill is a fair but firm piece of legislation, one which is designed to be tough, and rightly so, on the issues of discrimination and practices associated with secondary and tertiary boycotts, but one which is also designed to try to permit continuing economic and political relationships with a part of the world we cannot ignore.

Secretary of State Vance told the Committee on International Relations when he returned from the Middle East that he believed that carefully directed legislation and diplomatic action can protect our political and economic interests in the Middle East.

We have tried in H.R. 5840 to produce what the Secretary calls "carefully directed legislation." I think we have largely succeeded.

I believe H.R. 5840 gives the President the necessary flexibility. Any more restrictive language, I feel, will serve no useful purpose and could prove counterproductive. I urge support for title II of H.R. 5840 without further amendment.

Mr. ZABLOCKI. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Chairman, in light of some of the objections that have been raised to title II of the bill outside of this Chamber, I thought it might be useful to make an effort to put it in perspective.

Mr. Chairman, the antiboycott provisions of this legislation, in my judgment, are very carefully constructed to distinguish between the right of the Arab countries to engage in a primary boycott against Israel, on the one hand, and the right of our own country to protect American citizens and corporations from the insidious impact of secondary and tertiary boycotts, on the other hand.

Mr. Chairman, when we adopted the Export Administration Act in 1969, we established as the policy of this country that we would attempt to discourage American firms from cooperating with foreign boycotts of friendly countries.

The problem was that no provision was made in that law to penalize those citizens or corporations that chose to consciously flaunt the established policy of our country. As a consequence, there were many American firms which honored this policy in the breach rather than the observance, as a result of which those corporations which were good corporate citizens were put at a competitive disadvantage with those corporations that were not.

This bill, by making it illegal for American firms to cooperate with the secondary or tertiary boycotts against Israel, would assert the primacy of principle over profits. For these reasons, I think it merits the support of this House.

Mr. WHALEN. Mr. Chairman, I yield 9 minutes to the gentleman from Illinois (Mr. MICHEL), the distinguished minority whip.

Mr. MICHEL. Mr. Chairman, during the long debate over antiboycott legislation, we have been told time and time again that what we are confronted with here is a moral issue, an issue of conscience. I agree with that assessment.

Where I disagree with the proponents of this legislation is with the view that there is only one moral issue at stake here. There is really more than one. Any legislation which takes away thousands of jobs from Americans must be viewed as one involving serious moral questions. The legislation before us unfortunately will have that result.

That is not just my opinion, Mr. Chairman. It is a view shared by many businessmen. And I do not mind beginning with a citation or two from my own district.

Caterpillar Tractor Co. is the dominant industry in my district. They produce quality products known the world over. Last year their sales volume worldwide was in excess of $5 billion. Their net contribution—now get this—to a favorable U.S. balance of payments during the last 3 years has amounted to $4.8 billion.

If my memory serves me correctly, Mr. Chairman, that is just about the amount the American taxpayer has been asked to ante up for foreign aid or military assistance to Israel. Actually I think the total U.S. aid to Israel in the past 3 years comes to $5.3 billion.

This again, mind you, is just one company's contribution and I have no qualms about speaking up for them here when they are to be so adversely affected by what we are proposing in this bill.

During the past 3 years Caterpillar Tractor has sold $700 million of its products to Arab countries and $60 million to Israel. They do business with both sides because they produce a quality product and both sides want them.

Caterpillar Tractor has long been among the companies most actively involved in promoting freer trade and the removal of obstacles to trade, of which international boycotts are a prime example.

They have maintained good business relationships with both Israel and the Arab nations. They sell to and through independent, locally owned dealers in these countries.

A substantial and growing number of Caterpillar employees in the United States owe their jobs to the business they are doing with the Arab world. In 1976 the level of Caterpillar jobs was approximately 3,000. For each of these jobs it is estimated that two more jobs are generated with supplier firms so that is a total of 9,000 jobs for just one company's transactions.

Stabilizing employment is an important objective of this company, the Caterpillar Tractor Co., just as it is an important social and economic goal of the United States.

What have we been talking about in this economic stimulus and jobs programs? We have been talking about putting people to work, having people productively employed. Despite high U.S. unemployment in the past 3 years, Caterpillar with over 60,000 employees has had to lay off less than 200 employees. Caterpillar could not have achieved this record of employment stability over the past few years had not increased sales to the Middle East made up for relatively flat markets in the United States, Europe, and Japan.

It is in the best interest of the United States—and of firms like Caterpillar—to export products both to Israel and to the Arab nations. It is due to this ability that Caterpillar has been able to export as much as it has.

Now, if I may go beyond the special interest of my own district, there are studies and good authority for pointing out what would happen without this trade. Conceivably the United States could stand to lose $16 billion in outstanding service and construction contracts in Saudi Arabia alone this coming year, plus another $4 billion a year in sales of direct civilian exports, and $9 billion in military goods and services.

Dr. Richard D. Robinson, professor of international management at the Alfred P. Sloan School of Management at MIT has come up with these figures and translates them into something like 200,000 jobs in this country.

And here again, we are talking only about one Arab country, Saudi Arabia. If we took into account all 18 Arab countries, the figure according to Professor Robinson could be as high as a half million jobs in the United States.

I do not understand a morality that demands hundreds of thousands of families all across this Nation be faced with the distinct possibility of having a breadwinner unemployed in order to satisfy somebody else's allegedly higher moral views.

So, Mr. Chairman, let us put this debate in proper perspective. This is not a debate where morality and sensitivity of conscience are on only one side of the issue. The fact of the matter is that certain provisions of H.R. 5840 make uncertain the future of hundreds of thousands of Americans working for companies who now do business in Arab nations.

These provisions would put in jeopardy billions of dollars of national income.

These provisions would seriously damage U.S. influence in negotiations for a Middle East peaceful settlement.

It seems to me that any legislation that disregards these questions in the name of some allegedly higher moral purpose does not command the respect and most certainly not the assent of those of us who believe that jobs and income and peace also involve moral questions.

H.R. 5840 does, however, embody certain laudable provisions which I endorse.

Do other nations have a right to demand that Americans discriminate against U.S. individuals on the basis of race, religion, sex, or national origin? The answer should be no and H.R. 5840 correctly says so.

Do other nations have the right to ask U.S. companies or individuals to furnish information about any other U.S. person or about his or her contributions to charities or freedom organizations that might support the boycott curbs? The answer should be no and H.R. 5840 correctly says so, although I would prefer the Senate version which permits furnishing of normal business information in a commercial context.

Insofar as discrimination against U.S. citizens or groups is concerned, there can be no question that we support the strongest possible legislation to make certain every nation is aware we do not tolerate such actions in this country.

But another important question still lingers, Mr. Chairman, and it goes right to the heart of this bill:

Do other nations have the right to decide for themselves what goods they will import into their own territory. My answer—one agreed to by experts in international law—is yes, but H.R. 5840 garbles up this time-honored international practice.

Let us examine for a moment two unacceptable provisions of this bill:

H.R. 5840 permits a "negative certification" of origin for 1 year, but bans such certification thereafter. This is, in effect, placing the burden on the shoulders of American business and American workers. What guarantee do we have that after 1 year such "negative certification" will not be demanded by the Arabs? None.

Who will be hurt when and if the year ends and the Arabs demand such certification which American companies, under such law, cannot provide? I will tell you: American workers and their families. We are fooling ourselves if we believe we can bluff the Arabs with a threat. And it is the height of immorality to use somebody else's job to back up a threat. And that is precisely what H.R. 5840 does.

What we should do, is allow the President, after 1 year of experience with this bill, to extend negative certification beyond this time limit if economic national interest dictates this extension?

H.R. 5840 permits compliance with a designation by a boycotting country of a specific component, carrier or subcontractor as long as the U.S. person has no "actual knowledge" that the sole purpose of the designation is to implement the boycott.

This provision is supposedly designed to allow a U.S. company to comply with the request of a buyer that a specific component be included on equipment the buyer orders. This provision is, however, guaranteed to lose jobs for Americans because we all know that this "knowledge" will be widespread and will effectively stop any American concern from dealing with an Arab country.

Mr. Chairman, let me conclude by saying there is an unspoken assumption underlying this debate and I believe it is time that it came out in the open.

There is fear, a very real fear, present in the House that those who question or vote against H.R. 5840 will be labeled less than friendly to the nation of Israel.

I can only say that the very worst kind of approach that can be taken on this legislation is to make it one in which a hard line is drawn between those who support and those who do not, with the former being labeled "pro-Israel" and the latter being labeled "anti-Israel." Such line-drawing is overly simplistic and inaccurate.

I have no apologies to make for the number of times I have supported the State of Israel with my votes on the floor of this House.

As a matter of fact, during the Johnson administration when one Gamel Abdul Nasser of Egypt was telling us to go "drink from the sea" it was my amendment to the foreign aid bill that year that prohibited shipments of grain to Egypt and it was adopted by an overwhelming vote of this House.

It is my view that the United States will never permit the original borders of the State of Israel to be violated by an aggressor nation. We are committed as a nation to preserve the State of Israel as a bastion of democracy in the Middle East. Israel will remain independent, strong and free because the United States of America will continue to support the Israelis' determined fight for their national existence.

In short, Mr. Chairman, let us get this issue out of the way once and for all. A commitment to support Israel does not demand a constant repetition of that support. It does not mean showing good faith from time to time by making symbolic gestures or engaging in ringing rhetoric. True support of Israel means that we keep the United States of America strong, for without a strong America, Israel will surely be destroyed. And we cannot have a strong America by legislating away hundreds of thousands of American jobs.

You do not strengthen Israel in the long run by weakening the United States. And the moral commitment to Israel's freedom is not enhanced by the dubious morality of sacrificing American families for the purpose of what amounts to another symbolic gesture.

If there is any lesson that Israel itself has taught the world in the past 25 years, it is that insofar as national interests are concerned, "No. 1" always comes first. In Israel, Israel is No. 1. That is as it should be and the bravery and fortitude of the Israeli people have made the fact known to the world.

Well, the same is true in the United States: The interests of the United States are our primary concern. We should support and aid Israel because it is in the interest of the United States to do so. But we should remember what the Israelis have taught us and the world: When our our interests, economic or otherwise, are at stake, we come first. There is no other way to do it. If Israel did it any other way, it would have ceased to exist years ago.

And so let us at the very least pay to the Israelis the tribute of having learned from them and reject this needless, punitive, and dangerous legislation, that is certainly not in our country's best interest.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WHALEN. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Chairman, I listened with interest to the remarks of the gentleman from Illinois (Mr. FINDLEY) with regard to the provisions of this bill dealing with agricultural controls. The gentleman from Illinois (Mr. FINDLEY) made the statement that only when the overriding requirements of national security demanded should we allow export controls of agricultural products. He refers to my good friend, the gentleman from Wisconsin (Mr. ZABLOCKI) and asks, "Is that not true?" The gentleman from Wisconsin (Mr. ZABLOCKI) answered him by saying, "The Congress will look with a jaundiced eye at any effort to control agricultural products."

That is all well and good, but this bill, Mr. Chairman, does not do that. What this bill actually does is it says that in 30 days if the Congress does not disapprove of the action, then the export controls stay on.

What I am intending to do, Mr. Chairman, is offer an amendment to place the burden and the monkey on the right people's back and ask the Congress of the United States that at the end of 30 days if the Congress does not approve of such action, then the export controls go off.

Mr. ZABLOCKI. Mr. Chairman, I might say to the gentleman from Kansas (Mr. SKUBITZ) that he has made a very good case, and we fully understand his sincerity. But the present legislation and the provisions of this bill tighten the controls. I am sure the gentleman must agree on that basis that it does.

Mr. FRENZEL. Mr. Chairman, in regards to the much discussed antiboycott provisions of the bill, we all realize the insidious effects of boycotts. I agree that the United States must strengthen its commitment to opposing foreign boycotts against nations which are friendly to us. Hopefully, the provisions of this bill will be an effective means of preventing intentional compliance with a boycott without harming the position of U.S. companies in the international markets. Also, since this bill preempts State laws, it will restore some order to this field.

Mr. Chairman, due to the widespread interest in the antiboycott provisions of the Export Administration Act, the main provisions relating to the administration of export controls have been getting little attention. I regard these provisions as a vast improvement over present export administration policies and procedures, and support the bill's immediate passage.

I believe that the improvements in the present export licensing process and in export control criteria are a welcome reversal in procedures and standards which have crept into the law, and into regulations, over the past several years. Congress has in the past unwisely set up obstacles to export expansion which have reduced the ability of U.S. companies to compete abroad and have limited the number of export-related jobs created in the United States.

This bill improves the export licensing process, which currently causes numerous, often unnecessary and unexplained delays. All applications not acted upon within 90 days will be considered approved unless more time is specifically determined to be necessary and this determination is explained to the applicant by the Department of Commerce. In addition, all license denials will have to be fully justified on a statutory basis to the applicant.

Another major improvement is a shift in the criteria for controlling exports for reasons of national security. The Secretaries of Commerce and Defense are directed to no longer focus these controls solely on Communist nations, but rather on all nations, based on each nation's relationship to the United States, and, to a greater extent than at present, on the commodity or technology being exported. The bill specifically states that goods which are freely available from other countries should not be subject to U.S. export controls except for overriding national security reasons.

The Secretary of Commerce is to review and improve the present export administration policies and procedures, particularly in terms of simplifying export control standards. Further efforts are being made to improve export administration by requesting additional studies by the Department of Commerce, including an indepth analysis of the administration of multilateral export technological information on national controls carried out by COCOM, a monitoring of the effects of exchanges of security and foreign policy, and an evaluation of the effects of authorized technology exports on the international trading position of the United States and on the U.S. economy. Hopefully, these studies will lead to further improvements in this area over the next several years.

One additional point worth mentioning is the additional assistance which will be given to agricultural exports by allowing foreign purchases of U.S. agricultural products to be stored in the United States without being subject to subsequently imposed "short supply" limits. Any such Presidentially imposed limits will be subject to possible congressional review and veto.

Mr. Chairman, I support this bill as an enormous improvement over existing law, and I urge that it be promptly passed.

Mr. BADILLO. Mr. Chairman, I rise in support of H.R. 5840, the Export Ad-

ministration Act amendments which will once and for all declare publicly that the United States will have no part in a disgraceful, exclusionary and discriminatory boycott against Israel, our firmest friend in the Middle East.

This bill, which will prohibit American firms and persons from complying with any boycott imposed by any country, will also have the force of law by providing penalties, including the suspension and revocation of export authority for anyone who violates these provisions. The bill bars Americans from refraining to do business with a boycotted country; refraining from employing or otherwise discriminating against any American citizen regardless of race, religion, sex, or national origin; furnishing to foreign countries the religion, sex, race, or national origin of any person; and other provision which will make our position quite clear, and leave no loopholes for American businessmen and corporations to sneak through.

The antiboycott policy we have right now has not worked in dealing with the Arab countries. Arab demands have increased, the pressure has gotten heavier, and American firms have capitulated to that pressure in increasing numbers. The bill is written so that American businesses will not suffer, but is also written so that our country's reputation will not suffer either from being in the embarrassing position of stating one thing in our policy and doing another thing in our laws.

Recently I led a fight in this Chamber to have strong human rights language added to our multinational lending institutions authorization. The argument I used at that time in favor of strong human rights language is the same argument that is relevant to this antiboycott legislation. One of the cornerstones of our democratic philosophy is that all people are equal—that we cannot as a country, discriminate against any citizen. We have spent many years honing our laws and perfecting those mechanisms that will prohibit discrimination. Under those circumstances, how can we as a nation speak boldly about human rights, and at the same time countenance bigotry in other nations' policies, simply for economic gain or political expediency.

This legislation is good. It not only reinforces our country's commitment to human rights and freedom, but also reaffirms our awareness of the role that Israel plays in bringing those freedoms to the Middle East. I cannot urge my colleagues too strongly to add their support to mine for the passage of this fine piece of legislation.

Mr. WIRTH. Mr. Chairman, I rise in strong support of the antiboycott provisions of H.R. 5840, the Export Administration Act Amendments.

Until this time, American policy concerning foreign boycotts did not have the force of law. The Export Administration Act stated that the United States was opposed to participation in these boycotts on the part of American businesses, but compliance with the act was totally voluntary. While the boycott was in its infant stages, this policy was acceptable. But since the escalation of oil prices, and the resulting increases in the buying power of participating countries, it has become clear that stronger measures are necessary.

The amendments we are considering today are very strong measures. We are not attempting to interfere in the internal affairs of other nations; in fact, special mention is made in the legislation of local laws and the need to honor them. What we are concerned about are secondary boycotts, which affect the conduct of business in the United States.

There is a broad base of support for this legislation. I was pleased to receive a copy of a joint statement of principles from the Business Roundtable and the Anti-Defamation League of B'nai B'rith concerning the boycott, outlining their many areas of agreement. Both groups recognized the sovereign right of other nations to regulate their own commerce. And, more importantly, both agreed that the boycott of Israel was affecting business among American companies, and therefore required regulation. Mr. Speaker, I ask unanimous consent that the joint statement appear at this point in the RECORD.

Similarly, Secretary of State Cyrus Vance when testifying on legislative proposals last month, reaffirmed the administration's commitment to the enactment of this type of legislation.

Mr. Chairman, I hope that our action here today will receive wide support in the American business community. By giving official American policy regarding the participation in secondary boycotts the force of law, we are providing a concrete and readily discernible basis for refusal to comply in the future. And I know we all share a sense of repugnance at the acquiescence in a scheme that runs contrary to our traditions and our ideals.

AD HOC COMMITTEE OF ANTI-DEFAMATION LEAGUE OF B'NAI B'RITH AND THE BUSINESS ROUNDTABLE—JOINT STATEMENT OF PRINCIPLES RE FOREIGN BOYCOTT LEGISLATION

INTRODUCTION

Increasing concern has been developing as to the extent to which Arab Boycott policies are affecting the traditional freedom of American citizens, residents and enterprises to determine, without external compulsion, the persons with which, and the localities where, they do business.

A number of federal and State laws currently exist to protect American citizens and residents in their freedom to make business decisions. These laws, however, vary in their application and effectiveness and only deal in part with the specific problem. For this reason we feel it appropriate that there be uniformity of applicable law to deal with the complex issues inherent in international boycotts which are fostered by foreign governments. In addition to protecting American citizens and residents from discrimination and economic compulsion, any such laws, to be effective, must also recognize the fundamental principle of international law that a foreign country may regulate and restrict its trade and access with other countries for political and economic reasons and may determine how business is to be conducted within its territories in its own national interest. Similarly, there is no principle requiring the United States or any other country to cooperate or assist in regulations or restrictions which are inimical to its fundamental ethical principles or deemed contrary to its national interest.

PRINCIPLES

We believe that the following principles should guide any legislation in this area:

(1) No U.S. person may discriminate against a U.S. individual on the basis of that individual's race, religion, sex, or ethnic or national origin in order to comply with, further or support a foreign boycott.

(2) No U.S. person may furnish information with regard to or reflective of a U.S. individual's race, religion, sex, ethnic or national origin, or presence or absence on a blacklist for the use of a foreign country, its nationals, or residents in order to comply with, further or support a foreign boycott.

(3) No U.S. person may refrain from doing business with or in a foreign country, or with its nationals or residents pursuant to an agreement with another foreign country, its nationals or residents in order to comply with, further or support a foreign boycott.

(4) No U.S. person may refrain from doing business with any other U.S. person pursuant to an agreement with a foreign country, its nationals or residents in order to comply with, further or support a foreign boycott.

For purposes of (3) and (4) above, an agreement need not be in writing and may be implied by a course of conduct.

Agreements which have the prohibited effect on a U.S. person would be violations of applicable law irrespective of where such agreements are entered into.

Any such legislation should not, however, prevent a U.S. person from: (a) complying or agreeing to comply with the laws or regulations of a foreign country (i) prohibiting import of goods from, or produced by a national or resident of, another country, (ii) prohibiting shipment of goods by a carrier of another foreign country or by a route other than as specified by such country or its nationals or residents, (iii) dealing with import and shipping document requirements of such country regarding country of origin, name of carrier, route of shipment and name of supplier except that no information furnished in response to such requirements should be stated in negative, blacklisting or similar exclusionary terms, (iv) dealing with export requirements of such country relating to shipment or transshipment of goods from such country to any other country, its nationals or residents; (b) dealing with immigration or passport requirements of such country provided that information furnished in response to such requirements should not be furnished in a manner which is in conflict with principles (1) and (2) of this statement; or (c) complying with a unilateral selection by a foreign country, or any national or resident (including a U.S. person) thereof of one or more specific persons to be involved in one or more distinct aspects of a transaction, including a seller, manufacturer, subcontractor, insurer, carrier, financial institution or freight forwarder. In order to ensure the continued efficacy of international commercial letters of credit, such legislation should not provide a legal right for any person to demand and enforce payment under a commercial letter of credit other than on the basis of compliance with its terms.

The provisions of the foregoing paragraph are not designed to violate the intent of the principles set forth in paragraphs (1) through (4) of this statement, but they are intended to protect a U.S. person against prosecution under the legislation as a result of such person's observance of the laws and regulations of a foreign country with respect to such person's activity directed to or within such country or a unilateral and specific selection of a supplier of goods or services. Such provisions should not, however, be formulated so as to permit a U.S. person, if a bank, insurance carrier, freight agent or other

export service organization, to act as a conduit for information which would not be permissible if furnished directly.

Subject to the foregoing, any legislation should apply to U.S. nationals and residents and to domestic corporations. Legislation should also apply to foreign corporations to the extent of their activities within the U.S. and to any foreign subsidiary of any domestic company which is 50% or more owned by such domestic company with respect to its activities which affect the foreign trade of the U.S. The legislation should not apply, however, so as to require any U.S. person to contravene the laws, regulations or official policy of a foreign country with respect to such person's activities within such country. In no event should a U.S. person utilize any foreign person, whether or not affiliated with such U.S. person, to evade the application of the legislation to the import or export of goods or services into or from the U.S.

It is appropriate that the American public, as well as the Congress and concerned agencies of the U.S. Government, be informed as to requests affecting the freedom of choice of U.S. persons, provided the identity of reporting persons is not publicly disclosed except where there is a violation of the law. Therefore, reporting of boycott requests should be required, but only to the extent necessary for effective enforcement of legislation and to inform our government of the actions of foreign governments affecting U.S. persons.

The legislation, in order to establish uniform rules relating to foreign commerce, should preempt state laws concerning the acts or transactions governed by the legislation.

The legislation should provide a reasonable period of transition to allow for adjustment of existing practices.

Mrs. COLLINS of Illinois. Mr. Chairman, I rise today to urge my colleagues to vote in favor of H.R. 5840, the Export Administration Act amendments. This bill reflects long hours of hard study and intense discussion by the Committee on International Relations of which I am a member.

In addition to the significant steps this bill takes toward terminating possible American business compliance with the Arab boycott, it also further clarifies and details the policies and procedures of the Export Administration Act.

I feel particularly strong about section 118 of title I which calls for a study of the economic impact of industrial technology exports from the United States whose export requires a license under the Export Administration Act.

I sponsored this amendment in committee because many experts believe that the technological lead American industry enjoyed following World War II is being eaten away by Japanese and Western European industrial gains made through American technological exports. Such changes could have a deleterious effect on the future competitiveness of American-based industry and American jobs.

I believe that it is time this problem was carefully studied so that appropriate action may be taken if found necessary. Section 118 provides for such a study.

To reiterate, I urge all of my fellow Members to support enactment of H.R. 5840 and would like to commend to their attention section 118 of title I.

Mr. WAXMAN. Mr. Chairman, it is with some measure of reluctance that I wish to express support for this legislation, the Export Administration Act Amendments of 1977. More than 2 years ago, many of us in the Congress renewed an effort to pass a law which makes compliance with the Arab boycott illegal. We nearly succeeded. Although such a bill, H.R. 15377, passed both the House and Senate last year, the appointment of conferees was filibustered in the other body on orders of then-President Ford. The legislation died in the waning hours of the last Congress. In response to this performance, Jimmy Carter in his second debate with Gerald Ford on October 6, 1976, stated that the administration's efforts to block this legislation were disgraceful. He pledged support for the strongest possible antiboycott legislation. He dismissed the contentions of those who claimed these provisions would jeopardize trade with the Arab League nations by saying:

It is not a matter of diplomacy in trade with me. It's a matter of morality.

I therefore anticipated and fully expected, based on the record of the campaign, that the President would support the compromise agreement on the antiboycott legislation which was reached by the House and Senate conferees last autumn. Instead, and in apparent response to the powerful lobbying efforts of the Business Roundtable, the oil companies, and our arms manufacturers, the administration has worked to weaken that compromise. The effect has been to create a series of loopholes in this bill which may yet allow, unless the most diligent enforcement is undertaken, continued compliance by American business with some of the Arab boycott's discriminatory demands. I am particularly concerned with two provisions. The first is the exception provided for unilateral selection. Under this amendment, an American firm could comply with a boycotting country's selection of subcontractors and products unless the American firm has actual knowledge that the sole purpose of such designation is to implement the boycott.

I am seriously concerned that under the guise of normal business procedures, discriminatory demands against U.S. firms can continue to be imposed. Indeed, business as usual in the Middle East in the past has been marked by the Arab League's designation of certain American companies and products for exclusion from trade opportunities. The burden established under this amendment for an American firm to resist these demands may well be too stringent to prevent the continuation of the boycott.

Second, this legislation permits the President to waive the requirements of the bill for U.S. citizens in Arab League countries, if these requirements are incompatible with local law. In other words, if an Arab League country prohibited the importation of boycotted goods, U.S. nationals in that country would be similarly constrained if the President granted this waiver. The Presidential waiver, therefore, could easily be used to allow our citizens in these countries to continue to act as agents of the Arab League in enforcing their boycott. It is precisely this situation which the legislation seeks to terminate as far as businesses in the United States are concerned, and I very strongly regret that this may be allowed to continue overseas.

I am also disturbed that important sectors of the business community have chosen to work for the defeat of this legislation. They have seriously misread the principles which must guide our international economic relationships. They are prepared to sacrifice other, less powerful American businesses who may not wish to succumb to these pressures in their scramble for Arab oil money.

The United States has consistently supported a policy which this legislation seeks at last to write into law. More than 10 years ago, the Congress explicitly stated in an amendment to this same law that it is the policy of the United States to oppose restrictive trade practices and foreign-imposed boycotts and to refuse to take any action which encouraged these activities.

The Congress enunciated this policy, because it clearly recognized that the existence of boycotts, such as the Arab boycott, are repugnant to many of our basic values. The Arab boycott in particular not only works to erode the operation of a free market, but also systematically denies any of our citizens basic protections against discrimination.

Responsibility for implementing this clear policy direction was given to the Department of Commerce. Since 1965, however, its record has been one of acquiescence to and encouragement of the Arab boycott in the United States. On September 7, 1976, the Commerce Subcommittee on Oversight and Investigations, of which I am a member, released its report, "The Arab Boycott and American Business." This study—the most comprehensive review ever of the boycott's impact on the United States—is a damning indictment of the Commerce Department's response to the boycott. Our report documented—

That for more than a decade, the Commerce Department circulated trade offerings from Arab League countries which contained boycott demands;

That for more than a decade, the Commerce Department formally advised American exporters that they were not prohibited from complying with the boycotts' demands;

That since 1965, the Department refused to require American firms to report whether or not they had complied with the boycott; and

That until December 1975, banks, freight forwarders, and insurers were excluded from even the Department's minimal boycott regulations.

These policies had the direct and significant effect of greatly expanding the impact of the Arab boycott on our economy. More than 1,500 American corporations are currently blacklisted by the Arab League. In 1974 and 1975 alone, more than $4.5 billion in goods were sub-

ject to boycott restrictions. More than 90 percent of all trade agreements with the Arab League are currently in compliance with the boycott's provisions. Almost all the letters of credit issued by banks in order to underwrite exports to the Arab League contain discriminatory demands.

It is, therefore, painfully apparent that instead of promoting policies which would work to limit the boycott's effect on the United States, the Department of Commerce consistently subverted and obstructed the implementation of our Nation's antiboycott policy.

What is also clear is that all these trends have been accelerated in response to the shift of economic and political power to the OPEC nations since the 1973 quadrupling of oil prices.

In effect, the boycott has driven a wedge into the American business community, separating those who are prepared to comply with the boycott's demands in order to enjoy the growing trading opportunities with the Arab League from those who would reject its demands, because of their discriminatory and anticompetitive nature.

Only by making compliance with the boycott illegal can the American business community and the American people be protected against its pernicious influence. Only by removing the boycott as a condition of trade with the Arab League can there be removed the competitive advantage secured by complying with it.

The heart of this issue is whether the United States will allow itself to be blackmailed—politically and economically—as a condition of furthering our relationships within the Arab world. By passing this amendment, we will be making it clear that there are basic principles which must be respected, and which must form the framework of future ties.

I believe the mutual desire for each other's goods and services will overcome any potential this legislation might have to jeopardize our trade with the Arab world. Even today, the boycott is suspended for firms whose products are needed in the OPEC countries—precisely because it is more to their advantage to ignore it than enforce it. By prohibiting compliance with the boycott, we can only encourage this trend.

Mr. Chairman, if the policy of the Congress had been enforced a decade ago, we would not now be confronted with the dilemma posed by the boycott, nor would we need this legislation today.

Therefore, Mr. Chairman, even though I do have some reservations over this legislation, I believe its merits—particularly its explicit prohibitions against complying with the secondary and tertiary aspects of the boycott—outweigh its serious deficiencies. I very much hope the House conferees will not permit any further weakening of this legislation, and that those interested Members will continue to work with me to insure the effective implementation of this legislation once it is enacted.

I also wish to attach, for the further consideration of my colleagues, my additional views to our subcommittee's report, "The Arab Boycott and American Business":

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS, REPORT, "THE ARAB BOYCOTT AND AMERICAN BUSINESS"

ADDITIONAL VIEWS OF REPRESENTATIVES HENRY A. WAXMAN, JOHN E. MOSS, ANTHONY TOBY MOFFETT, JAMES H. SCHEUER, RICHARD OTTINGER, ANDREW MAGUIRE

The subcommittee's report, "The Arab Boycott and American Business," is the most comprehensive congressional review of the nature, scope, and impact of the Arab boycott on the United States since anti-boycott provisions were added to the Export Administration Act in 1965.

The subcommittee's investigation has opened the wall of secrecy which has surrounded much of the Arab boycott. The barest outlines of the scope of the boycott, and its gross economic impact on the United States, are now available. Billions of dollars in trade have been subjected to the boycott's discriminatory trade practices. But strikingly absent from this report—and obscured even today by Commerce Department policies—is the answer to the question of how many businesses have changed their business practices in order to comply with the boycott's restrictions and have in effect become tools in the Arab's economic warfare against the State of Israel. Specifically: To what extent have businesses agreed to terminate their direct relationships with Israel in order to obtain contracts in the Arab world? To what extent have businesses agreed to refuse to deal with other American companies which have relationships with or are otherwise sympathetic to Israel? These questions remain unanswered because the Commerce Department has refused to prohibit compliance with these so-called secondary and tertiary aspects of the Arab boycott—even though there is a greater awareness of these activities, and even though their frequency and intensity is growing, and not diminishing.

Despite this inevitable shortcoming, this report is a damning chronicle of evasion and subversion by several administrations and, to a lesser extent, by the business community of the clear Congressional mandate opposing boycotts and restrictive trade practices. At the same time, this report repeatedly emphasizes that the profound issues raised by the Arab boycott—legal, political, economic, moral—remain unresolved to this day. It is our hope that this document will serve as a major impetus toward the passage of legislation which would at last prohibit business in the United States from complying with the Arab boycott.

Such a desire surely embraces the spirit of the law. As the Export Administration Act unequivocally states,

"It is the policy of the United States (A) to oppose restrictive trade practices or boycotts fostered or imposed by foreign countries * * * and (B) to encourage and request domestic concerns engaged in * * * export * * * to refuse to take any action, including the furnishing of information or the signing of agreements, which has the effect of furthering or supporting the restrictive trade practices or boycotts * * *"

The Congress' meaning in establishing this policy in 1965 was clear. It reflected the judgment that compliance with the Arab boycott was repugnant to cherished American principles regarding freedom from discrimination and the operation of a free market. It sought to assure that this Nation would not compromise its basic values in the search for expanded trade opportunities throughout the world.

Nevertheless, the subcommittee's report has documented that the Department of Commerce, which was charged with enforcing this mandate, consistently undermined this policy to the extent that, over the years, the Arab boycott has been allowed to proceed with the full acquiescence and indeed the tacit encouragement of the U.S. Government. In particular:

For more than ten years, the Commerce Department's reporting forms of boycott requests explicitly stated that U.S. exporters are "not legally prohibited from taking any action" in support of the Arab boycott. Such a statement represented a clear signal to all U.S. exporters that compliance with the boycott carried no sanctions whatsoever.

Again, for more than ten years, the Commerce Department circulated to American businesses notices of trade opportunities which contained boycott demands. The Commerce Department circulates such notices in order to encourage trade with other countries. By promoting trade opportunities which were contingent upon compliance with the boycott, however, the Commerce Department played an active, and central, role in promoting the Arab boycott in the United States.

Although the Export Administration Act requires all boycott requests, including the furnishing of information or the signing of agreements, to be reported to the Commerce Department, for over ten years the Department chose not to require U.S. exporters to report whether or not they had complied with such requests—even though the Department had the clear statutory authority to compel such information. Such a policy prevented the Department and anyone else from ascertaining the boycott's scope and its impact on the American economy.

Although the operations of banks, freight forwarders, and insurance companies are essential components of all export transactions, it was not until December 1975 that the Department's boycott regulations were broadened to encompass these concerns. For over a decade, in other words, letters of credit, insurance policies, and transportation arrangements for billions of dollars in exports were not subject to even minimal antiboycott requirements.

A distressingly clear pattern of passivity to, promotion of, and disinterest in enforcing the antiboycott policy of the United States by the Department of Commerce over a ten-year period is therefore plainly evident. Indeed, the four policies which are mentioned above were terminated only after vigorous initiatives were undertaken by members of this Subcommittee, and others in the Congress, with former Commerce Secretary Rogers Morton.

Even then, our efforts were vigorously rebuffed at first. In order to effectively ascertain the nature, scope, and impact of the Arab boycott on the United States, this Subcommittee subpoenaed from the Commerce Department boycott requests which exporters received from Arab League countries—and which were required by law to be reported to the Department. For months, this Subcommittee was forced into contesting an unfounded claim of statutory privilege which Secretary Morton sought to exercise over these reports, which this Subcommittee urgently needed if it were to fulfill its oversight responsibilities. Renowned scholars came before the Subcommittee and testified that Secretary Morton's position had no legal basis whatsoever under the statutes he cited or the Constitution.

But more importantly, Commerce Secretary Rogers Morton's four-month refusal to provide documents was consistent with the Administration's decade-long policy of acquiescence in and promotion of the Arab boycott. As the Subcommittee's report shows, the subpoenaed materials reveal that the Department exercised virtually no control over attempts by the Arab League to enforce boycott provisions against American business—although it had both the Congressional policy mandate and the statutory authority to implement it. Rather than correct these shortcomings over time, the Department failed to take any remedial steps.

We are forced to conclude that Secretary Morton's refusal for five months to comply with the Subcommittee's subpoena for Arab boycott information was nothing less than an attempt to cover up the Department's grave abdication of its responsibilities under the Export Administration Act.

There is therefore no question in our minds, after reviewing the entire record which the Subcommittee has developed, that the Commerce Department, with the approval of the highest levels of several Administrations, obstructed over a ten-year period the effective implementation of the antiboycott provisions of the Export Administration Act as expressed by both the Congress and by successive Presidents and Secretaries of State. Second, in that the Commerce Department has failed to move against the secondary and tertiary aspects of the Arab boycott, it may be fairly stated that such an obstruction is continuing unto this day.

This is, in our judgment, a matter of the most serious concern to the Congress and the American people.

The business community has exhibited an ambivalent response to the competing pressures which the existence of the boycott evokes. On the one hand, the pressure to comply with the boycott is enormous. The records indicate that upwards of 90 percent of all transactions subject to boycott demands were ultimately in compliance with them. Only in 2-3 percent of all cases has the boycott been deliberately evaded. Nevertheless, in coordination with the American Jewish Congress, more than two dozen corporations have publicly pledged to refrain from complying with the boycott.

On the other hand, in the absence of an express prohibition of compliance with the Arab boycott, and in the presence of government policies which actively encourage compliance with it in order to improve our balance-of-payments with the Arab oil-producing states, noncompliance with the boycott can only place those who adhere to such a policy at a competitive disadvantage. As Federal Reserve Chairman Arthur Burns has stated.

"The time has come for the Congress to determine whether it is meaningful or sufficient merely to "encourage and request" U.S. banks not to give effect to the boycott. It is unjust, I believe, to expect some banks to suffer competitive penalties for responding affirmatively to the spirit of U.S. policy, while others profit by ignoring this policy. This inequity can be cured if Congress will act decisively on this subject." (Letter to Rep. Benjamin Rosenthal, June 3, 1976.)

This dilemma, however, extends beyond the choices faced by the business community. The Subcommittee's report documents that at least $4.5 billion in trade with the Arab League in 1974 and 1975—and probably much more—has been held hostage to the Arab boycott. The Subcommittee staff further indicates that nearly half if not more of all trade with the Arab League—involving billions more—is currently being subject to boycott demands. It is clear that despite the increased attention which has been focused on the boycott, its influence appears to be growing and not diminishing.

The higher level of scrutiny has also revealed that the boycott is not monolithic or impermeable; rather, it has consistently been applied in an arbitrary and capricious manner. Ostensibly, the boycott's blacklist contains those firms who have contributed to Israel's economic growth or have an affiliation with another blacklisted firm. Since 1948, the Chase Manhattan Bank has served as Israel's agent in handling government bonds in the United States. General Electric supplies the Israeli Air Force with jet engines for the Kfir aircraft—Israel's first military jet. Despite the crucial role these two corporations play in Israel's economic and military security, both firms are not blacklisted and do extensive business in the Arab world. TWA, Myles Laboratories, and IBM are among the firms which do substantial amounts of business with both Israel and the Arab nations. Moreover, experience since the Arab oil embargo has been that obeisance to restrictive trade practices neither ensures improved trade relationships nor guarantees immunity from further economic reprisals. France, which went to extraordinary lengths to accommodate OPEC demands after the Yom Kippur War, has not had as great an increase in trade with the OPEC nations as the Netherlands and West Germany, which pointedly refused to alter their relationship with Israel.

It is therefore apparent that these corporations and countries, and others like them, are able to operate in such a manner precisely because their services are as indispensable to Arab needs as they are to Israel.

Therein, we believe, lies the key to breaking the Arab boycott's influence on our economy and society. American goods and services are the most sought after in the world. We currently account for 18 percent of all world trade. The Arab nations, who so desperately want to develop their societies, are increasingly relying on American resources. The United States now accounts for 40 percent of the additional trade which the OPEC nations have undertaken since the quadrupling of oil prices in 1973. This relationship, instead of being characterized by discriminatory demands that are alien to our traditions and law, should instead dictate that, as a condition of its continuance, no such demands will be tolerated.

It remains that compliance with the Arab boycott is still not prohibited by law. We therefore urge that the Export Administration Act be amended to prohibit all agreements to refrain from doing business (1) with a foreign country friendly to the United States, and (2) with a company or supplier boycotted by a foreign concern, thereby furthering a foreign-imposed boycott or restrictive trade practice. We also urge the Congress to amend the Export Administration Act to prohibit business from furnishing the information the Arab League uses to enforce its boycott demands. Both of these recommendations are contained in the Subcommittee's report.

Whether the Congress will finally declare these practices illegal is another facet of the long-standing debate over whether the conduct of our foreign policy—in which economic relationships are the substructure—will be consistent with our ideals. It does little good—indeed it does much harm—to voice opposition to the boycott while winking at compliance with its demands. Both our credibility and our true intentions are called into question. Rather than mortgage our principles—both domestically and in our support for the State of Israel—it is time that we exercise the leverage and suasion we command in the Persian Gulf. Rather than succumb to discriminatory demands imposed by foreign governments against American citizens, it is time this Nation repudiate them once and for all.

This is our hope, and the policy to which we are committed.

HENRY A. WAXMAN.
JOHN E. MOSS.
ANTHONY TOBY MOFFETT.
JAMES H. SCHEUER.
RICHARD OTTINGER.
ANDREW MAGUIRE.

Mr. DRINAN. Mr. Chairman, I am pleased to rise in support of H.R. 5840 which would extend the Export Administration Act through September 30, 1979, and bring to an end American complicity in the insidious Arab economic boycott of Israel. Our Nation's policy of opposing restrictive trade practices is established by statute. The repugnance of an economic boycott directed against one of our stanchest allies is much greater when it results in widespread discrimination within the American business community. As the committee notes in its report:

> This type of boycott is clearly against the spirit and intent of U.S. law, including the civil rights and equal opportunity laws and the antitrust laws.

It is the Arab boycott's pervasive and discriminatory impact within the United States which makes the enactment of H.R. 5840 so essential.

We have all seen the excellent report on American boycott compliance issued by the Interstate and Foreign Commerce Subcommittee on Oversight and Investigations last September. That report indicated that American firms were acquiescing to boycott demands in more than 90 percent of all cases. As a result, more than 1,500 American companies appearing on the Arab blacklist are unable to do business with Arab countries or with other American firms which have agreed to comply with the regulations of the Arab Boycott Office. Such regulations prohibit an exporter from doing business with a blacklisted firm.

Thus, American firms desiring to do business with the Arab states are presently faced with the unpleasant choice of succumbing to discriminatory demands or suffering a loss of business to other American companies. A uniform ban on compliance with boycott demands would end this dilemma and place all firms on an equal competitive footing in seeking business in the Middle East and elsewhere.

Title II of the legislation before us today constitutes a fair and practical solution to the intolerable situation we confront today with regard to boycott compliance. The bill would prohibit most forms of compliance with boycott demands, including the furnishing of information and the refusal to do business with Israel or with American companies blacklisted by the Arab League. Stringent civil and criminal penalties are authorized to be imposed for violations of these provisions.

I am pleased to note that this antiboycott title, carefully worked out by Congressmen ROSENTHAL and BINGHAM, and other members of the International Relations Committee, incorporates to a great extent the provisions of H.R. 5913 which I introduced in April 1975 along with 28 cosponsors in the House. That bill, like the one before us today, prohibited boycott compliance and established tough penalties for violations. One significant characteristic of H.R. 5913 contained in the bill before us is the inclusion of foreign subsidiaries and affiliates of domestic firms within its scope. Thus, American firms will not be able to evade the provisions of the act by channeling their Arab business through subsidiary firms.

I would be remiss if I did not mention my objections to some of the exceptions placed in the antiboycott section at the urging of the Business roundtable. The most important of these is the so-called unilateral selection exception. This pro-

vision permits Arab contractors to continue to specify the names of acceptable subcontractors to their American suppliers, even if such specification is based on discriminatory criteria. While this exception is disallowed if the American firm knows that the sole purpose of the designation is to implement the boycott, I fear that it may constitute a serious loophole for effective antiboycott enforcement.

I also question the wisdom of permitting the President to waive noncompliance requirements based on circumstances brought to his attention by a particular firm. I am certain that President Carter, who strongly opposes American compliance with the Arab boycott, will not abuse that provision. But its presence offers boycott participants another potential avenue of escaping the requirements imposed by this legislation.

On balance, however, H.R. 5840 is a strong antiboycott bill which I can enthusiastically support. I am hopeful that we will pass this bill by an overwhelming margin this afternoon to encourage the House conferees to hold fast to the provisions of H.R. 5840 in conference.

Mr. BRODHEAD. Mr. Chairman, I rise in strong support of title II of the Export Administration Act Amendments of 1977. This title will prohibit American citizens and companies from intentionally and knowingly complying with secondary or tertiary boycotts. Existing policy and current law have been totally ineffective in combating the Arab boycott of Israel. Since 1965, when the U.S. antiboycott went into effect, Arab pressure on American business to comply with the boycott has steadily increased. Today the Arab blacklist includes more than 1,500 American firms and individuals. Discrimination against American Jews and blatant violation of American policy as enunciated in the Export Administration Act are widespread. American firms have complied with the Arab boycott against Israeli companies and individuals, and with boycotts against other American companies that have such associations or are Jewish-owned or managed. Many American banks have honored letters of credit from Arab nations that specify compliance with Arab boycott regulations.

The Arab boycott of Israel is inimical to American principles of free trade and fair play as well as to freedom of religion and freedom of association. It is high time that Congress acted on this matter. We should firmly establish the principle in this country. The United States must end its acquiescence in the discriminatory practices of the Arab nations. We must stand up for what we know is right. Mr. Chairman, I urge my colleagues to join me in supporting the antiboycott provisions of this legislation.

Mr. RYAN. Mr. Chairman, as a member of the House International Relations Committee, and a participant in the drafting of the amended version of the legislation which is before us today, I want to make a few clarifying remarks with respect to title II of this bill. I realize that all the Members are not as close to this bill as are members of the committee, and they are not aware of the way in which this bill developed. It is a result of intense negotiations among the committee members who have sought to incorporate the views of various interested groups into a legislative package which would prohibit certain actions and at the same time continue our U.S. export activities.

I have asked, as early as the first hearings before the International Relations Committee: "What will be the economic impact of this bill?" I have still not received a satisfactory answer to this very basic issue. We do not know whether the impact on jobs and business will be severe or slight. Accordingly, I urge the Commerce Department to monitor the impact of this legislation and advise us immediately if it has an unexpected negative economic result.

Yesterday, for the first time, I was told some supporters of the bill believe it will help employment. At best, that statement is misleading and to date unsubstantiated. To the contrary, an American corporation today, April 20, is canceling a $10 million contract with a Middle Eastern country because it is apprehensive it will be impossible to draw upon a letter of credit without violating the provisions of section 4A(a)(1)(E). This bill has yet to become law and it is already having a chilling effect upon our exporting community. We would be naive and foolish to think that this legislation will create jobs.

While I fervently believe that U.S. persons, either individuals or corporations, who intentionally refrain from doing business in compliance or furtherance of a foreign boycott, should be prosecuted—I do not think unnecessary and burdensome litigation should result just to clarify the meaning of this legislation. There is a significant lack of precise language in this bill providing U.S. exporters with a clear understanding of what they can and cannot do. Because of this, I believe that the litigation from this bill may be staggering. With this possibility in mind, I hope the conferees will make every effort to incorporate precise language in their report.

This brings me to another point. I am somewhat concerned that the legislative history of this bill is not as clear as it should be. Before markup of the bill in the International Relations Committee, there were several meetings of an ad hoc group of committee members which proposed substantive suggestions later adopted at the formal markup session as a substitute amendment for title II. While I participated in these frank and very constructive discussions, nonetheless I am bothered by the fact that these meetings were not on the record.

Because the legislative development of this bill is not readily apparent, I want to make a few clarifying comments about certain specific sections of the bill.

The committee bill makes it unlawful to willfully take, or agree to take, specified actions to comply with, further, or support certain boycotts. The committee report, at page 5, states that the purpose of title II is to prohibit U.S. citizens from "intentionally or knowingly" complying with certain secondary or tertiary boycott requirements. It is my understanding that regulations issued by the Department of Commerce are to prohibit intentional compliance with a foreign boycott against a country friendly to the United States, which itself is not the object of a boycott under U.S. law. What this means is that the regulations are to provide a requirement that a corporation or individual will not be presumed guilty of an offense under this legislation based upon ministerial or administrative error or mistake.

This is an offense new to general law and we want to make it clear that a culpable state of mind is a necessary element. That is to say, penalties should be imposed only when the individual or corporation intentionally or knowingly engages in a course of conduct to further the boycott.

Section 4A(a)(1)(G) makes it unlawful to pay or otherwise implement a letter of credit containing a prohibited condition or requirement. The report states that this provision is not intended to preclude detailed examination of the letter's provisions to establish whether it contains a prohibited condition. It is my understanding that if the letter of credit does contain such a prohibited requirement, the U.S. exporter could be informed by the bank, and given the opportunity to take appropriate corrective action to negotiate the unlawful provisions out of the letter of credit and there would be no violation of this section.

The reporting requirements of section 4A(b) of the bill are intended to remove many of the unnecessary reporting requirements under existing law in order to lessen the paperwork burden of reporting by U.S. exporters and processing by the Department of Commerce. The Department of Commerce will have to revise its reporting procedures in view of this bill and require reports only where they are necsesary and serve a useful information purposes. For example, I do not think it is useful to require more than one report for any transaction as in the case of reporting each order of an installment contract separately. In these types of situations, one report should be enough to keep us informed.

I support this bill, and urge immediate enactment because delay only increases the confusion and uncertainty in our exporting community. In doing so, however, we must be prepared to take corrective action if this legislation has unintended consequences. Finally, I support this bill because I abhor the use of an economic boycott by any country as a weapon, especially when such a boycott impinges not only on our foreign trade but on our domestic trade between American firms conducting business in the United States.

Mr. ZABLOCKI. Mr. Chairman, I have no further requests for time, and I yield back the remainder of my time.

The CHAIRMAN. All time has expired. Pursuant to the rule, the Clerk will now read the bill by title.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Export Administration Amendments of 1977".

Mr. ROSENTHAL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think it is appropriate that someone respond to the remarks of the gentleman from Illinois, because I think there are legitimate questions raised. The intensity of his argument and the emotion of his feelings obviously show that he is concerned about this title of the bill. The gentleman from Illinois is the same Member of the House, if I am correct, who circulated or made available the two-page ad that appeared in the Wall Street Journal last week. The ad was paid for by Dresser Industries. Dresser Industries, one of the Fortune 500 companies, is primarily engaged in the manufacture of mining and drilling equipment; it has a large position in the Middle East. In that ad, Dresser cited a Professor Robinson who estimated that if this bill were passed, if this legislation became law, some 500,000 American jobs would be put in jeopardy.

That statement hardly deserves comment because it is an absurdity on its face. Professor Robinson apparently assumes that every contract or deal in the Arab world would terminate immediately upon the passage of this legislation.

That is fantastic.

I think that there are four logical reasons why there will be minimal, if any, disruptions in our trade. In the first instance, the Arabs have shown themselves, and I say it respectfully, to be pragmatists in past business dealings. They have secondarily acquiesced to U.S. law in the past, specifically the November 1975, Executive order outlawing compliance with discriminatory religious and racial requests. Third the Arab businessmen with whom I have spoken dislike the boycott, since it restricts their activities with many large American firms. Fourth, many European countries are also resisting compliance with boycott and some may well follow the American lead.

Professor Robinson also uses highly distorted figures of the Arab trade at risk. Civilian sales to Saudi Arabia last year, according to the Commerce Department, were $2.7 billion, not the $4 billion he claims. Civilian service contracts amounted to $750 million last year. Robinson uses the figure of $16 billion, which must represent every contract ever entered into or even contemplated.

Robinson also includes military contracts of $9 billion. These contracts have always been concluded in complete disregard of the Arab's own boycott laws. In other words, the very same military supplies from companies that do business with Israel also are readily accepted in the Arab countries. Second, most of these are concluded by the U.S. Government, which does not honor the boycott requests.

The interesting fact is that passage of this legislation could even create jobs, because many of the firms which have resisted business opportunities in Israel, once this law is passed and, hopefully, once there is some kind of amelioration within the Arab countries, those very companies could increase their trade in Israel. Moreover, there are presently 1,500, many of them large American corporations, such as RCA and Xerox, that are on the Arab blacklist; once this legislation becomes law and there is, hopefully, a change in attitude, those companies will have an opportunity to do business in Arab States.

Another comment that the very distinguished gentleman from Illinois makes is that the gentleman sees the vote on this bill as being a vote for or against Israel. I do not see it that way at all. It is a vote for or against fundamental American principles. The fact of the matter is, I say to my friend, the gentleman from Illinois, that this boycott has very little impact in Israel, very little impact. Surely the primary boycott has some effect; but the secondary and tertiary boycotts have such a minimal effect. They have had an effect on some highly sophisticated technological trade and some electronics equipment; but what has occurred is that foreign nationals for the first time in 200 years have been able to tell American companies who they can do business with. It is an outrageous, offensive kind of thing.

The Congress said in 1965 that we should stop this and we all sat back and hopefully waited for the regulations from the Commerce Department to put an end to this.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. ROSENTHAL was allowed to proceed for an additional 5 minutes.)

Mr. ROSENTHAL. Finally, Mr. Chairman, in 1976 the Congress said, "Look, we have lived with this situation for 11 years. Now we are going to have to pass implementing legislation." That is the need for this. It is no longer a concern of what effect it has extraterritorily, but it is a concern for how American business is conducted. What has happened is that American bank, insurance companies and trading firms have become the enforcers of the boycott and we have foreign nationals with the use of advocacy and letters of credit telling American firms with whom they can do business. I would hope we can all almost unanimously support this legislation, if not totally unanimously, because there is not one of us in this Chamber who wants to permit foreign nationals to tell Americans with whom they can do business. If we accept that principle, which is grounded not only in morality, but found in American tradition, if we accept that, then the rest of the world will follow suit.

I believe, and I have had many, many conversations with distinguished Arab leaders, that they would like to get rid of this boycott, if they can find a graceful way to do it, I believe that the secondary and tertiary boycott have proved to be a dud. It has proved to be a very, very ineffective weapon in the economic warfare against Israel.

So, I would urge not only the gentleman from Illinois, but everyone in the Chamber, to stand firm for American principles. Nobody wants to reduce any jobs. My judgment is that there will be a minimal, if any, disruption. The fact of the matter may well be that if these 1,500 American companies and individuals that have been excluded are afforded the opportunity for entering into the Arab markets, the net effect could be an increase in American production and in American jobs.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I would like to associate myself with the gentleman's remarks and say that I think it has been proved that there is no better foundation for good and profitable business than a just and equitable marketplace. I think that is what this bill seeks to do.

Mr. ROSENTHAL. I thank the gentlewoman.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, I have a letter, which I know my colleague has seen, signed by a Mr. Irving Shapiro, who apparently is chairman of the Business Round Table, concerning the joint statement that was made by his group and the B'nai B'rith. In this letter, which was addressed to the President, he says:

> I am dismayed that recent developments in the Congressional consideration of pending anti-boycott bills reveal an almost consistent disregard of positions originally advanced by the Administration and compatible with the Joint Statement, in favor of the adoption of excessively restrictive and unrealistic standards. I am firmly convinced that many of the provisions, as they presently stand, will severely hinder American interests, both in the Mid-East and at home, while having no beneficial impact upon the restrictive trade practices the laws are supposed to attack.

What are my colleague's comments on this letter?

Mr. ROSENTHAL. Let me respond to that. Mr. Shapiro, who is chairman of the board and chief officer of E. I. du Pont de Nemours, deserves a lot of credit for bringing together the Round Table and the Anti-Defamation League. They worked very hard and achieved a statement of principles. The Business Round Table, I think, is composed of over 150 of the chief executive officers of major Fortune 500 companies.

They accomplished a great deal. Each side had very, very distinguished lawyers. They agreed on 90 to 95 percent of the provisions of this bill. When lawyers get together, there have to be some areas of disagreement. There was disagreement among us, but we did reach an agreement. We reached an agreement with the administration. The administration supports this legislation as it stands now.

As the gentleman knows, we can argue for years, ad nauseum. We can always find another lawyer who finds a new loophope or another exception. I can tell the gentleman that the Business Round Table is to be commended for their forthright approach to this legislation, but

there had to be some areas of disagreement.

Mr. KAZEN. If the gentleman will yield further, the only thing is that this actually is a very strong, strong indictment of what we are fixing to pass here, when he says that in his opinion it will hinder American interests.

Mr. RYAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, members of the commitee, this is probably the most—I do not know whether the word "peculiar" is appropriate—piece of legislation I have come across in a good many years. I say peculiar respectfully, because it is an effort to do something which is almost impossible to do.

I am reminded of the comment made by a colleague of mine some years ago, who said of a very difficult effort that it was like trying to nail jello to a tree.

I think of that in connection with this, because we are trying to do a particular kind of thing which, legislatively, is almost impossible to do. We are trying to reduce or to harness a religious prejudice which has existed for almost 2,000 years between the Arab world and the Jewish world. The Arab world today, in varying countries within the Arab world, encourages, supports, and uses a boycott based upon religion to pursue business matters on an international basis.

This legislation, then, is an effort to combat that kind of rotten prejudice that still exists in the world as it relates to the United States.

It becomes more difficult, when we consider the more we try to oppose it here in the Congress and restrict the flow of free trade—and this bill does make an attempt to restrict the flow of free trade, based upon certain conditions—the more we attempt to restrict that in this country, the more we force the Arabs to deal with other countries, such as West Germany, Japan, and other manufacturing nations who are intensely competitive today with the United States.

The result is that we have a bill here which attempts to clear up legislation already on the books and which has produced some severe problems for the international business community, and, consequently, for tens of thousands of people in this country whose jobs rely on the acceptance or rejection of a particular contract.

What happens is this: Company A says, "I am about to sign a contract with 'X' Arab country for $17 million."

"X" Arab country is ready to complete the contract. Now the company president goes to the bank and says, "May I borrow $70 million on the strength of this proposed contract?" And the corporate counsel of the bank may then say, "Well, that is possible, except for one thing. If we become the principal on this particular contract, we are liable to have trouble with the State of California or the State of New York, whose attorney general says, 'You may be in violation of the State law that affects antiboycott legislation.' "

At this point, the corporate counsel of the bank says, "I do not think we should loan the money."

At this point, the man who had the contract says, "It is too late now to try to renegotiate with another bank because the West Germans picked it up for the same price and the United States has lost that many jobs, that much revenue, that much work."

That particular situation actually did happen. It happened to a businessman of my acquaintance in San Francisco. He is concerned about it, and so am I.

Then should we get rid of the antiboycott legislation? Of course not.

How do we work it out? We try to make it better than it was. That is where the problem lies. We spent several weeks in the Committee on International Relations, trying to work out these various problems which exist. They involve the Carter administration. They involve those who protect, I believe, the more Jewish viewpoint of the Anti-defamation League, of the Businessmen's Round Table. They involve other elements. They involve the State chamber of commerce in California. They involve persons who object to some of these amendments but who have no objection to the idea of the bill and who have no objection to the idea of creating antiboycott legislation to resist the kind of prejudice which exists in the Arab world.

The CHAIRMAN. The time of the gentleman from California (Mr. RYAN) has expired.

(By unanimous consent, Mr. RYAN was allowed to proceed for 4 additional minutes.)

Mr. RYAN. Mr. Chairman, let me give the Members an example. In the beginning of the title, it refers to the intent to comply with the boycott. The question is: Does the company and the officers thereof intend to comply? What is willful? We have tried to add to that and make that more clear. The committee bill now makes it unlawful to willfully take or agree to take specified actions to comply with further or support certain Arab boycotts.

Our committee report at page 5 states that the purpose of title II is to prohibit U.S. citizens from "intentionally or knowingly" complying with certain secondary or tertiary boycott requirements. I wanted the word, "willfully," and we fought over that. I lost on that one, but it is at least more clear now with the compromise words.

It is my understanding that the regulations issued by the President are to prohibit intentional compliance with a foreign boycott against a country friendly to the United States, which is not a boycott under the U.S. law. What this means is that the regulations are to provide a requirement that a corporation or an individual will not be presumed guilty of an offense under this legislation based upon ministerial or administrative error or mistake.

In other words, the language simply says, "From now on you aren't presumed guilty until they prove you are." That is an extremely important point in this legislation. There are other matters of this kind that are part of this legislation and that constitute at the present time the makeup of the bill.

Mr. Chairman, let me make one more point about the present condition of this bill, because it is different in nature from most pieces of legislation that come through here. We will not find too many Members who actually oppose the bill itself totally. I think that has been obvious here today. More importantly, how this bill moves out of this House is extremely important because the Senate version is different. I cannot think of a bill in recent memory that has passed through this House and through the conference committee that revolves more around how it comes out of the House. In that regard, that factor has more effect upon the ultimate effect of this legislation, because unless there is some kind of tenuous balance struck this year through this bill, we will not have legislation which is vital to the interests of both sides, represented in this legislative battle here on the floor.

It is my feeling that this bill is probably in as good a shape as it possibly can be as it comes out of this House. There has been a great deal of work done on it by many distinguished colleagues of different persuasions concerning the matter as far as policy is concerned.

So, Mr. Chairman, I think the best alternative here today is for us to vote for this legislation on the floor, recognizing its flaws, because unless this legislation does pass in the form it is in now, or close to it, all those elements involved in the dialog here today and that are represented here today will lose and lose substantially by not having a bill passed. For that reason I support the legislation as presently written.

Mr. MICHEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in order to make an inquiry of the gentleman from New York (Mr. ROSENTHAL). The gentleman mentioned blacklisting.

One of the concerns I have with this legislation is that section 4A, subtitle (a)(1)(E) would prohibit American companies from furnishing information on their own business relationships. As the section is written, there is a prohibition which will make it practically impossible for any American company to have its name removed from an Arab blacklist, in my judgment.

Let me give the Members an example. Sears, Roebuck & Co. is on the blacklist because some Arab bureaucrat had the mistaken impression that a British company, Sears Holding, Ltd., was in some way affiliated with Sears, Roebuck. Sears, as far as I know, has no department stores located in the Middle East. If, however, it were to try to open stores in Arab countries, it would first have to have its name taken off the blacklist.

This bill would make that impossible because it outlaws giving Arab boycott offices any information concerning a business relationship with Sears Holding, Ltd.

Why should Sears not be able to state that? Why should Sears not be able to open a store in Saudi Arabia, for example? How does this help Israel or anybody else? The prohibition hurts the United States. It prevents job opportunities from being created.

We can use Caterpillar Tractor again to show how this provision can be car-

ried to extremes. The U.S. Government has officially endorsed the OECD declaration and guideliness for multinational corporations which, among other things, calls for greatly increased disclosure of information about the extent of the MNC's transnational activities. In response to this Caterpillar now lists all of its overseas subsidiaries and affiliates in its annual report. Carried to its logical extreme this legislation could prevent Caterpillar—and other companies who have been asked by the United States to support the OECD guidelines—from distributing this kind of general information to Arab customers, since it reveals the extent of our business relationships in other nations and the absence of any direct business relationship with Israel. Do we want to go to that extreme?

Mr. ROSENTHAL. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York, but before doing so I would like to pose several additional questions to which I would appreciate an elaborated response, if nothing else, but in his extension of remarks.

I believe they do deserve answers.

I have a question about the grace period provided in this bill: It states that rules and regulations issued pursuant to H.R. 5840 will become effective 120 days after enactment. I believe we can do ourselves all a favor by taking an approach similar, in this respect, to that taken by the Senate bill, S. 69. That bill provides for proposed rules and regulations to be issued within the next few months, and for there to be a subsequent 120-day period during which public comment would presumably be permitted. This is an extremely complex issue, full of implications for Americans of all persuasions. It seems to me that we should not then impose new rules and regulations without first determining whether they actually do what this legislation calls for. I would like your view or the chairman's, on whether you would be willing to accept this Senate proposal that the public be allowed to comment on these rules and regulations before they take effect?

And a related question is this: H.R. 5840 provides that this legislation shall not affect contracts in existence prior to March 1. But the bill will not be signed and rules and regulations written until several months from now. This leaves contractors in an unworkable situation. Contracts dated after March 1 are subject to the legislation, but they have no guidelines on how to conduct their business. What should they do?

I think we need to clarify the intent of this legislation regarding the brand X tire problem. We know that Caterpillar has once had a delivery refused in Libya because the machine included a black listed component—a Motorola alternator. If next week Caterpillar receives an order from a Libyan buyer which requests that the alternator be produced by Delco-Remy several questions arise: First, can Caterpillar comply with that request, and fill the order, without running afoul of this law? Second, is Caterpillar deemed, by virtue of its past experience, to have "actual knowledge" that this is a boycott-related request? Third, must Caterpillar inquire of the buyer why he has requested the Delco-Remy part, to determine whether it is a boycott-related request? And fourth, if Caterpillar knows—or surmises—that the request is boycott-related, how is the company to determine whether its "sole purpose is to implement the boycott"?

The provisions in H.R. 5840 relating to compliance with local laws are another prime example of the deficiencies and the illusory nature of some of the compromises that are embodied in this bill. The bill allows a U.S. person resident in another country to get a Presidential exemption relieving him of any liability if he complies with a local law that conflicts with H.R. 5840. But what the bill gives, the report takes away by making it extremely difficult to obtain a Presidential waiver. The report says:

> Waivers should be granted as narrowly as feasible and only after both private and diplomatic efforts have been made to remove objectionable provisions.

What is the practical application of this? Are we telling our oil companies and our construction companies, and others who have U.S. personnel working in the Arab world that they must disobey local law in order to comply with this provision of H.R. 5840? It sounds to me like we are. We provide an escape through a Presidential waiver mechanism that is so tight as to be practically useless. Equally important, what Arab project would wait for the U.S. bureaucracy to grind out such waivers, when they could instead turn to our foreign competitors who are aggressively seeking Arab contracts. Is this not just another poorly disguised attempt to impose an embargo on American business in the Arab world?

Let us take the problem one step farther. In another back door attempt to eliminate the effectiveness of this local law compliance exception, the committee report restricts its application to U.S. persons resident in the boycotting country. Suppose that 16 months from now U.S. law, under this bill, prohibits provision of negative certificates of origin. And suppose that an Iraqi buyer proposes to buy a Caterpillar tractor produced in France and asks for certification that the goods are not made in Israel. The French plant manager, of a French corporation, which happens to be a subsidiary of an American corporation is faced with a quandry. Should he comply with the laws of his own country which allow him to provide the negative certification? This would guarantee the sale and be consonant with French trade policy which strives to maximize trade with the Arab world. Or, must he comply with H.R. 5840, which as now written would prohibit providing that negative certification? My question is this: How can our American corporations maintain their welcome in foreign nations when we in Washington tell them that they should ignore local law and let Washington call the shots? I think it is an untenable position for them to be in; and for us to advocate. And I would like to hear the indignation that would arise from this House of Congress if another country tried to dictate the behavior of its companies' subsidiaries in the United States.

Mr. ROSENTHAL. Mr. Chairman, I think the gentleman has elucidated a classic example of the type of problems American companies have had with these boycotts. The fact is that Sears is on the blacklist because to some Arab official it appeared to be affiliated with a company that had a name similar to Sears. Sears, of course, never could understand why its name appeared on the blacklist.

However, the furnishing of information aids and abets the boycotters and the blacklisters. There is not just 1 blacklist; there are as many as 21 blacklists. They are supposed to be coordinated from Damascus, but every single Arab country has its own blacklist. What develops is that in each country there is a cottage industry, and American companies are offered the inducement to buy their way off the blacklists. As individuals or as companies, they are offered the opportunity of buying their way off a blacklist.

Therefore, the committee, in its wisdom, felt that we ought not to continue to permit American companies to furnish any inormation because the furnishing of information is, in itself, honoring the blacklist.

It is similar to saying to someone who wants to rob you, "Tell me in advance or give me an affidavit as to how much money you have and then I will make a decision whether you should be robbed or not."

This is one of the ways in which blacklisting can be prevented, by saying that American firms cannot furnish information as to compliance with the boycott.

Mr. MICHEL. Mr. Chairman, may I say this to the gentlemen from New York (Mr. ROSENTHAL): Ford Motor Co., I believe, is on the blacklist. Ford recently sold one of its divisions to another American company that is not on the blacklist. This division now has the opportunity to sell its products to the Arab markets, but this bill could prevent that from happening; is that not true?

Mr. ROSENTHAL. No, I do not think so.

Mr. MICHEL. How does the gentleman reac' it?

Mr. ROSENTHAL. If the company is independent of Ford, there is no problem whatsoever.

The fact of the matter is that the Arabs do business with many companies such as Hilton Hotels or Hughes Aircraft, which also do business with Israel.

Mr. MICHEL. However, the gentleman would prohibit Ford from giving them any information which spells out the new kind of conditions that prevail.

Mr. ROSENTHAL. The United States of America cannot allow some foreign bureaucratic blacklist office to decide what American companies can be certified for doing business in another part of the world. It simply is an intolerable situation. That kind of conduct aids and abets the boycott and must be terminated.

If we can prevent that information from being disseminated, this boycott will collapse of its own weight.

Mr. MICHEL. I do not see how anyone is ever going to clear that sort of thing up if we are preventing American business and industry from submitting the kind of information they have to clear themselves.

Mr. ROSENTHAL. May I say to the gentleman that the Arabs will not ask for that kind of information once they know it is against American law for companies to furnish the information. They could not enforce the boycott after that.

This is a simple, elementary way to end the enforcement of the boycott.

Let me tell the gentleman a little story. We had a hearing last year of the subcommittee that I chair, the Government Operations Subcommittee on Commerce, Consumer and Monetary Affairs in which an officer of Morgan Guaranty Bank testified that they refused to honor 25 letters of credit.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. MICHEL) has expired.

(On request of Mr. ROSENTHAL and by unanimous consent, Mr. MICHEL was allowed to proceed for 4 additional minutes.)

Mr. ROSENTHAL. Mr. Chairman, will the gentleman yield further?

Mr. MICHEL. I yield to the gentleman from New York.

Mr. ROSENTHAL. To continue, Mr. Chairman, they were requested to honor 25 letters of credit that would have required the furnishing of information about religious affiliation. Morgan Guaranty, to their credit, said:

No, we are not going to do it. We are simply not going to honor these letters of credit.

They sent the letters back to the Arab importers. When they returned, that information request had been stricken from 24 of the 25 letters.

In other words, once an American firm resisted compliance with the boycott, then the boycott people themselves withdrew their boycott requests.

That is exactly what is going to happen after this legislation becomes law.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York.

Mr. BINGHAM. Mr. Chairman, my colleague, the gentleman from New York (Mr. ROSENTHAL), I think has covered the situation very admirably. However, let me point out that in the agreement that was reached between the Business roundtable and the Anti-Defamation League, in which there is now some question about some aspects of it, on this point that agreement is absolutely clear. This was included among those principles that should guide the legislation, according to the Business roundtable.

It said: "No U.S. person may furnish information with regard to or which is reflected by the U.S. individual's presence or absence from a blacklist for the use of a foreign country, its nationals," and so on.

In other words, the basic principle that the gentleman from New York (Mr. ROSENTHAL) has just outlined was very clearly contained in the Business roundtable agreement.

Mr. MICHEL. Mr. Chairman, let me go on to another area and pose several questions if, for no other reason, than to establish legislative history.

With respect to unilateral selection, I think that if we discuss that, we ought to look at the views expressed by the parties primarily interested in the administration's position as expressed in Secretary Vance's letter to Chairman ZABLOCKI, which is that an American company should be allowed to comply with the unilateral and specific selection by a boycotting country or national or resident thereof without regard to the purpose underlying the request.

The position of the ADL-Roundtable statement of principles is that—

Legislation should not, however, prevent a U.S. person from complying with the unilateral selection by a foreign country or any national or resident, including a U.S. person thereof, or one or more specific persons to be involved in one or more aspects of a transaction, including a seller, manufacturer, subcontractor, insurer, carrier, financial institution, or freight forwarder.

Would the gentleman explain to me this anomaly: The Carter administration's proposed language of unilateral selection makes no reference to the reason for the unilateral selection, resulting, presumably, in the view that this is just a foreign policy application of the legislation.

The ADL roundtable makes no reference to the reason. This compromise was agreed to by the Jewish lobbying organizations that have pushed the hardest for the legislation as I understand. Yet the legislation requires American organizations to inquire into the motives of their Arab customers. Why are we going further in the legislation, as we are, than what those special interest groups were really calling for?

Mr. BINGHAM. If the gentleman will yield for a moment, no, the provision we have here is the result of the compromise. It is the kind of a situation which is, frankly, a very difficult one. Just before the gentleman from Illinois raised his question I was in private discussion with another Member who said that the provision we have here would be impossible to use against any company because it would require knowledge that this was the sole reason for the specification.

What we have done here is to try to cut somewhere between a total loophole which would allow the specification of the components, even though the manufacturer knew that the reason for the specification was connected with the boycott, on the one hand, or, on the other hand, not allowing any specification of components at all because that would open up a loophole.

In other words, this provision was worked out with the representatives in the White House. It does represent a compromise and both sides are going to criticize it.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE I—EXPORT ADMINISTRATION IMPROVEMENTS AND EXTENSION

EXTENSION OF EXPORT ADMINISTRATION ACT

SEC. 101. Section 14 of the Export Administration Act of 1969 is amended by striking out "September 30, 1976" and inserting in lieu thereof "September 30, 1979".

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. The Export Administration Act of 1969 is amended by inserting after section 12 the following new section 13 and redesignating existing sections 13 and 14 as sections 14 and 15, respectively:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 13. (a) Notwithstanding any other provision of law, no appropriation shall be made under any law to the Department of Commerce for expenses to carry out the purposes of this Act for any fiscal year commencing on or after October 1, 1977, unless previously and specifically authorized by legislation.

"(b) There is hereby authorized to be appropriated to the Department of Commerce $14,033,000 (and such additional amounts as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs) for fiscal year 1978 and 1979 to carry out the purposes of this Act.".

CONTROL OF EXPORTS FOR NATIONAL SECURITY PURPOSES; FOREIGN AVAILABILITY

SEC. 103. (a) Section 4(b) of the Export Administration Act of 1969 is amended—

(1) by striking out the third sentence of paragraph (1);

(2) by striking out paragraphs (2) through (4); and

(3) by inserting the following new paragraph (2) immediately after paragraph (1):

"(2)(A) In administering export controls for national security purposes as prescribed in section 3(2)(C) of this Act, United States policy toward individual countries shall not be determined exclusively on the basis of a country's Communist or non-Communist status but shall take into account such factors as the country's present and potential relationship to the United States, its present and potential relationship to countries friendly or hostile to the United States, its ability and willingness to control retransfers of United States exports in accordance with United States policy, and such other factors as the President may deem appropriate. The President shall periodically review United States policy toward individual countries to determine whether such policy is appropriate in light of the factors specified in the preceding sentence. The results of such review, together with the justification for United States policy in light of such factors, shall be reported to Congress not later than December 31, 1978, in the semiannual report of the Secretary of Commerce required by section 10 of this Act, and in every second such report thereafter.

"(B) Rules and regulations under this subsection may provide for denial of any request or application for authority to export articles, materials, or supplies, including technical data or any other information, from the United States, its territories and possessions, to any nation or combination of nations threatening the national security of the United States if the President determines that their export would prove detrimental to the national security of the United States. The President shall not impose export controls for national security purposes on the export from the United States of articles, materials, or supplies, including technical data or other information, which he determines are available without restriction from sources outside the United States in significant quantities and comparable in quality to those produced in the United States, unless the President determines that adequate evidence has been presented to him demonstrating that the absence of such controls would prove detrimental to the national security of the United States. The nature of such evidence shall be included in the semiannual report required by section 10 of this Act. Where, in accordance with this paragraph, export controls are imposed for national security purposes notwithstanding foreign availa-

bility, the President shall take steps to initiate negotiations with the governments of the appropriate foreign countries for the purpose of eliminating such availability.".

(b)(1) Section 4(h) of the Export Administration Act of 1969 is amended by striking out "controlled country" in the first sentence of paragraph (1) and in the second sentence of paragraph (2) and inserting in lieu thereof "country to which exports are controlled for national security purposes".

(2) Section 4(h)(2(A) of such Act is amended by striking out "controlled" and inserting in lieu thereof "such".

(3) Section 4(h)(4) of such Act is amended—

(A) by inserting "and" at the end of subparagraph (A); and

(B) by striking out the semicolon at the end of subparagraph (B) thereof and all that follows the semicolon and inserting in lieu thereof a period.

(4) The amendments made by this subsection shall become effective upon the expiration of ninety days after the receipt by the Congress of the first report required by the amendment made by subsection (a)(3) of this section.

(c) Section 4(h) of such Act is amended—

(1) in paragraph (1)—

(A) in the first sentence by striking out "significantly increase the military capability of such country" and inserting in lieu thereof "make a significant contribution to the military potential of such country"; and

(B) in the second sentence by striking out "significantly increase the military capability of such country" and inserting in lieu thereof "make a significant contribution, which would prove detrimental to the national security of the United States, to the military potential of such such country"; and

(2) in paragraph (2)(A), by striking out "significantly increase the military capability of such country" and inserting in lieu thereof "make a significant contribution, which would prove detrimental to the national security of the United States, to the military potential of such country or any other country".

(d) Section 6(b) of such Act is amended by striking out "Communist-dominated nation" and inserting in lieu thereof "country to which exports are restricted for national security or foreign policy purposes".

EXEMPTION FOR CERTAIN AGRICULTURAL COMMODITIES FROM CERTAIN EXPORT LIMITATIONS

SEC. 104. Section 4(f) of the Export Administration Act of 1969 is amended—

(1) by redesignating such section as section 4(f)(1); and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) Upon approval of the Secretary of Commerce, in consultation with the Secretary of Agriculture, agricultural commodities purchased by or for use in a foreign country may remain in the United States for export at a later date free from any quantitative limitations on export which may be imposed pursuant to section 3(2)(A) of this Act subsequent to such approval. The Secretary of Commerce may only grant such approval if he receives adequate assurance and, in conjunction with the Secretary of Agriculture, finds that such commodities will eventually be exported and that storage of such commodities in the United States will not unduly limit the space available for storage of domestically owned commodities.

"(B) The Secretary of Commerce shall grant or deny approval under subparagraph (A) within 30 days after receiving an application for such approval. Unless the Secretary denies approval within 30 days, approval shall be deemed to be granted and the applicant shall be notified that approval has been granted.

"(C) The Secretary of Commerce is authorized to issue such rules and regulations as may be necessary to implement this paragraph.".

CONGRESSIONAL REVIEW OF EXPORT CONTROLS ON AGRICULTURAL COMMODITIES

SEC. 105. Section 4(f) of the Export Administration Act of 1969, as amended by section 104 of this Act, is further amended by adding at the end thereof the following new paragraph:

"(3) If the authority conferred by this section is exercised to prohibit or curtail the exportation of any agricultural commodity in order to effectuate the policies set forth in clause (B) of paragraph (2) of section 3 of this Act, the President shall immediately report such prohibition or curtailment to the Congress, setting forth the reasons therefor in detail. If the Congress, within 30 days after the date of its receipt of such report, adopts a concurrent resolution disapproving such prohibition or curtailment, then such prohibition or curtailment shall cease to be effective with the adoption of such resolution. In the computation of such 30-day period, there shall be excluded the days on which either House is not in session because of an adjournment of more than 3 days to a day certain or because of an adjournment of the Congress sine die.".

PERIOD FOR ACTION ON EXPORT LICENSE APPLICATIONS

SEC. 106. Section 4(g) of the Export Administration Act of 1969 is amended to read as follows:

"(g)(1) It is the intent of Congress that any export license application required under this Act shall be approved or disapproved within 90 days of its receipt. Upon the expiration of the 90-day period beginning on the date of its receipt, any export license application required under this Act which has not been approved or disapproved shall be deemed to be approved and the license shall be issued unless the Secretary of Commerce or other official exercising authority under this Act finds that additional time is required and notifies the applicant in writing of the specific circumstances requiring such additional time and the estimated date when the decision will be made.

"(2)(A) With respect to any export license application not finally approved or disapproved within 90 days of its receipt as provided in paragraph (1) of this subsection, the applicant shall, to the maximum extent consistent with the national security of the United States, be specifically informed in writing of any substantial questions raised and negative considerations or recommendations made by any agency or department of the Government with respect to such license application, and shall be accorded an opportunity to respond to such questions, considerations, or recommendations in writing prior to final approval or disapproval by the Secretary of Commerce or other official exercising authority under this Act. In making such final approval or disapproval, the Secretary of Commerce or other official exercising authority under this Act shall take fully into account the applicant's response.

"(B) Whenever the Secretary determines that it is necessary to refer an export license application to any interagency review process for approval, he shall first, if the applicant so requests, provide the applicant with an opportunity to review any documentation to be submitted to such process for the purpose of describing the export in question, in order to determine whether such documentation accurately describes the proposed export.

"(3) In any denial of an export license application, the applicant shall be informed in writing of the specific statutory basis for such denial.".

EXPORTS OF TECHNICAL INFORMATION

SEC. 107. Section 4 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection:

"(j) The Secretary of Commerce shall conduct a study of the problem of the export, by agreements for scientific or technical cooperation or exchange entered into by any United States person (including any college, university, or other educational institution) and by publications or any other means of public dissemination, of technical data or other information from the United States, the export of which might prove detrimental to the national security or foreign policy of the United States. Not later than 12 months after the enactment of the subsection, the Secretary shall report to the Congress his assessment of the impact of the export of such technical data or other information by such means on the national security and foreign policy of the United States and his recommendations for monitoring such exports without impairing freedom of speech, freedom of press, or the freedom of scientific exchange. Such report may be included in the semiannual report required by section 10 of this Act.".

CERTAIN PETROLEUM EXPORTS

SEC. 108. Section 4 of the Export Administration Act of 1969, as amended by section 107 of this Act, is further amended by adding at the end thereof the following new subsection:

"(k) Petroleum products refined in United States Foreign-Trade Zones, or in the United States Territory of Guam, from foreign crude oil shall be excluded from any quantitative restrictions imposed pursuant to section 3(2)(A) of this Act, except that, if the Secretary of Commerce finds that a product is in short supply, the Secretary of Commerce may issue such rules and regulations as may be necessary to limit exports.".

EXPORT OF HORSES

SEC. 109. Section 4 of the Export Administration Act of 1969, as amended by sections 107 and 108 of this Act, is further amended by adding at the end thereof the following new subsection:

"(l)(1) Notwithstanding any other provision of this Act, no horse may be exported by sea from the United States, its territories and possessions, unless such horse is part of a consignment of horses with respect to which a waiver has been granted under paragraph (2) of this subsection.

"(2) The Secretary of Commerce, in consultation with the Secretary of Agriculture, may issue rules and regulations providing for the granting of waivers permitting the export by sea of a specified consignment of horses, if the Secretary of Commerce, in consultation with the Secretary of Agriculture, determines that no horse in that consignment is being exported for purposes of slaughter.".

TECHNICAL ADVISORY COMMITTEES

SEC. 110. (a) Section 5(c)(1) of the Export Administration Act of 1969 is amended by striking out "two" in the last sentence thereof and inserting in lieu thereof "four".

(b) The second sentence of section 5(c)(2) of such Act is amended to read as follows: "Such committees, where they have expertise in such matters, shall be consulted with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to any articles, materials, and supplies, including technical data or other information, and (D) exports subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.".

(c) Section 5(c)(2) of such Act is further amended by striking out the third sentence and inserting in lieu thereof the following: "The Secretary shall include in each semiannual report required by section 10 of this Act an accounting of the consultations undertaken pursuant to this paragraph, the use made of the advice rendered by the technical advisory committees pursuant to this paragraph, and the contributions of the technical advisory committees to carrying out the policies of this Act.".

PENALTIES FOR VIOLATIONS

SEC. 111. (a) Section 6(a) of the Export Administration Act of 1969 is amended—

(1) in the first sentence, by striking out "$10,000" and inserting in lieu thereof "$25,000"; and

(2) in the second sentence, by striking out "$20,000" and inserting in lieu thereof "$50,000".

(b) Section 6(b) of such Act is amended by striking out "$20,000" and inserting in lieu thereof "$50,000".

(c) Section 6(c) of such Act is amended by striking out "$1,000" and inserting in lieu thereof "$10,000".

(d) Section 6(d) of such Act is amended by adding at the end thereof the following new sentence: "In addition, the payment of any penalty imposed under subsection (c) may be deferred or suspended in whole or in part for a period of time no longer than any probation period (which may exceed one year) that may be imposed upon such person. Such a deferral or suspension shall not operate as a bar to the collection of the penalty in the event that the conditions of the suspension, deferral, or probation are not fulfilled.".

AVAILABILITY OF INFORMATION TO CONGRESS

SEC. 112. (a) Section 7(c) of the Export Administration Act of 1969 is amended by adding at the end thereof the following new sentences: "Nothing in this Act shall be construed as authorizing the withholding of information from Congress, and any information obtained under this Act, including any report or license application required under section 4(b), shall be made available upon request to any committee or subcommittee of Congress of appropriate jurisdiction. No such committee or subcommittee shall disclose any information obtained under this Act which is submitted on a confidential basis unless the full committee determines that the withholding thereof is contrary to the national interest.".

(b) Section 4(c)(1) of such Act is amended by inserting immediately before the period at the end of the last sentence thereof "and in the last two sentences of section 7(c) of this Act".

SIMPLIFICATION OF EXPORT REGULATION; AND LISTS

SEC. 113. Section 7 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection:

"(e) The Secretary of Commerce, in consultation with appropriate United States Government departments and agencies and with appropriate technical advisory committees established under section 5(c), shall review the rules and regulations issued under this Act and the lists of articles, materials, and supplies which are subject to export controls in order to determine how compliance with the provisions of this Act can be facilitated by simplifying such rules and regulations, by simplifying or clarifying such lists, or by any other means. Not later than one year after the enactment of this subsection, the Secretary of Commerce shall report to Congress on the actions taken on the basis of such review to simplify such rules and regulations. Such report may be included in the semiannual report required by section 10 of this Act.".

TERRORISM

SEC. 114. Section 3 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new paragraph:

"(8) It is the policy of the United States to use export controls to encourage other countries to take immediate steps to prevent the use of their territory or resources to aid, encourage, or give sanctuary to those persons involved in directing, supporting, or participating in acts of international terrorism. To achieve this objective, the President shall make every reasonable effort to secure the removal or reduction of such assistance to international terrorists through international cooperation and agreement before resorting to the imposition of export controls.".

SEMIANNUAL REPORTS

SEC. 115. (a) Section 10 of the Export Administration Act of 1969 is amended by adding at the end thereof the following new subsection:

"(c) Each semiannual report shall include an accounting of—

"(1) any organization and procedural changes instituted, any review undertaken, and any means used to keep the business sector of the Nation informed, pursuant to section 4(a) of this Act;

"(2) any changes in the exercise of the authorities of section 4(b) of this Act;

"(3) any delegations of authority under section 4(e) of this Act;

"(4) the disposition of export license applications pursuant to sections 4 (g) and (h) of this Act;

"(5) consultations undertaken with technical advisory committees pursuant to section 5(c) of this Act;

"(6) violations of the provisions of this Act and penalties imposed pursuant to section 6 of this Act; and

"(7) a description of actions taken by the President and the Secretary of Commerce to effect the policies set forth in section 3(5) of this Act.".

(b)(1) The section heading of such section 10 is amended by striking out "QUARTERLY".

(2) Subsection (b) of such section is amended—

(A) by striking out "quarterly" each time it appears; and

(B) by striking out "second" in the first sentence of paragraph (1).

SPECIAL REPORT ON MULTILATERAL EXPORT CONTROLS

SEC. 116. Not later than 12 months after the enactment of this section, the President shall submit to the Congress a special report on multilateral export controls in which the United States participates pursuant to the Export Administration Act of 1969 and pursuant to the Mutual Defense Assistance Control Act of 1951. The purpose of such special report shall be to assess the effectiveness of such multilateral export controls and to formulate specific proposals for increasing the effectiveness of such controls. That special report shall include—

(1) the current list of commodities controlled for export by agreement of the group known as the Coodinating Committee of the Consultative Group (hereafter in this section referred to as the "Committee") and an analysis of the process of reviewing such list and of the changes which result from such review;

(2) data on and analysis of requests for exceptions to such list;

(3) a description and an analysis of the process by which decisions are made by the Committee on whether or not to grant such requests;

(4) an analysis of the uniformity of interpretation and enforcement by the participating countries of the export controls agreed to by the Committee (including controls over the re-export of such commodities from countries not participating in the Committee), and information on each case where such participating countries have acted contrary to the United States interpretation of the policy of the Committee, including United States representations to such countries and the response of such countries;

(5) an analysis of the problem of exports of advanced technology by countries not participating in the Committee, including such exports by subsidiaries or affiliates of United States businesses in such countries;

(6) an analysis of the effectiveness of any procedures employed, in cases in which an exception for a listed commodity is granted by the Committee, to determine whether there has been compliance with any conditions on the use of the excepted commodity which were a basis for the exception; and

(7) detailed recommendations for improving, through formalization or other means, the effectiveness of multilateral export controls, including specific recommendations for the development of more precise cirteria and procedures for collective export decisions and for the development of more detailed and formal enforcement mechanisms to assure more uniform interpretation of and compliance with such criteria, procedures, and decisions by all countries participating in such multilateral export controls.

REVIEW OF UNILATERAL AND MULTILATERAL EXPORT CONTROL LISTS

SEC. 117. The Secretary of Commerce and the Secretary of State, in cooperation with appropriate United States Government departments and agencies and the appropriate technical advisory committees establish pursuant to the Export Administration Act of 1969, shall undertake an investigation to determine whether United States unilateral controls or multilateral controls in which the United States participates should be removed, modified, or added with respect to particular articles, materials, and supplies, including technical data and other information, in order to protect the national security of the United States. Such investigation shall take into account such factors as the availability of such articles, materials, and supplies from other nations and the degree to which the availability of the same from the United States or from any country with which the United States participates in multilateral controls would make a significant contribution to the military potential of any country threatening or potentially threatening the national security of the United States. The results of such investigation shall be reported to the Congress not latter than December 31, 1978.

TECHNOLOGY EXPORT STUDY

SEC. 118. (a) The President, acting through the Secretary of Commerce, the Secretary of Labor, and the International Trade Commission, shall conduct a study of the domestic economic impact of exports from the United States of industrial technology whose export requires a license under the Export Administration Act of 1969. Such study shall include an evaluation of current exporting patterns on the international competitive position of the United States in advanced industrial technology fields and an evaluation of the present and future effect of these exports on domestic employment.

(b) The results of the study conducted pursuant to subsection (a) will be reported to the Congress within one year after the date of enactment of this Act.

Mr. ZABLOCKI (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. SKUBITZ

Mr. SKUBITZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SKUBITZ: Page 8, line 13, strike out "If the Congress," and all that follows through line 21 and insert in lieu thereof the following:

"Any such prohibition or curtailment shall cease to be effective not later than the end of the 30-day period beginning on the date it first becomes effective unless—

"(A) such prohibition or curtailment is modified during such 30-day period, in which case the modified prohibition or curtailment shall cease to be effective not more than 30 days after the end of the original 30-day period;

"(B) such 30-day or 60-day period, as the case may be, ends before the end of the 30-day period beginning on the date the prohibition or curtailment is reported to the Congress (excluding in the computation of such 30-day period any days on which either House of Congress is not in session because of an adjournment sine die), in which case the prohibition or curtailment shall cease to be effective not later than the end of such 30-day period; or

"(C) the Congress adopts a concurrent resolution approving the prohibition or curtailment before such prohibition or curtailment ceases to be effective, except that any subsequent modification of a prohibition or curtailment so approved which results in an increased curtailment of exports shall be deemed a new exercise of authority for purposes of this paragraph and shall be subject to all the requirements and limitations of this paragraph.".

Mr. SKUBITZ (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. SKUBITZ. Mr. Chairman, on page 8 of this bill, H.R. 5840, the committee has dealt with the subject of congressional review of export controls on agricultural commodities. They have offered a new paragraph to section 105, section 4(f) of the Export Administration Act of 1969, which reads, as follows:

(3) If the authority conferred by this section is exercised to prohibit or curtail the exportation of any agricultural commodity in order to effectuate the policies set forth in clause (B) of paragraph (2) of section 3 of this Act, the President shall immediately report such prohibition or curtailment to the Congress, setting forth the reasons therefor in detail.

Mr. Chairman, this sounds like the Congress is to take some action, but then it is followed up with this language:

If the Congress, within 30 days after the date of its receipt of such report, adopts a concurrent resolution disapproving such prohibition or curtailment, then such prohibition or curtailment shall cease to be effective with the adoption of such resolution.

What does that mean? That means that if the President acts, then this body has 30 days to disapprove. But if this Congress does nothing at all, then the prohibition stays in effect.

Mr. Chairman, my amendment is a simple one. As I said before, what I am trying to do is place the monkey on the right person's back, and that is the Congress of the United States. My amendment provides that the President may extend an embargo on agricultural products for 30 days. It goes a step further. If it is modified in any way, then it goes on for another 30 days. But then at the end of that time, the Congress must act affirmatively. It must either approve or disapprove. If it does not approve, then the controls expire.

This strikes me as a much fairer and more appropriate way to deal with the question of agricultural exports. Some of us had our experiences in the past with the export controls that were placed on grain. We had our experiences when they were placed upon soybeans.

Certainly I agree that the President must be free to make foreign policy decisions, but at the same time the exportation of agricultural products is of such great concern to the farmers of this country that the Congress should have the last say as to whether or not these export controls should stay in effect. Therefore, the points of my amendment are very, very simple. Any prohibition or curtailment of agricultural exports shall not be effective more than 30 days, and if the President modifies them for another 30 days, at the close of that time this body, and this body alone, must take affirmative action to keep the controls in effect; otherwise they disappear. Hence, the difference between the provisions in my amendment and this bill is that the bill provides nothing except that it comes back to Congress and Congress can weasel its way out by doing nothing and keeping the controls in effect, whereas my amendment says that Congress must act.

That is what I thought that side of the aisle wanted to do for the past six years. On a number of occasions when I sat on this side, I supported provisions in amendments that were offered on that side giving back to the Congress the authorities that they had given to the executive department, and that is what I want to do here today. I hope my amendment is supported.

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in support of the Skubitz amendment to require congressional approval of any embargo on an agricultural commodity within 30 days of the President's order. Ideally, this legislation would disallow any export controls on agricultural commodities except for extreme national defense demands. In other words, no agricultural embargoes for economic reasons. The language of the gentleman from Kansas advances a step in the right direction. It requires the Congress to ratify Presidential embargo on agricultural products. In the absence of such ratification, the embargo is lifted after 30 days. The only unfortunate aspect of this language is that most damage to farm income caused by an embargo occurs within the first 30 days of its imposition.

The American farmer plays a pivotal role in the economic and social well-being of our Nation and the world. The farmer must have a free market and a fair price for agricultural goods if we plan to maintain our favorable balance of trade and advance toward prosperity at home and abroad.

The farmer has been eager to embrace the concept of a free world market for his commodities instead of a Government-subsidized economy. He has made massive investments in land, machinery, and technology. As a result of this new worldwide thrust in U.S. farm policy, farmers increased total acreage for major crops from 291 million acres in 1969 to 355 million acres in 1976.

In view of the increased Government spending and controls as well as falling productivity in the private sector throughout this same period, there has been incredible achievement in our farm communities.

In return the farmer only asks for fair treatment and unrestricted access to markets both at home and abroad. This amendment would help guarantee the promise of a free market for farm products. It was a mistake to embargo grain exports in the past. It would be a mistake to embargo grain exports in the future.

Allow me to emphasize very briefly the importance of our agricultural exports: In 1976 the U.S. agricultural trade balance totaled $12 billion. Nonagricultural trade, however, accumulated an $8 billion deficit. Our Nation is fortunate that its farmers were able to offset the trade losses in other commodities. With America's greatest trade strength, the farmer, awaiting the outcome of this legislation, I urge Congress to adopt Mr. SKUBITZ' amendment to reduce the damaging impact of agricultural embargoes.

Mr. SEBELIUS. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Kansas.

Mr. SEBELIUS. Mr. Chairman, I wish to associate myself with the remarks of the gentlewoman from Nebraska (Mrs. SMITH) and the gentleman from Kansas (Mr. SKUBITZ).

Mr. ZABLOCKI. Mr. Chairman, I rise reluctantly in opposition to the amendment. I certainly realize and sympathize with the motivation of the gentleman from Kansas. After all, we realize that in the past there were some instances of export controls on some agricultural commodities. The most recent and most serious was the embargo on soybeans in 1973.

Mr. Chairman, there is general agreement that this was a mistake. There is agreement both in the Congress and the executive branch that it was a mistake. But officials are now very, very careful about imposing such export controls. I submit we have a former colleague of ours who is now the Secretary of Agriculture. We know of his deep concern about and his interest in what is in the best interest of our agricultural economy. Can any of us imagine that he would willy-nilly support the imposition of any embargoes?

I submit that our committee has given careful consideration to this problem. We have language in the bill—I refer the gentleman to section 105. I would have to say that his amendment would reverse the veto so that an export control placed on agricultural commodities would have to be lifted after 30 days unless before the end of that period the Congress

passed a concurrent resolution approving the export control. That would have called for a positive action on the part of the Congress.

As I understand the amendment would also permit the President to modify any export control measure during the 30-day period. This would have the effect of extending the control for another 30 days before a positive action would have to be taken.

Under the International Relations Committee language, there could be a concurrent resolution at any time that would protest the embargo. Now given the current reluctance, as I said earlier, of the Secretary of Agriculture Mr. Bergland to approve export controls on farm products, except I might say under extreme circumstances, this amendment is unnecessary. I think it unnecessarily ties the President's hands.

If the Congress does not approve of an export control it can readily pass a resolution of disapproval and I think this is all the protection we need.

Also I might say to the gentleman from Kansas, has he thought this through? This amendment would allow any smart exporter to vitiate the export controls because he could simply withhold his orders for 30 days and then report and file them after the export control is lifted.

And does the farmer thereby gain? Will this really do him, the farmer, a benefit? I would submit that the answer must be "No."

Therefore I would hope that the committee would not accept the gentleman's amendment.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Chairman, there is a lot of difference between the gentleman's language and my amendment. At the end of 30 days we let the action stay in effect in the control, and if the President would see fit to modify it or alter it we would permit another 30 days. But where we really differ is in the bill where it says that the Congress within 30 days after the date must disapprove, now if the Congress sits here and does nothing then the authority stays on. And I have been sitting here too long and watching this body act not to know that this is exactly what is going to happen, and within 30 days we cannot get anything done.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

(By unanimous consent, Mr. ZABLOCKI was allowed to proceed for an additional 2 minutes.)

Mr. ZABLOCKI. Mr. Chairman, I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Chairman, all that my amendment does is simply say that the Congress must act affirmatively and say that it approves what the President is doing. I thought that was what this body was for. I thought it was a body that wanted to regain some of its authority, that wanted to have something to say about the foreign policy of this country. Here is our chance to take that stand.

Mr. ZABLOCKI. Mr. Chairman, I might say to the gentleman from Kansas, I cannot possibly imagine any Member of Congress that is unhappy with an embargo on agricultural exports who would not within 30 days, as a matter of fact, within a week or 10 days, introduce a resolution of disapproval.

I appreciate the gentleman calling it my amendment, but I must be honest. I am not the author of this amendment. I am very happy to associate myself with the intent of this provision.

Therefore, I hope that the gentleman from Kansas will agree that we do not unduly tie the hands of the President with the committee amendment.

I also hope the gentleman from Kansas will understand and reconsider the position on the gentleman's amendment and go along with the committee amendment. In the meantime and until that happens, I urge a "no" vote on the amendment of the gentleman from Kansas.

Mr. FINDLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment. The gentleman from Ohio (Mr. PEASE) offered an amendment to the Export Administration Act in committee, which represents an excellent advance. The Skubitz language is an even more promising advance, and for that reason I support it.

In addition to the comments made by the gentleman from Kansas (Mr. SKUBITZ), which I endorse in support of the amendment, I would like to call attention to the unique similarities between the Skubitz language and the war powers legislation, legislation that I know my good friend, the gentleman from Wisconsin (Mr. ZABLOCKI) supports enthusiastically, just as I do. The War Powers resolution recognizes the need to give the President the opportunity to respond promptly, but for a short-stated period of time to an emergency situation. The Skubitz language will do exactly the same thing. Under the war powers legislation the President could not continue to use military force on foreign territory after the expiration of a short period of time, unless the Congress gave him legislative endorsement for that further involvement.

The same would apply with the Skubitz language and I heartily endorse the Skubitz amendment.

Mr. RONCALIO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Skubitz amendment. I am not a member of the International Relations Committee, but I have been listening for better than 2 hours, with complete interest, to this debate. I find it fascinating; and I support the amendment of the gentleman from Kansas (Mr. SKUBITZ), because I think it is the better procedure. Domestic beef growers have been trying for the past 4 years to get the President of the United States to do something about the importation of agricultural products detrimental to American producers, the importation of beef detrimental to the price of livestock. We have tried in the western States to effect some prices by adjustment of importation quotas which is next to impossible under present procedures.

I would rather see the burden put upon Congress to act, rather than the language of the committee bill. This may not be a very seasoned opinion, but it is my reaction after listening to both sides regarding the Skubitz provision, and the overall complexities of H.R. 5840.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas (Mr. SKUBITZ).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title I?

AMENDMENT OFFERED BY MR. SEBELIUS

Mr. SEBELIUS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SEBELIUS: Page 8 after line 21, insert the following:

"(4)(A) Notwithstanding any provision of law, whenever the President of the United States or any other member of the executive branch of the Federal Government suspends or causes a suspension of export sales of corn, wheat, soybeans, grain sorghum, or cotton, the Secretary of Agriculture shall make payments described in subsection (B) and (C) to any farmowner or operator who has in storage at the beginning of the suspension any amount of the commodity for which export sales have been suspended; except that no such payments may be made with regard to any such commodity unless, at the close of the calendar month preceding the calendar month in which the suspension is initiated, the price received by producers of such commodity was less than the parity price.

"(B) The first payment described in subsection (A) shall become payable at the initiation of the suspension of export sales of the commodity concerned. Such payment shall be made at a rate of 10 per centum of the parity price per bushel or bale of the commodity concerned which was produced by the farm owner or operator and which is held in storage by him at the time of the initiation of the suspension; except that, for each bushel or bale of such commodity held by an owner or operator in excess of twenty thousand bushels, or five hundred bales, the rate of payment shall be 5 per centum of the parity price per bushel or bale of such commodity.

"(C) In addition to the payment described in subsection (B), the Secretary shall make payments to such farm owners or operators for each thirty-day period during which the suspension of the commodity concern is in effect, except that no payment shall be made in addition to the one described in subsection (B) with respect to the first thirty-day period of the suspension. The rate of each such payment shall be 3 per centum of the parity price per bushel or bale of the commidity concerned which was produced by the owner or operator and which is held in storage by him at the beginning of the thirty-day period for which the payment is made; except that, for each bushel or bale of such commodity held by an owner or operator in excess of twenty thousand bushels or five hundred bales, the rate of payment shall be 2 per centum of the parity price per bushel or bale of such commodity."

Mr. SEBELIUS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. ZABLOCKI. Mr. Chairman, I desire to reserve a point of order against the gentleman's amendment.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order against the amendment.

Mr. SEBELIUS. Mr. Chairman, I wish to commend the International Relations Committee for efforts to simplify U.S. policy on export controls and to reduce emphasis upon political ideology as the basis for export controls as opposed to national security. I want to thank Chairman ZABLOCKI for reserving his point of order against this amendment, because I am very much interested in this. I think my chances of having the point of order overruled are like the chances of a hummingbird flying to the planet Mars with the Washington Monument tied to its tail. However, I feel so strongly about this and the need to bring the embargo problem of the farmer to the attention of the Nation.

Mr. Chairman, I am especially interested in title I of the act and specifically in regard to agricultural exports. The act contains the provision that if export controls are placed on agricultural commodities for foreign policy reasons, the President shall justify the controls to Congress and within 30 days of receiving the report, Congress may veto export controls by concurrent resolution.

Mr. Chairman, the purpose of my amendment is to carry the intent of this provision one step further and to provide equity and consideration to the man whose job it is to feed this Nation and to help feed a troubled and hungry world.

If it is in our national interest to suspend agricultural export sales for any number of reasons, and if these suspensions or export controls are punitive and discriminatory to the farmer, then I believe it is also in our national interest to provide the farmer equity. If we are going to embargo the farmer's product in the interest of fighting inflation, conducting foreign affairs or any number of other reasons, social, or economic, we should have to pay for it. That is what my amendment is all about.

This legislation is intended to increase the realization that should future Government intervention in exports occur, there is a price that has to be paid and that price is in truth an investment in our national interest. My amendment would assure the farmer minimum financial protection if Government interference or special interest pressure should cause future disruption in U.S. farm exports.

Should the executive branch of Government deem it in the national interest to suspend export sales of grain, national interest equity payments to farmers who still own their grain would be required.

This initial payment would become payable when export sales of grain and cotton are suspended. The payment would be 10 percent of the parity price per bushel or bale of the commodity concerned. Payments for holdings beyond 20,000 bushels or 500 bales for an individual producer would be reduced to 5 percent.

For each additional 30-day period the suspension is in effect, there would be additional payments in the amount of 3 percent of the parity price per bushel or bale of the commodity withholding in excess of 20,000 bushels or 500 bales at the rate of 2 percent of the parity price per bushel or bale.

I wish to stress that these payments, or investments in our food and fiber production capability, in no way cover the precipitous decline in grain prices that farmers have experienced during Government intervention in grain exports the past few years. However, during this time of fiscal restraint, these equity payments will at least enable the farmer to maintain his economic position during future such suspensions.

Mr. Chairman, in the past the farmer has been told it is in the national interest to maximize food production. He received assurances from the executive branch of our Government of free access to export markets. Despite record production costs, he responded in good faith.

Unfortunately, suspensions of export grain sales disrupted supply and demand marketing, effectively depressed grain prices in some cases below production costs, denied grain producers a fair and equitable price for their product, and imposed additional storage costs on grain producers who cannot market their products without a fair economic return.

I submit to my colleagues that equity payments to the farmer are also in the national interest and in return become investment's in this Nation's ability to fight hunger, stem inflation, provide jobs, improve our balance of payments, pay for foreign oil, and alleviate hunger and malnutrition.

I do not want equity payments. What I really want is for the Government to stop embargoing grain shipments. We have to have this as a tool. I think that all should know and understand that the farmer cannot sit there and hold his grain without being compensated for it. I am asking for equity.

I urge consideration and support for this amendment.

POINT OF ORDER

The CHAIRMAN. Does the gentleman from Wisconsin make a point of order against the amendment?

Mr. ZABLOCKI. Yes, Mr. Chairman.

The CHAIRMAN. I would inquire of the gentleman from Kansas as to whether or not he concedes the point of order.

Mr. SEBELIUS. I stated to the chairman that I felt I should not, because the chance of being sustained is as good as that hummingbird I spoke of going to Mars with the Washington Monument tied to its tail. So, I would just submit the point of order for the Chair to rule upon.

The CHAIRMAN. The gentleman from Wisconsin will state his point of order.

Mr. ZABLOCKI. Mr. Chairman, apparently the amendment the gentleman from Kansas (Mr. SEBELIUS) has presented is a parity amendment pending in the part of the bill before the Agriculture Committee.

Mr. SEBELIUS. That is right.

Mr. ZABLOCKI. It is not germane to section 105, which deals solely with existing authority of the President to limit export controls for foreign policy purposes under the Export Administration Act.

Second, the amendment gives the President new authority where export controls are imposed for new purposes uner a new act.

And, third, this new authority deals solely with domestic matters which are within the jurisdiction of another country.

As I said, it is a parity amendment.

Lastly, this is a farm subsidy issue, not an issue of foreign affairs.

This bill does not deal with agricultural parity, it does not deal with support controls.

Therefore, Mr. Chairman, I submit that the amendment is not in order.

Mr. SEBELIUS. Mr. Chairman, I would like to respond, to this extent: I acknowledge the validity of many of the statements the Chairman has made. To me, personally, and to the farmers of my district, I think this is the time and this is the place.

The CHAIRMAN. The Chair is ready to rule.

H.R. 5840 is a bill to amend the Export Administration Act of 1969 in order to extend the authorities of that act, improve the administration of export controls under that act, and to strengthen the antiboycott provisions of that act.

Section 105 of the bill as amended amends the procedure by which the Secretary of Commerce can notify the Congress of the exercise of authority curtailing exports of agricultural products. It thereafter gives the Congress a certain period of time within which to disapprove if it so chooses.

The amendment offered by the gentleman from Kansas (Mr. SEBELIUS) goes beyond the purview of the title and the section to which offered, in that it would require payments by the Secretary of Agriculture to any farmowner or operator who has in stowage at the beginning of the suspension any amount of the commodity for which export sales have been suspended.

For the reasons stated by the Chair and the reasons given by the gentleman from Wisconsin, the point of order is sustained.

Are there any other amendments to title I of the bill?

AMENDMENT OFFERED BY MR. M'KINNEY

Mr. McKINNEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McKINNEY: Page 12, immediately after line 18, insert the following new section 110 and redesignate existing sections 110 through 118 as sections 111 through 119, respectively:

PROHIBITION OF CERTAIN PETROLEUM EXPORTS

SEC. 110. Section 4 of the Export Administration Act of 1969, as amended by sections 107, 108, and 109 of this Act, is further amended by adding at the end thereof the following new subsection:

"(m) Notwithstanding any other provision of this Act and notwithstanding subsection (u) of section 28 of the Mineral Leasing Act of 1920, no domestically produced crude oil transported by pipeline over rights-of-way granted pursuant to such section 28 (except any such crude oil which (1) is exchanged in similar quantity for convenience or in-

creased efficiency of transportation with persons or the government of an adjacent foreign state, or (2) is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States) may be exported from the United States, its territories and possessions, during the 2-year period beginning on the date of enactment of this subsection.".

Mr. McKINNEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. McKINNEY. Mr. Chairman, on Monday night, President Carter gloomily outlined the imminent perils of our growing energy shortages to the American people. Among the specific goals which the President proposed to ward off the impending national catastrophe was a reduction in foreign oil imports from the present 8 million barrel per day level to 6 million barrels per day by 1985. The President also proposed development of a 1 billion barrel strategic petroleum reserve within the same timeframe, while simultaneously preventing profiteering by big, integrated oil producers.

In contrast to the President's admirable goals, we have before us a bill (H.R. 5840) which, as written, could be used to justify the exportation of 400,000 barrels per day of Alaskan oil. The necessary success of what the President has proposed makes it incumbent upon us to correct such inconsistencies. It would be incomprehensible to expect that the administration and this Congress can convince the American people of severe supply shortages while we simultaneously export nearly a half million barrels of oil per day to Japan. I, for one, Mr. Chairman, cannot tell my constituents on the one hand to button up, pay more and use less while on the other hand we are exporting 400,000 barrels of excess Alaskan crude.

I heartily endorse each of the goals outlined by the President, and the amendment which I offer today will enhance the feasibility of attaining those goals. My measure, which amends section 4 of the Export Administration Act of 1969, essentially provides that no domestically produced crude from Alaska's North Slope shall be exported for 2 years. The amendment will further insure the fulfillment of our specific intent in passing the Trans-Alaska Pipeline Authorization Act—TAPS Act—the domestic distribution of Alaskan oil.

Mr. Chairman, my amendment is the product of 2 years of extensive research in this area. Since my initial contact with FEA, FPC, and the Department of the Interior, I have communicated with industry executives, conferred with agency and department heads and have solicited every responsible viewpoint regarding Alaskan oil distribution. Each new piece of information I receive only strengthens my conviction that exportation of Alaskan oil to Japan is inevitable unless we act to plug the loophole.

In Monday's address the President stated that despite the absence of long gasoline lines "our energy problem is worse tonight than it was in 1973." You may recall, Mr. Chairman, that in 1973, passage of the TAPS Act included a provision which states:

The early development and delivery of oil and gas from Alaska's North Slope to the domestic markets is in the national interest because of growing domestic shortages and increasing dependence upon insecure foreign sources.

Monday night, President Carter emphasized that our continued reliance upon insecure foreign sources represents a serious danger to the economic and political independence of the United States. Clearly, Mr. Chairman, the exportation of Alaskan oil, especially if exchanged for additional OPEC supplies as has been proposed, will perpetuate the dangers to which the President referred, and will increase our dependence upon OPEC by nearly one-half million barrels of oil every day.

The only rationale, as unconvincing as it may be, for an exchange or export agreement with Japan is to provide the North Slope producers with a 50 cent to $1 per barrel savings in transportation costs. Not only are these savings of little significance when considered against the resulting increase of foreign imports, they are also unnecessary, based upon economic findings by the FEA. In a report released last Friday, the FEA presented at least two scenarios which include domestic distribution as well as: An adequate wellhead price for the producer; a price to the refiner which is cost competitive with imports and a cost to energy-starved consumers of the Midwest and Mid-Atlantic States not in excess of present oil prices. These financial scenarios are FEA's own, Mr. Chairman, and are not embellished with my personal interpretation of that report. In fact, I received personal assurances from FEA officials last week that indeed such pricing proposals can be immediately implemented.

We are all concerned with providing more jobs in our struggling industries. Why then should we create more work for the foreign tanker industry by transporting the oil to Japan, while our own merchant tanker fleet suffers through hard times. I have further been assured by top FEA officials that sufficient American tanker capability already exists to transport the Alaskan crude through the Panama Canal to the gulf coast for refining and distribution.

Furthermore, Mr. Chairman, substantial doubt exists regarding the legality of exporting Alaskan oil under any conditions. As dictated by section 28(U) of the Mineral Leasing Act—as amended by the TAPS Act—the President can only approve the export of North Slope crude if he determines it will benefit the national interest. As you may recall, the 93d Congress, in approving the TAPS Act, determined that the national interest would best be served by distributing the North Slope crude domestically. Section 202, subsection (a) of the TAPS Act states:

The earliest possible construction of a trans-Alaska oil pipeline from Alaska's North Slope to Port Valdez in that state will make the proven and potential reserves of low-sulfur oil available for domestic use and will best serve the national interest.

In addition, subsection (a) of 202, to which I referred previously, states that domestic distribution of North Slope is in the national interest due to our increasing dependence upon insecure foreign sources. Yet despite these plainly worded provisions, Mr. Chairman, many still contend that the President has the authority to determine the export of Alaskan oil will best serve the national interest.

I find this contention particularly ironic for the very presence of an export clause in the pipeline law, according to the legislative history, was prompted by the desire to limit export decisions made in contrast to domestic distribution alternatives. Yet when the oil begins to flow next October, that apparently limiting export clause will be used to sanction open-ended exportation simply because no alternative exists against which to measure the national interest. No alternative, that is, except reduced production which no one discusses in serious terms.

Be that as it may, the intent of my amendment is to insure that alternatives to export are considered so the present uncertainty does not become the gaping hole through which the American public will lose one-half million barrels of domestically produced oil every day.

Despite the obvious inequity of encouraging sacrifice while exporting "excess" oil, I have received strong indications that the administration intends to do just that. I trust, Mr. Chairman, that neither you nor any of my other distinguished colleagues will ignore this opportunity to correct this inequity through support of my amendment. It would indeed be a disgrace to undercut our efforts toward increased energy self-sufficiency before they have a chance to begin.

Mr. Chairman, in closing, I would simply state that it is impossible for me to believe that we can make the American people believe there is a fuel crisis in this country, that we tonight can go back to our constituencies and say, "Yes, we must do something, we must do as the President asks," and that then your constituents and mine will be happy when they pick up the newspaper on the next day and see that we are shipping oil to Japan.

Mr. SOLARZ. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman and members of the committee, I rise in opposition to this amendment because it is not only unnecessary; it is potentially counterproductive, particularly in terms of the interests of millions of American industry consumers in the Northeast and in the southern sections of our country.

Under existing law, no Alaskan oil can be exported out of the country unless the President first makes a determination that it will not diminish the total supply of petroleum available in the United States. In other words, the only circumstances under which the President can

permit Alaskan oil to be shipped out of the United States is if, in effect, there is a swap whereby a comparable amount of oil is brought into the country. Even under those circumstances, if the President makes such a determination, the Congress has the right—in spite of the fact that it will not result in a diminution of the total amount of petroleum available in our own country—to veto it anyway. Consequently, Mr. Chairman, this amendment is totally unnecessary because nobody has to be concerned that the export of Alaskan oil is going to diminish the amount of petroleum available in our country. The only circumstances under which oil can be exported would be if it does not result in a diminution of supplies.

Second, I think the amendment is potentially counterproductive because to the extent that there is a surplus of Alaskan oil above and beyond what consumers on the west coast can utilize, the fact is that it may potentially cost substantially more to ship Alaskan oil than it would cost the east coast to import that oil from overseas, in the context of a swapping arrangement in which the oil we export from Alaska is replaced by oil we import from elsewhere.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Chairman, as I mentioned in my rather speeded up remarks, the FEA itself has come out with two scenarios of transactions on this oil which would not increase the cost. The problem is that the northeast is 98 percent or almost totally dependent on foreign oil.

The fact of the matter is that we are dependent on getting that foreign oil through the grace of continued peace in the Middle East, the Russian Navy, and no more financial blackmail from OPEC.

I think to allow ourselves to remain in this condition and not force another system of transportation when it is available is just incredulous.

Added to all of that, I still do not see how we can explain to any citizen in this country what you expect him and I expect him to go through in the matter of energy conservation and then having him turn around to see that American oil is being shipped to Japan. He is not going to tolerate it, he is not going to stand for it, and he is not going to believe us.

Mr. SOLARZ. Mr. Chairman, I find the gentleman so persuasive that I have no doubt whatsoever he would be perfectly capable of convincing any of his constituents who care to listen that there is nothing wrong with permitting Alaskan oil to go to Japan if the condition for permitting that is the bringing in of a comparable amount of oil from elsewhere in the world.

However, I did not say that shipping Alaskan oil to the east coast would necessarily be more expensive than importing oil to the east coast from elsewhere in the world. I did say that potentially it might be more expensive. Right now we just do not know, and I do not think we ought to put consumers on the east coast in that kind of potentially vulnerable position.

Finally, Mr. Chairman, may I say to the gentleman that if, in fact, the Congress believes it would be unwise to permit Alaskan oil to be sent overseas, in spite of the fact that an equal amount is coming in from elsewhere, we would retain the right to veto the permission for such exportation.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, there is a flaw in that reasoning, and as I understand it, it is this: Alaskan oil is so-called acid oil, and to refine it requires a particular adjustment in a refinery.

The CHAIRMAN. The time of the gentleman from New York (Mr. SOLARZ) has expired.

(On request of Mr. SEIBERLING and by unanimous consent, Mr. SOLARZ was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Ohio.

Mr. SEIBERLING. As I was about to say, Mr. Chairman, oil from the Middle East or from other sources may not be the same chemically.

So if we were suddenly cut off and had to go to Alaskan oil our refineries might not be able to handle it right away and we would not have the transportation system set up internally in the country to move that oil from the west coast to the east coast. So, how do we get around those two problems?

Mr. SOLARZ. There is nothing that requires us to replace the oil with oil from the Middle East. It could come from Venezuela, or from Canada, or other parts of the world that produce oil as well.

Second, if in fact it turned out to be no more expensive, or possibly less expensive to bring the Alaskan oil to the east coast than it would be to import oil from elsewhere in the world to the east coast, I would hope that the President would not give permission for Alaskan oil to be exported. And if he were foolish enough to do that, then I would be among those who would vote against such action.

Were it to turn out that it is more expensive because of the shipping expenses to bring oil from Alaska to the east coast, then I do not think we should be denied the opportunity to give Japan oil.

Mr. SEIBERLING. But we may have gotten ourselves out on a limb and cannot use the Alaskan oil when we most need it, that is my concern.

Mr. YOUNG of Alaska. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Connecticut to prohibit any export of Alaskan crude oil for the next 2 years. As the Representative for the State of Alaska, I am acutely aware of the history of Alaskan oil development and want to assure my colleagues that it never has been the intent of the State's political leadership to see our oil go anywhere except to American consumers. Events however, seem to be pointing to the export of some North Slope crude oil to Japan.

The predicted west coast oil surplus that is generating pressure for oil exports to Japan is hardly a new phenomena. The possibility of a surplus became evident in 1974. To refresh my colleagues' memory, in 1973 it was widely expected that the west coast could effectively use the entire throughput of the Trans-Alaska Pipeline. In the wake of the Arab Oil Embargo, however, oil consumption patterns suddenly changed and projections then indicated that Alaskan oil would generate an excess supply on the west coast.

Nevertheless, efforts began almost immediately to correct the situation. Congress addressed the matter through hearings and private industry came forth with proposals to bring surplus Alaskan oil to mid-continent markets. Standard Oil of Ohio—Sohio—unveiled its California-to-Texas pipeline in late summer, 1974. Subsequently, other firms proposed the Northern Tier Pipeline to move Alaskan oil from Puget Sound into the upper Midwest and the Trans-Provincial Pipeline to land Alaskan oil in British Columbia and pump it to Edmonton where it could be hooked into the pipeline network that serves the Midwest and Plains States. Finally, the Federal Government commenced studies regarding the possibility of bringing Alaskan oil in tankers through the Panama Canal to gulf and East coast ports.

But export proponents tell us these efforts have been for naught. Despite 3 years of warning, despite 3 years of planning, despite untold numbers of studies, despite the existence of at least four concrete proposals to transport extra Alaskan oil to needy domestic markets, we are being told that this extra oil must go to Japan. Frankly, I can't accept that answer.

The Sohio project, scheduled for completion in 1978 if it gets all the necessary Federal and State approvals, has been inching through our bureaucracy for nearly 3 years. Yet the Federal Power Commission part of its approvals—it must get an OK to convert an unused gas line to an oil line—will only start next month. I find it incomprehensible that we must export precious domestic oil because bureaucratic fiddlers have failed to act expeditiously on a critical project.

Lest I seem too harsh on the Federal Government, I want to mention that the intransigence of certain States has also been a factor. California, particularly its Air Resources Board, has fought the Sohio project every step of the way. Indeed, segments of California officialdom have been so crass as to suggest that they would approve Sohio's project in return for assurances of greater natural gas supplies. I hate to think of Alaskan oil going to Japan because a few officials in one State are dragging their feet on a nationally vital project. In Washington, local officials have fought the Northern Tier proposal. However, the recent comments of Governor Ray indicate that the State recognizes the national need for systems to bring Alaska oil to needy domestic users. And problems in Canada, obviously beyond our control, are affecting Trans-Provincial.

Apparently we find ourselves in an uncomfortable position: Alaskan oil will begin to flow in 3 months and the systems to move the extra oil from the west coast inland have been stymied by red-tape and/or opposition. Therefore, some observers say, export of this extra oil to Japan is the only alternative.

Let me reaffirm my opposition to such export and explain why passage of this amendment is necessary. First, we need to hold some feet to the fire so that one or more of these three pipeline projects is approved and approved very soon; passage of this amendment demonstrates the Congress will not tolerate exports nor tolerate further delays to projects which can obviate the need for exports. Second, interim methods do exist to bring Alaskan oil to eastern markets.

FEA and the Maritime Administration have found that U.S. flag tankers can be used to take Alaskan oil from Valdez through the Panama Canal to U.S. ports. Obviously this will cost a little extra. However, these extra dollars will be kept in our economy, these dollars will not go into the OPEC treasury.

Mr. Chairman I urge passage of this amendment. Let us keep our Alaskan oil for Americans.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

I agree with the position of the gentleman from Alaska on this matter. However, I would like to point out that in 1973 some of us were opposing the Alaskan Pipeline bill because we wanted a line built through Canada. We said at the time that there is going to be a surplus on the west coast, and the oil companies said, "Oh, that isn't so." Now it is clear that they were wrong about that.

Mr. YOUNG of Alaska. I will say to my good friend, the gentleman from Ohio, that is perfectly clear on the record. May I say, though, that if it had been built through Canada, it might not be built today, and there would not be a surplus, and we would not be in a position of solving some of this energy dependence that we have on foreign countries.

We can argue the pros and cons after the fact, but I will say to my good friend, the gentleman from Ohio, that I think he will agree that we must build this distribution system. This will put their feet to the fire. It will require this administration, that really wants to solve the energy problem, to get on with the show and go ahead and get the job done.

Mr. SEIBERLING. I agree, under the situation we are in now, but it could have been avoided had the line been built through Canada to the Midwest, which is an oil short region.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Illinois.

Mr. FINDLEY. I thank the gentleman for yielding.

Is it conceivable, however, that this amendment would bar the United States from taking advantage of the swap arrangement that might be to our financial advantage?

Mr. YOUNG of Alaska. To my knowledge, whether we take advantage of the swap arrangement or not is a moot question because if we do not at this time utilize that surplus to build the additional distribution system, then we have lost the chance and the golden opportunity ever to build it.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Connecticut.

Mr. McKINNEY. I thank the gentleman for yielding.

I can assure the gentleman that the FEA has come up with two scenarios which will deliver it at the same price. Also they have admitted in my office a week ago Friday that there are enough Jones bottom ships right now to take that oil through the Panama Canal.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BINGHAM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I oppose this amendment for one simple reason: I think this debate is premature. We are going to hear from the President this evening on his proposal for a comprehensive energy program. It would seem to me that it would be disrepectful, to say the least, for us now to take a stand on this matter which would foreclose the President and the Congress from taking a different position later on, should it seem wise to offer to do it. This debate should be occurring at the time and only at the time that the President has made a finding that there should be exports to Japan, and then the Congress can debate the question of whether or not that would be wise. But for us on an Export Administration Act, which is primarily procedural, to make a substantive decision in the energy field is the wrong move at the wrong place and the wrong time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PEASE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I simply would like to associate myself with the remarks the gentleman from New York (Mr. BINGHAM) just made.

I am new in this Chamber, but it seems to me that there are arguments on both sides as to how that Alaskan oil ought to be transported to the Midwest and the Northeast and the South. Surely, as a Congressman from a Midwest State, there is a lot to be said for a pipeline to get it directly into the Midwest. However, again as a newcomer, it seems to me that this is a policy decision of major import that requires a lot of study, a lot of input, and a lot of discussion by some committee of this Congress, and that now and here is not the time and the place to make this kind of decision and commit the Congress to a course of action which it may not wish to pursue.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. McKINNEY).

The amendment was agreed to.

The CHAIRMAN. Are there any other amendments to title I?

Mr. BAUMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do so to make an observation to which the gentleman from Wisconsin might wish to respond. Not being a member of the committee I read carefully the provisions of title I and the changes it makes in the current export control law. It was my impression that the entire statute was originally enacted to control trade with Communist countries. I see however that the law is being changed by this bill to give to the President a great deal of discretion in trading with Communist countries based on certain factors that are written into title I and in addition any other factors that he might consider appropriate.

I had understood that the law has operated in some respects as an absolute ban on certain types of trade with Communist countries. Now the bill changes this to make it pretty much an act of judgment by whatever administration is in power, so strategic trade with Communist countries or other goods which could be used against us could in fact be authorized by the administration if it made that judgment.

I make that statement knowing the President of the United States endorsed the asinine statement by the Ambassador to the United Nations that the Cuban Communist troops in Angola lent stability to that country. I suppose that lends stability in the same way that a prisoner is given stability by the cell in which he resides.

It seems to me if this new provision is to be so interpreted by the administration that will in fact encourage further trade with Cuba, a country that is exporting communism and violence and death all over Africa. If that is the case then we ought to seriously consider whether this provision and this broadened discretion is indeed to the benefit of the United States.

I wonder what response the gentleman from Wisconsin might have to that?

Mr. ZABLOCKI. Mr. Chairman, if the gentleman will yield, if the gentleman had been here, and I presume he was here, he would have heard my explanation of the bill.

Mr. BAUMAN. I listened very carefully to that.

Mr. ZABLOCKI. I made it clear then that this bill does not change the basic law as to trading with Communist countries. It does give some discretion compared with the law which expired last September. But there was discussion about having a requirement for a review of that law for national security purposes. Furthermore, there were some questions before the Rules Committee as to trading with Communist countries was indeed lessened to an extent so as to be of concern.

I have before me some 12 pages of very fine print of a computer listing of certain products, manufactured goods and other strategic commodities the exportation of which is restricted. I can assure the gentleman that this law does not weaken the restrictions with respect to trading with Communist countries.

Let me assure the gentleman that it is also the concern of the gentleman

from Wisconsin that we do not weaken our position and our policy in this legislation as far as the security of our country is concerned.

Mr. BAUMAN. I share that concern, but the point I want to make is that if Communist control of a nation is not the only factor to be considered and the President is allowed to bring in other factors, does not this in fact weaken the law which forbids certain types of trade, if the President decides to go ahead and do it?

Mr. ZABLOCKI. The present law does not limit only trade with Communist countries, but to any country if such trade would affect our national security.

Mr. BAUMAN. I hope the gentleman is correct in what he says, but I have grave reservations as to the policy which this present administration has expressed toward trade with Communist countries. While I support title II of the bill and its antiboycott provisions, I do not think we should weaken restrictions against Red trade.

The CHAIRMAN. There being no further amendments to title I, the Clerk will read title II.

The Clerk read as follows:

TITLE II—FOREIGN BOYCOTTS

PROHIBITION ON COMPLIANCE WITH FOREIGN BOYCOTTS

SEC. 201. (a) The Export Administration Act of 1969 is amended by redesignating section 4A as section 4B and by inserting after section 4 the following new section:

"FOREIGN BOYCOTTS

"SEC. 4A. (a)(1) For the purpose of implementing the policies set forth in sections 3(5) (A) and (B), the President shall issue rules and regulations prohibiting any United States person from willfully taking or agreeing to take any of the following actions to comply with, further, or support any boycott fostered or imposed by a foreign country against a country which is friendly to the United States and which is not itself the object of any form of embargo by the United States, if such action is taken or agreed to be taken pursuant to an agreement with, a requirement of, or a request from or on behalf of the boycotting country:

"(A) Refraining from doing business with or in the boycotted country, with any business concern organized under the laws of the boycotted country, or with any national or resident of the boycotted country. The absence of a business relationship with or in the boycotted country, with any business concern organized under the laws of the boycotted country, or with any national or resident of the boycotted country, does not alone establish a violation of rules and regulations issued to carry out this subparagraph.

"(B) Refraining from doing business with any person (other than the boycotted country, any business concern organized under the laws of the boycotted country, or any national or resident of the boycotted country). The absence of a business relationship with a person does not alone establish a violation of rules and regulations issued to carry out this subparagraph.

"(C) Refraining from employing or otherwise discriminating against any United States person on the basis of race, religion, sex, or national origin.

"(D) Furnishing information with respect to the race, religion, sex, or national origin of any other United States person.

"(E) Furnishing information about whether any person has, has had, or proposes to have any business relationship (including a relationship by way of sale, purchase, legal or commercial representation, or supply) with or in the boycotted country, with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person which is known or believed to be restricted from having any business relationship with or in the boycotting country.

"(F) Furnishing information about whether any person is a member of, has made contributions to, or is otherwise associated with or involved in the activities of, any charitable or fraternal organization which supports the boycotted country.

"(G) Paying, honoring, advising, confirming, processing, or otherwise implementing a letter of credit which contains any condition or requirement compliance with which is prohibited by rules and regulations issued pursuant to this paragraph.

"(H) Using a foreign person, including a subsidiary or affiliate, in order to circumvent the rules and regulations issued pursuant to this paragraph.

"(2) Rules and regulations issued pursuant to paragraph (1) shall provide exceptions for—

"(A) compliance with requirements (i) prohibiting the import of goods or services from the boycotted country or of goods produced, or services provided, by any business concern organized under the laws of the boycotted country or by nationals or residents of the boycotted country, or (ii) prohibiting the shipment of goods to the boycotting country on a carrier of the boycotted country or by a route other than that prescribed by the boycotting country or the recipient of the shipment;

"(B) compliance with import and shipping document requirements with respect to a positive designation of country of origin (except that, during the 1-year period beginning on the date on which rules and regulations issued pursuant to paragraph (1) first become effective, a negative designation of country of origin may be furnished), the name and nationality of the carrier and route of shipment, and the name of the supplier of the shipment;

"(C) compliance with export requirements of the boycotting country relating to shipments or transshipments of exported goods to the boycotted country, to any business concern organized under the laws of the boycotted country, or to any national or resident of the boycotted country;

"(D) compliance with the designation by the boycotting country, by a business concern organized under the laws of the boycotting country, or by a national or resident of the boycotting country, of a specific person to be involved in a particular aspect of a transaction, including the specific person who is to act as seller, manufacturer, subcontractor, insurance carrier, financial institution, or freight forwarder, except that this exception shall not apply in any case in which the United States person has actual knowledge that the sole purpose of the designation is to implement the boycott; and

"(E) the refusal of a United States person to pay, honor, advise, confirm, process, or otherwise implement a letter of credit in the event of the failure of the beneficiary of the letter to comply with the conditions or requirements of the letter.

"(3) The President may grant exemptions from any requirement of the rules and regulations issued pursuant to paragraph (1), other than rules and regulations issued to carry out paragraph (1)(H), in order to permit compliance with a specific provision of the laws of a foreign country which requires the taking of an action in that country which would, in the absence of such an exemption, be prohibited by such rules and regulations.

"(4)(A) Nothing in this subsection may be construed to supersede or limit the operation of the antitrust laws of the United States.

"(B) The rules and regulations issued pursuant to paragraph (1) shall preempt and supersede any provision of law or regulation of any State or political subdivision thereof which is directed to compliance with, furtherance of, or support for any boycott fostered or imposed by a foreign country against another foreign country; and no State or political subdivision thereof may establish, continue in effect, or enforce any such provision of law of regulation.

"(5) Rules and regulations pursuant to this subsection and section 11(2) shall be issued and become effective not later than 120 days after the date of enactment of this section, except that rules and regulations issued pursuant to this subsection shall provide a grace period during which the rules and regulations issued pursuant to paragraph (1) will not apply to actions taken pursuant to a written contract or other agreement entered into on or before April 1, 1977. Such grace period shall end on December 31, 1978, except that the Secretary of Commerce may extend the grace period of not to exceed 1 additional year in any case in which the Secretary finds that good faith efforts are being made to renegotiate the contract or agreement in order to eliminate the provisions which are inconsistent with the rules and regulations issued pursuant to paragraph (1).

"(b)(1) In addition to the rules and regulations issued pursuant to subsection (a) of this section, rules and regulations issued under section 4(b) of this Act shall implement the policies set forth in section 3(5).

"(2) Such rules and regulations shall require that any United States person receiving a request for the taking of any action prohibited by the rules and regulations issued pursuant to subsection (a)(1) shall report that fact to the Secretary of Commerce, together with such other information concerning the request as the Secretary may deem appropriate for the effective enforcement of those rules and regulations. In addition, such rules and regulations may also require that any United States person receiving a request for the taking of any other action referred to in section 3(5) but not prohibited under subsection (a)(1) shall report that fact to the Secretary of Commerce, together with such other information concerning the request as the Secretary may require for such action as the Secretary may deem appropriate for carrying out the policies of that section. Any person reporting a request pursuant to either of the two preceding sentences shall also report to the Secretary of Commerce whether he intends to comply and whether he has complied with such request. Any report filed pursuant to this paragraph after the date of enactment of this section shall be made available promptly for public inspection and copying, except that information regarding the quality, description, and value of any articles, materials, and supplies, including technical data and other information, to which such report relates and the identity of any party to any business transaction to which such report relates (including the identity of the United States person filing such report unless a charging letter or other document has been issued initiating procedings against such person), shall be kept confidential if the Secretary determines that disclosure thereof would place the United States person involved at a competitive disadvantage. The Secretary of Commerce shall periodically transmit summaries of the information contained in such reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary of Commerce, may deem appropriate for carrying out the policies set forth in section 3(5) of this Act.".

(b) Section 4(b)(1) of such Act is amended by striking out the next to the last sentence.

(c) Section 7(c) of such Act is amended by striking out "No" and inserting in lieu thereof "Except as otherwise provided by the fourth sentence of section 4A(b)(2) and by section 6(c)(2)(C) of this Act, no".

STATEMENT OF POLICY

SEC. 202. (a) Section 3(5)(A) of the Export Administration Act of 1969 is amended by inserting immediately after "United States" the following: "or against any United States person".

(b) Section 3(5) of such Act is amended by striking out "(B)" and all that follows through "(C)" and inserting in lieu thereof the following: "(B) to discourage and, in specified cases, to prohibit United States persons engaged in the export of articles, materials, supplies, or information from taking or agreeing to take actions to comply with, further, or support boycotts fostered or imposed by any foreign country against a country friendly to the United States or against any United States person, (C) to discourage the use of negative certificates of origin (and accordingly the President should negotiate with other countries for the purpose of eliminating such practice), and (D)".

ENFORCEMENT

SEC. 203. (a) Section 6(c) of the Export Administration Act of 1969 is amended—

(A) by redesignating such section as section 6(c)(1); and

(B) by adding at the end thereof the following new paragraph:

"(2)(A) The authority of this Act to suspend or revoke the authority of any United States person to export articles, materials, supplies, or technical data or other information, from the United States, its territories or possessions, may be used with respect to any violation of the rules and regulations issued pursuant to section 4A(a) of this Act.

"(B) Any administrative sanction (including any civil penalty or any suspension or revocation of authority to export) imposed under this Act for a violation of the rules and regulations issued pursuant to section 4(A)(a) of this Act may be imposed only after notice and opportunity for an agency hearing on the record in accordance with sections 554 through 557 of title 5, United States Code.

"(C) Any charging letter or other document initiating proceedings for the imposition of administrative sanctions for violations of the rules and regulations issued pursuant to section 4A(a) of this Act shall be made available for public inspection and copying.".

(b) Section 8 of such Act is amended by striking out "The" and inserting in lieu thereof "Except as provided in section 6(c)(2), the".

DEFINITIONS

SEC. 204. Section 11 of the Export Administration Act of 1969 is amended to read as follows:

"DEFINITIONS

"SEC. 11. As used in this Act—

"(1) the term 'person' includes the singular and the plural and any individual, partnership, corporation, or other form of association, including any government or agency thereof; and

"(2) the term 'United States person' includes any United States resident or national, any domestic concern (including any subsidiary or affiliate of any foreign concern with respect to its activities in the United States), and, with respect to its activities which affect the foreign commerce of the United States, any foreign subsidiary or affiliate of any domestic concern which is controlled in fact by such domestic conern, as determined under regulations by the President.".

Mr. ZABLOCKI (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. DODD

Mr. DODD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DODD: Page 26, at the end of line 4, insert the following new sentence: "The President shall promptly report to the Congress any exercise of the authority granted by this paragraph."

Mr. DODD. Mr. Chairman, my amendment is a very simple and straightforward one which would allow Congress to be ever vigilant that the antiboycott provisions of this act are being adhered to as closely as possible, and that no President can make glaring loopholes in this measure.

My amendment would require the President to promptly report to Congress any exercise of the authority he has in this act to grant exemptions from the antiboycott policy to American firms under the most limited of conditions.

In the best of all possible worlds, I would prefer that no exemptions be allowed to our antiboycott provisions. Each time such an exemption is granted, there is a possibility that American principles of justice and fairness will be compromised.

But there may be extreme cases where a limited exemption might be necessary, so our distinguished colleagues on the International Relations Committee who drafted this bill allowed for this Presidential flexibility.

However, in their report, our colleagues made it clear that any exemptions or waivers "should be granted as narrowly as is feasible and only where both private and diplomatic efforts have failed to obtain the waiver of the objectionable requirements" foreign law might impose on American firms regarding boycotts.

Mr. Chairman, my amendment would insure that no President could alter the intent of Congress by secretly granting many exemptions or wholesale waivers of the antiboycott language in this act.

My amendment will enable Congress to more effectively exercise its responsibilities to oversee the workings of the executive branch, and it will prevent any unintential surrender by us of this important "check" in our Government's system of "checks and balances."

Mr. Chairman, I think it is clear that our colleagues on the International Relations Committee, and the majority of this House, are firm in their convictions that both the spirit and the letter of our antiboycott legislation be complied with as far as possible.

I want to thank the members of the committee, especially the gentleman from New York (Mr. BINGHAM) and the gentleman from Ohio (Mr. WHALEN), for their guidance and support in helping me to draft this amendment, and for their appreciation of our mutual concerns that this act be very explicit about strong enforcement of this law.

My amendment will facilitate this strong enforcement through greater disclosure of our Government's efforts to combat the existence of these despicable boycotts throughout the world. Mr. Chairman, I urge adoption of this amendment.

Mr. BINGHAM. Mr. Chairman, will the gentleman yield?

Mr. DODD. I yield to the gentleman from New York.

Mr. BINGHAM. Mr. Chairman, we have had an opportunity to examine the gentleman's amendment, and I have had the opportunity to consult with my colleagues on the committee. While it was the intention of the committee that any waiver by the President would be reported to the Congress, it does seem to be an improvement in the bill to require that specifically.

Therefore, I commend the gentleman for this amendment and we would accept it.

Mr. WHALEN. Mr. Chairman, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Ohio.

Mr. WHALEN. Mr. Chairman, we on the minority side have had an opportunity also to examine the amendment and find it acceptable.

Mr. DODD. With that, Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. DODD).

The amendment was agreed to.

Ms. HOLTZMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of title II of this legislation which attempts to curb the harmful effects in this country of the Arab boycott.

I think it is extremely important for the U.S. Government to protect all Americans—American citizens and American businesses—from interference by outside governments and outside forces.

I think it is intolerable that Arab countries have been able, for quite some time, to dictate business practices in the United States and to dictate which companies in the United States American companies can deal with. They have also tried in some instances to require American companies to discriminate against American citizens.

Having introduced the first antiboycott bill in the House in 1975, I compliment the committee and the members of the committee for their success in bringing this legislation to the floor.

I must, however, express a certain regret that there was a compromise with the principle of protecting Americans and that the administration was not willing to accept clear and unequivocal prohibitions against foreign dictation of business practices within the United States.

Specifically, I am concerned with a few provisions of this legislation including one that allows the President to waive virtually all of the prohibitions against participation in a boycott. As I read this legislation, section 4A(a)(3) would allow the President to waive even

the prohibition against discrimination against American citizens on the basis of race, religion, sex, and national origin. I cannot imagine any reason for permitting a waiver of those prohibitions and for allowing discrimination.

Mr. Chairman, I am also concerned with section 4A(a)(2)(D) which would allow, in essence, any company to engage in the boycott so long as that company did not have "actual knowledge" that the "sole purpose" of the action of the Arab country was to engage in a boycott. I do not know how any lawyer would prove in a criminal case, beyond a reasonable doubt, that a company had violated this provision. It is extremely difficult, it would seem to me, to prove that the only purpose for which an Arab country acted in selecting a shipper, supplier, or the like, was to implement the boycott. Making the standard "primary purpose" instead of "sole purpose" would have strengthened the bill substantially.

The term "actual knowledge" also seems far too restrictive and may well be impossible to prove. "Reason to know" would be a much more reasonable test.

I am concerned that we have created in this bill an exception that will swallow up the very important prohibitions against boycott participation contained in this bill.

Mr. BINGHAM. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I would be happy to yield to my distinguished colleague, and to congratulate him for his leadership on this bill.

Mr. BINGHAM. Mr. Chairman, I thank the gentlewoman.

I, too, share in the gentlewoman's concern. This legislation, in part, is the result of compromise. I think there are people on both sides who are dissatisfied with some of the elements in this compromise, but it does result from extensive labor. I think if it turns out in the course of time that this is a major change in American policy and American control over business activities, if it turns out in the course of ensuing months after enactment of this legislation that some real loopholes have been created, we will always be in a position to move to close those loopholes.

I do share some of the concerns the gentlewoman has expressed, but this is the product of compromise.

Ms. HOLTZMAN. I would say to my friend from New York that ordinarily I would not be so concerned by imperfections in this bill because the antitrust laws should provide a strong additional weapon against boycott activity within the United States. However, as a result of the action taken by the Justice Department's proposed settlement in the Bechtel case, which abandons the position that the antitrust laws fully prevent cooperation in the boycott, the only need we may have left to rely on is this legislation. For that reason, I wish that there had been no compromise with principle.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the bill before us today, H.R. 5840, the Export Administration Amendments of 1977.

This measure represents extensive efforts of the Congress, the executive branch, and the private sector working together to reach a compromise that would be acceptable to all interested parties. H.R. 5840 is a reasonable and effective response to the need for antiboycott legislation.

As a cosponsor of this legislation, I have sought to prevent the discriminatory practices that have resulted in the United States from compliance with the Arab boycott. The primary boycott of Israel is not in question; it being the right of any nation to refuse to do business with another. However, the secondary and tertiary boycotts force individuals and businesses to adopt business practices that pit one American against another because of racial, ethnic, or religious backgrounds.

This country was founded on principles that seek to protect all citizens against unfair, discriminatory practices. The Arab boycott is an attack not only on those who are perceived to be friendly to Israel, but to all citizens who are dedicated to ethical standards in all phases of life including business. To uphold our Nation's lofty traditions, it is incumbent upon us to outlaw compliance with any attempt by a foreign country to intrude in our domestic commerce.

Believing that Federal legislation is the only effective means to combat such practices, I have enthusiastically supported the efforts over the last year of our colleagues, the gentlemen from New York, Representatives BINGHAM and ROSENTHAL, and other members of the International Relations Committee who have led the fight to enact this legislation. Their efforts have benefited from the enterprising and creative efforts of the Anti-Defamation League and the Business Roundtable in working to reach an agreement on the value and content of this legislation.

While U.S. policy opposes such restrictive trade policies and boycotts, we must not only discourage such acts, but we should also prohibit them. I urge the adoption of these amendments to outlaw the disclosure of discriminatory information and participation in the restrictive trade practices of foreign nations. The legislation before us is the result of extensive deliberation and negotiation by this and the last Congress and reflects the concerns of the President and the executive branch. While not as restrictive as some may have liked, it represents a constructive step forward in ending the divisive effects of discriminatory boycotts.

Mr. Chairman, I reiterate that the primary boycott is an issue between the Arab States and Israel. But the secondary and tertiary boycotts are tantamount to blackmail. Accordingly, I urge my colleagues to join in support of H.R. 5840, in order to strengthen U.S. policy against compliance with foreign boycotts.

Mr. FINDLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to title II. I think the discussion we have had here this afternoon makes it very clear that title II deals with a nonproblem. It has been said by proponents of title II that the Arab boycott has not been effective in its primary effect; the secondary and tertiary aspects of the Arab boycott have not been effective, and therefore the question arises, why in the world would this body see fit to fix upon the U.S. business community this complexity of rules and regulations and requirements to deal with in its effort to continue to do business with the Arab world? I am puzzled as to any adequate answer to that question.

One effect of this title, however, is going to be to reduce U.S. jobs. That is beyond doubt, and I think it is really absurd for anyone to argue that this title conceivably could create additional jobs for U.S. industry. Just today, I had a call from the Harris Corp., a large conglomerate which does business in many countries, notifying me that because of the prospect that title II will become law—and we will and must recognize that it likely will become law—their firm has decided not to try to get a contract worth approximately $10 million with a certain Arab country. They made that decision based on the difficulty they have had already in trying to comply with Commerce Department regulations on the Arab boycott.

Mr. Chairman, the boycott is a recognized instrument of foreign policy and is supported or opposed by the United States, depending on circumstances.

For example, the United States supports the United Nations boycott of Rhodesia and maintains its own boycott of Cuba but opposes the Arab boycott of Israel.

U.S. opposition to the Arab boycott of Israel has resulted in title II of H.R. 5840, the antiboycott provisions of the Export Administration Act.

Most of the provisions in title II of H.R. 5840 are reasonable attempts to avoid unacceptable intrusions of foreign boycotts into the foreign and domestic commerce of the United States.

However, other provisions impose severe limitations on U.S. international business and attempt potentially dangerous restrictions on the sovereign right of foreign countries to regulate their own imports and exports. These provisions of title II, if enacted in their present form could risk a substantial loss of American jobs and trade with the Middle East countries as well as threaten confrontation with the Arab world at a time when the United States is attempting by its leadership to bring peace to that area of the world, a peace badly needed by Israelis and Arabs alike.

The most objectionable provisions of title II are:

First. Section 4A(a)(2)(D) which permits U.S. exporters to comply with a boycotting country's unilateral selection of all the companies to be involved in supplying the goods and services contained in a specific transaction except in any case in which the U.S. company had actual knowledge that the sole purpose of the selection is to implement the boycott. The provision is highly restrictive because Arab countries ban imports from hundreds of companies in other countries that they say aid Israel's economic de-

velopment. Consequently, American suppliers having "actual knowledge" that the Arab purchaser failed to specify a particular company because it was on his country's "black list" would have to give up the business entirely. If the American suppliers failed to do so, then under this provision it would constitute a criminal act. This provision also impacts adversely on the jobs of American citizens. A major U.S. corporation with over 3,000 employees plus 6,000 employees with supplier firms have jobs dependent on sales to Arab countries. Under this provision those 9 million jobs involved with one major U.S. corporation are placed in jeopardy.

Second. Section 4A.(a)(2)(B) permits U.S. exporters to give only positive certifications of country of origin to importing countries. It, however, provides that rules and regulations might permit a 1-year grace period for negative certifications. This is an arbitrary deadline for negotiating an end to negative certifications. If after that time, certain countries refused to accept positive certifications, presumably American exporters would no longer be able to sell to those markets. This is a highly punitive provision against American trade and confrontational with respect to the Arab world. It represents a direct U.S. interference in the Arab's primary boycott of Israel, which the bill's proponents assert is not their intention. The President should be permitted an unlimited waiver of this provision, if he believed that it would serve the national interest.

Third. Section 4A(a)(3) authorizes the President to grant exemptions from U.S. antiboycott law to permit U.S. firms in Arab countries to comply with specific provisions of foreign laws when they are in conflict with the provisions of this bill. The exemption is so hedged with qualifications as to make it practically unavailable. The House report proposes that, as a preliminary, both the private U.S. parties concerned and the State Department must first negotiate with the Arab countries to waive their conflicting laws. Since the Arab countries have ample substitute sources of supply—the United States provides less than a fifth of their imports—and since American businesses will be very adversely affected if they must request special "extraterritorial" treatment for their operations in the Arab countries, the Presidential waiver could be illusory.

Fourth. Section 4A.(a)(1)(E) prohibits U.S. companies from furnishing information on their past or present—as well as future—business relationships in the boycotting country or with anyone restricted from doing business there. To deny them this freedom is unjust. Companies, mostly small and medium sized, intending to do business in Arab nations for the first time could be barred from entry in that market if they were prohibited from furnishing information on their business relationships in that area. Further, companies already on the blacklist would have no means available to remove their names, if, for example, they were blacklisted by mistake.

These provisions of title II contain broad prohibitions which would, in effect, make it virtually impossible for U.S. firms to do any substantial business with Arab countries without violating both U.S. civil and criminal laws. The bill does provide specific exceptions to permit U.S. firms to conduct certain limited transactions with or in Arab countries. However, the exceptions are so qualified that U.S. firms currently doing business in the Middle East will find it more difficult, if not impossible, in most instances to continue their operations, and firms trying to do business in that area for the first time may find it impossible to do any business without violating U.S. law.

The restrictive provisions of title II could cause enormous losses of business for U.S. firms. The fact is that U.S. firms supply less than one-fifth of the Arab's imports. Even this share has required the greatest effort on the part of U.S. companies in the face of intense competition from Europe and Japan.

These restrictive provisions of title II adversely impact on U.S. domestic and foreign commerce as well as the income and jobs of millions of Americans.

But important as are these economic considerations, they are dwarfed by another which towers above all else.

Title II is a major step backward in the achievement of conditions for a just peace. It will promote confrontation among all major parties necessary to reach a peace agreement in the Middle East—Israel and its neighbors, and between the Arab States and the United States.

What we urgently need is not confrontation, but conciliation.

Mr. KOCH. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the bill.

Mr. Chairman, I strongly support H.R. 5840, the Export Administration Amendments of 1977, which we are considering today. I have long advocated the passage of legislation to deal with foreign boycotts of nations friendly to the United States and those American companies who trade with our friends. Together with Representative JAMES H. SCHEUER I have introduced legislation both in the last Congress and again in this Congress to prohibit American companies from participating in the Arab boycott of Israel. I have also supported the efforts of Congressmen BENJAMIN S. ROSENTHAL, JONATHAN B. BINGHAM, and STEPHEN SOLARZ, who have been among the leaders in proposing comprehensive boycott legislation. I commend them and the other members of the International Relations Committee for their productive efforts in writing and reporting this important legislation. I particularly commend Chairman CLEMENT ZABLOCKI of the International Relations Committee for his fine job in supporting and managing this bill.

As my colleagues should be aware, the Arab boycott of Israel far exceeds traditional economic boycotts of one nation against another. The boycott involves three levels of economic coercion—the primary boycott, a refusal by Arab states to deal commercially with the State of Israel or its nationals; the secondary boycott, the refusal to deal with non-Israeli supporters of Israel; the tertiary, or extended secondary, boycott, a refusal to do business with firms or individuals which are not themselves supporters of Israel, but which do business with others who are considered to do business with those considered to be supporters of Israel, thus putting American companies who want Arab business in the position of boycotting other U.S. firms.

Both the secondary and tertiary boycotts carry with them not only an implied conflict with U.S. antitrust law, but also with domestic civil rights laws. Because Israel is not only a sovereign state, but also one established for the purpose of providing a homeland for the Jews, religious faith has become a basis for the Arab boycotters to judge who are those considered to be supporters of Israel. Thus, in order to do business with the Arabs, an American firm may refrain from hiring, assigning or promoting persons, because of their Jewish faith, a clear religious discrimination. Although the Arabs claim that their boycott is not directed against a religion but is only an economic extension of their war against Israel, firms are blacklisted for their Jewish or Zionist affiliations as much as for any other reason. In fact, as the September 1976 report of the Subcommittee on Oversight and Investigation of the Interstate and Foreign Commerce Committee shows, some firms are blacklisted without any reason given. In such cases one can only guess at the real reason.

In attempting to involve domestic American companies in conspiracies and boycotts against other American companies to further their political and economic campaign against Israel, the Arab boycotters strike not only at the political policies of the United States, as a staunch supporter of the State of Israel, but also at the laws by which the United States is governed and the basic principles underlying them.

The essence of the question facing the United States is a moral one—will we allow foreign powers to dictate that one American businessman discriminate against another in violation of our laws and fundamental principles for the sake of trade with that foreign power? If legislation is not passed to deal with the Arab boycott, the fundamental rights of all Americans will suffer.

But opponents of such legislation argue that American business will suffer if new legislation is passed. They say that the United States will lose business to other countries who do not forbid their companies from participating in the boycott. This argument is specious on two counts. First, there is no assurance that trade will be lost if a strong antiboycott stance is taken. In fact, data in the subcommittee report appears to indicate that negative effects would be minimal, if they occurred at all. The Netherlands and West Germany have reportedly taken strong anti-Arab boycott positions, yet Arab trade with both those countries has not declined, but has grown substantially in recent years. On the other hand France's pro-Arab stand has netted minimal rewards in trade. But, second, and most importantly, the fundamental moral issue involved here transcends mere considerations of possible lost trade. The United States should not abandon its moral stance here just as it

did not do so in the recent aircraft bribe scandals. When the United States adopted a policy to forbid aircraft manufacturers and others from offering bribes to foreign purchasers of their products, there were those who said American business would suffer. Yet because a moral issue was involved, the United States adopted a firm stand against such payments and the results have not been catastrophic. In the final analysis, it seems that in all nations, including the Arab states, sound business judgments based on quality and price of goods prevail over other considerations in determining from which market they will buy. Although no one can predict the exact impact a strong anti-Arab boycott stand will have, it appears from available data that, so long as the United States maintains a competitive advantage in quality and price, business will not suffer.

This bill does not outlaw completely and absolutely every aspect of the boycott, but it does make the United States' position clear and it does outlaw a great many of the worst practices. Both the Secretary of State and the President have reiterated their commitment to preventing all discrimination based on race, religion, or national origin. The administration, the House International Relations Committee, and the many interested organizations have all had to reach a difficult and complex compromise in writing and agreeing to this bill.

Some of the exceptions permitted by the bill make it less than perfect in my opinion. For instance, one provision allows a purchaser unilaterally to select subcontractors and component parts. However, I commend the committee for narrowing this exception so that it cannot be used, when the company knows that the purpose of the unilateral selection is to implement the boycott.

The bill would also permit companies to divulge information concerning the race, religion, or sex of its employees for passport reasons. I believe this exception is wrong and should not be in the bill.

The bill also permits positive certification of origin—that is, a statement about where the goods were manufactured. This is vastly superior to complying with a requirement to state that the goods were not made in a particular country, such as Israel, but it is still odious. However, in spite of some limitations, this bill is superior in many respects to the counterpart bill being considered in the Senate. I urge those Members who will serve on the conference committee for this bill to fight for the stronger antiboycott provisions contained in this bill.

In the long run the President is the person to whom we must look for effective implementation of this antiboycott legislation. The bill provides the President power to create exceptions and exemptions "in the interest of the United States." I hope the President reciprocates our trust in him by using such exemptions sparingly, if at all.

During his campaign for the Presidency, President Carter called the Arab boycott "an absolute disgrace." During the consideration of this legislation, at the urging of the administration, the Congress has moderated its legislative proposal to deal with the boycott. It will now be up to the President to do something to end American complicity in this disgraceful boycott.

Mr. FORD of Tennessee. Mr. Chairman, I move to strike the requisite number of words.

Mr. FORD of Tennessee. Mr. Chairman, I rise today to give my wholehearted support to H.R. 5840, the Export Administration Amendments of 1977, and especially to title 2 of the bill which deals with foreign boycotts. This bill passed the 94th Congress by a vote of 318 to 63, with my support, but final action was prevented because of Senate refusal to call for a conference on the bill.

Ever since Israel was established in 1948 the Arab States have refused to do business with it. This practice is deplorable but beyond our reach. The Arabs have done much more, however, by extending this boycott to third parties who do business with Israel. The end result may be for there to be two types of firms in every industry—those that sell to Israel and those that do not. In 1965 Congress adopted an amendment to the Export Control Act of 1949 proclaiming U.S. policy to be in opposition to boycotts imposed by foreign countries against other countries that are friendly to the United States and in support of U.S. companies that refuse to cooperate with such boycotts.

Unfortunately, this policy has been ineffective. Since 1965 there has been a steady increase in Arab demands that U.S. firms comply with the boycott. Especially since 1973, when the oil embargo and resulting higher oil prices greatly increased the Arab States' purchasing power, the Arab nations have used American firms as their agents in perpetrating this boycott.

Congressman ROSENTHAL points out in the committee report, however, that the boycott is larger than an economic one—it is a racial one as well. Senate investigators have uncovered numerous instances where American individuals or companies were apparently denied business with Arab nations solely because they or their officers were Jewish.

We cannot tolerate this action any longer. The ineffectiveness of the current weak laws on this subject fly in the face of the administration's commitment to human rights. This commitment is morally right and consistent with the desires of the American people. Those who oppose this legislation say that it will cost us a great deal of money in lost trade. If we refuse this antiboycott legislation, how can we continue to champion human rights? How can we tell the world or the American people that we are not moral cowards but that we are economic cowards? I believe that we cannot.

The Washington Post in an editorial on Sunday April 17 put it well. I would like to quote the last paragraph from it:

> The United States seeks Arab friendship, in diplomacy as well as commerce. To build the kind of sturdy, long-lasting relationship that American interests require, however, American virtues must be respected from the outset. To say that legislation will make Arabs turn away from America is to ignore the self-interest of Arabs as well as Americans in a stable agreement on trade rules. Arabs buy many of the same American weapons sold to Israel, for instance. Fortunately, American business and American diplomacy have enough else of value to offer Arabs—the world's best technology and know-how on the one hand, leadership in the drive for peace on the other. Americans do not have to humiliate themselves to win Arab good will.

The CHAIRMAN. Are there further amendments to title II? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. EVANS of Colorado, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5840) to amend the Export Administration Act of 1969 in order to extend the authorities of that act and improve the administration of export controls under that act, and to strengthen the antiboycott provisions of that act, pursuant to House Resolution 493, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MICHEL

Mr. MICHEL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. MICHEL. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

> Mr. MICHEL moves to recommit the bill H.R. 5840 to the Committee on International Relations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

Mr. MICHEL. Mr. Speaker, am I not entitled to 5 minutes?

The SPEAKER. The Chair will inform the gentleman that on a straight motion to recommit there is no debate.

The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BINGHAM. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 364, nays 43, not voting 26, as follows:

[Roll No. 140]

The Clerk announced the following pairs:

Mr. Shipley with Mr. Teague.
Mrs. Meyner with Mr. Milford.
Mr. Le Fante with Mr. Robert W. Daniel, Jr.
Mr. Yatron with Mr. O'Brien.
Mr. Price with Mr. Devine.
Mr. Boland with Mr. John T. Myers.
Mr. Mitchell of Maryland with Mr. Bowen.
Mr. Moorhead of Pennsylvania with Mr. Forsythe.
Mr. Murphy of New York with Mr. Duncan of Oregon.
Mr. Derrick with Mr. Martin.
Mr. Biaggi with Mr. Edgar.
Mr. Ford of Michigan with Mr. Hawkins.
Mr. Wolff with Mr. Jenrette.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to announce at this time that this evening there will be a joint session. A certain number of seats will be set aside for the Senate. The leadership of the House would appreciate it if we would respect those seats because it has been embarrassing in the past when Senators have arrived that seats have not been available for them.

The Chair would also like to note the fact that there will be no guests on the floor of the House Chamber this evening. The seats will be reserved for Members of the House, for the Members of the Senate, for the diplomatic corps, and for the members of the Cabinet.

THE CONCORDE IS TOO NOISY FOR BRITAIN, DULLES, AND NEW YORK

(Mr. KOCH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOCH. Mr. Speaker, I was interested to read in this morning's New York Times that an official body in Britain, the Noise Advisory Council which reports to the British Secretary of State for the Environment, has found that the Concorde supersonic airplane exceeds the British statutory noise limitation on 72 percent of its takeoffs from London's Heathrow Airport. The Noise Advisory Council reported:

> The measurement program has illustrated that the aircraft is considerably noisier than any other commercial airliner and that it reverses the trend towards the development of less noisy aircraft and towards an alleviation of the aircraft noise program.

Mr. Speaker, this new information reinforces our determination that the United States, and particularly the New York area, should not allow itself to be bullied into permitting the Concorde to land here, if the British Government itself now fully admits that the airplane is too noisy. There is presently a great deal of pressure, both diplomatic and commercial, by the French and British, to obtain landing rights for the Concorde at Kennedy Airport in New York. Yet the conclusions of this British study indicate that the Concorde is too noisy for Britain. And it is too noisy for New York, too.

The Washington Post reported that the study said:

> The manufacturers' hopes and promises of reduced noise in commercial service haven't been achieved and it seems unlikely that any further significant improvement will be obtained.

The report also stated that the noise level, which was tested at a distance of 3 miles from the airport "is due largely to the type of engine installed in the Concorde and it is doubtful if there is any scope for improvement in this area."

This study confirms that the Concorde is noisier than other aircraft and that there is no chance to improve its noise performance so as to make it acceptable to those who must live or work within miles of the airports where it lands. The British study showed that the Concorde created noise levels greater than 110 decibels, which is the statutory noise limit for Britain, according to the Times article. Unofficial monitoring showed levels of up to 124 decibels at some distance from the monitoring stations.

All of these readings are of interest, because I have recently received a letter from the Federal Aviation Administration summarizing the Concorde operations at Dulles Airport for 6 months of 1976. This summary shows that Concorde has exceeded not only the British standard of 110 decibels, but also the average levels of perceived decibels which had been predicted for Concorde in the Environmental Impact Statement approved by the Secretary of Transportation prior to the 16-month test period at Dulles. At takeoff, the Concorde has been measured at 119.8 decibels, which is greater than the 119.5 decibels that had been predicted in the EIS. On approach, the EIS had predicted 116.5 decibels would be heard on the average, but Concorde has actually been recorded at an average of 117.9.

Mr. Speaker, it is now dramatically clear that the Concorde is too noisy for Britain, too noisy for Dulles Airport and its environs, and too noisy for New York. I will continue to urge, indeed we must demand, that the Port Authority of New York and New Jersey continue to refuse permission to the Concorde to land, and that the President and the U.S. Secretary of Transportation support the local decision to bar the Concorde.

I am appending a copy of the letter I recently received from John L. McLucas, Federal Aviation Administrator and two of the articles which appeared in today's newspapers:

FEDERAL AVIATION ADMINISTRATION,
Washington, D.C., March 28, 1977.

Hon. EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR MR. KOCH: This is in further response to your letter of February 22 regarding Federal Aviation Administration (FAA) noise abatement programs, proposed financing legislation, and the future use of supersonic transport aircraft.

With respect to your inquiry on FAA noise abatement programs, I have summarized our most significant programs and new proposals. For convenience, they are presented in Enclosure A. After reviewing this material, I believe you will agree with me that the FAA has developed an aggressive program to treat the issue of aviation noise.

In regard to the status of former Secretary of Transportation Coleman's financing proposal, the FAA is currently reviewing this proposal as it is embodied in the proposed "Aircraft Noise Reduction Act of 1977." Our recommendations will be forwarded to the Department of Transportation upon completion of this review process.

Regarding your question on supersonic transport aircraft, a decision on their future use will be made at the conclusion of the 16-month Concorde demonstration periods. The results of the noise level monitoring experiments for the Concorde flights are summarized in Enclosure B.

Sincerely,

JOHN L. MCLUCAS,
Administrator.

ENCLOSURE A

SUMMARY OF FAA NOISE ABATEMENT PROGRAMS

Regulation (FAR) Part 36, as amended, sets forth the maximum permissible noise levels for aircraft type certification and requires that existing non-FAR 36 domestic, subsonic aircraft exceeding 75,000 pounds maximum weight reduce their noise emissions to specified levels or below. Stepwise compliance is required over an 8-year period starting January 1, 1977. Without this action, we have determined that approximately 50 percent of the noncomplying aircraft would still be in operation by 1990.

The recently promulgated FAR Part 36-XYZ is more demanding than FAR Part 36. The XYZ regulation applies where applications for type certificates were made after November 5, 1975.

We are in the initial stages of developing an approach to defining and addressing the future longer term needs in the area of aviation noise abatement. The objective of this effort is to be able to describe future composition of the fleet and its associated technology needs, certification levels, and cperation procedures. With this information we will be able to gauge the impact of these factors on the environment and hence assess the need for future environmental standards.

We have encouraged state and local governments to join with the FAA in the abatement of aviation noise impacts by appropriate land use planning, zoning strategies, et al. In an effort to encourage the airport proprietor to undertake positive noise abatement planning action, the FAA is developing a pilot program which will award grants for generally applicable noise abatement plans.

In the area of operating procedures, in December of 1976, the FAA promulgated a standardized approach involving the use of minimum certified flaps. Using this type of approach, aerodynamic drag is reduced and the resulting decrease in engine thrust reduces fuel use and increases noise reduction benefits.

Regarding takeoff procedures, the FAA is in the process of evaluating different departure procedures after the aircraft reaches 1500 feet. The issue is complicated since each airport is unique in terms of its surrounding geography and land use. The FAA expects to complete regulatory actions on this subject by January 1, 1978.

Recent FAA studies reveal new procedures which improve safety through reduced low altitude flying time, standardize high performance aircraft arrival procedures, equalize the arrival delay through the regulation of traffic flow, and provide departures for unrestricted climb to cruise altitude. The new procedures will soon be made final in an FAA Order or local-flow traffic management and will apply to all airports where high performance aircraft operate.

In response to the Department of Transportation's Climatic Impact Assessment Program findings, the FAA initiated an 8-year High Altitude Pollution Program (HAPP). HAPP is designed to provide information to avoid environmental problems from all types of long range aircraft. As part of the Federal stratospheric program, it is coordinated with efforts of the National Aeronautics and Space Administration, National Oceanic and Atmospheric Administration, Environmental Protection Agency, National Science Foundation, Department of Defense, and Energy Research and Development Agency. The expected output from 1976 activities is the review and analysis of immediacy of need for the regulation of the fleets to the year 1990.

ENCLOSURE B

SUMMARY OF CONCORDE OPERATIONS

297 Concorde operations were conducted at Dulles since their initiation on May 24 through November 30, 1976.

Noise measurements have been made at 31 sites on and around Dulles Airport. Most of these measurements were taken in populated areas; however, sites approximating the FAR Part 36 approach and takeoff measuring points were also used.

Noise levels measured were approximately those predicted in the Environmental Impact Statement:

	Average measured EPNdB	*Predicted EPNdB*
Takeoff	119.8	
Approach	117.9	
Takeoff	119.5	
Approach	116.5	

698 Concorde complaints have been received for the 297 operations. 90 complaints or 13 percent were releated to arrival noise. 608 complaints or 87 percent were related to departure noise. The incidence of complaints was highest in September when there were 186.

Concorde accounted for 0.3 percent of total tower operations at Dulles.

Structural vibration studies conducted by NASA at Sully Plantation and in typical residences showed that Concorde caused more vibration in the structures than other aircraft but not as much as nonaircraft events such as doors closing.

One sonic boom was recorded as the Concorde approached the U.S. coastline. Flight procedures have been changed to assure that there will be no recurrence.

Monitoring of emissions at Dulles has shown that Concorde produces more emissions than other aircraft. However, emissions from all aircraft cannot be distinguished from the ambient at the passenger terminal.

This project is continuing; further analysis will be made at appropriate intervals.

[From the New York Times, Apr. 20, 1977]

BRITISH GOVERNMENT'S ADVISERS FIND CONCORDE NOISY

(By Joseph Collins)

LONDON, April 19.—The Brtish Government's advisers on aircraft noise, in a report made public today, found that the supersonic Concorde airliner exceeded the statutory noise limit on 72 percent of its takeoffs from London's Heathrow Airport. They said it was regrettable that Concorde had been exempted from noise regulations.

After an investigation of the first eight months of Concerde's commercial operation, the Noise Advisory Council, an official body set up by the Secretary of State for the Environment, reported:

"The measurement program has illustrated that the aircraft is considerably noisier than any other commercial airliner and that it reverses the trend towards the development of less noisy aircraft and towards an alleviation of the aircraft noise nuisance problem."

The Department of Trade took issue with the findings and said that another report, by the Civil Aviation Authority, due out next week would show that less than 5 percent of takeoffs had exceeded the limit in the first full year of operation.

STUDY OF 97 SCHEDULED FLIGHTS

The Noise Advisory Council's working group on air traffic noise wrote its report in late 1976 after having studied the first 97 scheduled Concorde flights out of London. The plane is in service between London and Bahrein and, since May 1976, between London and Washington.

The investigation was based on fixed monitoring points at the end of the main runways, where the statutory noise limit is 110 perceived decibels. Unofficial monitoring away from the fixed stations has shown readings of 124 decibels or more.

Commenting on the contention of the makers and operators of Concorde that the plane would become less noisy as pilots gain experience, the report observed:

"The working group understands that there is no likelihood of any significant improvement in Concorde's noise performance in operation and that no measures are in hand to reduce further its noise at source."

In fact, the report said, Concorde is noisier now than it was during test flights in 1975, when it was found to exceed the noise limit somewhat less frequently than it did on scheduled flights.

The report said Concorde was noisier than other commercial jet planes and measures should be taken to alleviate the noise. It suggested that Concorde should be banned from landing and taking off during the night, evening and early morning hours. A Civil Aviation Authority spokesman countered that the plane did not use Heathrow during these periods.

The working group also said British Airways should balance out the noise from Concorde by reducing the number of flights by noisy subsonic aircraft.

[From the Washington Post, Apr. 20, 1977]

BRITISH STUDY SAYS CONCORDE ENGINES ARE EXCESSIVELY NOISY

LONDON, April 19.—A British government study says the supersonic Concorde generated excessive noise during 72 per cent of its takeoffs from London's Heathrow Airport over an eight-month period and "it seems unlikely" the noise can be significantly reduced.

The report, prepared by the Noise Advisory Council for Environment Minister Peter Shore, recommended a ban on night takeoffs and landings.

The study said that not only is the plane "considerably noiser" than subsonic commercial aircraft, but the noise spreads out over a much wider area.

The Noise Advisory Council's report was certain to be welcomed by environmentalists and persons living around New York's Kennedy Airport who are fighting to keep the plane from landing there.

"The manufacturers' hopes and promises of reduced noise in commercial service haven't been achieved and it seems unlikely that any further significant improvement will be obtained," the Noise Council's report said.

The noise level tested at a distance of three miles from the airport "is due largely to the type of engine installed in Concorde and it is doubtful if there is any scope for improvement in this area," it said.

THE NEW LOOK ARMY: AN ANALYSIS—APRIL 1977

The SPEAKER. Under a previous order of the House, the gentleman from Wisconsin (Mr. STEIGER) is recognized for 60 minutes.

Mr. STEIGER. Mr. Speaker, on March 28, Newsweek magazine published an article written by David M. Alpern and Tony Fuller entitled "The New-Look Army." It is an unfortunate piece of work. Any fair person examining the story can arrive at only one conclusion: Either the authors are incompetent to be writing for such a prestigious journal or they have exercised no restraint about indulging in the worst forms of yellow journalism.

Mr. Speaker, the pervasiveness of their bias has prompted me to prepare a paragraph by paragraph analysis of the Alpern and Fuller article for the benefit of my colleagues. Certain of the authors' tactics are consistent throughout:

One. The facts and examples selected to represent the issue are serious distortions of the truth—the authors consistently use the "worst case" example, rather than provide the reader with generally accepted "best estimates" or ranges.

Two. The authors usually portray only one side of the argument.

Three. In an effort to grab attention, they ignore the vast body of information—in fact the overwhelming majority of the data—which would have proven their conclusions wrong.

Four. In their eagerness to be vivid, they make innuendoes and suggestions which must inescapably lead the reader to the wrong conclusion.

Five. They misquote some and take other statements out of context.

The failure to provide a fair picture of the all-volunteer force—AVF—and draft issues is perplexing in light of recent balanced presentations. A few examples include pieces by John Finney (New York Times, Mar. 6, 1977), Vernon A. Guidry, Jr. (Washington Star, Jan. 27, 1977), Harry Trimborn (Los Angeles Times, Mar. 20, 1977) and Pat Towell (Congressional Quarterly, Mar. 26, 1977).

The apparent lack of awareness by Alpern and Fuller of important, detailed studies compiled by RAND in 1976, the Defense Department—DOD—in its December 17, 1976, transition document, and the Congressional Budget Office in its 1977 budget issue paper is astonishing.

Then, too, the authors failed to talk with people who could have given them insights necessary for writing a balanced, accurate article. For instance, they failed to contact 11 key individuals—present and past Defense Department officials and the 2 leading civilian experts on military manpower—who could have given them precise facts with which to work. My office has talked with each of the following individuals who could have, if given the chance, given Alpern and Fuller a factual picture of the state of today's military: Dr. Richard Cooper at RAND; Martin Binkin, Brookings Institution's noted expert in this area; Martin Hoffmann, former Secretary of the Army; Norman R. Augustine, former Under Secretary of the Army; Donald Brotzman, former Assistant Secretary of the Army for Manpower and Reserve Affairs; Roger Kelley, former Assistant Secretary of Defense for Manpower and Reserve Affairs; David Taylor, former Assistant Secretary of Defense for Manpower and Reserve Affairs; Vice Admiral John G. Finneran, Deputy Assistant Secretary of Defense for Military Personnel Policy; Dr. Al Martin, Director of Accessions and Retentions at the Pentagon; I. M. Greenberg, Deputy Assistant Secretary of Defense for Manpower and Reserve Affairs; and Stephen Herbits, former Special Assistant to the Secretary of Defense and one-time member of the Gates Commission.

I find it inconceivable that a magazine of the stature of Newsweek would feature such a slapdash, sloppy, and slanted piece. If doubts are raised in the minds of potential recruits about the possibility of enlisting—and if unwarranted doubts are raised in the minds of many Americans about the quality of our defense force—Newsweek bears a burden or responsibility that should weigh heavily on its editors.

Mr. Speaker, my analysis follows:

ANALYSIS OF THE DISTORTIONS AND INACCURACIES IN NEWSWEEK'S "THE NEW-LOOK ARMY"

A disheveled, rain-soaked recruit stumbles through the inoculation line at the Army's Fort Dix training camp. He mumbles incoherently and waves his arms. "Hey you, dummy, get outa here. I say get outa here" bawls an angry sergeant—only slightly less disgusted with the young G.I. than with the new-style Army that accepted him in the first place. "He don't even speak English," the veteran noncom complains. "I had one come through the other day, he had open-heart surgery. And there was another with metal pins in his legs. Sergeants may always bitch, but I've been in the Army sixteen years and this is the worst I've ever seen, I swear."

The not-so-surprising complaint of the sergeant about the quality today's recruit versus that of his predecessors 15 years ago is refuted time and again. Newsweek could have talked to Army Chief of Staff Bernard Rogers, who has said today's Army is the best he has seen in the 34 years he has served. Maj. Gen. DeWitt C. Smith, Jr., commandant of the U.S. Army War College and a participant in the D-Day crossing of the English Channel, says today's Army "is far better" than the conscripted force of World War II. Col. Robert Ainsworth, head of the Army recruiting for Wisconsin and upper Michigan, has said:

The active Army has been tremendously successful beyond our fondest hopes in both quality and quantity.

Beyond that, the scene Newsweek described could just as well have taken place in 1957 or 1967 as 1977. There is nothing unusual about a senior noncommissioned officer sounding off on the low performance of a junior enlisted man. It is the age-old complaint that "they broke the mold after they made me."

From boot-camp firing ranges to Congressional hearing rooms to the corridors of the Pentagon, the nation's four-year-old experiment with all-volunteer armed forces is the target of tough questions and mounting criticism. Is it really working? Does it cost too much? Can it stand up to combat? A recent Gallup poll indicated that Americans by a clear 54–36 margin opposed any return to military conscriptions. But the problems of a voluntary force are serious enough to start politicians talking about the draft once again, and President Carter himself said last week that he had an open mind on the subject. "This is something that is constantly under assessment," he told the town meeting at Clinton, Mass. "If I consider as President that a restoration of the draft is necessary for the security of our nation, I will not hesitate one day to recommend it to the Congress."

The All-Volunteer Armed Forces may be the target of tough questions and mounting criticism, but similar questions and criticism could more properly be directed at the lazy journalism of Alpern and Fuller. Most of the griping has come from old-line soldiers and hidebound Members of Congress who have opposed the volunteer concept from the beginning and who refuse to acknowledge the fact it is working. A few longtime critics of the Volunteer Army saw the opportunity to go on the attack during the transition between the Ford and Carter administrations. Unquestioning reporters have rushed to report the "doom and gloom" analyses of those that they

know—or should know—have been predicting the failure of the Volunteer Army since before it went into effect.

Even the Army's sharpest critics begrudgingly admit it has been successful, but then they proceed to pick away at those few shortcomings which legitimately need attention. The only reason "the problems of a voluntary force are serious enough to start politicians talking about the draft once again" is that the critical politicians have been critical all along. With the advent of a new administration, many of these people see the opportunity to erode confidence in the Volunteer Army and seek a return to compulsory service. A new President would seem derelict in his duties if he did not agree to reassess a program which has been subject to some controversy. Furthermore, by using the quote without also noting that no responsible official, including supporters of AVF, has expressed hesitation about returning to the draft in the event of war, the authors blow the issue way out of proportion. I am confident that when President Carter and his staff look at the facts, they will find the volunteer military has been a great success.

> Even high Pentagon officials who continue to tout the all-volunteer force—AVF in military jargon—concede that its prospects are hazy. The program is working as of now . . . but I'm less certain about the future, said Gen. George S. Brown, chairman of the Joint Chiefs of Staff, at recent Senate hearings on AVF's troubles.

Pentagon officials need to look down the road, recognize potential problems, and prepare for the future. The key to the continued success of the Volunteer Army is sound management on the part of the high Defense Department officials. Virtually every top Pentagon official has acknowledged that management is perhaps the single most important element of AVF's continued progress.

> Some critics complain about the fast-rising wages and pensions required to attract and retain personnel—already 58 per cent of the Defense Department's $98 billion budget.

This statement is misleading. Moreover, the statement later in the piece about pay rising "193 percent in the lowest enlisted grades between 1964 and 1973"—giving the reader no further background—is deliberately distorting.

In the years following World War II, the draft was systematically used to hold down recruit pay. From 1946 until 1964—the year selected by Alpern and Fuller—the basic pay of a recruit at the entry level rose a mere $3, from $75 a month in 1946 to $78 a month in 1964. For a recruit, the monthly compensation package in 1964, including allowances, was worth only $133.50. With pay depressed below a subsistence level, it became a national scandal. The process of ending that disgraceful situation provides Alpern and Fuller with the deceptively high percentage used in the article.

After a modest increase in 1965 and long before the volunteer force became national policy, a law was enacted in 1967 which tied military pay increases to civil service increases. Civil service increases were tied to civilian private sector wage hikes in 1962. Virtually every commentator on military pay policy has noted that this legislation, having no relation whatever to the volunteer force, is primarily responsible for increases in the active duty personnel portion of the defense budget. Yet, Alpern and Fuller make no mention of it.

Although the pay increases of the late 1960's were large in percentage terms, in real dollars they simply raised the first-term soldier from the subsistence level to the poverty level. The widespread poverty among junior members of the Armed Forces under the draft was a major factor in the 1971 debate on the pay raise enacted in conjunction with the move toward the volunteer force. The most cursory review of the debates associated with that legislation would have shown Alpern and Fuller that even many opponents of the volunteer force joined in supporting those pay raises in an attempt to end the embarrassing situation of poverty in the Armed Forces. To paraphrase the quote Alpern and Fuller attribute to Moskos: What kind of society compels its young people to serve in enforced poverty while the rest of society avoids the tax burden of paying soldiers a decent wage?

The Senate Appropriations Committee has published a number of charts comparing military with civil service pay. Had Halpern and Fuller read these charts, they would have seen that military pay for the lowest three enlisted grades still lags behind the pay of their civil service counterparts. Given the gap between civil service and private sector pay, Alpern and Fuller would have been more accurate had they described an increasing gap between military entry pay and compensation for similar positions in the civilian sector.

The young men and women in today's military have gotten the same cost-of-living increases, about 5 percent annually, that all Federal employees receive each October. Still, some 62,000 of them are eligible for food stamps and other public assistance.

The authors should have attended Senator NUNN's hearings, rather than quoting his press releases about Dr. King's study. Then, they would have heard Marty Binkin, a renowned expert on military pay policy, testify that military pay at the entry level is now falling behind the rate of inflation. Purchasing power for military personnel has eroded 7 percent since 1972.

Despite all the peripheral information given by Alpern and Fuller, they have ignored one of the most important and well-publicized sets of figures about the draft. Out of our $100 billion-plus defense budget, if we returned to the draft right now, the savings would be about $300 million. If we were to return to the policy of forcing people to serve at substandard pay, thereby reducing recruit pay to the minimum wage, the savings would be only $1.7 billion. For the Army, the estimated cost savings in fiscal year 1977 if we returned to the draft is only $23.3 million. Are these relatively small savings worth the turmoil of a return to the draft? If people depend on Newsweek for this information, they will never be able to make an informed choice, because Newsweek has failed to give them crucial facts.

It is a gross and mischievous deception in an article about the volunteer force to attribute 58 percent of the defense budget to personnel costs without a further breakdown. As a matter of fact, the active duty military personnel share of the Defense Department budget has actually gone down from 31 to 27 percent since the end of the draft. Among personnel costs not relating to the volunteer force are retired pay, $7.3 billion; civilian pay, $16.5 billion; military pay excluding junior enlisted, $21.6 billion; and personnel support, $3.8 billion. All these are fiscal year 1976 figures.

Obviously, civilian wages are not attributable to the volunteer military. Pensions, which have risen dramatically in recent years, are a direct result of policies developed for a conscripted army. They have never been reformed and have virtually no relation to the volunteer force. It is interesting that the supporters of the draft cited by Alpern and Fuller, such as Senators STENNIS and NUNN, have done virtually nothing to assist in reforming the military retirement system, despite repeated calls for legislative reform from the Pentagon and an almost universal belief that the current system is a poor management device. Furthermore, pensions simply do not have a relation to first-term enlistments.

In actuality, the active duty payroll portion of the defense budget has decreased every year since the 1971 pay raise was enacted. That fact is easy to find—for anyone interested in looking.

> Others cite a decline in quality of incoming troops and the growing proportion of blacks in the service—now 22.2 per cent of the Army, twice the black representation in the population at large. Prof. Charles C. Moskos Jr. of Northwestern University, a specialist in military sociology, worries that ghetto youth will become "cannon fodder" and asks: "What kind of a society excuses its most privileged members from defending it?"

The racial question is a vivid scare issue without substance, but it is on the minds of many volunteer Army critics. The criticism is not a valid one. Admittedly, the number of blacks as a percent of non-prior-service enlisted accessions increased significantly from fiscal year 1964 to fiscal year 1974, but it has decreased since fiscal year 1974. This was noted in the DOD transition document. Servicewide, the percentage of blacks in fiscal year 1976 was 16.9, compared to 10.6 percent in fiscal year 1964 and 20.9 percent in fiscal year 1974.

Nonetheless, even if the figures were otherwise, the U.S. Government should not under any circumstances set a quota system or deny equal opportunity to any group. As George Will said in his January 30 column, "Profile of an Army":

> Obviously a moderately larger percentage of blacks than of whites finds that the armed forces provides an attractive opportunity. So what? The Government has no reason—and no right—to worry about whether there are "too many" blacks in the armed forces.

Professor Moskos was far off base in suggesting today's Army, as contrasted to

its draft-era counterpart, makes ghetto youth "cannon fodder." One of the strongest critcisms of the draft was that it forced into the Army—and in many cases the infantry—those from the lower economic class, while their more affluent peers first received various deferments, and even when those were reduced, had the benefit to a disproportionate degree of friendly doctors and lawyers able to spare them from serving.

The percentage of blacks in combat arms in the Army is remarkably similar to their share of the Army population. The black representation in combat arms was 23.4 percent in fiscal year 1976; their representation in the Army was 23.7 percent in fiscal year 1976. The number of blacks in combat arms decreased from fiscal year 1975 to fiscal year 1976.

Leading Members of the Congressional Black Caucus, such as Congressmen PARREN MITCHELL and RONALD DELLUMS, have not hesitated to criticize the paternalism of those who would deny blacks the opportunity to enlist in the Armed Forces. Representative DELLUMS was quoted in the October 17, 1976, Washington Post as saying:

Black volunteers understand what joining the military means. If through the exercise of free choice by individuals, there are more blacks in the service than in the population, we should expect a proportionately greater sacrifice . . .

Why did not Alpern and Fuller provide any indication of those feelings in their article?

Today's Volunteer Force is remarkably representative of the Nation as a whole. The 10 most populous States, with 53 percent of the Nation's male youths, have 53 percent of the recruits; the 20 most populous States, with 75 percent of the Nation's male youths, produce 75 percent of the recruits. The Pentagon's most recent study shows that from a family income standpoint, it is hard to imagine a more representative force: 26.3 percent of families and 26.9 percent of recruits are in the under $8,000 income bracket; 29.3 percent of families and 35.1 percent of recruits are in the $8,000–$13,999 bracket; 22.3 percent of families and 22 percent of recruits are in the $14,000–$19,999 bracket; and 21.8 percent of families and 16 percent of recruits are in the $20,000 plus bracket. These figures show that this is hardly a nation that "excuses its most privileged members from defending it," as is so glibly suggested.

More bothersome are demographic trends that indicate that there simply may not be enough young volunteers available in future years to maintain the armed forces at their authorized level of 2.1 million—800,000 in the Army alone. Army Reserve and National Guard units are already nearly 100,000 men short of full strength. In a crisis, one Senate report estimated, it would cost an astonishing $29 billion to raise current force levels to those of the Vietnam era. And with the Selective Service System reduced to a single vestigial office in Washington, it would take four months just to get the first of a new crop of draftees into basic training.

Newsweek properly pointed out that the pool of potential volunteers will shrink in coming years. This is a problem which can be managed, and DOD manpower officials have testified that they are looking at the several options available now to maintain proper strength levels. The active duty recruiting record to date is a good one. However, I am sure there are a number of people at the Pentagon who would not mind seeing the volunteer concept scuttled, if for no other reason than that a draft makes it easy to expand forces without a major public debate.

The Senate report quoted above by Newsweek was prepared by a strong critic of the volunteer concept. The $29 billion figure is speculative at best. Beyond that, it ignores the fact that any cost would be draft related and irrelevant to the volunteer force. It is unfair to suggest otherwise. Alpern and Fuller also showed their bias by taking the worst case estimate that military strength would have to be raised from 2.1 to 3.5 million, an increase two-thirds again the size of the current force. It is misleading to present a worst case without presenting any of the more realistic assessments accepted by the national security community.

There is justification for preparing a standby draft mechanism in the event of armed conflict. In my opinion. Selective Service System supporters deliberately downplay its ability to work draftees through the system. There is no reason why it should take 4 months to get people into the pipeline. When we became involved in World War I in 1917, the first registration was held 17 days after enactment of a draft bill and the first inductions came within 4 months. In 1940, only 63 days elapsed between draft law enactment and first inductions. This was done with virtually no standby planning organization and without maintenance of any standby machinery. Why should it take 4 months today? The structure of a new system prepared by DOD during the Ford administration is waiting to be implemented. It can supply people as fast as military reception stations can process and begin to train them. Slots can be filled as soon as is possibly needed.

THE QUESTION OF QUALITY

Until recently, AVF was doing quite well. Launched by President Nixon in 1973, after sentiment against the war in Vietnam made the draft politically untenable, the system has managed to attract enough recruits to active duty—in part because of high civilian unemployment. Aptitude-test scores run higher than in the larger, draft-fed Army of the Vietnam era. The number of high-school graduates—another index of quality—also held steady through 1975 at 62 per cent, though it has now dropped to a worrisome 45.5 per cent. In recent combat exercises, some units of the new Army have excelled. The 101st Airborne Division successfully airlifted 3,000 men, 348 helicopters and 2,500 trucks to Germany in one Nato operation. The "almost unanimous" assessment of top generals, says Army Secretary Clifford L. Alexander Jr., is that "this is the best Army they've seen."

Army Secretary Clifford L. Alexander, Jr.'s statement that it is the "almost unanimous" assessment of top generals that "this is the best Army they've seen" should have opened the paragraph on quality. It was preceded by a lot of misinformation. The very first sentence of the paragraph is in error. The AVF is still doing well. Distortions and a lack of information, rather than fact and analysis, have marked the current debate in the media.

By using the last quarter' figures, Alpern and Fuller gave only a snapshot of the overall picture, and an inaccurate one at that. Recruiting is a highly seasonal enterprise, and the high enlistment period comes in the summer months after high school and college graduation. A "snapshot" taken in those months would show a highly optimistic picture. Senator JOHN CHAFEE, in remarks which appear in the March 30 CONGRESSIONAL RECORD, raised some excellent points on this question:

During the final 3 months of 1976, recruitment dropped to 95% of the goals. Some suggest that this represents a new trend leading to the conclusion that 4 years of success have ended. But brief periods of recruitment difficulty have occurred in the past with no permanent consequences.

In fact, with a 5% recruitment shortfall in late 1976, the military fell only one-third of 1% below desired force levels.

Another measure of recruiting strength, from superficial analysis, is the number of recruits who have signed up to join the military at a later date when their training slot becomes available. If recruiting shortfalls are significant, future recruitment presumably would be very slow. Yet, the Army has a "delayed entry pool" twice last year's level and seven times the level of January 1974.

Maj. Gen. Eugene Forrester, commander of the U.S. Army Recruiting Command—USAREC—told me last week that there were 48,479 recruits in the delayed entry pool as of April 11. Over 70 percent of the recruits needed for the week of July 4 are already committed to enter under this program.

Anti-Vietnam war sentiment played a part in the decision to end the draft, as the authors said. However, there were many of us who had long-held feelings that the draft was inequitable and unjustifiable in a society based on individual freedom and equal opportunity for all.

Moreover, the modern controversy over selective service was not initiated during the Nixon administration, as Newsweek intimates, but by Adlai Stevenson in his 1956 campaign. Interestingly enough, Stevenson's volunteer force proposals were opposed by Nixon at that time. In 1964, BARRY GOLDWATER proposed a volunteer force. Even though the Vietnam escalation had not yet begun, the President did not directly challenge GOLDWATER on this. Instead, he ordered a DOD study on the feasibility of a volunteer force. While the results of the study—which were generally favorable to the volunteer force—were submerged in the burgeoning war, the movement to end the draft continued to gain bipartisan support. In 1968, an end to the draft was pledged not only by Nixon, but by GEORGE MCGOVERN during his belated primary campaign. Again in 1972, support for the volunteer force was bipartisan, so both Nixon and MCGOVERN supported an end to conscription.

Many people forget that for most of the Nation's history, we have had a volunteer military. The draft is a 20th-century phenomenon, and in only 30 of the 200 years of our history have young men been subject to conscription. We may

have grown accustomed to it, but that does not mean that it is fair or that it must be perpetuated. It is typical of government to create a bureaucracy and refuse to eliminate it when it is not justified.

The authors leave a wrong impression with the readers by selecting unemployment as their only example of why enough recruits are being attracted, even while using the phrase in part. Using journalistic license doesn't excuse the omission of the fact that most experts feel the level of unemployment is an overrated factor in attracting sufficient quantities of high quality recruits. Vice Adm. John Finneran, Deputy Assistant Secretary of Defense for Military Personnel Policy, testified recently before a House subcommittee that 74 percent of all volunteers were either working or in school when they enlisted. The December 17 DOD document offers specific information showing negligible impact:

Rough estimates indicate that for every 1 percent reduction in the general unemployment rate, another 21,000 individuals in the qualified and available military manpower pool would be able to obtain civilian employment. Taking a worst case approach—namely, that each of these individuals is in such an attractive job that DoD cannot compete for them—the qualified and available pool is reduced by 21,000. For example, assume that general unemployment is reduced from 8.1% to 5.1%. The impact on supply would be a reduction of 63,000 males, reducing the male supply in the 1985–1990 adjusted pool from 0.919 to 0.856 million males. The revised demand/supply ratio then becomes 1 in 2.9, about the same ratio experienced in the successful 1975/1976 period.

These projections, when combined with past experience, indicate that enlistment supply need not be a problem, even during the mid and late 1980s. To the extent that there is a problem, its resolution comes in (1) making more efficient use of the current supply pool (i.e., relaxing physical standards for enlistment, etc.) and (2) reducing demand (i.e., reducing attrition, more females, etc.).

Newsweek suggests the level of high school graduates has dropped to a worrisome level; in fact, the servicewide high school graduate comparison between 1964 and 1976 shows the services are doing quite well. In 1964, 68 percent of volunteers had graduated from high school; in 1976, the figure was 69 percent. Soldiers with 1 or more years of college now make up 11.5 percent of the Army, compared to 12 percent in fiscal year 1972. The number of volunteers with test scores in the top two of four mental categories has risen from 42 percent in 1964 to 44.1 percent in the most recent quarter. Perhaps more important, the number in category IV, the lowest mental category, has been dramatically reduced—from almost 20 percent in fiscal year 1974, and an average of 22 percent between 1960–64, to about 8 percent today.

When they discuss the quantity and quality of recruiting, Alpern and Fuller ignore the fact the recruiting budget has been slashed every year, at the direction of the House Defense Appropriations Subcommittee. During debate on the fiscal year 1976 defense appropriations bill, it was pointed out how difficult the committee was making it for the recruiting force. The committee members—many traditionally opposed to the AVF—responded that they had great confidence that the sums they were recommending were adequate. In view of the cutbacks mandated in the appropriations legislation, it is remarkable the services have done as well as they have in attracting a high quality force.

But the view from the field is not always so self-congratulatory, especially in the training camps where the newest recruits are stationed. "We just don't get the quality any more," said Sgt. George Griffin recently as he watched a squad of infantry trainees at Fort Benning, Ga., display antics worthy of the Keystone Cops. One man took careful aim with his M–16 rifle and buried its muzzle in the dirt. Another—against orders—peeked over the window ledge of a building under attack and got clouted in the head by an "enemy" grenade. And a third took cover behind a pine tree so scrawny "it could be split by a peashooter," the sergeant groaned.

This paragraph is very vivid—but very one-sided—journalism. An advocate of a particular position—be he reporter or politician—can always find someone to say what he needs to justify a stand or an assumption. Anyone who thinks "the view from the field, * * * especially in the training camps where the newest recruits are stationed" ever has been self-congratulatory—or ever should be—does not know the military very well. Boot camp is where the young men and women are developed as soldiers and as individuals. Basic training would not be needed if they all possessed the necessary skills and maturity on enlistment. Any sergeant who trained recruits and draftees 5, 10 or 20 years ago—and any individual who went through that training—can recount instances similar to those cited in the Newsweek piece. The point is this; basic training is meant to turn them into soldiers. Commanders today say they have never seen a better force.

Quick exits, however, cut the number of troublemakers. The result has been a drop in reported cases of drug abuse (from 17,000 two years ago in the Army, for example, to 15,000 today) and in incidents of racial violence (59 in 1973 against only three last year). "I get a guy who says, 'I can't stand whites,' I just wash him out," reports Col. Jack Farris, who runs infantry training at Fort Benning.

While Newsweek correctly notes the reduction in problems the Army has faced by quickly discharging troublemakers, the magazine is guilty of low journalistic ethics in its deliberate distortion of the remarks of Col. Jack Farris. As Colonel Farris told Newsweek in a letter to the editor, he was severely misquoted. His actual statement was this:

I get a guy who says, "I can't stand whites" or "I simply can't live with blacks." I just wash him out. There's no use waiting for trouble to begin.

To the credit of Tony Fuller, he has personally apologized to Colonel Farris. Colonel Farris' office told my staff that Tony Fuller had recorded the quote correctly, but that an editor had truncated the colonel's remarks.

The problem with the paragraph goes beyond that, though. Newsweek, in noting only a small reduction in drug abuse, leaves the eyebrow-raising impression that drug use is still excessively high.

The authors do not note two important facts: Drug use has shifted from hard to soft drugs, and the number is high because self-help programs are meeting with great success. Trust in the Army's handling of drug abuse is encouraging many more young offenders to turn themselves in.

Also unmentioned are many other positive factors. For example, between fiscal years 1974 and 1976, absence-without-leave rates were down 48 percent—and are the lowest since 1960—desertion rates were down 59 percent and are the lowest in 10 years. Crimes against property are at the lowest level since early 1971 and crimes of violence are the lowest in recent years. Careful selectivity portrays unbalanced information.

MORE WASHOUTS, LESS TROUBLE

Complaints come from almost all levels in the chain of command. "Some of these guys you can explain things to 50 times, yell and scream and they still don't understand," says Col. Ross Franklin, a staff officer at Fort Benning. "We can train all the . . . cooks you want, but when it comes to (handling) some of these (sophisticated) weapons it's a different story." A Senate study found that 37 per cent of all military recruits are now mustered out as unwilling or unfit before their first hitch is over, as against 25 per cent four years ago.

Alpern and Fuller once more give a distorted view of what the Army is doing. There is a higher attrition level among first termers because the Army is trying to identify problems and avoid greater ones down the line. The expedited discharge program was put into effect in 1974 at the urging of the House Appropriations Committee, which suggested the services would save money by discharging marginal performers in their first year of service. The Army feels those with early discharges are more likely to have positive reflections about their military experience than their draft-era counterparts, who often returned home feeling stigmatized and bitter about their service. Disciplinary problems are down, and the men are not burdened with the bad discharges that often saddled them with problems in civilian life because they were unable to fit into a system in which they were forced to serve.

Newsweek gives no credit to USAREC's positive efforts to upgrade quality, and thereby reduce early attrition. As I mentioned earlier, the level of non-prior-service high school graduates is up slightly from the fiscal year 1964 period. Perhaps more important, the number of individuals joining the Army in the lowest mental categories is decreasing. No category IV non-high-school graduate is permitted to enlist.

It is also important to keep in mind that the concept of attrition is new. During the draft, soldiers who did not measure up had to be retrained and continued to have problems throughout the period they were forced to serve. The result was an overabundance of forcibly retrained misfits who created problems for their peers, for the Army and for the Nation's defense. This new mechanism gives commanders a new option which strengthens the overall quality of their

units and reduces disruptions and disciplinary problems. The evidence suggests some commanders may be too liberal in applying this policy, but there is also evidence that the Army is refining its application and making it the effective tool it can be. At USAREC last week, I was told of a number of units that have attrition rates almost identical to those of the draft era. Overall, the implication left by Alpern and Fuller that high attrition is worse for the Army is exactly opposite of measureable experience.

The number of blacks in Army green has more than doubled since 1964. Minorities, including Hispanics, constitute almost 30 percent of today's Army. "It will be a black man's Army and black men will have to fight the wars," griped black Pfc. Gregory Young recently in a mess hall at Fort Campbell, Ky. But Army Secretary Alexander, himself black and a National Guard veteran, argues that the shifting racial balance is less a problem for the military than an indictment of the society that it serves. "There still is discrimination out there—in case anyone has forgotten," he says, flatly ruling out the idea of imposing racial quotas on recruits in the future.

Secretary of the Army Cliff Alexander best responded to those who complain about the number of blacks in the Army by saying it is "immaterial. Who is going to play God and set a quota?" Young black males have the highest unemployment rate of any segment of the American population. Many of them have recognized they will be given equal opportunity for advancement in the Army and will be given the chance to learn a skill. Today there is also an active effort among the services to increase their black officer content. Such an effort has long been needed, and I am pleased it is underway now.

Few Americans today enlist out of patriotism or a yen for the military life. For some it is simply the last refuge from a bad civilian scene. "My girl's old man wouldn't let me see her and I almost slugged the guidance counselor at school," said Bobby (Munch) Croyts, 17, a Pittsburgh highschool dropout at Fort Dix." "The Army ain't as rough as the street," explained fellow recruit Juan Hernandez, 17, of Cleveland. Many more are attracted by increasingly generous pay and allowances. A private with two years' service receives $6,915 a year, up to $5,400 in Federal matching funds for education after discharge and the prospect of a pension that provides half pay after twenty years' service. "I went downtown to Newark and there was a longer line at the Army office than at the welfare office," recalled recruit Carl Walker, 18, at Fort Benning.

In this paragraph, Alpern and Fuller would have us believe a large proportion of enlistees sign up to escape a "bad civilian scene." In reality, the number is miniscule.

The facts are these. A 1976 Department of the Army survey found the main reason for enlisting was educational opportunity or job skill training—49 percent. The opportunity to travel made up another quarter of enlistments. Pride in country applied to 12 percent, about the same as 5 or 10 years ago. Only one in 20 enlisted for economic opportunity. Other high ranking enlistment reasons included challenge and adventure, the chance to do something different, interest in an Army career, financial benefits and job security.

Pay is clearly more attractive than it was a decade ago, but why did Newsweek cite the $6,915 salary for a married private with 2 years of service, instead of the actual pay rate at the entry level? And why did Newsweek not add that few recruits actually receive a full salary, since they have to live in open bays rather than draw housing allowances?

As for retirement pay, studies have shown that few enlistees join because of the retirement benefits they would be eligible for if they put in 20 years in the service. The average 18-year-old is not thinking that far down the line. It would be futile in any case, since Army policy limits reenlistment for a second term to only a small share of first termers. Grouping retirement costs as part of the AVF is one of the most superficial and blatant misrepresentations used by draft advocates.

A SINKING SHIP?

Life in the volunteer Army is a mixture of old and new. Much-heralded experiments involving long hair and barracks with semiprivate rooms are fading away. And old-fashioned alcoholism is now as great a problem as drug abuse. But with more men entering at age 17 and 18, rather than in their 20s, a summer-camp air oftens prevails and sergeants complain about "baby-sitting." Stress on the financial rewards also has stirred interest in unionization—a potential threat to discipline, Defense Secretary Harold Brown warned last week—although supporters say their main concern is wages and benefits.

We have another set of misguided assumptions and observations erroneously tied by the authors to the volunteer force. The age issue, for instance, is a bogus one. The average age of today's soldier is not that much different from that of his draft-era counterpart. There is no more "baby sitting" by sergeants now than there was 5 or 10 years ago. Dr. William King, the AVF opponent, said in his report.:

The military services require young and vigorous personnel, thus necessitating personnel turnover and continuing requirements for new enlistees from the 17–21 age group.

Alcoholism is a careerist problem, and it is been one as long as we have had an Army. This reference again reflects the lack of precision exemplified throughout the piece by the Newsweek writers.

It is also incorrect to tie unionization interest to the Volunteer Army. Every European army with a union relies on conscription to fill its ranks. England and Canada, however, have voluntarism and no unions. One thing we can be sure of—if we have a draft, the pressures for unionization will mount.

Pay has already risen sharply—193 per cent in the lowest enlisted grade between 1964 and 1973—and the cost of providing such competitive salaries is drawing yelps from Capitol Hill. Georgia's Sen. Sam Nunn complains that AVF is a "sinking ship that is becoming increasingly costly to keep afloat." Rep. Les Aspin of the House Armed Services Committee warns that the escalating cost of military pensions ($34 billion a year by 2000, he says) could eventually produce "a New York City type of fiscal problem." Pentagon leaders reply that Congress itself wanted to raise military pay scales, even before AVF was born. Still, recruiting is costly and the Pentagon is planning an $86.6 million advertising campaign in 1976. Gen. Bernard W. Rogers, Army chief of staff, said last month that it might take up to $750 million in special benefits to bring the undermanned reserves up to strength.

I discussed the pay issue earlier in this analysis and will not repeat the points here. The one legitimate point is that pension reform is in order. A bill has been pending on Capital Hill since 1974 to do just this.

Recruiting is not inexpensive, but we still have recruiting—and recruiting costs—even if there is a draft. The Army will always need to attract 3-, and 4-, and 6-year enlistees for those jobs which require long training. The important thing is that a successful recruiting program reduces costs. If high quality recruits are brought into the services in sufficient numbers, attrition and costs will go down and retention, professionalism and stability will increase. From personal observation, I have concluded that we have a top-notch recruiting operation in USAREC. Gen. Gene Forrester has done a remarkable job, especially considering that congressional budget cuts have reduced the number of recruiters by 1,300 from fiscal years 1975 to 1977. In early 1975, criteria for recruiting personnel at all levels were strengthened, and the recruiting command now has the choice of the best Army personnel. This may be the reason the Army has been able to upgrade its recruit quality so substantially over the past couple of years while still nearly meeting the required numbers of recruits. General Forrester notes that fulfilling their desired number of nonprior Service high school graduate enlistees can mean an annual savings of $135 to $150 million to the Army. There has been criticism of recruiting adevtrising. Yet, USAREC points out that it spends only $165 per accession in its advertising. Yet, USAREC points out that spend twice that, $330 per accession.

General Forrester is a strong, dynamic leader, and I am impressed with what he has done as commander of USAREC. He told me one of the Newsweek reporters talked with him before the story was written. It is extremely unfortunate that the only part of the interview Newsweek chose to use was a quote attributed to "one top general" about the possible use of women in combat situations. While not as serious as the distortion of Colonel Farris' quote, the selected reference does not reflect Forrester's interview.

The reserve problem is a real one. The transition document noted that the bulk of the shortfalls are in the Army Reserve and Army National Guard. They currently have a 44,000 shortfall, with an expectation this will rise to 108,000 by fiscal year 1978. The Individual Ready Reserve—IRR—has even bigger problems. IRR strength is expected to drop from 469,000 in fiscal year 1976 to 398,000 in fiscal year 1982. In light of the absence of the draft and the emphasis on the Total Force concept, immediate attention by Pentagon officials is warranted.

Admiral Finneran told the Defense Appropriations Subcommittee recently that Pentagon manpower planners had concentrated on meeting active duty strength levels until just recently. They worried less about the Reserve Forces, because there were still draft-induced

volunteers, as well as draftees who had completed their active duty, who were fulfilling their 6-year obligation. New management initiatives are needed immediately in this area. In its transition paper, the Pentagon said more resources and DOD management attention will be required. The Army has included in its fiscal year 1978 budget both manpower and funding to place full-time recruiters and trainers in Selected Reserve units. Admiral Finneran said other options are under study.

The $750 million figure remains unsupported, and no one has outlined what it contains. The amount seems unjustified in light of the management options available before that money would have to be spent. Such alternatives as extending the reserve obligation, making it equal for women and men, and developing special programs in cooperation with active units or with local officials for community improvement projects are a few of the many options that could be implemented inexpensively and make the reserves more attractive and more effective. I am convinced that a reserve draft need not be considered, since the Pentagon has not even tried these other means to rejuvenate the reserves.

Part of the Pentagon's recruiting problem is the antimilitary sentiment spawned by Vietnam. "I've had men spit on," reports recruiting Sgt. Reginald Burton. A more serious concern for the future is purely demographic. Martin Binkin of the Brookings Institution estimates that the number of men turning 18 will have dropped 15 per cent by 1985 and 25 per cent by 1992. If this happens, he calculates, one of every three qualified and available men would have to volunteer just to maintain the present force level—an unlikely prospect if the economy improves.

One glib quote, and another sweeping generalization, simply do not make it. All indications are that the "antimilitary sentiment spawned by Vietnam" has diminished greatly. A March Louis Harris poll showed the public's confidence in the military had risen from 23 to 27 percent in the last year. Only medicine, higher education, the White House, the U.S. Supreme Court, organized religion and television news ranked higher. While not ranking at the top, the military does outrank the press, federal, state and local government, Congress, organized labor and major companies in the public's perception.

The resurgence in popularity of the Army's Reserve Officers Training Corps is another positive sign. ROTC participation fell from 177,000 at its peak in 1967 to a low of 33,000 in 1973, when anti-Vietnam sentiment was highest on the Nation's college campuses. For the third consecutive year, ROTC enrollment has increased, up by about two-thirds over 1973. Campuses that dropped ROTC because of antiwar demonstrations are welcoming the program back. These include Princeton, Dartmouth, and MIT. ROTC cadets are of a higher quality too, with 36 percent making the dean's list. All of this is clear evidence of the drop in antiwar feeling.

What are the alternatives? One suggestion is to lower the required strength of the armed forces, or the standards for enlistment. "The services discourage recruitment of high school dropouts because up to 40 percent are washouts," says Aspin. "For every ten (they) refuse, they are losing six potentially successful servicemen." He also proposes taking men with lower IQ scores, arguing that "they need a certain proportion of low-IQ recruits to do jobs that present little challenge."

In their approach to alternatives to AVF, Alpern and Fuller again put the least desirable alternative first and put it in the least desirable light. They look at only half the picture, completely ignoring the problem of people who are overqualified for positions.

Just what are the alternatives? At this point, reducing the strength of the armed services does not seem advisable. However, small adjustments in standards for enlistment could significantly broaden the pool of potential recruits. Requirements, such as height, were revised during the draft era, and there is no reason why they could not be today. A RAND study has shown that if maximum and minimum weight limits were relaxed 10 percent, 5 percent more men would be eligible to serve and the annual shortfall of quality recruits would be reduced by 11,000. The number of category IV high school graduates could be increased. The CBO's January 1977 analysis of manpower costs noted that category IV high school graduates were less likely to drop out of the service than nongraduates in the first three mental categories. Only 28 percent of them leave the service in the first 3 years, Pentagon officials say. This compares well with the 19 percent level for high school graduates in category I.

Another idea is to take in greater numbers of women and give them a broader range of assignments. Already, women account for 6.6 per cent of all volunteers in the Army—up from 1.1 per cent in 1970—and the women are drawing all but the most dangerous combat assignments. "The bottom line on that is whether we're ready to see women coming home in body bags," says one top general. "I don't think we are."

As the military becomes more technologically advanced, more jobs open up for women. Except in some physical requirements, women are doing as well as men. Their number in the Army has increased six-fold since 1970, as Newsweek said. However, that is still only 6.6 percent of the Army's total force. Servicewide, the figure is about 5.5 percent. There will be 120,000 women in the military by the end of 1977, but the CBO suggests the number could be increased by an additional 100,000 over the next 5 years. That would still put them at less than 10 percent of the total force.

Alpern and Fuller's approach is again deeply troubling to any fairminded reader. Their review of alternatives, beyond those which to any reader carry negative implications, is unbelievably cursory. They completely overlook a variety of other options. For instance, CBO found 95,000 uniformed personnel in commercial and industrial operations and said that conversion of half those positions to civilian or contractor personnel would permit a reduction of 50,000 in military manpower with no harm to combat strength. The annual enlistment requirement would be cut by 10,000 in the long run.

CBO also proposed the services reconsider their position that no more than 40 percent of the enlisted force should have more than 4 years of service. Reenlistment is denied to many enlisted personnel who would like to continue their military careers. CBO pointed out that the reenlistees have increased productivity because of their experience. Allowing additional extended terms of services without retirement would stabilize the force.

A Defense Department study is underway to determine whether there might be a role in some job slots for those with disabilities who would not otherwise qualify for military service. Consideration is also being given to revising present training procedures. Some 18 percent of our Armed Forces at any one moment are involved in training as students, instructors, or support personnel. Others are in transit or on temporary assignment. The average stay on a base is only about 15 months. CBO has said that minor revisions would permit a significant number of these individuals to fill needed job slots. The key is good management. As DOD officials said in the transition document:

An alert, flexible, and competent management approach promises to be the best guarantee for the successful sustainment of the AVF.

"PEOPLE ARE TALKING"

Finally, there could be a return to the draft in some form. Senate Armed Services Committee chairman John C. Stennis concedes that such a move would be politically impossible now, but he predicts that the public will eventually see it as the most practical way to get a credible military force. "It's a process of a year or two, but more and more people are talking about it, Stennis says. Senator Nunn has proposed a Vietnam-style lottery to choose recruits equitably, or a mandatory period of national service that would permit men to choose between military duty and Peace Corps, Vista or other public-service work.

The two men quoted in this paragraph are longtime opponents of the volunteer concept. Beyond that, Senator STENNIS has acknowledged his consistent resistance to the volunteer concept, but he has said the "matter is not proven yet" as to his hope that the selective service will return.

Senator NUNN's views are well-known, dating back at least to March 1973 in his first term in the Senate. As a proponent of national service, it is understandable that he has called the hearings and said the things he has. The unfortunate thing is that Newsweek has ignored all the favorable comments on the Volunteer Army made by experts testifying before the Nunn subcommittee. To be specific, Dr. Richard Cooper has spent 4 years as head of the defense manpower division of Rand and is the country's leading expert outside of the Department of Defense on military manpower. He testified before the Nunn subcommittee, but was completely ignored in the article. The other top civilian expert, Marty Binkin of Brookings, has told me he was misquoted by Alpern and Fuller, who managed to side-step the positive thrust of his remarks.

Such a program could cost up to $50 billion, however, and critics, including Senator William Proxmire of Wisconsin, argue that

it would be a nightmare of administrative and disciplinary problems. Less costly and controversial might be a draft for the reserves only, with less than six months of active duty—a suggestion outlined last month by Amy Chief of Staff Rogers.

A mandatory national service program, as favored by Senator NUNN and others, would be a nightmare, as Senator BILL PROXMIRE has said. Dr. King has claimed that a minimally coercive—just what is meant by that euphemism?—national service system could cost less than $8 billion annually. Compulsory service, he said, would cost more than $16 million. Rand researcher Cooper puts the likely figure at $25 billion or $40 billion. Others say it could cost as much as $50 billion.

Much has been written in opposition to a compulsory national service program, but none is referred to here. I, for one, believe a program of mandatory national service is completely counter to the spirit of individual freedom fostered in the nation over our 200 years of existence—and the American spirit of voluntarism which inspired President Kennedy to propose such programs as the Peace Corps and Vista. To the degree that these programs have been so successful, it is because they have attracted men and women of all ages who wanted to make a contribution to their fellow human beings at home and abroad. They have been committed, enthusiastic and involved. No mandatory program is going to come close to matching the record of achievement and the degree of good will volunteers have brought wherever they have been. Our Nation was founded on the premise that the state should serve the individual, not the individual the state. Mandatory national service is a dangerous concept to even contemplate for a nation with our commitment to personal freedom. Its implementation goes against everything the Nation stands for, and I hope those flirting with the idea will weigh all of its potential consequences.

None of these solutions is ideal, but the evidence suggests that AVF will need help from somewhere before very long.

The authors' closing cliche is ironically true. To continue to succeed, the AVF needs constructive criticism from the outside and good management from the inside. The Pentagon is showing a willingness to meet the management challenge head on, though it still has some distance to go in this regard. What is tragic is that AVF is not getting constructive criticism; rather, it is getting sandbagged by an unfair story in a magazine many of us have come to respect. One can only wonder what Newsweek was trying to accomplish in its distorted presentation.

VETERANS GROUPS SUPPORT BILL TO DENY BENEFITS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. HAMMERSCHMIDT) is recognized for 15 minutes.

Mr. HAMMERSCHMIDT. Mr. Speaker, a few days before the Congress recessed for its district work period I introduced a bill that would deny automatic veterans benefits to those individuals who receive upgraded military discharges under the reduced standards of the Carter special review program. I am reintroducing that legislation today, with additional cosponsors totaling 21.

I might also add that this legislation has received the specific endorsement of more than a half-dozen major veterans organizations, even though we have not yet reached the point of scheduling committee hearings. This is an indication to me of the strong backing this bill will have among the veterans of this country, and I also believe the great majority of our citizenry will applaud it as just. I emphasize again that my legislation is not designed to deny any of the affected veterans the benefits they would have earned if there were never a Carter special review program. Recipients under the program will be able to petition the Veterans' Administration for an individual review of their case, using traditional standards. Those veterans, for instance, who had a meritorious case and were being stymied by the backlog of existing Discharge Review Boards would be able to qualify for benefits.

But I must emphatically restate my strongly held view that the military discharge system, even during Vietnam, has been a fair system. Consequently, it would be wrong to extend veterans entitlements to many thousands of people who would not be eligible for them under the standards that millions of others have been judged, and have met. As an example, under the Carter program, it is not only conceivable, but likely, that an individual who deserted years ago, and remained away from his unit until this month, could be attending school using veterans benefits by next month. This deserter, who could easily qualify for an "automatic upgrade" under the Carter administration's giveaway criteria, will be enjoying all the benefits that his military counterparts earned through discipline and sacrifice. And the irony is that honorably discharged veterans, who were deserted by these others, are now going to be among those required to foot the bill, through taxes, of putting the deserter and nonperformer through school, as well as having to make room for them at the Veterans' Administration hospital. This is ludicrous, and I am happy to note that the major veterans organizations, and so many of my colleagues, feel as strongly about it as I do.

The veterans of this country are understandably angry and frustrated by the priorities of this administration, and I cannot feel any other way myself. Perhaps the most poignant comment among the many letters I have received came from Disabled American Veterans National Commander Frank J. Randazzo, who wrote asking:

Just whose wounds are being "healed" and whose wounds are being "rubbed with salt" by President Carter's preoccupation with the welfare of Vietnam-era draft evaders, military deserters, and holders of less than honorable discharges?

Commander Randazzo went on, with some very eloquent insight, to point out that:

Compassion is a noble sentiment but it should not be lavished in a capricious, unjust fashion. Do you have any doubt as to the reaction of the Carter Administration if the DAV should request that all pending claims for increases in VA service-connected disability compensation benefits by Vietnam combat-disabled veterans be "blanketly" approved?

R. D. "Bulldog" Smith, National Commander of the VFW, wrote me that:

It is inconceivable that we should reward those who have disgraced this Nation and themselves while at the same time the unemployment rate among honorably discharged Vietnam veterans is inordinately high. . . . The President's reduced standards criteria makes a mockery of the honorable discharge and is an affront to those who possess such.

C. L. Kammeier, executive director of the Marine Corps League, mentioned that one single chapter of his organization collected more than 20,000 signatures in opposition to the Carter pardon-amnesty, program, and indicated that organization's belief that my legislation is in "the best interests of this Nation."

Thomas A. Heaney, the national president of the Fleet Reserve Association, pointed out that the majority of the members in that organization have served in two or more of our Nation's wars, and wrote that:

As military careerists we are proud of the service we render to our Nation in peace and war. We are even more proud of the service performed by millions of Americans who have answered their Nation's call in times of need. We feel that the President's programs for amnesty and military discharge review are a slap in the face of those who served honorably.

Mr. Heaney went on to wonder why an administration that does not support a meaningful jobs for veterans program or the continuation of the GI Bill can justify spending tax dollars for the military discharge review program.

Harold B. Say, legislative director of the Veterans of World War I, noting that costs for caring of veterans have increased at a time when the Veterans' Administration budget has faced difficulties, stated that the Veterans of World War I "Feel that to treat ex-service people who dodged or evaded duty on the same basis as veterans with honorable discharge would be highly unfair to the veteran who carried out his orders."

Mr. Speaker, these endorsements of my legislation speak for more than 3 million citizens, all of whom have served our country honorably and well. If we also consider that the American Legion has condemned the principles of the Carter discharge program in a letter to Secretary of Defense Harold Brown, while postponing legislative action pending a meeting of their executive committee next week, this means that more than 6 million veterans have already expressed their adamant concern.

I thank the leaders of these veterans' organizations for their letters of support, and I wish to insert the letters into the RECORD at this time. I would also like to publicly express my hope, given the great interest already shown, that the Veterans' Affairs Committee will hold hearings

immediately on this most important and timely matter. The letters follow:

DISABLED AMERICAN VETERANS,
Washington, D.C., April 15, 1977.

Hon. JOHN P. HAMMERSCHMIDT,
U.S. House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN HAMMERSCHMIDT: On behalf of the 530,000 members of the Disabled American Veterans I wish to inform you of the unflinching support of our organization for H.R. 6136, a bill which you recently introduced in the Congress. This measure would prevent the automatic granting of veterans benefit entitlement to those individuals who will have their less than honorable military discharges "upgraded" by President Carter's special discharge review program.

Our endorsement of this bill stems from the same feelings and beliefs which prompted your sponsorship—a desire to insure that those Vietnam Era veterans whose military service was less than honorable are not placed on an equal footing (for VA benefit purposes) with those men and women who served this Nation faithfully, honorably and well. Nor do we believe it fair that less than honorable service Vietnam Era veterans should receive greater consideration from their government than did those veterans with similar discharges from prior wars.

H.R. 6136 would not deny VA benefits and services to Veterans whose discharges have been upgraded by President Carter's special program, but only required that any VA benefit entitlement sought by these veterans be governed by existing laws and regulations.

Quite frankly Mr. Hammerschmidt, the DAV is hard pressed to understand this most recent gesture on the part of President Carter. Compassion is a noble sentiment but it should not be lavished in a capricious, unjust fashion. Do you have any doubt as to the reaction of the Carter Administration if the DAV should request that all pending claims for increases in VA service-connected disability compensation benefits by Vietnam combat disabled veterans be "blanketly" approved?

There is no doubt in my mind and it leads me to ponder on just whose wounds are being "healed" and whose wounds are being "rubbed with salt" by President Carter's preoccupation with the welfare of Vietnam Era draft evaders, military deserters and holders of less than honorable discharges.

We in the DAV are therefore most heartened when a Federal legislator publicly voices a concern for what is right, just and equitable. Your sponsorship of H.R. 6136 and the leadership role you have assumed in this matter indicates that you are such a legislator. Please be assured that the DAV National Membership both supports and appreciates the stand that you have taken on this very important issue.

With warm personal regards, I remain,
Sincerely yours,

FRANK J. RANDAZZO,
National Commander.

VETERANS OF FOREIGN WARS,
Washington, D.C., April 15, 1977.

Hon. JOHN PAUL HAMMERSCHMIDT,
Ranking Minority Member, Committee on Veterans' Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. HAMMERSCHMIDT: The Veterans of Foreign Wars of the United States applauds your introduction of H.R. 6136 with more than 20 co-sponsors, to amend Title 38 of the United States Code to deny veterans' benefits to certain individuals whose discharges from service during the Vietnam Era, under less than honorable conditions, are administratively upgraded under temporarily revised standards. However, we believe your bill should be amended to further deny veterans' preference in Civil Service employment and participation in veterans' jobs programs administered by the Secretary of Labor. It is inconceivable to me that we should reward those who have disgraced this nation and themselves while at the same time the unemployment rate among honorably discharged Vietnam veterans is inordinately high.

Millions of Americans in war and peace have demonstrated their patriotism and honest and faithful service in defense of this nation, and such service is attested to by an honorable discharge. The President's reduced standards criteria makes a mockery of the honorable discharge and is an affront to those who possess such. Our current Resolution No. 406, entitled "Character of Discharge", passed by the voting delegates to our last National Convention held in New York City in August of 1976, enjoins the Veterans of Foreign Wars to commit the full force of our organization in opposition to lowering the requirements for an honorable discharge, or to demean in any way the special significance appertaining to the concept of honest and faithful service.

In addition to the foregoing, the upgrading of more than 432,000 less than honorable discharges, issued during the period August 4, 1964 through March 28, 1973, could cost the federal government more than 100 million dollars in veterans' benefits for individuals whose conduct and behavior while on active duty reflect neither loyalty to the United States of America, nor honor to themselves and the uniform they once wore. This, in a budgetary atmosphere wherein we must fight for adequate funding to care for those veterans who served honorably and who are in many instances maimed or scarred for life. Additional costs to be incurred by the Department of Defense and the General Services Administration could put a price tag of millions of dollars on this ill-begotten illaudable program.

Given the foregoing, it is hoped the Veterans' Affairs Committee will timely advance your bill and that it will be passed quickly by the House of Representatives.

Sincerely,

R. D. "BULLDOG" SMITH, Jr.,
Commander-in-Chief.

FLEET RESERVE ASSOCIATION,
Washington, D.C., April 18, 1977.

Hon. JOHN P. HAMMERSCHMIDT,
U.S. House of Representatives, Washington, D.C.

DEAR MR. HAMMERSCHMIDT: On behalf of my 132,586 Shipmates of the Fleet Reserve Association, I express our wholehearted support of your pending legislation, H.R. 6074. As we understand the provisions of the measure, it would bar the automatic granting of veteran's benefits to those deserters and service malcontents whose less than honorable discharges are upgraded under President Carter's ongoing military discharge review program.

As career enlisted personnel, active duty and retired, of the United States Navy, Marine Corps and Coast Guard, we do not understand the rationale for the President's action in upgrading the discharges of those whose military service did not meet the criteria for a military discharge of at least "under honorable conditions". The majority of our members have served in at least two of our nation's past four wars. As military careerists we are proud of the service we render to our nation in peace and war. We are even more proud of the service performed by millions of Americans who have answered their nation's call in times of need. We feel that the President's programs for amnesty and military discharge review are a slap in the face of those who served honorably.

We wonder why an Administration which does not support a meaningful jobs for veterans program and the continuation of GI bill educational opportunities can justify spending tax dollars for the military discharge review program. We feel that those who received less than honorable discharges, especially the military deserters, should have the circumstances of their individual cases reviewed under the laws and regulations established for that purpose prior to the President's new program.

Our support for your legislation is not being expressed by this letter alone. I have addressed the enclosed letter to the 2,200 key association officers of the Association's national, regional and local Branch levels requesting them to contact their individual representatives in the U.S. Congress. I have asked them to express their support of H.R. 6074 and urge their Congressmen to actively support the measure.

Mr. Robert W. Nolan, our National Executive Secretary, heads our Washington, D.C. offices. He has already been in contact with members of your staff and will continue to assist them in building support for the passage of your bill. Do not hesitate to call on us for any additional action that we may take.

I thank you for introducing this legislation and assure you of our full support. With best personal regards I remain in,

Loyalty, Protection and Service,

THOMAS A. HEANEY,
National President.

NATIONAL HEADQUARTERS,
MARINE CORPS LEAGUE,
Arlington, Va., April 6, 1977.

Hon. JOHN PAUL HAMMERSCHMIDT,
U.S. House of Representatives, Washington, D.C.

DEAR MR. HAMMERSCHMIDT: In accordance with instructions of the National Commandant of the Marine Corps League, Edward A. Schramm of Hazlet, New Jersey, this letter represents a block vote of the Marine Corps League and its Auxiliary, representing over 17,000 members, in support of your legislation, HR 5852 which would amend Title 38 of the U.S. Code to deny veterans' benefits to certain individuals whose discharges from service during the Vietnam era under less than honorable conditions are administratively upgraded under temporarily revised standards to discharge under honorable conditions.

One of the most vocal issues to date within this organization is the action of the President regarding the granting of pardons to draft evaders and amnesty for those who served under less than honorable conditions during the Vietnam conflict. As a matter of interest, the Virginia Beach Detachment of the Marine Corps League, located in Virginia Beach, Virginia, collected 20,000 signatures this past December/January from local residents in opposition to the amnesty/pardon issue.

Your effort toward sponsoring legislation to preclude veterans benefits for those with "bad paper" is considered to be in our best interests, and in the best interests of this Nation.

Sincerely,

C. L. KAMMEIER,
Executive Director, By direction of the National Commandant, MCL.

OFFICE OF THE ASSISTANT
SECRETARY OF DEFENSE,
Washington, D.C., March 22, 1977.

TO VETERANS AND MILITARY RELATED ORGANIZATIONS:

The following announcement concerns Armed Forces Day observances planned for 1977. In the past, many of your local chapters have participated in military/civilian community observances, and are invited to do so again this year. If appropriate, please include the announcement in your next publication. "Armed Forces Day, May 21, 1977." Armed Forces Day 1977 is Saturday, May 21. Military installations will be conducting obsrevances during the week starting

Monday, May 16 and ending Sunday, May 22, 1977.

The theme for this year's Armed Forces Day is "Peace Through Readiness." Military installations across the country, in coordination with neighboring civilian communities, are planning special ceremonies and exhibits in those communities as well as installation Open Houses.

Army, Navy, Air Force, Marine Corps and Coast Guard units will participate in daily observances in Washington, D.C. during this week.

Organizations and groups desiring additional information or who desire to participate may contact the Information Officer of a local military installation.

D. J. MAYNARD,
Captain, U.S. Navy, Director for Community Relations.

NATIONAL CAPITAL OFFICE, NON-COMMISSIONED OFFICERS ASSOCIATION OF THE UNITED STATES OF AMERICA,
Washington, D.C., April 12, 1977.

Hon. JOHN PAUL HAMMERSCHMIDT,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN HAMMERSCHMIDT: The Non Commissioned Officers Association of the USA (NCOA), representing more than 150,000 active, retired, reserve, guard and veteran Noncommissioned and Petty Officers of the U.S. Armed Forces, salutes you for sponsoring in the 95th Congress the bill, H.R. 5852 "to amend title 38 of the U.S. Code to deny veterans' benefits to certain individuals whose discharges from service during the Vietnam era under less than honorable conditions are administratively upgraded under temporarily revised standards to discharge under honorable conditions."

Please be advised that the Association supports your proposal. We have written the chairman of the appropriate committee requesting permission to testify on the bill if hearings are scheduled.

If this office can assist you in this matter, please feel free to call upon us. We stand ready to serve.

With every good wish, we remain,
Respectfully,
C. A. "MACK" MCKINNEY,
Director of Legislative Affairs.

VETERANS OF WORLD WAR I OF THE U.S.A., INC.,
Alexandria, Va., April 13, 1977.

Hon. JOHN PAUL HAMMERSCHMIDT,
House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR REPRESENTATIVE HAMMERSCHMIDT: This letter is to say to you that we are in fullest accord with your H.R. 6074 as applicable to benefits received by veterans with specified degrees of discharge.

We feel that to treat ex-service people who dodged or evaded duty on the same basis as veterans with honorable discharge would be highly unfair to the veteran who carried out his orders.

Cost of caring for deserving veterans has continually increased. We do not want honorably discharged veterans to find the VA system short of money for their care. We do not think it is appropriate to afford funds for those who in war time shirked their duty and then by regrading of their discharges would possibly be put in a situation legally to obtain benefits from funds needed for use in caring for honorably discharged veterans.

If desired you may use this letter of our position in hearing records on your bill.

Sincerely,
HAROLD B. SAY,
Legislative Director.

LEGISLATION ASKING PRESIDENT TO RESIST EFFORTS TO BAN MEAT, MILK, AND POULTRY FROM WHITE HOUSE FOOD DAY DINNER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. SEBELIUS) is recognized for 5 minutes.

Mr. SEBELIUS. Mr. Speaker, according to the April 16 issue of the Washington Post, a daily newspaper serving the Washington metropolitan area, a special White House dinner is planned for tomorrow evening commemorating Food Day for 1977.

I believe President Carter and his administration should be commended for sponsoring this event whose purpose I understand is to encourage American citizens to eat a nutritious diet.

However, upon reading the entire Post article I was concerned to discover Food Day for 1977 is to be publicized by holding a supper at the White House at which beef, poultry, and milk have been banned.

Mr. Speaker, I would agree with the goals of striving to make all Americans recognize we should eat nutritious foods. However, the activitist organizers of this event, Center for Science in the Public Interest, apparently are in the business of blaming agriculture for the poor quality of the American diet.

When the President of the United States offers the use of the White House for a symbolic event that bans meat, milk, and poultry, I believe it contributes to the ignorance and misinformation some food faddists disseminate about American livestock and poultry products.

As a result, I wish to report to my colleagues that I offered a resolution this afternoon within the Livestock and Grains Subcommittee calling on the President to resist efforts to ban meat, milk, and poultry from the White House Food Day dinner on April 21.

I would like to commend to the attention of my colleagues the following resolution that was agreed to by Mr. JOHNSON of Colorado, Mr. THONE, Mr. HAGEDORN, Mr. COLEMAN, and myself and sent to the White House.

COMMITTEE ON AGRICULTURE, LIVESTOCK AND GRAINS SUBCOMMITTEE RESOLUTION OFFERED BY MR. SEBELIUS

Whereas the animal production industry is the basis of the American diet, and

Whereas animals serve as a means of bringing to us energy which is trapped in vegetable materials in ways that we could not otherwise retrieve, and

Whereas meat and other animal-source proteins have all the eight essential amino acids needed by the human body, and in the correct ratio for immediate use by the human system, and

Whereas plant-source foods are deficient in one or more essential amino acids and cannot individually satisfy the human body's protein needs, and

Whereas on-the-plate meat consumption averages less than 3 ounces per day and provides about 25 grams of protein which is less than half the average adult Recommended Daily Dietary Allowance (56 grams for men, 46 grams for women) as determined by the National Research Council, and

Whereas a 3½ ounce (100 grams) serving of meat also provides substantial quantities of the Recommended Daily Allowances for various B vitamins, iron, and zinc, plus phosphorus, potassium, and essential micronutrients, and

Whereas the feeding of grain to livestock does not cause starvation or malnutrition in needy countries, and

Whereas ruminants such as beef and dairy cattle and sheep play a vital role in converting millions of acres of rangeland, hay, nonedible plant fiber and humanly nonedible waste products and by-products from other agriculture operations into animal protein, milk, and fiber, and

Whereas in addition to providing meat with high quality protein, essential vitamins, and minerals, livestock are a virtual "pharmaceutical factory" of medicines and other health aids, and

Whereas it has been publicly reported that at the World Food Day dinner at the White House scheduled for April 21, 1977 President Carter will abstain from eating livestock and poultry products and consume an entirely vegetarian diet composed of black bean soup, broccoli-nut casserole, wheat muffins, te.. and fruit juice, and

Whereas every American's life contains products almost without number that derive from meat animals—from leather goods and hair brushes to phonograph records and ball bearings, and

Whereas the meat industry, as the largest segment of U.S. agriculture and food production, would suffer additional injury by an apparent endorsement of a meatless diet, and

Whereas serving a strict vegetarian dinner on this occasion would amount to discriminatory endorsement of a segment of food faddism and sanction a meatless diet, and

Whereas the publicity surrounding this affair will be used to discredit livestock products as a leading food item,

Be it therefore resolved that the Livestock and Grains Subcommittee of the House Committee on Agriculture respectfully petitions President Carter to reconsider his participation in a formal event which denigrates our livestock and poultry industry; to instead use his office to promote American livestock and poultry; and thus include in his menu at the Food Day dinner on April 21 an appropriate portion of tasty and nutritious meat, dairy, and poultry products.

LEGISLATION TO ADD PORTION OF ESCATAWPA RIVER TO NATIONAL WILD AND SCENIC RIVERS SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. EDWARDS) is recognized for 5 minutes.

Mr. EDWARDS of Alabama. Mr. Speaker, today I am introducing a bill to determine the feasibility of adding a portion of the Escatawpa River in Alabama and Mississippi to the National Wild and Scenic Rivers System. I am extremely serious about this legislation. I have been working on it for several years, and this bill is similar to H.R. 9157, which I introduced in the last Congress. I urge my colleagues in the House to consider my bill and support me in my efforts.

Most of you probably know that I have long been in the forefront in developing waterways in and around the Port of Mobile, Ala., including the Tennessee-Tombigbee Waterway, the Coosa-Alabama

Waterway project, the Warrior-Tombigbee project, and Theodore Channel. These waterway development projects are necessary to the commercial and industrial growth of our area, they will add to our recreational resources, and they will provide much-needed jobs and more efficient transportation. All the same, as we develop these waters we must also insure that we leave at least one small, relatively untouched stream for the pure enjoyment of our people and to protect an ecological system unique to our area in southern Alabama.

The Escatawpa River is an important part of Alabama's natural heritage. I am familiar with almost every portion of the river, having canoed in its waters and having flown over it; and I assure you it is one of the most beautiful and unspoiled rivers you will ever see. The purpose of my bill is to protect the river itself from harmful environmental changes and to protect it in its present state for future generations. I pledge that I will work to keep restrictions on the adjoining land at a minimum and there will be ample opportunity for public input into decisions on how different segments of the river will be protected.

As you all know, the process of adding a river to the National Wild and Scenic Rivers System is a lengthy one, but I am committed to my proposal for the Escatawpa River. I solicit your support in every way possible to insure passage of my bill to provide a study of the Escatawpa River for inclusion in the system.

HEW'S INACCURATE MEDICARE REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, last year we added a freedom of information amendment to the Government in the Sunshine Act of 1976 and like most Members of this House, I voted for it. I would do so again. But as the Washington Star commented in its March 27, 1977, editorial:

> There is nothing wrong with government in the sunshine, so long as the sunshine lights up the entire picture.

I am alluding now to the release on March 14, by Secretary of HEW Joseph A. Califano, Jr., of the names of physicians in solo practice, physicians groups, and laboratories for whose services medicare paid $100,000 or more in 1975.

In doing this, Secretary Califano was responding to press demands for the information.

What the press got was a document filled throughout with inaccuracies. What emerged in the sunlight misinformation from HEW was the revelation that the Bureau of Health Insurance does not much know who is being paid how much and for what services.

The HEW release gave the names of 409 physicians, 1,752 groups, and 58 laboratories for whose services medicare paid $100,000 or more.

Of the 409 physicians listed as individual practitioners, 166 were checked by the American Medical Association in 30 States and the District of Columbia. Of the 166 checked, 65.7 percent, or 2 out of three, were the victims of misinformation.

And I use the word "victims" advisedly. For what happened is that some of the press checked first to make sure HEW was accurate but most of the press did not.

The results were disgraceful. The physicians victimized by published misinformation have reported harassment by angry patients, crank telephone calls, threats, verbal assaults by angry colleagues, criticism by employees, threatened losses to their hospitals of philanthropic support, continuing embarassment within their communities and, in one case, the possibility of sharp cuts in appropriations by a State legislature.

Observed the Washington Star:

> The figures sometimes are misleading, the HEW list includes payments to doctors as well as to patients, but patients don't always pay the doctor; sometimes they spend their medicare reimbursements for something besides doctor bills.

The Star continued:

> The point is that raw statistics often can give someone a raw deal. In this instance, the error was compounded by the news media which in some cases didn't bother to go beyond the statistics in their first stories, and in other cases gave more prominence to the seemingly spectacular payments than to the explanation that the payments frequently didn't all go to one person.

The Star is correct. In two out of three cases either the doctors were not solo practitioners, had not been paid what HEW said they had, or were wrongly listed on both scores.

One of my own physician-constituents, Dr. Richard Patterson, is a specialist in obstetrics and gynecology at the Holzer Clinic in Gallipolis. HEW said he received $133,796 in medicare payments. As it happens, the Holzer Clinic consists of 40 physicians. In 1976 all of them together received $173,000 from medicare. For reasons best known to HEW, Dr. Patterson was inaccurately reported as having received nearly 80 percent of that sum—to his great embarrassment.

Little of the press coverage bothered to say that these medicare payments do not represent net profit to the recipients but must go to pay for rent, equipment, personnel, and all of the other overhead costs of operation.

Let me cite just two other cases that occurred in Ohio.

Dr. E. W. Peters of Cleveland was listed as receiving $882,458. Dr. Peters, one of 5 founders of the Euclid Clinic, retired from practice in November of 1968. He cannot imagine how this amount could have been listed under his name—nor can I.

Dr. Peters said:

> I have gotten a lot of kidding, but when I explain I feel people have accepted my explanation. However, I have several times had the feeling that some people are just being polite and not saying anything because they feel the information might be correct. And, sadly, I have heard a number of derogatory remarks about the medical profession in general as a result of this release.

At the Euclid Clinic, which was not even listed by HEW, Administrative Director Frank Sopyla met March 23 with the local medical carrier who insists that all the information it fed to HEW was under the name of the Euclid Clinic. In any case, Mr. Sopyla said, the amount seems high by at least $100,000.

Also in Cleveland, Dr. Houshang Makipour was listed as receiving $2,338,434 during 1975. But Dr. Makipour was not even a full member of the eight-physician gastroenterology department of the Cleveland Clinic—which was also not even listed. No one at the Cleveland Clinic can figure out how HEW even got hold of his name, much less began crediting payments to him. As for the amount:

Dr. Leonard Lovshin, the director of professional affairs at the clinic, lists the amount as "absolutely ludicrous," since the total billings for the department for 1975 were $1,400,000 and only 20 percent of their patients are covered by medicare. The treasurer of the department corroborates this.

Mr. Speaker, I believe in Government that operates in the sunshine and I believe in a free press with free access to information from the Government.

But this sort of thing makes a mockery of both concepts.

It is as bad to disseminate inaccurate or false information to the press as it is for the press to assume blithely that everything it receives in a Government release is accurate and true.

I suggest to Mr. Califano that his apology is long overdue to the physicians whose reputations he has inadvertently damaged through the sloppy bookkeeping of an HEW agency for which he is responsible.

And I further suggest that he act promptly to assure no further repetition of such incidents.

With permission, I should like to append to my remarks the editorial published in the Washington Star:

[From the Washington Star, March 27, 1977]

A SLOPPY PIECE OF WORK

That Medicare information put out a couple of weeks ago by the Department of Health, Education and Welfare (at the demand of several news organizations, including *The Star*) was darn startling.

It indicated that 409 physicians around the country received $100,000 or more during 1976 from payments for Medicare patients. When that news hit the streets of Topeka, Peoria, Baltimore, Washington and a few hundred other places, the local citizenry was given the impression that the doctors were really cleaning up on Medicare payments.

But were they?

Perhaps some. But in response to complaints from outraged doctors, who in many instances had been badgered and sometimes called crooks by furious citizens, the American Medical Association undertook a study of the list. As of a few days ago, the AMA had checked 129 of the 409 and found a 70 percent rate of error.

Some figures, according to AMA, were simply wrong. But the biggest error was the listing of physicians who are in group practice as solo practitioners. For example, a Kansas doctor, who is chief of a 20-member group practice, was listed as the recipient of $544,014 but says he was responsible for billings of only $12,522. An Oregon doctor, who is the salaried director of a hospital and has

no private practice, was listed as receiving $103,686 which evidently went to the hospital.

The AMA's check included three District of Columbia physicians reported as receiving more than $100,000—Charles A. Hufnagel, John W. McTigue and George E. Schreiner—who were erroneously listed in the HEW release as solo practitioners when in fact they shared the proceeds with associates.

The figures sometimes are misleading in another respect. The HEW list includes payments to doctors as well as to patients, but patients don't always pay the doctor; sometimes they spend their Medicare reimbursements for something besides doctor bills.

The point is that raw statistics often can give someone a raw deal. In this instance, the error was compounded by the news media which in some cases didn't bother to go beyond the statistics in their first stories, and in other cases gave more prominence to the seemingly spectacular payments than to the explanation that the payments frequently didn't all go to one person.

Similar errors and misleading impressions, in approximately the same proportion, have been found by AMA in Medicaid payment lists released the past several years.

HEW produced the Medicare list to satisfy requests from the press under a Freedom of Information amendment to the Government in the Sunshine Act of 1976.

Now there is nothing wrong with government in the sunshine, so long as the sunshine lights up the entire picture. HEW has an obligation not to produce misleading or erroneous information. And news organizations have an obligation to go beyond raw statistics, particularly when we have initiated an inquiry.

Perhaps some doctors have abused the Medicare program, but it seems obvious that many who haven't were tarred with the same brush.

Dr. James H. Sammons, executive vice president of AMA, claims that the Medicare episode "has got to be the sloppiest performance in the history of American bureaucracy." Well, maybe not the sloppiest, but it certainly ranks high.

ECONOMIC DEVELOPMENT ADMINISTRATION SUCCESS STORY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 5 minutes.

Mr. CLEVELAND. Mr. Speaker, during the past year the Economic Development Administration has been in the news because of the job thrust upon it of administering the Local Public Works Act.

This agency, which has the job of promoting economic development in disadvantaged areas in the country, found itself spending $2 billion—as much as it had spent in the previous 10 years—and being told by Congress to shovel it out for construction projects within the following 4 months.

The Economic Development Administration did just that, and was suddenly criticized for not having made all of the right decisions.

It is worth remembering that the job of EDA is economic development, and not administering pork barrel programs dreamed up by a Congress trying to prove its interest in fighting unemployment.

One of the striking aspects of dealing with EDA is that, unlike most Federal agencies, they spend little effort in promoting themselves. While some agencies solicit hundreds of applications for each one available, EDA has a preapplication process to sharply limit the amount of wasted effort. EDA employs no massive public relations office to build a constituency, but simply does it job and has done it well.

These remarks are prompted by a letter from the regional planner for Lebanon, N.H., describing an industrial park which will provide more than 200 new jobs less than 2 years after EDA made a public works grant to extend water and sewer facilities to it. This is a real success story and demonstrates the good work that EDA does. Thus, an EDA grant of $160,000 will provide 200 permanent jobs in the private sector.

The ultimate irony in reporting a success story like this is that while Congress last year gave EDA $2 billion to spend on construction projects with little regard for economic growth criteria, and is about to hand it another $4 billion to shovel out, it has grossly underfunded EDA's traditional programs. While EDA is authorized $1.6 billion for fiscal year 1977 its actual appropriation is $422 million. There is no serious congressional or administration effort to fully fund this agency so that it can do its real job.

If ever we needed a demonstration of the way Congress does things for publicity rather than as the result of sound factfinding and decisionmaking, this is it.

The letter from Jim Wechsler, the executive director for the local planning region, follows:

UPPER VALLEY LAKE SUNAPEE COUNCIL,
Lebanon, N.H., April 6, 1977.

Hon. JAMES C. CLEVELAND,
Congressman from New Hampshire, Rayburn House Office Building, Washington, D.C.

DEAR JIM: I thought you would be interested in this little follow-up to an EDA project that I have been involved with here, particularly in view of some of the flak EDA activity sometimes engenders.

As you know, we've had the Lebanon Industrial Park on the Etna Road in Lebanon in existence for many years, and, since the early 1960's, had managed to attract six industries filling about half the space. Filling the remaining lots was difficult because of a lack of water and sewer lines. In the fall of 1976, the City of Lebanon completed its extension of water/sewer lines to the park, a project the city could never have afforded on its own, made possible only because of EDA participation in the funding. The result has been amazing.

In the fifteen months since work began in early 1976, we have attracted six new industries—as many as in the previous fifteen years. While some of these are still in the design or construction stages, we are estimating that by the end of this year, when all should be moved in, they will have added nearly $1 million to the city's assessed valuation; provided more than 200 new jobs; and had numerous other spin-off benefits for the region. (There's just one lot left, eight acres out of the original ninety-three, and that should go soon. Needless to say, we're now thinking of an additional industrial area, and have had good cooperation from EDA's Concord office in initial discussions of funding for that—which I think can also be filled pretty rapidly.)

Anyway, this little note may add to your file for the day when you have to defend EDA programs and their cost-effective ratio, either in committee or otherwise.

With best wishes,

JAMES M. WECHSLER,
Executive Director.

THE CASE FOR A PERMANENT TAX RATE REDUCTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

Mr. KEMP. Mr. Speaker, last week President Carter announced that he was abandoning his rebate proposal, because the economy no longer needs the "quick-fix" it was designed to provide. As a strong opponent of the rebate since it was first proposed, I congratulate the President for having the political flexibility to abandon it. Now we should move forward on a program of permanent tax rate reductions that will assure growth in our economy without inflation, and reduce the Nation's unemployment.

I am disappointed that President Carter has said he will veto any permanent tax rate reduction at this time. This is unfortunate, because I think the President is basing his decision on a false assumption. He assumes that a permanent tax rate reduction will prevent him from making permanent tax reforms later this year, and that it would sacrifice future revenues needed to balance the budget. While these are sincere concerns on his part and those of others, they are, however, demonstrably wrong.

In the first place, a permanent tax rate reduction now certainly does not preclude further tax reform. Over the years Congress has been responsible for complicating the tax code to such an extent that the people and even its best tax experts cannot understand it. Furthermore, certain biases have been built into the code over the years against investment which must be corrected. Consequently, there is a very serious need for tax reform and tax simplification which is unrelated to the present need for tax reduction.

I also believe—as President Kennedy did in the early 1960's and Treasury Secretary Mellon in the 1920's—that when tax rates are too high you actually increase tax revenues by lowering the rates. This only happens, however, when marginal rates are reduced, because marginal rates of taxation—the tax on each additional dollar that is earned—are what affect the future investment decisions of individuals and businesses.

The fact is that people do not care about gross wages or gross profits, they care about after-tax income. Thus, the rate of taxation is very crucial to their decision of whether to work or take leisure, or to invest in profitmaking enterprises or tax-free municipal bonds. These trade-offs are not based on the total burden of taxation—which varies according to exemptions, deductions, and credits—but on the marginal rate of taxation. This may be illustrated by assuming a tax system in which the government took 10 percent of your wages the first day, 20 percent the second, 30 percent the third, 40 percent the fourth, 50 percent the fifth, 60 percent the sixth, and 70 percent the seventh. How many people do you suppose would work the last 2 or even 3 days of the week? Not very many, I suppose.

And it is the same with capital. If the after-tax return is not enough to justify the risk of investing one's resources

in a capital, they will put them in tax shelters, like municipal bonds, instead. And if there is no new capital investment there will be no new jobs created or new productive capacity, eventually leading to higher prices and higher unemployment. This is exactly what has happened in Great Britain and in New York, as a result of high tax rates.

The whole thing boils down to a question of incentives, the incentive to work, produce, hire, and invest. Taxation is a disincentive. If taxes were levied at the rate of 100 percent, obviously there would be no production, work, or investment at all—and therefore no tax revenues. Conversely, at a zero-percent tax there is the greatest incentive to produce. Given the government's need for revenue, the trick is to write the tax code so that revenues are maximized while disincentives are minimized. As Adam Smith said in The Wealth of Nations, the first maxim of taxation is that "the subjects of every State ought to contribute towards the support of the Government, as nearly as possible, in proportion to their respective abilities." His fourth maxim was that "every tax ought to be so contrived as both to take out and to keep out of the pockets of the people as little as possible, over and above what it brings into the public treasury of the State." Otherwise, "it may obstruct the industry of the people, and discourage them from applying to certain branches of business which may give maintenance and employment to great multitudes."

In considering any reduction in taxes, the Government must of course be assured that its revenues will not be reduced so much as to deprive it of the revenues it needs for legitimate purposes. But high taxes affect the prosperity of the country itself, because in the final analysis taxes are only partly borne by the individual or property taxed. Ultimately they fall upon the consumer. High taxes mean high prices and a high cost of living. A tax reduction, therefore, results not only in an immediate saving to the individual or property directly affected, but an ultimate saving to all people in the country. It can safely be said that a reduction in the income tax reduces expenses not only for the income taxpayer, but of the entire 210,000,000 in the United States. It is for this basic reason that the question of tax reform is not how much each individual taxpayer reduces his direct contribution, the real question is to determine what plan results in the least burden to the people and the most revenue to the Government.

Up until 1963, the highest marginal tax rate on individuals was 91 percent on incomes over $200,000. Clearly, this was a strong disincentive to earning taxable income of more than $200,000. Thus, rather than leading to increased Government revenues, this high tax rate was actually reducing them.

In 1963, President Kennedy proposed a reduction of the top rate from 91 percent to 70 percent. This change was enacted the following year by Congress. It is interesting, therefore, that beginning in 1964 the percent of total tax revenues derived from incomes over $100,000 actually went up, and continued to go up until the inflation resulting from spending for the Vietnam war began to push everyone's income up into high marginal brackets. The following table demonstrates what happened:

Percent of Federal tax revenues paid by incomes of $100,000 and above

1963	5.1
1964	6.3
1965	7.6
1966	7.5
1967	8.5
1968	9.2

The reason for this is simple: At a 91-percent tax rate, very few investments would look as profitable as tax-free municipal bonds. At a 70-percent rate, there are probably quite a few that might make sense. At even lower rates, there would be even more incentive to invest one's money and time on earning profits, rather than seeking out more tax shelters. A recent Wall Street Journal editorial illustrates this by example:

Consider what would happen to a "good" rich person who refuses to use loopholes and prefers hard work to sailing yachts. He decides to invest $1 million of his capital in a widget factory in New York City, which will employ hundreds. He will run it himself, arranging the financing, assembling the personnel, finding the markets, and so forth. Give him a year to get off the ground, but say he is lucky enough in the second year to make a 10% profit on his invested capital. This is after his workers have paid federal, state and local income taxes and the widget company has paid property taxes, license fees, etc.

Of the $100,000 profit, the city clears away roughly $5,700, leaving $94,300. The state clears away about 10 percent of that, leaving $84,870. The IRS, levying at progressive rates, snatches $38,000, leaving $46,870. Our good rich person then pays this to himself as a dividend.

Being rich, our man is of course in the highest personal income-tax brackets, and after paying 4.3 percent to the city ($2,015) has $44,855 left. The state clips him for 15 percent of that ($6,728) and leaves him $38,-127. Uncle Sam "nicks" him for 70 percent of that, which is $26,689, leaving him with $11,438.

Thus, on the investment of $1 million in capital and two years hard work in assembling an enterprise that is risky to begin with, this lucky fellow who turned a profit of $100,000 has $11,438 to spend. He has given up two years on his yacht to gain $5,-719 in annual income. If he had invested in tax-free municipals, he would have gained roughly $60,000 in annual income and could have remained on his yacht instead of fighting New York City traffic, City Hall, and the widgetmakers union.

People at every income level have to make the same kind of decision as the hypothetic millionaire above. A working man, for example, may realize that by working overtime he will be pushed up into a higher tax bracket and decide that his leisure time is worth more than the after-tax wage he would receive. Professional people like doctors are even more accutely aware of this tradeoff and in many cases decide to take off a couple of months of work, rather than earn additional income because it is taxed at such a high rate.

When you take the cumulative effect of all these work and investment decisions which are made on the basis of marginal tax rates, the loss of tax revenue and additional wealth is staggering. A reduction in marginal tax rates, therefore, would enrich the country as a whole, as well as leading to increased tax revenues.

The dismal performance of capital spending in the recent recovery clearly attests to the fact that there is a fundamental problem of disincentives in the Nation's economy. Every statistic indicates that demand is growing and money available for plant expansion. It is a fact that interest rates are much lower than they have been historically at this stage of recovery. Something is holding back business, and it can only be its uncertainty of being able to earn a sufficiently high after-tax profit on its investments. This uncertainty is compounded, of course, by a fear of inflation and of Government policies harmful to business, such as price controls and environmental regulations.

When business decides not to expand its plant capacity, this translates directly into lost jobs. It also affects the productivity of labor itself, which translates into real wage rates. Unless real productivity increases there cannot be an increase in real wages or a company would soon be out of business.

Thus there are many facets to the disincentive problem caused by high tax rates which must be corrected to assure our Nation's economic growth and prosperity. The sooner Congress acts, the better off we will be.

SUPPORTING THE DEBT COLLECTION PRACTICES ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO), is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on April 4 of this year, the House of Representatives passed the Debt Collection Practices Act, H.R. 5294, and sent it on to the Senate. As I emphasized on the day of the House vote, this bill is badly needed since there is no effective regulation of debt collectors.

Thirteen States have no debt collection laws at all, and altogether 24 States, with a combined population of more than 80,000,000 have either no laws or ineffective laws.

This legislation can have a profound effect on American consumers. During last year alone approximately $4 billion in debts were turned over to debt collection agencies.

The goal of this legislation is to stop unethical debt collectors from using abusive tactics. In essence this means that every individual whether or not he owes a debt, has the right to be treated in a reasonable and civil manner. The bill is not meant to allow people to avoid paying legitimate debts. This legislation is intended to protect consumers without putting any unnecessary burdens on the debt collector.

Since the House vote on April 4, there has been widespread reaction and discussion on the merits of the legislation, much of it in the press. My office has also received a continuous influx of consumer written testimony supporting the need for this legislation. I now offer a copy of the Chicago Daily News editorial of April 11 which offers support for the Debt Collection Practices Act.

A LEASH ON PREDATORS

U.S. Rep. Frank Annunzio (D) of Chicago has earned a vote of thanks from Americans beyond his constituency for successfully shepherding through the House a bill to halt the more despicable practices of debt collectors—like midnight telephone calls, threats of bodily harm and false claims of action in behalf of the government.

No one can dispute the right of creditors to take ethical action to collect money honestly owed them by deadbeats, and this right is not inhibited by the Annunzio bill. But it is high time that the animals in the business are leashed, especially because their prey often is among the weakest, most vulnerable segment of the society.

It is to their credit that the major, reputable collection organizations, such as the American Collectors Assn., support the bill. The worst practitioners give all a bad name. If the legislation gets through the Senate and is signed, such collectors will be subject to a fine of $5,000 and a sentence of a year in jail.

Opponents of the bill argued that it entered an area more properly left to the individual states to control. But Annunzio argued convincingly that state regulation over all has been ineffective. The legislation covers only independent debt collectors involved in interstate activities and does not apply to banks, retailers, credit unions, finance companies and lawyers. Thus there's still plenty of room—and need—for state enforcement.

The Senate will hold hearings on the bill later this month. We hope it follows the House lead.

Mr. Speaker, the indicators are all there for favorable consideration of the Debt Collection Practices Act, and I urge my colleagues in the Senate to carefully consider the overwhelming amount of evidence in support of this legislation, the number of unprotected American consumers in States across the country, and the endorsement the bill received from industry representatives themselves. The bill has been drafted with an eye for sure enforcement and clear remedies for lack of compliance. Its best feature is the fact that it represents a single Federal law to regulate debt collectors and will not be accompanied by any further regulations from any Federal agency.

AMENDING THE TRADE ACT OF 1974

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. DENT) is recognized for 30 minutes.

Mr. DENT. Mr. Speaker, I am today introducing a bill to amend the Trade Act of 1974 to reimburse the States for the amount of State unemployment insurance benefits paid to workers eligible to receive trade readjustment allowances.

As you know, I was very vocal in expressing my opposition to the Trade Act of 1974, the practical application of which has not served to mitigate my reservations. In fact, as always, the practical application of the act has served to bring new problems to the surface, one of which should interest every Member of the House who has had workers and industries certified for trade readjustment assistance—hereinafter referred to as TRA—benefits, and every Member of the House who is concerned about the high costs of Government spending.

The issue at hand deals with the provisions in the Trade Act of 1974 that shift the financial responsibility for unemployment caused by international trade agreements from the Federal Treasury, where it legitimately belongs, to State unemployment compensation funds, resulting in a hidden cost to the States that will ultimately total hundreds of millions of dollars.

Let me explain. Under the Trade Act of 1962, States that paid workers determined to be unemployed as a consequence of increased imports were reimbursed by the Federal Government for the unemployment compensation benefits paid to these workers. Reimbursement was, and is, an appropriate approach inasmuch as these workers were unemployed as a consequence of national policy decisions in an international forum, and for no other reason. Such dislocation and unemployment was inherently recognized and expected in the Trade Act of 1962 and in other subsequent trade arrangements, such as the Canadian-American Automotive Agreement.

It surfaced as an even greater issue in deliberations on the Trade Act of 1974, primarily because of the inordinate number of industries affected by imports, and because of complaints that TRA qualifying guidelines were far too stringent. In dealing with this aspect of the law, the guidelines were liberalized, but the burden for supporting the cost of these TRA benefits was shifted to the States, who have absolutely nothing to say about our trade policy. I pursued this matter in my own State of Pennsylvania and found the following, staggering information:

Under the Trade Act of 1962, 1,040 Pennsylvania workers received a total of $1,066,600 of TRA benefits from the State of Pennsylvania, reimbursed by the Federal Treasury, from 1962 through April 3, 1975.

Since the passage of the Trade Act of 1974 through April 2, 1977, 32,780 Pennsylvania workers have qualified for TRA benefits and have received a total of $80,236,355. Of that, $22,557,780 came from the Federal Treasury; the remainder, $57,678,575 came out of Pennsylvania's unemployment compensation fund. This is the case in virtually every State in the country.

This raises two very important issues:

First. The cost this Nation bears as a consequence of its trade policies is vastly understated, and, in fact, hidden. In addition to the revenues lost to communities and State as a consequence of unemployment due to imports, we also pay out enormous amounts of money for these trade policies at both State and Federal levels. Now, if you call the TRA office of the Department of Labor and ask them what the cost of the TRA program is, they will report that under the new act from April 1975 through January 31, 1977, 192,954 workers received benefits totaling $192.4 million. Of that amount, Pennsylvania received $22,557,780. They are right. That is the Federal cost. It is staggering in itself. What they do not tell you is that the real cost to the country is approximately three times that because the States pay these same workers unemployment compensation. In the case of Pennsylvania, the State paid unemployment compensation benefits of $57,678,575, for which it should not be responsible, and for which it will not be reimbursed. And that is only through April 2, 1977. Petitions to the Department of Labor are increasing on a daily basis, and believe me, we have yet to see what unrestricted imports cost this Nation. It is estimated that TRA benefits are increasing by approximately $10 million a month. I suggest that the total payments of TRA, by both State and Federal Treasuries will easily approach hundreds of millions of dollars on a yearly basis.

Second. The upshot of this shifting of costs is that it lends itself to easy misrepresentation of a program to which many look as part and parcel of the rationale to continue our present trade policies. It is easy to say that the damage of imports is minimal because we have only paid out of the Federal Treasury a small amount of dollars, ignoring that the major burden of the cost is State borne, and also ignoring that more than half the claims for TRA are denied. Moreover, some of the highest unemployment rates are evidenced in those areas where the most workers have applied for and received TRA benefits.

Thus far the Department of Labor, as of March 31, 1977, has certified 617 petitions for a total of 192,954 workers. Over one-half of these workers are in the States of Michigan, Missouri, New York, Pennsylvania, Wisconsin, and Ohio.

I am not for a moment suggesting the dissolution of the TRA program. For many workers, it represents the difference between bread on the table and nothing. I am suggesting that the TRA program was never meant to be a supplemental welfare system, or an excuse for categorically relinquishing more of this country's production jobs in the name of free trade. Moreover, it is grossly inequitable at a time when States are experiencing serious financial difficulties, to expect States to pay for national trade decisions. This bill will put the financial burden where it belongs—back on the Federal Treasury—and if that high cost is able to be seen for what it is, then perhaps, those who make the trade decisions will pay closer attention to what their decisions are costing this country, and those of us who are committed to fiscal responsibility will realize the direct impact that trade policies have on unemployment and its concurrent problems.

H.R. 6384

A bill to amend the Trade Act of 1974 to reimburse the States for the amount of State unemployment insurance benefits paid to workers eligible to receive trade readjustment allowances

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 232 of the Trade Act of 1974 is amended by adding at the end thereof the following new subsection:

"(g) (1) If unemployment insurance is paid under a State law to an adversely affected worker for a week for which—

"(A) he receives a trade readjustment allowance, or

"(B) he makes application for a trade readjustment allowance and would be entitled (determined without regard to subsection (c) or (e) of this section) to receive such allowance,

the State agency making such payment shall, unless it has been reimbursed for such payment under other Federal law, be reimbursed for such payment to the extent such payment does not exceed the amount of the trade readjustment allowance which such worker would have received, or would have been entitled to receive, as the case may be, if he had not received the State payment. The amount of such reimbursement shall be determined by the Secretary on the basis of reports furnished to him by the State agency.

"(2) In any case in which a State agency is reimbursed under paragraph (1) for payments of unemployment insurance made to an adversely affected worker, such payments, and the period of unemployment of such worker for which such payments were made, may be disregarded under the State law (and for purposes of applying section 3303 of the Internal Revenue Code of 1954) in determining whether or not an employer is entitled to a reduced rate of contributions permitted by the State law.".

(b) Subsection (a) of section 241 of such Act is amended to read as follows:

"(a) The Secretary shall from time to time certify to the Secretary of the Treasury for payment to each cooperating State (1) the sums necessary to enable such State as agent of the United States to make payments provided for by this chapter, and (2) the sum reimbursable to the State pursuant to section 232(g). The Secretary of the Treasury, prior to audit or settlement by the General Accounting Office, shall make payment to the State from the Adjustment Assistance Trust Fund established in section 245 in accordance with such certification. Sums reimbursable to a State pursuant to section 232(g) shall be credited to the account of such State in the Unemployment Trust Fund and shall be used only for the payment of cash benefits to individuals with respect to their unemployment, exclusive of expenses of administration.".

(c) The amendments made by this section shall apply to unemployment insurance (as defined in section 247(12) of the Trade Act of 1974) paid for weeks beginning after the date of the enactment of the Trade Act of 1974.

HELSINKI'S UNFULFILLED PROMISE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

Mr. DRINAN. Mr. Speaker, I am pleased to begin today "Helsinki's Unfulfilled Promise," a project which my office will be coordinating during the 94th Congress on behalf of Soviet Jewish families and individuals who are being forcibly detained within the U.S.S.R. as a result of the Soviet Government's repressive emigration policy. This effort, conducted with the cooperation of the Union Council on Soviet Jewry's Boston Chapter, Action for Soviet Jewry, is a direct outgrowth of the Soviet Union's blatant violations of the human rights provisions of the Helsinki Final Act.

For the next several months over 100 Members of Congress will be rising to address the House of Representatives concerning many cases; each case is an example of the continuing repression by the Soviet authorities of Jews whose sole crime is a desire to be reunited with their families. Last year this program was inaugurated by my distinguished colleague, Mr. EILBERG, under the title of "Orphans of the Exodus." It met with great success as 70 Members of Congress spoke on behalf of 72 individuals and families being detained in the Soviet Union. Remarkably, 17 percent of those families and individuals subsequently received permission to emigrate from the U.S.S.R.

Mr. Speaker, it is for precisely this reason that we must continue to speak out for the nearly 200,000 Jews who have applied for permission to emigrate as well as for those whose fear of reprisal has prevented them from requesting permission to leave. If we do not voice our vigorous opposition to this repression and harassment then we are little more than accomplices to these repugnant actions. Contrary to Soviet assertions, the issue of human rights is not simply an internal affair. We have a right to expect the U.S.S.R. to honor the basic human liberties explicitly spelled out in the Helsinki agreement and the Universal Declaration of Human Rights, to both of which the Soviet Union is a signatory.

In recent weeks, the Soviet Government has embarked on a deliberate policy of increased repression of Soviet Jews. This policy, which includes open invitations to anti-Semitism, included the arrest on March 15 of one of the Soviet Union's most prominent Jewish activists, Anatoly Scharansky.

Mr. Scharansky originally applied for exit visa in 1973, and shortly thereafter lost his job. His subsequent requests for permission to emigrate were all denied. He has been harassed continually by the KGB; over the last 2 years, he has spent more than 100 days in jail. He was once arrested for 15 days merely for asking why he could not obtain an exit visa.

On July 4, 1977, Mr. Scharansky was married. The next day, his wife Natalia received an ultimatum from the Soviet Government: She had to leave the country that day or never be allowed to leave in the future. In the hope that her husband would soon join her, Natalia Scharansky left for Israel, and she has been separated from her husband ever since.

Anatoly Scharansky is one of the leaders of the Moscow's "refusednik" community. He has acted as a liaison to the Western press for Soviet Jews who wish to emigrate, and is a founding member of the Soviet group to monitor the Helsinki agreement. On March 15, 1977, he was arrested and accused of treason and espionage, the first Soviet Jew since the Stalin era to be charged with this capital offense.

During my visit to Moscow in the summer of 1975, Anatoly Schransky acted as my host, introducing me to other members of the Jewish community in Moscow. It is absolutely inconceivable that he has acted as a spy for the American intelligence agencies. Yet this patently false charge was made against Mr. Scharansky and several other leaders of the "refusednik" community in the official Soviet Government newspaper Izvestia on March 4. The same edition of that publication charged Senator HENRY JACKSON, Congressman DANTE FASCELL, and myself with participation in these "subversive activities." Mr. Scharansky's arrest for suspicion of espionage constitutes a very serious escalation of the Soviet Government's continuing campaign of harassment of the Jewish community. Never before has a "refusednik" been charged with offenses of this magnitude.

Recently Soviet dissident and Nobel Laureate Andrei Sakharov called the arrest of Mr. Scharansky a challenge to the United States and "an attempt to blackmail the new administration, before the visit of Secretary of State Vance, to give up its principled stand on defending human rights all over the world." Mr. Sakharov and other victims of Soviet repression believe that the Kremlin is unleashing an especially vicious crackdown in an attempt to persuade the United States that talking about human rights is counterproductive, and might jeopardize agreements in other areas. But Mr. Sakharov warned that the absence of vigorous American criticism of these measures will only lead to further repression:

> Any hesitation will have tragic consequences.

Just prior to this arrest, Mr. Scharansky told American journalists that he fervently hoped President Carter would continue his strong criticism of human rights violations in the Soviet Union. Echoing remarks which I have heard from many Soviet Jews, Mr. Scharansky said:

> Only pressure from the West can bring about our freedom.

The only sensible response to the recent increase in Soviet repression is an increase in our own condemnation of these acts, which clearly violate a number of international agreements.

As seems so often to be the case, the increasingly oppressive policies of the Soviet Government have fallen most heavily upon the Jewish community. Mr. Scharansky himself said recently that the atmosphere "smelled of a pogrom." The March 4 Izvetsia article charged two Jewish officials of the U.S. Embassy in Moscow of acting as the contacts for Scharansky and the other Jewish "intelligence agents," a blatant appeal to anti-Semitism. In recent weeks, Soviet prime time television has featured on two occasions a scurrilous film entitled "Traders in Souls," attacking Jewish activists as "soldiers of Zionism," and then providing their names and addresses, presumably to encourage viewers to take action against them. Another recent Soviet film shown on television charges a Jewish conspiracy to kill Lenin and asserts that Jewish funds supported Hitler's invasion of the U.S.S.R. These anti-Jewish actions culminated in the arrest of Mr. Scharansky, which Israeli Foreign Minister Yigal Allon called:

> A new dimension in the persecution of the emigrant activist movement, in fact against all Jews—a grave and worrisome dimension such as we have not known in the last 25 years.

This is, indeed, a moment of grave crisis for the Soviet Jewish community as a whole, and Anatoly Scharansky in particular. The need for immediate action on behalf of Anatoly Scharansky and other Soviet Jews could hardly be

more urgent. It is in response to this need that I ask all those concerned with human dignity to raise their voices in protest over Mr. Scharansky's arrest and the harassment of the Soviet Jewish community. We cannot remain silent until the promise of the Helsinki agreement is truly fulfilled.

NATIONAL CLIMATE PROGRAM ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BROWN) is recognized for 5 minutes.

Mr. BROWN of California. Mr. Speaker, I am pleased to announce the introduction today of a revised and perfected bill to establish a national climate program. The improvements in the National Climate Program Act of 1977 are based upon excellent testimony given before the Subcommittee on the Environment and the Atmosphere April 4–6. We have also benefited from suggestions during a very useful roundtable discussion with representatives of Federal agencies who will be cooperating in the national climate program.

Subcommittee deliberation on the revised bill is scheduled on Monday, April 25, at 10 a.m. in room 2325, Rayburn House Office Building. The bill is cosponsored by Chairman OLIN TEAGUE of the Science and Technology Committee and by Representative LARRY WINN, JR. I would like to call to my colleagues' attention that at some time in the markup process we may want to introduce a clean bill, at which time I will seek additional cosponsors.

The legislation includes programs of climate research, monitoring, prediction, and the validation of climate theories, as has been recommended in recent years by a number of advisory groups, both in and out of Government. The importance of climate information services to farmers, water resource and energy officials, and other information users is emphasized.

I hope for and expect the most expeditious congressional action and administration support. I have encouraged staff to cooperate extensively with the Senate Subcommittee on Science, Technology, and Space and with several other interested senatorial offices. The progress of our action will be followed as we move to subcommittee and full committee consideration and beyond.

Testimony by John F. O'Leary, Federal Energy Administration chief, in the hearings April 4, estimated that the additional heating costs of the last winter ranged from $4.3 to $7.8 billion. With better climatic forecasts, over half of these costs could have been saved. According to O'Leary, the climate will be "of central relevance to the mission of the Department of Energy" and "an improvement in our understanding of climatological processes could be of enormous value in carrying out that mission."

The implications of climatic fluctuations for food and fiber production are as dramatic as for energy demand and supply. In a March 24 colloquy with me before the House Agriculture Committee, Secretary of Agriculture Bob Bergland pledged his cooperation in developing long-range climate investigations. Referring to the lack of information on climate, Mr. Bergland said:

> We need to know. That's the point. We need to know what is going to happen as best we can, rather than leave things to chance.

Mr. Speaker, I hope you and my other colleagues will follow and support this national climate program legislation as we progress in House action.

FINANCIAL DISCLOSURE STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

Mr. KASTENMEIER. Mr. Speaker, following a practice I first established in 1963, I am placing in the CONGRESSIONAL RECORD today a statement on my financial condition for the calendar year 1976. This report also includes the amount of Federal, State, and real estate taxes paid in 1976.

Mr. Speaker, the long campaign to obtain public financial disclosure by Members of Congress has finally been achieved this year with the adoption of new House and Senate rules on public disclosure. These provisions will be written into permanent law, and my financial disclosure statement next year will be filed under the procedures required by the new standards governing disclosure.

Statement of financial condition, Dec. 31, 1976

Cash, account with the Sergeant at Arms, House of Representatives (including Jan. 1, 1977, salary)	$1,404.12
Cash	65.55
Securities	None
Residential real estate:	
Arlington house and lot	82,400.00
Less mortgage	29,161.92
Equity	53,238.08
House, Sun Prairie, Wis.	29,000.00
Plus improvements	1,766.00
Lot	1,200.00
Total	31,966.00
Less 1st mortgage	17,699.63
Less 2d mortgage	4,500.00
Total	22,199.63
Equity	9,766.37
Household goods and miscellaneous personality	7,000.00
Miscellaneous assets, deposits with U.S. civil service retirement fund through Dec. 31, 1976, available only in accordance with applicable laws and regulations	45,856.07
Additional retirement fund deposit 1976	1,130.00
Cash surrender, value of life insurance:	
On the life of Robert W. Kastenmeier	None
On the life of Dorothy C. Kastenmeier	544.00
Donaldson Run deposit	400.00
Automobiles:	
1976 Oldsmobile	4,200.00
1966 Ambassador	100.00
1973 Ford LTD	1,500.00
Total assets	125,204.19
Income for calendar year 1976 (in addition to congressional salary, allowances, and reimbursements honorariums (2):	
League of Women Voters	300.00
National Milk Producers Federation	300.00
Sale of stock, net gain	33.47
Rent gross (before deductions, for expenses, etc. Sun Prairie)	1,972.50
Income total	2,605.97
Taxes paid:	
1976 Federal income tax	8,380.00
1976 Wisconsin State tax	3,308.53
1976 real estate taxes, town of Sun Prairie	782.58
1976 real estate taxes, city of Sun Prairie	37.77
1976 real estate taxes, county of Arlington, Va.	1,632.96
Total 1976 taxes paid	14,141.84

PROPOSED EQUAL PAY LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. HOLTZMAN) is recognized for 5 minutes.

Ms. HOLTZMAN. Mr. Speaker, I am introducing legislation today to plug a loophole in the Equal Pay Act that would allow unjustifiable wage discrimination.

Four years ago a Federal appeals court construed the Equal Pay Act to permit an employer to pay different salaries to men and women even though they perform the same services. The court allowed salesmen who sold men's clothes to be paid higher salaries than saleswomen who sold women's clothes in the same store.

In permitting this discrimination, the court relied on an exception to the Equal Pay Act, which is to mandate equal pay when "based on any other factor than sex." The "other factor" here was the claim that the sale of men's clothing was more profitable than the sale of women's clothing. The Supreme Court refused to review this case.

I believe this interpretation of the other factors clause is an unwarranted departure from the purpose of the Equal Pay Act which is to mandate equal pay for equal work. It allows wholesale sex discrimination in wages simply on the assertion of vague, hard-to-ascertain "business reasons."

I, therefore, propose in my bill to narrow the "any other factor provision" by specifically excluding economic profitability as a factor upon which employers can base a wage differential between employees. My bill would, however, retain the other exceptions to the Equal Pay Act which permit wage differentials based on merit or seniority systems, measures of quantity and quality of production, or other factors not based on sex. Thus, employers would remain free to establish reasonable, work-related or seniority based pay scales.

Discrimination in wage practices is one of the fundamental abuses that must be ended in order to secure equal treatment for women in America. Women now make up 40 percent of the work force. Yet in the retail sales industry, for example, female retail sales workers earned

only 51.9 percent of what male retail sales workers made, as of late 1974. By limiting the other factor provision in the Equal Pay Act, we can help these women achieve the economic equality that is long overdue.

I urge my colleagues to support this important legislation.

The text follows:

H.R. 6399

A bill to amend the Fair Labor Standards Act of 1938 to narrow the circumstances under which an employer employing employees subject to that Act may have wage differentials based on sex of the employees

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 (d) (1) (iv) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206(d)(1)(iv)) is amended by striking out "other factor other than sex" and inserting in lieu thereof "other factor (other than sex), but economic profitability, to the employer, of goods produced, handled, sold, or otherwise worked on in such jobs shall not be such a factor".

PRESSURE AGAINST OPEN WORLD TRADE DUE TO DISRUPTIONS CREATED BY HIGH OIL PRICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, in recent months, there has been growing concern about various new restraints to open and relatively free world trade. The European Community and Japan have reached an "agreement" to cut down Japanese steel exports to Europe by 2.6 million metric tons. European and Japanese understandings on shipbuilding competition and the trade in ball bearings have been reached. Brazil has liberally applied a law to protect "infant industries" from competition—even when the infants are the children of major multinational corporations. Now the United States is being criticized for considering "protection" for its shoe, color television, and sugar industries. Pressures are on to renegotiate the multifiber agreements to further control the level of trade in textiles.

All of these types of developments are particularly discouraging at a time when the multilateral trade negotiations, which seek to expand world trade, are underway in Geneva.

Why does there appear to be a growing difficulty in open world trade at the present time? I believe that much of the explanation can be found in the incredible economic pressures placed on the various national economies by high oil prices. The explosion in oil prices has been the primary reason for many nations developing trade deficits.

To counter these developments, more and more nations have attempted to increase export earnings—sometimes in violation of fair trading procedures. Others have found it necessary to restrict imports—and many have tried both increased exports and decreased imports. The results are severe pressures on continued open world trade and the exchange of products in the most efficient and rational manner.

While there are many reasons for seeking to develop new sources of clean energy and to conserve existing energy supplies, I believe that the need to remove the distortion of high-priced energy imports from world trade is one of the most important. Only if new and lower priced forms of energy are developed within the various nations of the world, will we be able to free ourselves from a continuing round of trade restraints and retaliations.

Following is data which has just been provided to me by the Department of Commerce on the import/export situation of various nations. Four of the fifteen nations composing the following list would have had trade surpluses in 1975, if the amount they spent on oil in 1975 were the same amount they spent in 1973. The enormous jump in the trade deficits of the sample of developing nations is largely due to the jump in the price of oil.

This data reveals another disastrous byproduct of the energy crisis and is another reason for supporting the President in a tough policy of energy conservation and the development of domestic sources of coal and solar energy.

The data follows:

TOTAL TRADE OF SELECTED COUNTRIES AND TRADE IN PETROLEUM, OTHER NONMANUFACTURES, AND MANUFACTURES, 1970 AND 1973–75

[Billions of dollars]

THE TOBACCO PRICE SUPPORT PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of North Carolina. Mr. Speaker, the old cliche "one man's tax deduction is another man's loophole" should be revised in the beginning of each Congress to read: what "one man sees as a proper Federal expenditure, another sees as a subsidy."

Since the establishment of the U.S. Department of Agriculture almost 200 hundred years ago, it has been charged with the responsibility of promoting agricultural pursuits for the betterment of its farmers and all the country's citizens.

Along the way certain crops were deemed basic agricultural commodities by the Congress, and over the years special attention has been given to these crops due to their importance in the physical and economic survival of the country as a whole. These commodities are wheat, corn, rice, cotton, peanuts, feed grains, and tobacco.

However, over the past several years a strange convolution has taken place with reference to one of these crops; namely, tobacco. Expenditures authorized and appropriated by the Congress to the Department of Agriculture for all tobacco programs are now referred by antitobacco legislators as subsidies. This is a demeaning definition I suppose, although I must say in all fairness, if tobacco expenditures are subsidies, all moneys appropriated by the Congress are subsidies regardless of the end use.

A subsidy, as I understand it, is something, when normally money is given to a person or persons over and above what the marketplace will supply, to induce them to perform tasks not normally undertaken by choice.

Mr. Speaker, I say categorically there are no subsidies given to tobacco growers to induce them to raise tobacco and no subsidies are given to manufacturers to induce them to supply tobacco products. The subject of subsidies on tobacco appears to rise most often in discussion of the tobacco price support program, which is in reality a loan program, and I might say the most successful program of its kind ever carried out by the Department of Agriculture. Over $4 billion has been loaned to tobacco growers since 1946 and to date over $3.4 billion has been repaid with interest. In the same period of time, only $57 million in principal has been writen off by the Government. This is a record in which I believe any corporation in the country would take pride.

In connection with the foregoing, C. N. "Kirk" Wayne, vice president of Tobacco Associates, authored a recent story in the Tobacco Observer outlining the operation of the tobacco price support program, which I have added to these remarks in order to give further amplification to the actual operation of the program. I especially recommend its reading by those who have been led to believe that the tobacco loan program is a subsidy program. The following is a reprint of the Kirk Wayne article:

TOBACCO SUPPORT PROGRAM ECONOMICAL, SUCCESSFUL

(By C. N. (Kirk) Wayne, Jr., Vice President, Tobacco Associates)

A most misunderstood, misinterpreted program is the U.S. government's price support plan for tobacco farmers.

Because of unfair and erroneous statements about it, the program is consistently mentioned by opponents of tobacco who claim it is a subsidy to cigarette manufacturers. It is not.

What the price support system does is stabilize tobacco prices for farmers so that they can get a reasonable return on their investments. It mandates quotas limiting the poundage a farmer can sell or the acreage he can use for tobacco growing.

Without such a support system, tobacco—at least for awhile—probably would be grown in such volume as to make its price ruinously cheap for farmers.

Then prices would most likely wildly fluctuate, providing little security for the average tobacco farmer.

The minimum price tobacco can be sold at is determined each year by the Secretary of Agriculture based on the prices paid by farmers for goods and services. Prices at which tobacco is sold depends upon demand both domestic and foreign. Any tobacco which doesn't bring the guaranteed price at the auction warehouse floor is delivered to producers' cooperatives. They in turn advance the support price to the grower.

Money to make these advances is loaned to the cooperatives by the U.S. Department of Agriculture through its Commodity Credit Corporation. Tobacco is the collateral.

It is processed, stored and sold later when demand is higher. It can be stored for up to ten years without significant financial loss due to deterioration. As the collateral securing the loan for each year's crop is sold, the proceeds are used to repay Commodity Credit Corporation for the loan, plus interest.

Cost of the price support program for tobacco has been minimal compared to the cost of all farm commodity price support agricultural operations.

In all collateral sales to date, the unpaid principal charged off as program losses totals only $57 million. More than half of this loss was on the loans for only two years' crops.

Total cost has been about 0.12 percent of the amount of all farm commodity price support operations incurred by the U.S.D.A. since the inception of price support programs 43 years ago.

Thus, the tobacco price support program is one of the least expensive and most successful of the farm commodity programs.

Stabilizing the price of tobacco means that when a farmer goes to a bank to borrow money to plant it, the bank can lend with confidence knowing that the tobacco will sell for a guaranteed price.

The price support system also is used as leverage to keep the quality of U.S. tobacco high. As a condition of price support, farmers are made to eliminate undesired insecticides, so that U.S. tobacco now has the lowest levels of residue of any major tobacco-growing nation.

AID TO SUDAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

Mr. BONKER. Mr. Speaker, today I am introducing an amendment to the fiscal year 1978 economic aid authorization bill which will create both a new aid program to the Sudan and a model of how to implement the new directions aid policy for rural development. With the material that follows—a discussion of the model, the proposed bill and report language, I hope to give a concrete response to the obvious need for an overall rural development strategy and to force the common perception away from issues and politics to processes and systems at work. This proposal has been designed with the cooperation of AID and Sudan Government officials and is based on the research of many international, national and private groups. I hope it will merit your support.

The proposal follows:

FISCAL YEAR 1978 SUDAN AID PROGRAM PROPOSAL OF CONGRESSMAN DON BONKER

I. THE THEORY

It is no secret, indeed, it has become commonplace knowledge that a generation of bilateral and multilateral development assistance programs have not prevented the continued widening of income gaps between the rich and poor. International statistics clearly show that the non-oil LDC's are falling ever farther behind the West. They also show that within most LDC's the gaps between rich and poor, between urban and rural, and between one region or class and another also continue to grow.

Why? Congress considered this issue in 1973 and legislated what is now termed the New Directions policy. Bilateral aid projects were to be directed at the poor rural majority with emphasis on the poorest and on improving their capacity to participate in development. Sec. 102b of the Foreign Assistance Act enumerated the critical problems: food production, nutrition, population, health, education, and human resource development.

In December 1975, Congress added to Sec. 102 two new parts, c and d, which explicitly call for a coherent strategy rather than a simple transfer of resources.

"(c) Assistance under this chapter should be used not simply for the purpose of transferring financial resources to developing countries, but to help countries solve development problems in accordance with a strategy that aims to increase substantially the participation of the poor. Accordingly, greatest emphasis shall be placed on countries and activities which effectively involve the poor in development, by expanding their access to the economy through services and institutions at the local level, increasing labor-intensive production, spreading productive investment and services out from major cities to small towns and outlying rural areas, and otherwise providing opportunities for the poor to better their lives through their own effort.

"(d) For the purpose of assuring that development assistance furnished under this chapter is increasingly concentrated in countires which will make effective use of such assistance to help the poor toward a better life (especially such countries which are suffering from the worst and most widespread poverty and are in greatest need of outside assistance), the President shall establish appropriate criteria to assess the commitment and progress of countries in meeting the objectives set forth in subsection (c) of this section and in other sections of this chapter. In establishing such criteria, the President shall specifically take into account their value in assessing the efforts of countries to—

"(1) increase agricultural productivity per unit of land through small-farm labor-intensive agriculture;

"(2) reduce infant mortality;

"(3) control population growth;

"(4) promote greater equality of income distribution, including measures such as more progressive taxation and more equitable returns to small farmers; and

"(5) reduce rates of unemployment and underemployment.

The President shall endeavor to bring about the adoption of similar criteria by international development organizations in which

the United States participates. Presentation materials submitted to the Congress with respect to assistance under this chapter, beginning with fiscal year 1977, shall contain detailed information concerning the steps being taken to implement this subsection.".

AID has responded to a measurable degree in refocusing specific projects toward specific needs of the rural poor in most societies. Roy Prosterman of the University of Washington Law School has monitored this evolution, and as the recent CBO study indicates (p. 22), movement between FY73 programs and FY77 programs is encouraging. Less encouraging is the absence of change from FY77 to FY78, maintaining a C+ plateau by Prosterman's rating. But this movement does not itself constitute a development strategy. What we have at present is a collection of bandaids applied to visible problems. Some of them will improve specific conditions. But en masse they treat symptoms not causes.

The question of why income gaps grow has yet to be answered. Without answers, the processes that create and sustain such poverty will continue to do so. The key to understanding begins with language. When we reduce things to "issues" and "problems", we are denying the empirical reality of a system at work, of man-made processes interacting over an historical period. In the real world, individual problems all bear on each other. AID has begun to use the concept of integrated development, but it has not moved with any visible haste or measurable success to articulate a coherent overall strategy for development of the poor. Without such a strategy, foreign development projects can be marginally successful at best.

To advance such a discussion, I would like to propose a pilot program for a single country that will demonstrate to the Executive branch what is meant by a development strategy for people. Development for people, as opposed to development for production and profit, begins where poor people are. If AID activities really are to help the poor in a significant fashion, they must be devised from the perspective of the poor and with their participation. This raises the following concrete issues.

People do not live at or below subsistence levels because they like to but because one or more key elements of productive and remunerative growth are missing. The peasant (to focus on the poor rural sector) must have the physical means to produce a surplus beyond subsistence. He must have an incentive to do so; insecure land tenure is a common disincentive. And he must have the ability to trade or sell the surplus for something he can perceive as worth the effort. A corollary to these three theorems is that changes in the nature of production cannot be seen to threaten subsistence security in any appreciable way. The basic flaw of international development efforts at the local level is the enormous stress given to theorem one (seeds, techniques, skills, health, etc.) and the relative oblivion shown toward theorems two and three. All the health, technology, skill and education in the world are not going to improve a farmer's standard of living if he cannot market his surplus in a way that does not rob him of the value of this surplus.

There is a growing body of literature on micro-development issues reaching conclusions of this sort. Close at hand is GAO's report of November 1975 (ID–76–2) on disincentives to agricultural production in LDC's. Oxford University economist Keith Griffin's Political Economy of Agrarian Change (1974) is a light survey. But the best overall discussion of micro-deveolpment is now Patterns of Poverty in the Third World (Praeger, 1975, and an $8.00 paperback) by English sociologist-theologian Charles Elliott.

It is a beautiful demonstration of systems analysis showing how market, state, and group interests work to exclude most of the poor from every avenue of life improvement. It should be required reading for every AID official.

To translate theory to practice, I have sought a LDC where AID is just beginning a program so that pre-existing efforts are not disrupted. In addition, I sought a country open to foreign development assistance and explicitly reevaluating and restating its commitment to a more equity centered development path. I have selected the Sudan. The analysis that follows and the projects that are suggested for support represent a sample of an operational model which can address the rural development needs of many LDC's. It does not deal with the national and international processes which also work against equitable growth for the rural poor, but it is a start.

The comments that follow are based on the major 1976 ILO report Growth, Employment, and Equity—A Comprehensive Strategy for the Sudan, on ten current unpublished reports from the involved international and national bodies and their private consultants, and some 20–30 published and unpublished articles. An AID rural development research team now in Sudan will add new insights. So will the current thinking of Hunting Technical Services, Ltd. (London), the premier analysts of Sudan's rural needs. The final and precise content of the projects, it is understood, will be worked out in the normal collaborative fashion between AID and a foreign government.

II. THE SUDAN

The Sudan is the largest country in Africa and with a population of 15.2 million (1974) would not seem to have a land shortage. Some 200 million acres are said to be arable and only 15 million are under cultivation. But the nomadic nature of farming and cattle raising over much of the Western half of the country serves to diminish that surplus. So, too, does "overgrazing, overcultivation, excessive burning and firewood collecting (which) together produce the symptoms of decertification." As Jon Tinker summarized it in the February 24 issue of New Scientist, "Over the whole breadth of the Sudan, desert conditions are advancing southwards at 5–10 kilometres a year."

Sudan's economy is agricultural. This sector produces 38% of GDP, 95% of exports, and more than 50% of government revenues. Historically, cotton has been the principal export; until 1974 it was more than 50% of total export value. The economic distortions and vulnerabilities of monoculture export agriculture have not been significantly addressed. Since the end in 1972 of a debilitating civil war between the predominantly Moslem north and the multi-ethnic Christian southern region, the government of President Nimeiri has been struggling against growing trade and budget deficits to lay down basic transportation infrastructure and expand production by irrigated agricultural projects in the north and center where economic (and political) conditions are most feasible.

The formal sector, defined by ILO to mean "organized agriculture, manufacturing, construction, commerce, and services, covers 1.6 million workers or 20 to 25% of the total labor force." The modern urban sector is no more than 100,000. Open unemployment is said to be 5%, low by LDC standards. But an estimated one million men and women (not counting the nomads) move every year long distances just to survive or to gain a bit above subsistence by being seasonal migrant laborers picking cotton or pursuing other agricultural activity. Women are in integral part of the work force in traditional agriculture which occupies 70–80% of the society. ILO estimates of the total work force run from 4.7 to 7.3 million in 1973. Overcoming such a degree of ignorance would seem an appropriate early activity in a human centered development plan.

As in most LDC's income is significantly skewed toward the urban and modern sectors. The national per capita income in 1974 was $230. A 1967–8 survey found 49% of total income going to the top 20% of households and about 15% going to the bottom 40% of households. By many rough measurements, average income in the Southern region (3 million in 1973) and in the Western regions. (4.3 million) are drastically lower than the central and northern regions. The government is openly committed to redressing these regional imbalances, and the AID programs proposed below are designed to assist this effort.

President Nimeiri's attempts to pursue a socially responsible mixture of public and private enterprise are constrained by powerful internal and external forces which must be noted. Development resources serve as the most tangible means of political integration, suggesting expenditure in the South and West. But the most powerful economic forces, the too large bureaucracy, and the other modern urban interests dictate the current preponderant social service and economic investment in Khartoum and the richer regions surrounding the capitol. Now Sudan is launching a six year development plan (1977–1983) requiring about $2.6 billion in foreign resources. Most of this will come from Arab states which will insist on investing in capital-intensive export agriculture—not likely to be of great assistance to the maority of Sudanese in traditional agriculture.

For FY78 AID has proposed (on p. 481 of the Africa presentation) an indeterminate $5 to 10 million spread over multiple problems of production, technology, and training. The Harvard University pilot program of integrated rural development in Abyei District of South Khordofan Province has a number of positive elements and should be incorporated into the alternative I set forth; not least is the kind of cross cultural insights made possible by the presence of an anthropologist, a practice AID should dramatically increase.

But the overall AID discussion is one of problem solving, little more than tokenism given the size of the challenge. There is no discussion of the concrete forces creating and sustaining poverty and of the processes that need to be created to begin to change the situation. This must be the core of any new AID program if it is to fulfill the congressional mandate.

III. THE ALTERNATIVE

To assist the traditional agriculturalist to raise his income one must first understand the basic elements of his predicament. Granting the need for analysis of regional variations, the issues are these. The 1968–73 drought merely accelerated a long term ecological collapse precipitated by overgrazing—itself the combination of improved veterinary care, the digging of pumped wells and surface reservoirs, and traditional cultural imperatives. Land deterioration means inability to subsist. Absence of alternatives means a steady stream of migrant workers who must trade labor for subsistence, an unequal exchange that drains potential from the traditional sector and keeps wages low in the monetized sector.

But most debilitating would seem to be the shall system by which most lending and marketing is done at the local level. In a pattern common the world over producers borrow on crops due and buy needed merchandise from the same set of entrepreneurs. The moneylenders set the prices, weights, and all other terms. A survey from 1968–69 of tenant farmers at the Gezira cotton plantations showed the average gross profit of the moneylenders (as a percentage of the harvest value) to be 47 percent for dura (the staple grain), 72 percent for wheat, 65 percent for groundnuts, and 76 percent for luba. The subsistence farmer is producing in reality far beyond his subsistence needs, but he cannot market it and retain the proceeds.

The core of a solution is thus to build in the Western region and in the Southern region essentially separate economies, as inward looking and self-sufficient in productive activity and exchange but not in resources, as possible. The Sudan government can continue political integration but at the same time attack the problems of the traditional sector on its own terms. This means the integration of:

(1) anti-desertification measures and the allocation of permanent tenure (and therefore responsibility for upkeep) among nomads and sedentary farmers;

(2) a region by region study of and then reconstitution of credit and marketing systems based on the cooperative efforts of producers and government authorities. Usury is not in keeping with Islam;

(3) the training and stationing of agricultural extension officials (preferably local farmers) tightly linked to growing centers of appropriate technology;

(4) a region by region analysis of and then sponsorship of local light industry to produce the appropriate technology, to provide local employment in slack seasons to diminish the migrations, and to provide the kind of consumer goods that would give the farmer incentive to produce more.

The sum of these activities would be the creation of an economic surplus that (save government taxation) would be invested back in the region by the producers—to his continuous enrichment and that of the region. Without these activities, the village merchants and the nature of the exchanges between groups at different stages of modernization and with very different economic power will all serve to continue the present processes that leave traditional agriculture continuously impoverished.

Therefore, for FY78 I propose the following alternative AID programs totalling $24 million.

(1) $6 million as a contribution toward the $15 million needed for the ably planned Sudan government program of desert encroachment control and rehabilitation (DECARP). This involves "the establishment of grazing cooperatives, range seeding, firelines, small scale irrigation, town perimeter afforestation, sand dune stabilization, and shelterbelt establishment." Five provincial centers will be set up. UN agencies and the FAO collaborated in the planning. It is an imperative project for Sudan. U.S. aid would provide additional momentum for other donors and reap more benefits at the September, 1977 U.N. conference on decertification.

(2) $8 million divided equitably among the provinces of the South and the West to pursue collaborative projects of economic analysis with multidiscipline teams to:

(a) study farmer incentives, land tenure issues, marketing and credit practices, appropriate technological needs, new productive possibilities based on available resources, consumer needs and desires, migration motives and costs (especially social and psychological), and the interaction of cultural norms and economic activities;

(b) create strategies for the implementation of credit and market transformations, secure land tenure, adaptive technologies, and new local industry (cheap cement and lime plants, cheesemaking, the HTS tool bar, school needs, et cetera).

(3) $5 million in agricultural extension training to raise Sudanese capabilities in traditional agriculture by:

(a) providing visiting faculty and library resources to appropriate technical institutes and schools;

(b) creating alternative curriculum, mobile courses, short courses to train selected local citizens (as opposed to high priced government officials who will want to be restationed frequently);

(c) integrating, assisting, adding to the efforts of intermediate technology centers in the Sudan.

(4) $5 million in primary health care within the framework designed by the Government of Sudan and WHO for the period 1977–1983.

[In millions]

In sum:	
Antidesertification	$6
Research and strategy creation of appropriate technology, credit and market systems	8
Agricultural extension training	5
Primary health care	5
	24

SUDAN AID PROGRAM AMENDMENT

DEVELOPMENT ASSISTANCE

In SEC. 103. FOOD AND NUTRITION (a) strike "$550,000,000 for the fiscal year 1978"

And insert in lieu thereof

"$563,000,000 for the fiscal year 1978"

In renumbered SEC. 105 HEALTH strike "$104,900,000 for the fiscal year 1978"

And insert in lieu thereof

"$109,900,000 for the fiscal year 1978"

In renumbered SEC. 107 TECHNICAL ASSISTANCE strike "$100,000 for the fiscal year 1978"

And insert in lieu thereof

"$106,000,000 for the fiscal year 1978"

In renumbered SEC. 107 add the new subparagraph

"(7) programs to help less developed countries prevent or reverse severe environmental damage."

FISCAL YEAR 1978 SUDAN PROGRAM

PROPOSED LANGUAGE FOR THE FOREIGN AID BILL REPORT

The FY 78 bilateral aid program to the Sudan has been created as an attempt to spell out more clearly what the New Directions aid policy, (defined in Sections 102c and 102d of the FAA of 1961) means in operational terms. It can thus serve as a model applicable to many rural development situations. The Congress intends that foreign assistance efforts cease reducing poverty to a collection of symptoms and instead face the processes that cause and sustain it. In part that means an overall strategy that addresses not just improving the physical means of production at the local level (as current projects now overwhelmingly do) but also improving the farmer's incentive to produce and, equally, his ability to trade or sell his surplus to his greater advantage.

The proposed FY 78 program for Sudan is aimed at improving the life quality and income of people in the poor rural areas of the Western and Southern regions. It intends to create relatively self-sufficient regional economies by the integration of four activities: (1) anti-desertification measures including the allocation of permanent tenure where appropos; (2) region by region reconstitution of credit and marketing systems based on the cooperative efforts of producers, government authorities and others; (3) improvement of agricultural knowledge systems for traditional agriculture with an emphasis on self-participation and appropriate technology; and (4) improvements in the local health environment. Ideally the results will include the sponsorship of local light industry to produce the appropriate technology, to provide local employment in slack seasons, to diminish the current massive migrations, and to provide the kind of consumer goods that would give the farmer incentive to produce more. The sum of such activities would be the creation of an economic surplus that (save government taxation) would be invested back into the region by the producers—to their continuous enrichment. Without such changes, the current processes of exchange will continue to impoverish the poor and drain any surplus out of the region.

Contingent upon further and final negotiations between AID and the government of Sudan, the present $5–10 million preliminary AID proposal may be enlarged up to a total of $24 million for FY 78 to be allocated among four project areas, each to be carried out in normal collaborative fashion.

(1) Up to $6 million to improve the relationship of people with their resource and enviromnental base, with particular consideration given to the government's antidesertification plan DECARP.

(2) Up to $8 million to study the total marketing enviromnent and technological base of the traditional sector and to develop programs and resource allocations to implement strategies for credit and market transformations, secure land tenure, adaptive technologies, and new local light industry.

(3) Up to $5 million to improve agricultural knowledge systems for the traditional farm sector with special emphases on appropriate technologies and on improving the linkages among small farmers, extension efforts, and research activities.

(4) Up to $5 million to primary health care programs in the two regions with emphases on training local paramedical resources and on systems analysis of local health environments.

In each project maximum effort should be made to involve and train local personnel who will remain in place and who will be the most appropriate teachers of the first and future generations. In addition, the minimum of outside resources should be used in any aspect so that the habit of self-sufficiency is engrained and activity does not stop when external aid ceases.

Because the development of production and of life quality in the rural world cannot be accomplished without the producers as willing active participants reaping an equitable measure of the rewards of production, project area two is of paramount importance. Absence of significant progress in this area will be understood as failure to fulfill Congressional intent and to meet the objectives of New Directions and policy. Biannual reports to the Congress on the status of this project would be appropriate.

LIKE THE GREEKS AT MARATHON, WE MUST STAND FAST

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, on repeated occasions since the beginning of the new administration, I have expressed my gratification at President Carter's strong statements on the issue of human rights in other countries. It has long been my firm belief that, while the United States cannot reform every despot in the world, it need not condone nor should it aid violations of human rights in those countries over which it has any influence, especially its allies.

The situation in Cyprus serves as a good illustration of my point. Seizing upon the opportunity offered by the Greek junta's attempt to inspire an uprising and takeover of Cyprus by Greek Cypriots, an attempt which failed and fortunately led to the return of democratic rule in Greece, Turkey in an unwarranted response invaded the island and set into motion its own evil machinations, using American-supplied military forces intended for NATO defense. The Republican administration at that time did not want to link American aid to human rights by cutting off our aid to Turkey until an acceptable settlement of the Cyprus situation was reached, but the Congress exercised its own power to place an embargo on arms to Turkey, thereby

preventing the United States from aiding the Turkish occupation and providing a strong incentive for Turkey to rethink its Cyprus policy.

Naturally, the Turkish Government reacted, as other human-rights violators have reacted when challenged, by denouncing the United States for interfering in the internal affairs of another country and by retaliating against U.S. interests within Turkey; to wit, the closing of American military bases. The charge is simply untrue. First and most importantly, respect for human rights is a principle that transcends national borders; second, conflicts between members of the NATO Alliance are of legitimate concern to the United States; and finally, American military equipment was used to carry out the invasion. By placing an arms embargo on Turkey, the Congress went on record as dissociating this country with the expansionist and repressive ambitions of Turkey, just as I trust it would have expressed outrage had the Greek junta succeeded in its attempt to seize Cyprus.

Turkey would like nothing more than to stall and stall on negotiations over Cyprus, thereby gaining the legitimacy that longevity would give to its control of the island. But the arms embargo provides a positive incentive for Turkey to back down. Naturally, the United States does not gain by having its overseas bases closed, particularly one with the great strategic advantage that those in Turkey have, but the Turkish Government also has much to lose by a continued disruption of relations. And, our country has much to gain by associating itself and our allies with humanitarian and democratic principles. The United States is, for example, regretting its misguided support of the Greek junta now that a democratic government has returned to that country.

It is, therefore, with great sorrow that I have noted that the Carter administration, after a 3-month review of the situation in Cyprus, has indicated its desire to avoid a linkage of renewed military aid to Turkey with Turkish concessions on Cyprus. In electing to follow his predecessor's policy on this matter, President Carter is moving away from the encouraging statements he made on human rights during the campaign and his first 2 months in office. Moreover, Carter has decided to back the controversial $1 billion aid and defense package that Kissinger negotiated with Turkey last year and to ask Congress to relax the arms embargo to allow the sale of $175 million in military hardware.

The reasoning behind the President's decision is to allow flexibility in our negotiating position. My feeling is that this will only work to the advantage of Turkey and its continued occupation of Cyprus. The fact is that Congress finds the current situation there unacceptable, and it has stated that, unless the situation improves, it will not allow military aid or sales to Turkey. This gives Turkey a simple choice: Make concessions on Cyprus or give up a renewal of the military aid and sales that it badly wants.

On a related and more general policy development which greatly disturbs me, the Senate Foreign Relations Committee has rejected language passed by the House that would require U.S. representatives to the World Bank and other international financial institutions to vote against approval of loan applications from countries which violate human rights. The committee followed the President's wishes in rejecting this requirement, and, as in the Turkish aid matter, his position is that such a requirement would undermine flexibility in our foreign relations. I disagree. I feel that no significant progress will be made in improving human rights in those countries with strategic and economic interests common to the United States unless we make it clear that progress with the latter will be predicated upon a satisfactory record on the former. Therefore, I welcomed President Carter's refreshingly strong statements on human rights, which he now appears to be backing away from.

Only firm and positive American action will persuade the Turks to agree to a reasonable solution to the situation in Cyprus. Like the Greeks at Marathon, we must stand fast.

DESCRIPTION OF BILLS INTRODUCED BY EDWARD I. KOCH IN THE 95TH CONGRESS

(M. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, on January 4 at the outset of the 95th Congress, I inserted in the RECORD a list of the legislative proposals that I planned to introduce in the opening months of this Congress. Almost all of those bills have now been introduced; however, there are seven listed without numbers. The latter are being circulated among the agencies and other experts for comments and will be introduced in the near future. Of course, there are other worthwhile bills initiated by others which I have cosponsored, but all of the bills I have listed below are ones that I have taken a primary role in developing.

While taking an idea and developing it into an actual piece of legislation is in many cases no simple task, the simple introduction of legislation is only the beginning of the legislative process in the Congress.

Most pieces of legislation require hearings and subsequently the appropriate subcommittee and committee must mark up the legislation, and if favorably disposed, must report the legislation to the House. Often the subcommittee and committee will act on worthwhile legislation on their own initiative. However, it often takes public interest to impress upon the committee that the legislation has sufficient support and merit to warrant hearings and legislative consideration. Most of the bills listed will only become law if constituents who are concerned take an active interest in seeing that these bills progress.

Of the approximately 20,000 bills introduced in the House every Congress, about 6 percent receive hearings and are reported from committee, about 5 percent are passed, and 3 percent signed into public law. Obviously, not all of the bills that I am introducing this month will become law in the 95th Congress, but I hope that some will and I shall do my best to make that come about.

The following is a brief description of the bills:

TAXES AND TAX RELIEF

H.R. 435—to increase to $1,500 the personal income tax exemptions of a taxpayer, including the exemption for a spouse, for dependents, for old age and blindness. Chairman Al Ullman, Ways and Means Committee.

H.R. 436—to provide that blood donations shall be considered as charitable contributions deductible from gross income. Chairman Al Ullman, Ways and Means Committee.

H.R. 437—to disallow the business expense tax deduction for first-class air and rail travel in excess of the coach fare for such travel. Chairman Al Ullman, Ways and Means Committee.

H.R. 440—to provide that landlords using an accrual method of accounting may not deduct real property taxes on their property until such taxes are paid. Chairman Al Ullman, Ways and Means Committee.

H.R. 441—to allow a credit to tenants or houses or apartments for their proportionate share of the taxes and interest on mortgage paid by their landlords. Chairman Al Ullwan, Ways and Means Committee.

H.R. 850—to give tax equity to single taxpayers and working married couples. Chairman Al Ullman, Ways and Means Committee.

HUMAN RIGHTS AND FOREIGN POLICY

H.R. 450—to eliminate "maintenance of internal security" as a purpose for which military assistance may be furnished. Chairman Clement Zablocki, International Relations Committee.

H.R. 950—to provide that the place of birth of an individual issued a U.S. passport shall not be disclosed in the passport and to eliminate the requirement that the passport of an individual seeking entry into the United States disclose such individual's place of birth. Chairman Clement Zablocki, International Relations Committee.

H.R. 1505—to prohibit U.S. companies from participating in the boycott of another U.S. company or a country friendly to the United States, or providing certain information, in response to a foreign country's request. Chairman Clement Zablocki, International Relations Committee.

H. Res. 36—to urge the leaders of the Soviet Union to remove all obstacles to emigration and to the free exercise of religious and cultural rights and expressing congressional support of "Solidarity Sunday" to achieve this goal. Chairman William Lehman, Subcommittee on Census and Population.

H. Res. 37—requesting reports from the President and from the Commission on Security and Cooperation in Europe concerning the freedom of the citizens of the Socialist Republic of Romania to emigrate and the status of minorities in the Socialist Republic of Romania. Chairman Charles A. Vanik Subcommittee on Trade, and Chairman Clement Zablocki, International Relations Committee.

H. Con. Res. 22—expressing the request of the U.S. Government that the Government of the U.S.S.R. provide Valentyn Moroz with the opportunity to accept the invitation of Harvard University. Chairman Lee Hamilton, Subcommittee on Europe and the Middle East.

URBAN ENVIRONMENT

H.R. 446—to establish a Commission on the Humane Treatment of Animals. Chairman, W. R. Poage, Subcommittee on Livestock and Grains.

H.R. 953—to authorize the Secretary of the Treasury to provide loan guarantees for the debts of municipalities. Chairman Henry S. Reuss, Committee on Banking, Finance and Urban Affairs, and Chairman Al Ullman, Ways and Means Committee.

H.R. 955—to authorize the Secretary of

Transportation to make grants for the construction of bikeways in urbanized areas and to connect urban areas with local, State, and national parks. Chairman James J. Howard, Subcommittee on Surface Transportation.

H.R. 2448—to authorize money for grants to be awarded by the Secretary of HEW for the development of alternatives to scientific experimentation and testing of toxic substances on live animals. Chairman Ray Thornton, Subcommittee on Science, Research and Technology.

H.R. 2828—to provide for loans for the establishment and/or construction of municipal, low-cost, nonprofit clinics for the spaying and neutering of dogs and cats. Chairman W. R. Poage, Subcommittee on Livestock and Grains.

H.R. 3668—to provide for payments in lieu of taxes to local governments based upon the amount of certain tax exempt property owned by the United States within such locality. Chairman L. H. Fountain, Subcommittee on Intergovernmental Relations.

H.R. 5256—to modify the Highway Trust Fund, to create a Unified Transportation Trust Fund from which funds will be available for both mass transportation and highway purposes. Chairman James J. Howard, Subcommittee on Public Works and Transportation.

H.R. ____—to increase employment in the private sector.

H.R. ____—to ensure that citizens injured in motor vehicle accidents involving a member of the diplomatic community receive just compensation for their injuries.

HEALTH, EDUCATION, AND WELFARE

H.R. 92—to improve and make more effective the provision of nursing home service under medicare and medicaid—introduced with Representative Pepper. Chairman Paul G. Rogers, Subcommittee on Health and the Environment and Chairman Don Rostenkowski, Subcommittee on Health.

H.R. 443—to provide for supportive day treatment and in-home services to troubled children and families. Chairman James C. Corman, Subcommittee on Public Assistance.

H.R. 448—to provide equal employment opportunity for handicapped individuals. Chairman John Brademas, Subcommittee on Select Education.

H.R. 449—to require that operators of a schoolbus be at least 18 years of age. Chairman John H. Dent Subcommittee on Labor Standards.

H.R. 452—to improve the survey and certification process, ratesetting and fiscal audit methods, and general regulation of nursing homes and intermediate care facilities under medicaid, and provides for medical, psychological, and social assessment of long-term care patients under medicare and medicaid. Chairman Paul G. Rogers, Subcommittee on Health and the Environment and Chairman Dan Rostenkowski, Subcommittee on Health.

H.R. 453—to expand home health care and homemaker services provided under medicare and medicaid. Chairman Dan Rostenkowski, Subcommittee on Health and Chairman Paul G. Rogers, Subcommittee on Health and the Environment.

H.R. 952—to amend the Social Security Act to replace existing Federal public assistance and welfare programs with a single program under which all residents of the United States are guaranteed an adequate minimum income, with incentives to work for those who are able to do so, and for other purposes. Chairman Thomas S. Foley, Committee on Agriculture, Chairman Al Ullman, Committee on Ways and Means.

H.R. 954—to increase the excise tax on cigarettes and establishes a trust fund for research programs at the National Cancer Institute. Chairman Al Ullman, Committee on Ways and Means and Chairman Harley O. Staggers, Interstate and Foreign Commerce Committee.

H.R. 1136—to revise and expand various provisions relating to home health and other long-term care services under medicare—introduced with Rep. Pepper. Chairman Henry Reuss, Committee on Banking, Finance and Urban Affairs, Chairman Harley O. Staggers, Committee on Interstate and Foreign Commerce, and Chairman Al Ullman, Committee on Ways and Means.

H.R. 1114—to provide additional programs as assistance for health personnel training programs—introduced with Representative Pepper. Chairman Paul G. Rogers, Subcommittee on Health and the Environment.

H.R. 2449—to establish a commission to study the results of racial integration of public schools, the use of busing to achieve racial integration of the public schools, and other questions relating to the quality of public schools. Chairman Carl Perkins, Subcommittee on Elementary, Secondary and Vocational Education and Chairman Don Edwards, Subcommittee on Civil and Constitutional Rights.

H.R. 2450—to establish research programs and treatment centers for the study and treatment of problems associated with human fertility, sterility and the reproductive process. Chairman Paul G. Rogers, Subcommittee on Health and the Environment.

H.R. 4573—to provide for the protection of the public health from unnecessary medical exposure to ionizing radiation by providing for the licensure of radiologic technologists; directs the Secretary of HEW to prescribe radiation standards for diagnostic and other X-ray equipment manufactured before August 1, 1974, and to conduct regular inspections of all X-ray equipment. Chairman Paul G. Rogers, Subcommittee on Health and the Environment.

H.R. 6120—to provide access to voting places for handicapped voters—introduced with Representative Cohen. Chairman Frank Thompson, Jr., House Administration Committee.

H.R. 6327—to provide for the use of electronic teleprinting devices by the Senate and House of Representatives to enable deaf persons and persons with speech impairments to engage in toll-free communications with Members of Congress.

H.R. —To establish a system for promoting the creation of independent living centers for handicapped individuals, and for other purposes.

ARTS AND HUMANITIES

H.R. 429—to establish a library services matching grant program to provide for Federal matching of private contributions made to public libraries for operating expenses. Chairman John Brademas, Subcommittee on Select Education.

H.R. 438—to provide that the 4-percent excise tax on the net investment income of a private foundation shall not apply to a private foundation organized and operated exclusively as a library, museum, or similar educational institution. Chairman Al Ullman, Ways and Means Committee.

H.R. 439—to allow a tax credit for certain donations of the artist's own work to public institutions. Chairman Al Ullman, Ways and Means Committee.

H.R. —making appropriations to carry out the grant program established in the Museum Services Act during fiscal year 1978. Chairman Sidney R. Yates, Subcommittee on the Interior.

SOCIAL SECURITY

H.R. 442—to reduce from 20 to 10 years the length of time a divorced woman's marriage to an insured individual must have lasted in order for her to qualify for wife's or widow's benefits on his wage record. Chairman James A. Burke, Subcommittee on Social Security.

H.R. 444—to provide that support and maintenance—in cash or kind—furnished to an eligible individual by members of his or her immediate family shall be disregarded—and shall not serve to reduce his or her supplemental security income benefits—to the extent that it does not exceed $200 a month. Chairman James C. Corman, Subcommittee on Public Assistance.

PRIVACY

H. R. 430—to make it an unlawful employment practice for an employer to request papers or information from an employee or applicant for employment with regard to the military service of the individual, unless such a request is directly job related or involves a question of prior criminal convictions. Chairman Augustus Hawkins, Subcommittee on Employment Opportunities.

H.R. 433—to restrict the disclosure of information in the possession of telephone companies or telegraph companies concerning members of the news media. Chairman Lionel Van Deerlin, Subcommittee on Communications.

H.R. 434—to prohibit the use of polygraphs (lie-detectors) for employment purposes. Chairman Don Edwards, Subcommittee on Civil and Constitutional Rights.

H.R. 1984—to extend to the private sector and State and local governments privacy safeguards now in effect for Federal agency records on individuals—introduced with Representative Goldwater. Chairman Don Edwards, Subcommittee on Civil and Constitutional Rights.

H.R. 1985—to require the individual's consent or notice to the individual and judicial review before the individual's financial, telephone, or credit records are disclosed to state and local governments or persons in the private sector, but with no notice to the individual where it would jeopardize a criminal investigation. Chairman Fernand St Germain, Subcommittee on Financial Institutions and Chairman Don Edwards, Subcommittee on Civil and Constitutional Rights.

CIVIL LIBERTIES, THE COURTS, CRIMINAL JUSTICE AND GOVERNMENT

H.R. 432—to decriminalize personal use and possession of marijuana. Chairman Paul G. Rogers, Subcommittee on Health and the Environment.

H.R. 2998—to prohibit discrimination on the basis of affectional or sexual preference. Chairman Peter W. Rodino, Jr., Judiciary Committee and Chairman Carl Perkins, Committee on Education and Labor.

H.R. 3361—to permit Federal regulatory agencies to award costs of participation where there is a showing that the applying party could substantially contribute to the fairness of the proceeding. Chairman George E. Danielson, Subcommittee on Administrative Law and Governmental Relations.

H.R. 3752—to amend the Federal Election Law to provide that payments made or obligations incurred with respect to campaign items, such as buttons and bumperstickers, shall not be considered to be contributions to Presidential campaigns under such laws. Chairman Frank Thompson, Jr., House Administration Committee.

H.R. —to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation.

H.R. —to provide for the payment by the United States of attorneys' fees and other costs of the accused in criminal cases where the ultimate disposition is other than a conviction or plea of nolo contendere.

H.R. —to amend title 28, United States Code, to improve certain procedures in class actions.

WANTED: AN AMERICAN CULTURAL RENAISSANCE

(Mr. KOCH asked and was given permission to extend his remarks at this

point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, the arts form an integral part of America's life. They bring vitality to the American spirit and are an essential ingredient of a rich and meaningful urban existence. Congress created the National Endowment for the Arts in recognition of the important role the arts should play in America. The Endowment has done a magnificent job with the limited funds they have, but more still needs to be done. To respond to this need, I have been working on legislation that will help remedy the financial difficulties artists, performers and our cultural institutions are facing.

The problem is of particular concern to me because of the important role the arts play in New York City. The city's museums, libraries and cultural events generate a distinctive and creative atmosphere that is central to the spirit of the city. However, the national impact of New York City's culture has often been overlooked. For instance, the Joffrey Ballet and the New York Philharmonic each traveled to 23 cities outside New York, and performed before a collective audience of 633,750 people.

The Metropolitan Opera is heard by 5 million Americans on the 20 Saturdays its performances are broadcast across the country. Its perfomance of La Boheme on March 15 was viewed live on national television by millions of Americans. In addition, the opera tours to 8 cities a year, something it has been doing since its creation in 1883.

The Metropolitan Museum of Art estimates that it does more lending than any other institution in the country; last year it made short-term loans of 1,777 art objects to 233 institutions. Additional funding ought to be provided for these and similar institutions throughout the United States, because the return on such an investment is so great. Money for the Chicago Symphony or the New York City Ballet brings cultural awareness to cities and countries all over the country.

I have introduced three bills that would help alleviate the difficulty artists and institutions promoting the arts are now facing: First, H.R. 439, which would provide for a tax credit for certain contributions of literary, musical, or artistic compositions. A similar provision was dropped during the House-Senate conference on the 1976 Tax Reform Act. My bill, H.R. 439, would allow a 30-percent tax credit. This bill includes many safeguards against potential misuse of the proposal; only art-related income can be credited, and the income that is credited may not exceed 50 percent of the artist's total income. There is a limit of 10,000 dollars on the tax credit that can be received.

The bill addresses a pressing problem. Donations to museums have dropped dramatically since the tax laws were revised in 1969. At one point before 1969, the Museum of Modern Art received 41 pieces of art from 17 different artists. In 1975 they received none. This bill would not only assist the artist but it also would be of great benefit to a public which often does not get the chance to see and appreciate the works of living American artists. It is inequitable that if an artist decides to give a painting to a friend, the artist is subject to the gift tax provisions of the law based on the fair market value of the painting, yet if he wishes to donate it to a museum he only receives a tax credit for the cost of materials. I want to restore dignity as well as financial solvency to the contemporary artist, for Congress accords them little of either presently.

I have also introduced H.R. 438 which provides that the 4-percent excise tax on the net investment income of a private foundation shall not apply to a private foundation organized and operated exclusively as a library, museum, or similar educational institution. Over the years several institutions have been established by wealthy donors which have since been turned over to governing bodies that tried to represent the public's interest. However, the Treasury Department treats these museums as "operating foundations" rather than "publicly supported" organizations. This technicality forces them to pay a 4-percent excise tax that normally does not apply to museums or libraries. Because of this tax museums such as the Isabella Stewart Gardner Museum and the Henry Francis DuPont Winterthur Museum in Delaware are faced with increasing costs and are consequently forced to charge higher admission fees. The Frick Collection in New York had to begin charging admission for the first time because of the difficulties paying this tax posed. My bill would help alleviate this financial burden, would lead to lower admission fees, or in certain cases no admission fees at all, and thereby make these museums more accessible to the public.

Today I am introducing a bill which would make appropriations to carry out the grant program established under section 206(a) of the Museum Services Act for fiscal year 1978. This bill would appropriate $25 million for programs enabling museums to construct displays, develop an experienced staff, and meet administrative costs. It would also fund programs that will help museums in forming cooperative exhibition efforts by meeting the cost of transportation of collections and identifying and locating collections available for loans. It also provides funds for programs to assist museums in conserving their artifacts and art objects as well as programs that attempt to reach special groups in our society such as urban neighborhoods and Indian reservations. These are all vital functions of a museum, which will not be carried out unless Congress provides the needed funds.

A related and important area of concern for me is the needs of the public library system in the United States. Millions use the resources of their public library every year. It provides research data, cultural events, and reading facilities that are currently threatened with termination because of skyrocketing costs. I have introduced H.R. 429, which would provide for Federal matching grants to equal private contributions, which would pay for the operating expenses of public libraries. Sixty percent of any given private contribution will be spent in any given branch library that the donor may designate. In addition, 50 percent of the Federal matching funds will be spent in libraries that serve low income areas. The first provision is designed to assure the donor that the impact will be felt in a specific loan branch while allowing the central library system to use contributions to provide general support services to branches. The second provision is intended to compensate for the lower amount of contributions that would be expected from areas where services are still highly valued.

I want to clarify that this bill is in no way meant as a substitute for full funding under the Library Services and Construction Act. Full funding under that act must be the Congress first priority in aiding our Nation's libraries. My bill is designed to supplement existing library programs that are not available for general operating expenses. It is hoped that it could add to the excellent service that is already being provided and that it could make the difference in keeping libraries open in places where financial conditions make this difficult. Without such assistance many libraries throughout the country will be unable to provide minimal services and thousands of Americans will be denied the chance to enrich their lives through the use of the library.

President Carter has, by his example, rekindled interest in the arts in America. He has also indicated his support for measures which would aid artists and institutions promoting the arts. I applaud his leadership in this area and I look forward to working with him in an effort to create an American cultural renaissance. I hope my colleagues will join in this endeavor.

OUTPATIENT REHABILITATION SERVICES AND MEDICARE

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, today I am introducing a bill to amend title XVIII of the Social Security Act—the medicare program—to clarify the treatment of rehabilitation services and to rectify what I think is a longstanding oversight in the statute by recognizing outpatient rehabilitation facilities as medicare providers within the program.

Presently, title XVIII covers rehabilitation services to medicare beneficiaries only when provided in rehabilitation hospitals or acute care hospitals on an outpatient care basis in either type of facility. However, because medicare provides only limited coverage of services provided by free-standing outpatient facilities, the availability of comprehensive outpatient rehabilitation services for medicare patients is significantly restricted.

This legislation defines inpatient and outpatient rehabilitation services to clarify the appropriate objectives and components of each, and to determine the standards necessary to become a medicare provider. Also, the bill defines the outpatient rehabilitation services eligible for medicare reimbursement.

Medicare is designed to provide medical services to the Nation's aged and disabled population at reasonable cost. Rehabilitation services are instrumental in aiding individuals to regain their

abilities and to restore them to the highest degree of functioning possible.

The cost-benefits of extensive rehabilitation services initiated at the earliest point of treatment decrease, and in some instances prevent, further costs due to recurrence of illness or disability. Medicare patients who use rehabilitation centers generally undergo long periods of treatment. Typically they need to overcome disabling conditions produced by traumatic injuries, neurological disorders and cardiac problems. Rehabilitation is often essential to avoid recurrent hospitalization or admission to a nursing home. Often these services can be provided on an outpatient basis. However, only hospitals are eligible for medicare reimbursement for a full range of rehabilitation services.

Presently, freestanding rehabilitation centers are limited to payment for physical therapy and speech therapy. Moreover, comprehensive medical rehabilitation services are covered if given in a home health agency or skilled nursing facility, but not in an outpatient rehabilitation center. The net result is that medicare patients are forced to receive care at a hospital, pay for the services themselves, or forgo them completely.

The extension of coverage under medicare to outpatient rehabilitation facilities is consistent with a variety of improvements made in the medicare program in recent years which encourage outpatient care and discourage high cost, inpatient hospital care.

Mr. Speaker, at this time I would like to insert the text of the bill and to thank the national organizations which have assisted me in the preparation of this legislation including the Association of Rehabilitation Facilities, the American Congress of Rehabilitation Medicine, the Academy of Physical Medicine and Rehabilitation:

H.R. 6411

A bill to amend title XVIII of the Social Security Act for the purpose of including outpatient rehabilitation services among the benefits of the medicare program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1832(a)(2) of the Social Security Act is amended by striking out "and" at the end of subparagraph (B), by striking out the period at the end of subparagraph (C) and inserting in lieu thereof "; and", and by inserting the following new subparagraph after subparagraph (C):

"(D) outpatient rehabilitation services."

(b) Section 1835(a)(2) of such Act is amended by striking out "and" at the end of subparagraph (B), by striking out the period at the end of subparagraph (D), and by inserting the following new subparagraph after subparagraph (D):

"(E) in the case of outpatient rehabilitation services, such services are or were medically required."

(c) Section 1861(u) of such Act is amended by inserting "rehabilitation facility," immediately after "home health agency,".

(d) Section 1861(z) of such Act is amended by inserting "rehabilitation facility," after "care facility,".

(e) Section 1861 of such Act is amended by adding the following new subsections at the end thereof:

"Rehabilitation Facility

"(aa) The term 'outpatient rehabilitation facility' means a public or private institution (or a district part of an institution) which—

"(1) is primarily engaged in providing a program of diagnostic, therapeutic, and restorative services to outpatients addressed to be rehabilitation of injured, disabled, or sick persons;

"(2) maintains adequate clinical records on all patients;

"(3) has bylaws in effect with respect to its staff or physicians;

"(4) has a requirement that every patient must be under the care of a physician;

"(5) in the case of an institution in any State in which State or applicable local law provides for the licensing of rehabilitation facilities, (A) is licensed pursuant to such law, or (B) is approved by the agency meeting the standard established for such licening;

"(6) has in effect an overall plan and budget that meets the requirements of subsection (z); and

"(7) meets such other requirements as the Secretary finds necessary in the interests of the health and safety of patients served by the institution.

"Outpatient Rehabilitation Services

"(bb) The term 'outpatient rehabilitation services' means services by a rehabilitation facility furnished under a medically directed plan related to the achievement of specific outcomes regarding functional capacity or the prevention of deterioration in the disabling condition of the patient; including any one or more of the following:

"(1) physician services, including diagnostic, evaluation, and therapeutic services;

"(2) physical therapy, occupational therapy, inhalation therapy, and speech therapy;

"(3) prosthetic and orthotic devices, including testing, fitting, or training in the use of prosthetic and orthotic devices;

"(4) social and psychological services;

"(5) nursing care provided by or under the supervision of a professional nurse;

"(6) supplies, appliances, and equipment, including the purchase or rental of equipment; and

"(7) such other services as are medically necessary for the mental and physical restoration of the patient, or for the prevention of his deterioration, and are ordinarily furnished as outpatient services by a hospital."

"Inpatient Rehabilitation Services

"(cc) The term 'inpatient rehabilitation services' means services furnished under a medically directed plan related to the achievement of specific outcomes regarding functional capacity or the prevention of deterioration in the disabling condition of the patient which plan may include the following services:

"(1) bed and board;

"(2) physician services, including diagnostic evaluation, and therapeutic services;

"(3) physical therapy, occupational therapy, inhalation therapy, and speech therapy;

"(4) prosthetic and orthotic devices, including testing, fitting, or training in the use of prosethetic and orthotic devices;

"(5) social and psychological services;

"(6) nursing care provided by or under the supervision of a professional nurse;

"(7) drugs, biologicals, supplies, appliances and equipment, including the purchase or rental of equipment; and

"(8) such other diagnostic or therapeutic services or items, furnished by a hospital or by others under arrangements with them made by the hospital, as are ordinarily furnished to inpatients either by such hospital or by others under such arrangements.".

NATIONAL ELECTRONICS WEEK

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, it is with great pleasure that I am introducing a joint resolution in the House today to proclaim the first week in May as National Electronics Week.

Few industries have demonstrated the leadership in technological change as well as in economic growth as has the electronics industry. The economic health of the industry is due, in large part, to the combined efforts of manufacturers, sales representatives, and distributors. It is appropriate that the first week in May be designated as National Electronics Week, because it is during that period that the entire industry will be gathering together to present the NEWCOM Show. The show exemplifies the diversity and dynamism of the electronics industry, and the cooperation of all segments of that industry to work together.

In the last few years, the electronics industry has become a major force in both the economic and social life of the country. From heavy manufacturing to leisure activities to office work, the electronics industry has spurred productivity, enhanced efficiency and minimized waste.

I urge my colleagues to join with me in congratulating the electronics industry on past successes and on wishing them well in the future. At this point I would like to insert the text of the resolution:

JOINT RESOLUTION

Authorizing the President to proclaim the week beginning May 1, 1977, and ending May 7, 1977, as "National Electronics Week"

Whereas the electronics industry in the United States has traditionally provided innovative technology which has increased the productivity and improved the management of business and industry in the United States; and

Whereas the electronics industry in the United States has made important contributions to the economic progress of the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the week beginning May 1, 1977, and ending May 7, 1977, as "National Electronics Week", and calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

PRESERVATION OF PINES BARRENS NATIONAL ECOLOGICAL RESERVE

(Mr. FLORIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FLORIO. Mr. Speaker, as this new Congress begins, and as a new administration begins with it, many of us are looking forward to an era of creative government—an era when many critical human needs can be addressed with a spirit of cooperation in the search for imaginative and enlightened domestic policies.

As a citizen and Representative of the Nation's most urbanized State, I believe that one of the most critical needs is to renew the commitment of the Federal Government to help a safe, healthful, and humane living environment for our

urban populations. Nearly three-quarters of us live in urban places in the United States, and yet we have, of late, too often failed to provide the tools needed by our urban States and localities to maintain an environment worth looking at and living in.

Most assuredly, this has not been our intention. In the pellmell growth of metropolitan areas during the 1950's and 1960's we recognized that the quality of life of those caught up in this growth was diminishing rapidly. Among the early responses to this problem was the establishment by Congress in 1958 of the Outdoor Recreation Resources Review Commission. The Commission's report, issued in 1962, helped to bring about the recognition that natural beauty, ecological balance, and the healthful use of leisure times are essential in an urban nation. More specifically, the Commission's report affirmed the right of all Americans—including urban Americans—to the protection of landscape resources which possessed important ecological, scenic, and recreational values. Many new land conservation programs were enacted by Congress as a result of that report, and many programs already in place were expanded. In effect, the report and the enactments it spawned established the Federal Government as a full partner in the effort to preserve outstanding landscapes during a period of rapid economic growth and urban expansion.

It is worth asking at this juncture—at the beginning of a new Congress and a new administration—whether we are fully living up to the goals and expectations we created 15 years ago. To be sure, the Congress in its last session was able, finally, to increase the Land and Water Conservation Fund. This can help, but even an expanded fund can hardly be expected to reduce the arrears accumulated over the past years of inaction as well as meet the new demands that will be placed upon it.

As a result, State and local governments, lacking resources of their own to preserve large ecological, scenic, and recreational areas, will continue to apply to the Congress for the inclusion of such areas into the National Parks System—itself seriously in arrears in manpower and money.

As the Congress struggles to deal with these demands, it is becoming clear that however hard we try to provide National Parks to serve urban populations, the process is ultimately self-defeating. The enormous cost for land acquisition, development and management, if applied fairly to all urban areas, is simply not sustainable. Even now, the National Park Service is seriously overextended, its capacity to manage existing urban parks as well as natural areas in question. Though we have succeeded in establishing a few urban parks, the effort has not uniformly met urban needs, nor has the distribution of Federal funds for the purpose been fair and equitable. In the end, the effect of such a procedure has been to deny, for lack of funds and manpower, the protection of many crucial landscape resources.

It is my view that Federal policy in this regard is at a turning point. It is becoming obvious that another way must be found to meet the burgeoning demand for the preservation of outstanding landscapes to provide a humane living environment for an urban population. It is essential that all levels of government fully exercise their capabilities in a new kind of cooperative effort to the end that such landscapes can be protected with means other than outright purchase for inclusion in the National Park System. The alternative to national park designation ought to be something other than the relegation of outstanding landscapes to indiscriminate development.

Unless a new kind of Federal policy to deal with this problem can be formulated, it is certain that many treasured landscapes will simply be lost. One such area for which this fear is very real is the Pine Barrens in my home State of New Jersey. The Pine Barrens are, according to a recent report of the Bureau of Outdoor Recreation, among the most outstanding natural areas in the country—a relict biota of the last ice age containing many rare and unusual species of plants and animals in an ecosystem still undergraded by development. The preservation of this 1,500 square mile area, almost miraculously spared from suburban sprawl in the densely populated Northestern urban corridor, is essential for many reasons.

Ecologically, the Pine Barrens are critical: the area overlies the major part of an aquifer which stores some 17.7 trillion gallons of water—an amount equal to 10 years of rainfall. But because of the highly porous soil and the shallow depth of the aquifer, this giant underground reservoir could be easily polluted should urban sprawl take place, endangering essential water supplies for an expanding population.

Scenically, the Pine Barrens provide a vast open space, laced with waterways—a remote, quiet, unbroken forest of pine and oak, unusual in such an urbanized region. Recreationally, the Pine Barrens provide boating, hunting, fishing, hiking, nature study, and camping to some 50 million people who live within striking distance of the area. There are inherent economic values associated with this landscape, too. The unusual combination of soils, water table, and climate make the Pine Barrens first in the Nation in blueberry production, and third in cranberry production.

Taken together, all these values have persuaded the Bureau of Outdoor Recreation that the Pine Barrens meet Department of Interior criteria for what is called "national significance." This means, in effect, that the area could qualify as an addition to the National Park System either as a "natural area" or as a "national recreational area."

But what would be its chances were this vast resource to be proposed as a national park? Fifteen hundred square miles constitutes nearly 1 million acres of land, land located in an area where per-acre value typically is calculated in the thousands of dollars. The brutal reality is that despite the importance of this place, the cost of acquisition would simply be unsupportable. An alternative might be to isolate a smaller section within the Pine Barrens for a national park designation. But this would fail to provide adequate protection for the ecosystem as a whole, and for the aquifer which this ecosystem so beneficially provides. Moreover, at whatever size, traditional national park management might not be appropriate for an area in which existing communities and the indigenous agriculture, among other land uses, are valued and should be maintained.

On April 26, I will, therefore, introduce a bill for the protection of the Pine Barrens, not as a national park, but in a way which calls upon a Federal-State-local partnership to produce a program for protecting this landscape resource by using the specific capabilities of each level of government for the role each is best suited to play. Under the bill the Federal Government would provide financial and technical support for the delineation of a Pine Barrens ecological reserve and for the development and implementation of an areawide management plan and program.

The program would require New Jersey to establish a land management commission broadly representative of all those who have a stake in the conservation of the Pine Barrens. This commission, augmented by a citizens' advisory body, which will have a significant role as a prerequisite for Federal assistance, would be empowered by the State of New Jersey to oversee the regulation of land uses and the control of developments of areawide significance.

The role of municipal governments within the Pine Barrens would be to help frame, and to lead in the sensitive implementation of a management plan which while conserving ecological, scenic, and recreational values, nevertheless allows the area to be a living landscape—a place where the land is not to be locked up as though in a museum, but where appropriate growth and change can be accommodated. Finally, my bill would require that all other Federal programs—grants, loans, and direct activities—would have to be consistent with an approved land management plan.

This approach to protecting the resource values of the Pine Barrens in New Jersey represents, I believe, a new and fruitful policy departure of interest and importance to other urban States. It can be a departure which will reestablish the Federal Government in its position as a full partner in the conservation of areas which, through meeting many criteria for national park status, are not best suited for outright acquisition or the traditional national park management. The text of this bill follows:

H.R. —

A bill to provide for the establishment of a Pines Barrens National Ecological Reserve in the State of New Jersey, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act, together with the following table of contents, may be cited as the "New Jersey Pine Barrens National Ecological Reserve Act":

Sec. 1. Short title and table of contents.
Sec. 2. Findings and purpose.
Sec. 3. Definitions.
Sec. 4. Assistance for plan development.
Sec. 5. Plan guidelines.
Sec. 6. Establishment of reserve; acquisition and transfer of lands.
Sec. 7. Grants for management.

Sec. 8. Compliance by Commission.
Sec. 9. Other Federal programs affecting the reserve.
Sec. 10. Citizens Advisory Committee.
Sec. 11. Authorizations.

FINDINGS AND PURPOSE

SEC. 2. (a) Findings.—The Congress finds that:

(1) The Pine Barrens area in southern New Jersey, containing some 970,000 acres of undeveloped pine-oak forest and a wide diversity of rare plant and wildlife species, is a unique ecological resource.

(2) The Pine Barrens area, located in the middle of the northeastern megalopolis of the United States, provides an excellent outdoor laboratory for scientific research, environmental education, and interpretive activities, and opportunities for a great diversity of recreational use and enjoyment for some 50 million people.

(3) The natural attractiveness and undeveloped condition of the Pine Barrens area is currently threatened with ecological downgrading because of encroaching residential, commercial, and industrial developments.

(4) The continuation of such developments within the Pine Barrens area will result in the permanent loss of its unique scientific, educational, recreational, and environmental values.

(5) The Federal Government, in recognition of the national significance of the natural resources of the Pine Barrens area, should provide assistance (pursuant to appropriate requirements) to the State of New Jersey to undertake a program to preserve and enhance the natural resources of the area.

(b) Purpose.—The purposes of this Act are to—

(1) encourage and assist the State of New Jersey in developing and administering a plan for a Pine Barrens National Ecological Reserve to be established under this Act in order to protect, preserve and enhance the ecological integrity, natural beauty, and recreational potential of the New Jersey Pine Barrens,

(2) to provide financial and technical assistance, pursuant to appropriate requirements, to the State for developing and carrying out such plan,

(3) to acquire and transfer to the State of New Jersey certain critical lands to be included in the Reserve, and

(4) to insure the consistency and coordination of all Federal programs affecting the natural resources of the Reserve.

DEFINITIONS

SEC. 3. For the purposes of this Act:

(1) The term "Secretary" means the Secretary of the Interior.

(2) The term "State" means the State of New Jersey.

(3) The term "Governor" means the Governor of the State of New Jersey.

(4) The term "Commission" or "Management Commission" means the management commission established by the State as provided in section 4(b)(3).

(5) The term "plan" means the documentation prepared and other actions taken by the Commission pursuant to the requirements of section 5.

(6) The term "Bureau of Outdoor Recreation Report" means the report prepared by the northeastern regional office of the Bureau of Outdoor Recreation, Department of the Interior, published in 1976 and entitled "New Jersey Pine Barrens: Concept for Preservation".

(7) The term "Reserve" or "Pine Barrens National Ecological Reserve" means the Pine Barrens National Ecological Reserve established under this Act.

ASSISTANCE FOR PLAN DEVELOPMENT

SEC. 4. (a) Grants.—Subject to the provisions of subsection (b), the Secretary is authorized and directed to provide grants to the State for the development of a plan for the preservation, protection, and enhancement of the natural resource values of the Pine Barrens. Such grants shall constitute not more than 75 percent of the costs of developing such plan. The remaining 25 percent shall be borne by the State in a manner and with such funds as shall be satisfactory to the Secretary.

(b) REQUIREMENTS FOR GRANTS.—The Secretary shall make grants under this section in such manner as he may deem appropriate, but the full amounts available for such purpose shall be disbursed not later than one year of the date that funds for such purpose first become available if before the expiration of such one year period—

(1) the State has demonstrated to the satisfaction of the Secretary that such amounts will be used to develop a plan meeting the requirements of section 5;

(2) the State has established a Pine Barrens management study area, the boundaries of which generally correspond to the boundaries of the Reserve to be established under section 6(a)(1);

(3) the State has established, through legislative action (to the extent necessary), a management commission consisting of twelve members each of whom has demonstrated expertise in national resource planning or management and at least four of whom are not residents of the Pine Barrens area;

(4) the State has empowered and required the management commission to—

(A) establish detailed boundaries for a Pine Barrens National Ecological Reserve to be established under section 6(a)(1);

(B) regulate land uses within or affecting such Reserve and to regulate land uses within or affecting the area in which such Reserve is to be established in the interim before the Reserve is so established;

(C) establish and enforce development standards for development within, or affecting such Reserve, and issue permits as a prerequisite for development within or affecting such Reserve;

(D) acquire land and interests in land within the Reserve by eminent domain or otherwise;

(E) develop recreational facilities and undertake recreational programs within the Reserve;

(F) coordinate governmental programs affecting the natural resource values of the Reserve;

(G) coordinate management policies for Federal and State land within the Reserve (including lands which were owned by Federal, State, or local governments before establishment of the Reserve);

(H) take such other actions as may be necessary as determined under regulations of the Secretary, for the comprehensive management of the Pine Barrens area in order to preserve, protect, and enhance its natural resource values; and

(I) take the actions referred to in this section after—

(i) consultation with the Pinelands Citizen Advisory Committee established under section 10, and

(ii) pursuant to such requirements respecting participation in decisonmaking by interested persons and the public as may be appropriate (as determined under regulations promulgated by the Secretary).

PLAN GUIDELINES

SEC. 5. (a) GUIDELINES.—The Secretary shall establish and publish guidelines for a plan for the conservation, protection, and enhancement of the natural resource values of the Reserve to be established under section 6. Such guidelines shall be reviewed from time to time by the Secretary (but not less frequently than every three years) and shall be revised as may be necessary. Such guidelines shall require that the plan provide for—

(1) a resource assessment which—

(A) determines the overall ecological carrying capacity of the Pine Barrens, with special reference to (i) water supply and water quality; (ii) natural hazards, including fire; (iii) endangered, unique, and unusual plants, animals, and biotic communities; (iv) ecological factors relating to the protection and enhancement of blueberry and cranberry production and other agricultural activity; (v) air quality; and (vi) other appropriate consideration affecting the ecological integrity of the area;

(B) includes an assessment of scenic, aesthetic, and open space resources of the Pine Barrens together with a determination of overall policies required to maintain and enhance these resources; and

(C) includes an assessment of the outdoor recreation resources and potentials together with a determination of policies required to utilize, protect and enhance these resources and potentials;

(2) a determination of the detailed boundaries of the area to be established as the Pine Barrens National Ecological Reserve and the identification and mapping (based on such determination and on the assessments under paragraph (1)) of—

(A) major areas within the Pine Barrens which are of critical ecological importance (including the "Plains as described on pages 2 and 21 of the Bureau of Outdoor Recreational Report), and

(B) areas of scenic, open space, and recreational significance;

(3) an areawide land-use capability map and statement of policies for management of the Pine Barrens, based upon the actions described in paragraphs (1) and (2);

(4) a recreational use and management program which is based on such land-use capability map and policy statement and includes—

(A) the coordinated utilization of (i) public conservation and recreation lands and (ii) other appropriate lands dedicated to such uses which are owned by private non-project organizations;

(B) the planned acquisition of additional sites for such purposes as parking, camping, interpretive facilities, picnic grounds, and other intensive-use areas;

(C) the acquisition of temporary or permanent public access agreements with private landowners to provide public rights-of-way over private land for footpaths, hunting, fishing, the "right to roam", and such other access as may enhance recreational opportunity; and

(D) such other elements as will carry out the purposes of this Act;

(5) a landscape management plan (based on such land-use capability map and policy statement) which will utilize the full constitutional authority of the State to regulate the use of land and water, including—

(A) the acquisition of scenic and conservation easements or development rights by eminent domain or otherwise;

(B) the transfer of development rights;

(C) the establishment of development performance standards and the use of development project review processes; and

(D) other methods (including methods involving compensation to landowners, methods not involving compensation, and any combination of methods) best suited to preserve, protect, and enhance the natural resource values of the Reserve consistent with the purposes of this Act;

(6) a process to coordinate, in a manner consistent with the purposes of this Act, governmental programs for housing, transportation, water resources, water pollution control, wastewater treatment, solid waste disposal, air quality control, and such other programs as affect the natural resource value of the Pine Barrens; and

(7) a program to provide for the maximum feasible public participation in the management of the Pine Barrens National Ecologi-

cal Reserve including the establishment of a Citizens Advisory Committee which meets the requirements of section 10.

(b) Technical Assistance.—The Secretary shall provide technical assistance to the Commission in developing and implementing the plan described in subsection (a).

(c) Submission and Approval of Plan.—(1) If the State adopts and submits to the Secretary a plan within 18 months after the time that funds are first made available to the agency for planning and if the Secretary determines that such plan meets the requirements of subsection (a), he shall approve such plan. If such plan does not meet such requirements and is disapproved by the Secretary, the Commission may, within 3 months of such disapproval submit a revised plan to the Secretary for his approval. If the Secretary disapproves the plan or revised plan he shall advise the Commission of his reasons for doing so together with his recommendations for revision.

(2) The State plans shall be revised from time to time to the extent necessary to take into account changes in circumstances or any change in the guidelines promulgated by the Secretary under this section. Such revisions shall be submitted to the Secretary for his approval or disapproval in the same manner as the original plan. The Secretary may disapprove the plan at any time if he determines that it does not meet the requirements of subsection (a).

(3) For provisions respecting action by the Secretary following failure of the State to submit a plan or disapproval by the Secretary of a plan, see section 8.

ESTABLISHMENT OF RESERVE; ACQUISITION AND TRANSFER OF LANDS

SEC. 6. If the State has in effect a plan approved by the Secretary under section 5 and if the Commission has indicated its intention to implement such plan, the Secretary is authorized to—

(1) establish, by publication in the Federal Register, the Pine Barrens National Ecological Reserve as an area of approximately 970,000 acres located in the State of New Jersey and within the "land and water line" appearing at Plate D of the Bureau of Outdoor Recreation Report.

(2) acquire not more than 50,000 acres of ecologically critical lands (including the "Plains" area as described in section 5(a)(2)), and such other lands as he may select based on the Bureau of Outdoor Recreation Report and the resource assessments made by the Commission; and

(3) transfer, in his discretion, lands acquired under paragraph (2), and other Federal lands within the Reserve, to the State at whatever time he deems appropriate, subject to the retention by the United States of a reversionary interest to be exercised as provided in section 8.

GRANTS FOR MANAGEMENT

SEC. 7. (a) GRANTS.—(1) Following approval of the State plan under section 5 and within 30 days of the establishment of the Reserve under section 6, the Secretary shall publish regulations for making grants to the Commission pursuant to the requirements of this section and such other requirements as may be necessary to carry out the purposes of this Act.

(2) Such grants shall be for not more than 75 percent of the costs incurred by the Commission for the purposes described in paragraph (3). The remaining 25 percent of such costs shall be borne by the State in a manner and with such funds as shall be satisfactory to the Secretary.

(3) Grants under this section may be used for—

(A) the acquisition in fee title of limited numbers of low-acreage, intensive-use sites in the Reserve in furtherance of recreational objectives;

(B) compensating landowners in the Reserve for public access agreements across private lands in the Reserve;

(C) making other forms of compensation to landowners in the Reserve as may be required; and

(D) providing payments in lieu of taxes to local governments where acquisition of property in the Reserve has resulted in actual revenue loss.

Payments under subparagraph (D) may not duplicate payments in lieu of taxes made under the provisions of other State or Federal law. Such payments under subparagraph (D) shall be made on a five-year declining schedule, after which no such payment shall be made.

(c) Termination.—No grant may be made under this section after the date ten years after the establishment of the Reserve.

COMPLIANCE BY COMMISSION

SEC. 8. (a) Termination of Assistance.—The Secretary shall conduct a continuing review of the management of the Reserve established under section 6 and shall, after giving notice and opportunity for presentation of views by the State, terminate any financial assistance extended under section 7 and withdraw any unexpended portion of such assistance if—

(1) the State plan is disapproved by the Secretary under section 5(c), or

(2) he determines that the State is failing to adhere to, and is not justified in deviating from, the approved plan.

(b) Reversion to Federal Control.—(1) In transferring Federal lands to the Commission under section 6, the Secretary shall retain a right of reverter to be exercised in any case in which the Secretary determines that the Commission has failed or refused to carry out an approved plan and that such failure or refusal substantially impairs the ability of the Commission to carry out the purposes of this Act.

(2) In any case in which no plan has been approved by the Secretary under section 5 within the 21 month period specified therein or in any case in which the Secretary has exercised the right of reverter as provided in paragraph (1), he may—

(A) manage the Federal lands within the 970,000 acre area described in section 6(1) (including any Federal lands which revert to the Secretary and other Federal lands referred to in paragraph (3) of this subsection, as a National Ecological Reserve in accordance with the purposes of this Act if he determines that such management is feasible and appropriate, or

(B) in any case in which the Secretary determines that management of such lands as a National Ecological Reserve in accordance with such purposes is infeasible or inappropriate (or both), he may dispose of the Federal lands which have reverted to the Secretary or manage such Federal lands and any other Federal lands in such area for such other purposes as may be appropriate.

(3) In any case in which no State plan has been approved within the requisite period and a determination is made by the Secretary under paragraph (2)(A), the Secretary is authorized to establish the area described in section 6(1) as a federally managed National Ecological Reserve and—

(A) acquire by donation, purchase with donated or appropriated funds, or exchange other lands and interests in lands within the boundaries of the Reserve,

(B) enter into agreements with local governments having jurisdiction over such lands for the management by such governments of such lands in a manner consistent with the purposes of this Act, or

(C) take any combination of the actions referred to in subparagraph (A) and (B).

OTHER FEDERAL PROGRAMS AFFECTING THE RESERVE

SEC. 9. (a) PRIORITIES AND COOPERATION.—All Federal departments and agencies should, to the maximum extent practicable, and in consultation with the Secretary, give priority to projects or activities within the Pine Barrens National Ecological Reserve which further the purposes of this Act and shall cooperate and participate with the Secretary, the Commission, the State, and with appropriate local governments in carrying out such purposes.

(b) Consistency and Compliance With State Plan.—(1) Each Federal agency conducting or supporting activities directly affecting the Reserve shall conduct or support those activities in a manner which is, to the maximum extent practicable, consistent with the approved State plan.

(2) Any Federal agency which shall undertake any development project in the Reserve shall insure that the project is consistent with the approved State plan.

(3) Any applicant for a required Federal license or permit to conduct an activity affecting the Reserve shall provide in the application to the licensing or permitting agency a certification that the proposed activity complies with the approved State plan and that such activity will be conducted in a manner consistent with such plan. At the time of such application, the applicant shall furnish to the Commission a copy of the certification, with all necessary information and data. The Commission shall establish procedures for public notice in the case of all such certifications and, to the extent it deems appropriate, procedures for public hearings in connection therewith. At the earliest practicable time, the Commission shall notify the Federal agency concerned that the Commission concurs with or objects to the applicant's certification. If the Commission fails to furnish the required notification within six months after receipt of its copy of the applicant's certification, the State's concurrence with the certification shall be conclusively presumed. No license or permit shall be granted by the Fderal agency until the Commission has concurred with the applicant's certification or until, by the Commission's failure to act, the concurrence is conclusively presumed, unless the Secretary, on his own initiative or upon appeal by the applicant, finds after providing a reasonable opportunity for detailed comments from the Federal agency involved and from the State, that the activity is consistent with the objectives of this Act.

(c) State and Local Governments.—State and local governments submitting applications for Federal assistance under other Federal programs affecting the Reserve shall indicate the views of the Commission as to the relationship of such activities to the approved plan.

Such applications shall be submitted and coordinated in accordance with the provisions of title IV of the Intergovernmental Coordination Act of 1968 (82 Stat. 1098). Federal agencies shall not approve proposed projects that are inconsistent with an approved plan, except upon a finding by the Secretary that such project is consistent with the purposes of this Act.

(d) Interim Protection.—During the period following the date of the enactment of this Act and preceding the date on which the Secretary establishes the reserve under section 6, no department or agency of the United States shall assist by loan, grant, license, or otherwise in the construction of any project which have a direct or indirect adverse effect (as determined by the Secretary) on the ecological or aesthetic values of the area to be established as the reserve.

(e) Air and Water Pollution.—Nothing in this Act shall in any way affect requirements (1) established by the Federal Water Pollution Control Act, the Clean Air Act, or the Federal Disaster Relief Act of 1973, or (2) established by the Federal Government or by any State or local government pursuant to such Acts. Such requirements shall be incorporated in any plan developed pursuant to this Act.

(f) Federal Management.—For purposes of this section, a Federal management of the

Reserve under section 8(b)(2)(A) shall be treated as an approved State plan and in the case of such Federal management, all references in this section to the Commission shall be treated as references to the Secretary.

CITIZENS ADVISORY COMMITTEE

SEC. 10. (a) No State plan shall be approved under section 5 unless there is established a Pinelands Citizen Advisory Committee (hereinafter in this section referred to as the Committee) which meets the requirements of this section. Such Committee shall be composed of thirteen members appointed by the Governor of New Jersey for terms of :lve years as follows:

(1) two members to be appointed from recommendations of the New Jersey Department of Environmental Protection;

(2) two members to be appointed from recommendations of the New Jersey Department of Agriculture,

(3) four members to be appointed from the membership of National or local conservation organizations, and

(4) five members representing the general public, of which no fewer than three shall be from among the permanent residents of the Pine Barrens area.

The Governor shall designate one member of the Committee as Chairman and any vacancy shall be filled in the same manner in which the original appointment was made.

(b) Members of the Committee shall serve without compensation as such, but the Secretary may pay expenses reasonably incurred by the Committee and reimburse members for reasonable expenses incurred in carrying out their responsibilities under this Act on vouchers signed by the Chairman.

(c) The management commission established under the State plan, shall from time to time but at least semiannually, meet and consult with the Committee on matters relating to the reserve and with respect to carrying out the duties of the management commission under the State plan.

(d) Unless extended by the Governor, the Committee shall terminate ten years after the date of the establishment of the reserve.

AUTHORIZATIONS

SEC. 11. There are authorized to be appropriated $500,000 to be used for purposes of section 4, $25,000,000 to be used for purposes of section 6, and $25,000,000 to be used for purposes of section 7 (including establishment and operation of the Committee under section 10).

THE RELATIONSHIPS BETWEEN FLUCTUATIONS IN UNEMPLOYMENT AND CRIMINAL BEHAVIOR

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, the Honorable William J. Page, Jr., secretary of Florida's Department of Health and Rehabilitative Services, recently wrote me about his concern for the relationship between fluctuations in unemployment and criminal behavior, especially among young people.

Enclosed is a report on "Occupational Guidance, Counseling, and Placement Services for Youthful Offenders," which I think might be of interest to our colleagues and to all who read this RECORD.

As chairman of the former House Select Committee on Crime, I became aware that there is a close relationship between unemployment and youth crime and I therefore, request permission to include in the RECORD this report prepared by the planning coordination unit of the Youth Services Program Office of Florida's Department of Health and Rehabilitative Services.

OCCUPATIONAL GUIDANCE, COUNSELING, AND PLACEMENT SERVICES FOR YOUTHFUL OFFENDERS

BACKGROUND INFORMATION

Youthful offenders are in the age group (16–19 years) with the highest unemployment rate. Compared with others in their age group, youthful offenders are at a greater disadvantage in obtaining employment because of their history of delinquent behavior and retarded educational achievement. The average youth entering a state training school for delinquents is achieving at the fifth grade level in reading and math when he should be functioning on the tenth grade level.

Recent evaluations of the educational programs in training schools show that the youth leaving these programs adjust more successfully if they work rather than attend school. Unfortunately, they are encountering greater difficulty in finding jobs. In fiscal years 1973–74, 48% of the youth leaving training schools obtained employment, while only 28% where able to get a job when furloughed in 1975.

Considering these facts and the abundant documentation showing a relationship between the availability of jobs and the level of criminal activity, the Youth Services Program Office of the Florida Department of Health and Rehabilitative Services sought funding to address the problem of unemployment for offenders furloughed from Florida's four training schools for delinquent youth.

The Occupational Guidance Counseling and Placement Program was a pilot project funded with Comprehensive Employment and Training Act (CETA), Section 106, funding through the State Manpower Services Council. Funding was originally sought for the amount of $200,000 with which to establish job counseling and placement services for the youth (16 years and older) in each of the State's four training schools. Funding was obtained in the amount of $20,000 with which to operate a pilot project for the youthful offenders furloughed to Miami from the Florida School for Boys at Okeechobee.

Of the $20,000 funded through the CETA grant, $17,000 was budgeted for the salaries ($8,500 each) of the occupational counselor assigned to the Florida School for Boys at Okeechobee and the placement coordinator assigned to the Youth Services district field office in Miami. The remaining $3,000 was budgeted for travel expenses of the two staff members and the Planner and Evaluator assigned to the project by the Youth Services Program Office. All other budgetary needs were provided through "in-kind" resources.

The objectives of the project were:

1. To provide counseling and informational services that assist clients in developing an awareness of the world of work and the employability skills necessary in obtaining and maintaining employment.

2. To establish linkages and assist the Florida Department of Health and Rehabilitative Services, public schools, Florida State Employment Service and Manpower programs in their efforts to place clients in jobs/job training programs upon their return to the community.

The guidance and counseling component that operated in the training school was basically concerned with job preparation. The occupational counselor conducted frequent group guidance sessions and worked with clients to help develop decision making and employability skills necessary for obtaining and maintaining employment. He also provided clients with information on employment opportunities in the local community (Miami).

The occupational counselor and placement coordinator worked closely together to maintain continuity in their efforts to prepare clients for and assist them in obtaining employment or returning to school. Many clients were encouraged to return to school to take vocational classes to strengthen their educational background as needed in preparation for employment. The placement coordinator worked closely with the Youth Services parole counselors who have primary responsibility for the placement of youth returning from the training school. A large proportion of the Coordinator's time was spent contacting prospective employers and establishing linkages with agencies and organizations that could assist clients in job placement.

EVALUATION METHODOLOGY

The approach to evaluating this project was to clarify relevant informational needs and to collect, analyze and report the information to meet the needs. The information needs centered around the placement and follow-up of clients once they returned home to Miami. The following evaluation questions reflect the kind of information considered most relevant for program decision-making.

1. How many clients were served and what type of placement did they receive?

2. Was the project staff helpful in placing clients?

3. Were the clients who were placed initially (within a month of furlough) in the same placement one month later?

4. Were the clients not initially placed, subsequently placed?

One evaluation constraint was the short time period to evaluate the project. Though funded for the 1975–1976 fiscal year, the project was not scheduled to begin until August 15. Even that date was too early because additional "red tape" delayed the start of the project until late in September when the two staff members were hired. Furthermore, the original placement coordinator resigned and a new one had to be hired. The first group of clients were furloughed in October and placed in November 1975.

Fortunately, additional funds ($2,588.48) were provided to extend the project from June 30, 1976 to September 30, 1976 to allow for a longer period of evaluation. Unfortunately, the project ended July 31 as a result of both staff members leaving their positions when the State Manpower Services Council decided not to refund the program.

RESULTS

All students 16 years of age or older from Miami who expressed an interest in employment following their return home were picked up as clients within their first month in training schools. Of the 131 students picked up as clients, 70% were black, 19% white, and 11% of hispanic background.

Upon return home, clients were officially terminated from the project after obtaining a school or job placement or after having been in the community one month without finding a placement. Nevertheless, the placement coordinator continued to assist these clients and their parole counselors in their efforts to arrange an appropriate placement.

The original plan was for 100 new clients to be picked up during the project year and for 90 to be terminated in the community. As indicated, a total of 131 students were served in this project with 80 being officially terminated. Fifty-one (51) clients were in the training school, yet to be furloughed, when the project was terminated in July 1976.

Of the 80 clients that were terminated, five were terminated while in the institution because of interprogram transfers that reassigned them to community based treatment programs. Thus, 75 clients were furloughed to Miami for placement.

The following statistics reflect the findings

concerning placement and followup for those terminated in the community.

1. About half (48%) of the clients were placed in a job or in school within a month of their date of furlough from the training school. Twenty-seven percent (20 clients) were placed in jobs and 21% (16 clients) were placed in school. Two percent (four clients) of those placed in jobs also returned to school.

2. Sixty-five percent (65%) of the clients placed in jobs obtained full-time employment while 35% went to work part-time.

3. The placement coordinator was directly responsible for almost half (45%) of the job placements that clients obtained when furloughed. The coordinator located the employer and also arranged the job interview for the client.

4. The placement coordinator arranged an average of 3 interviews for each client that was referred for a job interview. Seventy-four percent of the clients returning to the community were referred for job interviews.

5. One third (31%) of the 39 clients who were not placed during their first month in the community were placed during their second month at home. This increases the total percentage of clients placed following furlough from 48% (after one month) to 65% (after two months). The table below gives the percentage of clients placed within one month of their furlough from the training school as compared with the percentage placed within two months of furlough.

Percentage placed within 1 month

Type of placement:	
Job	27 (N = 20)
School	21 (N = 16)
Neither	52 (N = 39)
	N = 75

Percentage placed within 2 months

Type of placement:	
Job	40 (N = 29)
School	25 (N = 19)
Neither	36 (N = 27)
	N = 75

The percentage of clients placed in jobs increased from 27% to 40%. The difference is probably best attributed to the difficulty these youthful offenders encountered finding jobs upon return to the community. The lack of job opportunities is also an explanation for the 36% still without a placement after two months at home.

6. Clients maintained their placement better when placed in jobs than when placed in school. All of the clients placed in jobs when furloughed were still working one month later while only 80% of the clients placed in school were still attending school.*

DISCUSSION AND RECOMMENDATIONS

The results indicate that this project was instrumental in helping youthful offenders obtain and maintain employment in their home community upon return from the training school. The placement coordinator was valuable in contacting employers and arranging job interviews. The value of the guidance and counseling component in the training school is probably reflected most in the number of clients that obtained employment even after the full services of the placement coordinator had been terminated after one month at home.

There still was a sizable portion of the first two months at home but this is more a reflection of the lack of job opoprtunities in the community. Considering the fact that all of these youths were picked up as clients because of their desire to get a job, it is noteworthy that 25% saw the value of returning to school.

In addition to the high unemployment rate among youth and the difficulty in getting employers to hire unskilled, poorly educated youth with a history of delinquency there were other obstacles that made placement of the clients difficult. For example, age proved to be an obstacle in getting clients enrolled in certain job training programs, including manpower training programs, because a minimum age of 18 years was usually required. Public schools were often resistive to having clients return to their programs because of past behavior. Placement of clients in the months of June and July was a greater problem because school was not in session and there was an increased number of youth in the employment market.

The placement coordinator had to devote a large portion of her time to seeking community support and educating the public about the need and value of hiring these youths. With additional time, greater support would have been achieved and better linkages established with agencies such as the public schools and job training programs.

A grant application was resubmitted to the Manpower Services Council to obtain funding to extend and expand the project into the next fiscal year. The grant request was denied because it "was not appropriate for section 106 funding for Fiscal Year 1977." According to the Office of Manpower Planning, the pilot project had shown the validity of the idea and it was recommended that funding be pursued from local manpower prime sponsors or state general revenue.

The following recommendations are presented in light of project results and the inability to obtain further funding.

1. Each district of the Florida Department of Health and Rehabilitative Services should be provided with the services of an employment and job training coordinator for youth. In addition to coordinating district services for job conuseling, training, and placement of youth, the district coordinators should work closely with CETA "Prime Sponsors" and the "Balance-of-State Prime Sponsor" in planning for the provision of services to fill gaps in providing employment and training for youthful offenders.

2. The Youth Services Program Office of the Department of Health and Rehabilitative Services should place special emphasis in all of its programs on the career education, vocational training and the employment of youth. Treatment programs should provide a job development program that includes the provision of occupational information and career counseling services. Emphasis should be placed on the use of existing resources, including the DHRS Office of Vocational Rehabilitation and the Florida Department of Education.

*Data was available on 14 of the 20 clients placed in jobs within one month of their return home and on 15 of the 16 clients placed in school.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. O'BRIEN (at the request of Mr. RHODES), for April 19 and 20, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PURSELL) to revise and extend their remarks and include extraneous material:)

Mr. HAMMERSCHMIDT, for 15 minutes, today.

Mr. SEBELIUS, for 5 minutes, today.

Mr. EDWARDS of Alabama, for 5 minutes, today.

Mr. MILLER of Ohio, for 5 minutes, today.

Mr. CLEVELAND, for 5 minutes, today.

Mr. KEMP, for 10 minutes, today.

(The following Members (at the request of Mr. FOWLER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. DENT, for 30 minutes, today.

Mr. DRINAN, for 5 minutes, today.

Mr. BROWN of California, for 5 minutes, today.

Mr. KASTENMEIER, for 5 minutes, today.

Ms. HOLTZMAN, for 15 minutes, today.

Mr. VANIK, for 5 minutes, today.

Mr. JONES of North Carolina, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FLORIO, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,127.

(The following Members (at the request of Mr. PURSELL) and to include extraneous matter:)

Mr. ROBINSON in two instances.

Mr. COUGHLIN in two instances.

Mr. MOORHEAD of California.

Mr. YOUNG of Florida in five instances.

Mr. SARASIN in two instances.

Mr. MCKINNEY.

Mr. DORNAN in 10 instances.

Mr. PURSELL in two instances.

Mr. HYDE in two instances.

Mr. HAMMERSCHMIDT.

Mr. MCCLOSKEY.

Mr. SNYDER.

Mr. SYMMS in two instances.

Mrs. HOLT in two instances.

Mr. ANDERSON of Illinois.

Mr. HILLIS.

Mr. MADIGAN.

Mr. WALKER.

(The following Members (at the request of Mr. FOWLER) and to include extraneous matter:)

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. MOAKLEY.

Mr. LUKEN in 10 instances.

Mr. JACOBS in two instances.

Mr. EARLY.

Mr. DENT.

Mr. RICHMOND in two instances.

Mr. EDWARDS of California.

Mr. BRADEMAS in five instances.

Mr. ROYBAL.

Mr. LONG of Maryland in five instances.

Mr. EILBERG in 10 instances.

Mr. PATTISON of New York.

Mr. LEDERER.

Mr. CARNEY.

Mr. HAMILTON.

Mr. ROSENTHAL in two instances.

Mr. BLANCHARD.
Mr. ROE.
Mr. DRINAN in two instances.
Mr. CHARLES H. WILSON of California.
Mr. ADDABBO.
Mr. WIRTH.
Mr. AMMERMAN.
Mr. FRASER in two instances.
Mr. PREYER in two instances.
Mrs. SCHROEDER.
Mr. ROGERS in five instances.
Mr. BYRON.
Mr. APPLEGATE.
Mr. RANGEL.
Mr. WON PAT.
Mr. MINETA.
Mr. HARRINGTON.
Mr. TEAGUE.
Mr. FISHER in 10 instances.
Mr. FLIPPO.
Mr. AUCOIN.
Mr. MAGUIRE.
Mr. DELLUMS.
Mr. GAMMAGE.
Mr. ROBERTS.
Mr. PANETTA.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1269. An act for the relief of Camilla A. Hester; to the Committee on the Judiciary.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 489. An act to authorize supplemental military assistance to Portugal for the fiscal year 1977, and for other purposes.

RECESS

The SPEAKER. Pursuant to the order of the House on Monday, April 18, 1977, the Chair declares the House in recess until approximately 8:40 p.m.

The House stands in recess.

Accordingly (at 6 o'clock and 38 minutes p.m.), the House stood in recess.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 8 o'clock and 46 minutes p.m.

JOINT SESSION OF THE HOUSE AND SENATE HELD PURSUANT TO THE PROVISIONS OF HOUSE CONCURRENT RESOLUTION 196 TO HEAR AN ADDRESS BY THE PRESIDENT OF THE UNITED STATES

The SPEAKER of the House presided.

The Doorkeeper, the Honorable James T. Molloy, announced the Vice President and Members of the U.S. Senate, who entered the Hall of the House of Representatives, the Vice President taking the chair at the right of the Speaker, and the Members of the Senate the seats reserved for them.

The SPEAKER. The Chair appoints as members of the committee on the part of the House to escort the President of the United States into the Chamber the gentleman from Texas (Mr. WRIGHT), the gentleman from Indiana (Mr. BRADEMAS), the gentleman from Washington (Mr. FOLEY), the gentleman from Georgia (Mr. FLYNT), the gentleman from Arizona (Mr. RHODES), the gentleman from Illinois (Mr. MICHEL), and the gentleman from Illinois (Mr. ANDERSON).

The VICE PRESIDENT. Pursuant to the order previously entered into, I appoint the following Senators as a committee on the part of the Senate to join with a like committee on the part of the House to escort the President into the House Chamber: The Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from California (Mr. CRANSTON), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Texas (Mr. BENTSEN), the Senator from Washington Mr. JACKSON), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Tennessee (Mr. BAKER), the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), the Senator from Nebraska (Mr. CURTIS), the Senator from Wyoming (Mr. HANSEN), and the Senator from Indiana (Mr. LUGAR).

The Doorkeeper announced the Ambassadors, Ministers, and Charges d'Affaires of foreign governments.

The Ambassadors, Ministers, and Charges d'Affaires of foreign governments entered the Hall of the House of Representatives and took the seats reserved for them.

The Doorkeeper announced the Cabinet of the President of the United States.

The members of the Cabinet of the President of the United States entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

At 9 o'clock and 1 minute p.m., the Doorkeeper announced the President of the United States.

The President of the United States, escorted by the committee of Senators and Representatives, entered the Hall of the House of Representatives, and stood at the Clerk's desk.

[Applause, the Members rising.]

The SPEAKER. Members of the Congress, I have the high privilege and the distinct honor of presenting to you the President of the United States.

[Applause, the Members rising.]

ADDRESS BY THE PRESIDENT OF THE UNITED STATES

The PRESIDENT. Mr. President, Mr. Speaker, Members of the Congress, and distinguished guests:

The last time we met as a group was exactly three months ago today, on Inauguration Day. We've had a good beginning as partners in addressing our nation's problems.

But in the months ahead, we must work together even more closely to deal with the greatest domestic challenge that our nation will face in our lifetime. We must act now—together—to devise and to implement a comprehensive national energy plan to cope with a crisis that otherwise could overwhelm us.

This cannot be an inspirational speech tonight. I don't expect much applause. It is a sober and a difficult presentation. During the last three months, I have come to realize very clearly why a comprehensive energy policy has not already been evolved. It has been a thankless job, but it is our job, and I believe that we have a fair, well balanced and effective plan to present to you. It can lead to an even better life for the people of America.

The heart of our energy problem is that we have too much demand for fuel. It keeps going up too quickly while production goes down and our primary means of solving this problem is to reduce waste and inefficiency.

Oil and natural gas make up about 75 percent of our consumption in this country, but they only comprise about 7 percent of our reserves. Our demand for oil has been rising by more than 5 percent each year, but domestic oil supplies have been dropping lately more than 6 percent. Therefore, our imports have risen sharply—making us more and more vulnerable if our supplies are interrupted—but early in the 1980's even foreign oil will become increasingly scarce. If it were possible for world demand to continue rising during the next few years at the rate of 5 percent a year, we could use up all the proven reserves in the entire world by the end of the next decade.

Our trade deficits are growing. We imported more than $35 billion worth of oil last year, and we will spend much more than that this year. The time has come to draw the line.

We could continue to ignore this problem, as many have done in the past—but to do so would subject our people to an impending catastrophe.

That is why we need a comprehensive national energy policy. Your advice has been an important influence as this plan has taken shape. Many of its proposals will be built on the legislative initiatives that you have taken in the Congress in the last few years.

Two nights ago, I spoke to the American people about the principles behind our plans and our specific goals for 1985:

To reduce the annual growth rate in energy consumption by more than 2 percent;

To reduce gasoline consumption by 10 percent;

To cut imports of foreign oil to less than 6 million barrels a day, less than half the amount that we will be importing if we did not conserve;

To establish a strategic petroleum reserve supply of at least a billion barrels, which will meet our needs for about 10 months;

To increase our coal production by more than two-thirds, to over 1 billion tons a year;

To insulate 90 percent of American homes and all new buildings; and

To use solar energy in more than two and a half million American homes.

Now I hope that the Congress will adopt these goals by joint resolution as a demonstration of our mutual commitment to achieve them.

Tonight I want to outline the specific steps by which we can reach those goals. The proposals fill into these central categories: First, conservation; second,

production; third, conversion; fourth, development; and of course, fairness or equity, which is a primary consideration in all our proposals.

We prefer to reach those goals through voluntary cooperation with a minimum of coercion. In many cases, we propose financial incentives, which will encourage people to save energy and will harness the power of our free economy to meet our needs.

But I must say to you that voluntary compliance will not be enough—the problem is too large and the time is too short.

In a few cases, penalties and restrictions to reduce waste are essential.

Our first goal is conservation. It is the cheapest, most practical way to meet our energy needs and to reduce our growing dependence on foreign supplies of oil.

With proper planning, economic growth, enhanced job opportunities and a higher quality of life can result even while we eliminate the waste of energy.

The two areas where we waste most of our energy are transportation and our heating and cooling systems.

Transportation consumes 26 percent of all our energy—and as much as half of that is waste. In Europe the average automobile weighs 2,700 pounds; in our country, 4,100 pounds.

Now the Congress has already taken fuel efficiency steps and set standards which will require new automobiles to have an average efficiency or miles per gallon of 27.5 by 1985 instead of the 18 among new cars today. The entire fleet of cars is only 14 miles per gallon at this time.

To insure that this existing Congressional mandate is met, I am proposing, first of all, a graduated excise tax on new gas guzzlers that do not meet Federal mileage standards. This tax will start low and then rise each year until 1985. In 1978, for instance, a tax of $180 will be levied on a car getting only 15 miles per gallon, and for an 11-mile-per-gallon car the tax will be $450. That is at the beginning. By 1985, the taxes on these wasteful new cars with the same low mileage, 15-miles-per-gallon or 11-miles-per-gallon, will have risen to $1,600 and $2,500.

All of the money collected by this tax on wasteful automobiles will be returned to consumers through rebates on automobiles that are more efficient than the mileage standard. We expect both better efficiency and also more automobile production and sales under this proposal. We will insure that American automobile workers and their families do not bear an unfair share of the burden. And of course, we will also work with our foreign trading partners to see that they are treated fairly.

Now I want to discuss one of the most controversial and most misunderstood parts of the energy proposal—a standby tax on automobile gasoline. Gasoline consumption represents half of our total oil usage.

We simply must save gasoline and I believe that the American people can meet this challenge. It is a matter of patriotism and a matter of commitment.

Between now and 1980 we expect gasoline consumption to rise slightly above the present level. For the following five years, when we have the more efficient cars on the road, we need to reduce consumption each year to reach our targets for 1985.

I propose that we commit ourselves to these fair, reasonable, and necessary goals and at the same time write into law a gasoline tax of an additional 5 cents per gallon that will automatically take effect each year that we fail to meet our annual target in the previous year. As an added incentive, if we miss one year but are back on the track the next year, then the additional tax should come off. And if the American people respond to this challenge, we can meet these targets, and under these circumstances, this gasoline tax will never have to be imposed. I know and you know that it can be done.

As with other taxes, we must minimize the adverse effects on our economy. We must reward those who conserve and penalize those who waste. Therefore, any proceeds from the tax—if it is triggered by excessive consumption—should be returned to the general public in an equitable manner.

I will also propose a variety of other measures to make our transportation system more efficient.

One of the side effects of conserving gasoline, for instance, is that State governments, which have a limited amount of tax per gallon, collect less money through gasoline taxes. To reduce their hardships and to insure adequate highway maintenance, we should compensate States for this loss through the highway trust fund.

The second major area where we can reduce waste is in our homes and buildings. Some buildings waste half the energy used for heating and cooling. From now on, we must make sure that new buildings are as efficient as possible, and that old buildings are equipped—or "retrofitted"—with insulation and heating systems that dramatically reduce the use of fuel.

The Federal Government should set an example. I will issue an executive order establishing strict conservation goals for both new and old Federal buildings—a 45-percent increase in energy efficiency for new buildings, and a 20-percent increase in efficiency for old buildings by 1985. We also need incentives, though, for those who own homes and businesses so that they will conserve.

Those who weatherize buildings to make them more efficient would be eligible for a tax credit of 25 percent of the first $800 invested in conservation, and 15 percent of the next $1,400.

If homeowners prefer, they may take advantage of a weatherization service which will be required from all regulated utility companies to offer. The utilities would arrange for contractors and provide reasonable financing to the homeowners. The customer would pay for the improvements through small, regular additions to the monthly utility bills. In many instances these additional charges would be almost entirely offset by lower energy consumption brought about by energy savings.

Other proposals for conservation in homes and buildings include first, direct Federal help for low-income residents; next, an additional 10 percent tax credit for business investments in conservation; third, Federal matching grants to nonprofit schools and hospitals; and public works money for weatherizing State and local government buildings.

While improving the efficiency in our businesses and homes we must also make electrical home appliances more efficient. I propose legislation that will for the first time impose stringent efficiency standards for household appliances by 1980.

We must also reform our utility rate structure. For many years we have rewarded waste by offering the cheapest rates to the largest users. It is difficult for individual States to make such reforms because of the intense competition among States for new industry. The only fair way is to adopt a set of principles to be applied nationwide.

I am, therefore, proposing legislation which would require the following steps over the next two years: first, phasing out promotional rates and other pricing systems that make natural gas and electricity artificially cheap for high-volume users and which do not accurately reflect actual costs; next, offering users peak-load pricing techniques which set higher charges during the day when demand is great and lower charges during the day when demand is small; we also need individual meters for each apartment in new buildings instead of one master meter. Tests have shown that this will save 30 percent of electrical costs in the apartment building.

Plans are already being discussed for TVA, the whole system, to act as a model in implementing such new programs as I have described to conserve energy.

One final step toward conservation is to encourage industries and utilities to expand what is called cogeneration projects, which capture the steam which is now wasted from electrical power production. In Germany, for instance, 29 percent of total energy comes from cogeneration. In this country formerly it was about 19 percent, but now it is only 4 percent in the United States.

I propose a special 10 percent tax credit for investments in cogeneration.

Along with conservation, our second major strategy is production and rational pricing.

We can never increase our production of oil and natural gas by enough to meet our demand, but we must be sure that our pricing system is sensible, that it discourages waste and encourages exploration and new production.

One of the principles of our energy policy is that the price of energy should reflect its true replacement cost. As a means of bringing supply and demand into balance over the long-run. By realistic pricing it is especially important for our scarcest fuels, oil and natural gas. However, proposals for immediate and total decontrol of domestic oil and natural gas prices would be disastrous for our economy and also for working Ameri-

can families, and would not solve the long-range problems of dwindling supplies.

The price of newly discovered oil will be allowed to rise, over a three-year period, to the 1977 world market price, with allowances from then on for inflation. The current return to producers for previously discovered oil, that which already exists, would remain the same, except for adjustments because of inflation.

Because fairness is an essential strategy of our energy program, we do not want to give producers windfall profits beyond the incentives that they do need for exploration and production. But we are simply misleading ourselves, if we do not recognize the replacement costs of energy in our pricing system.

Therefore, I propose that we phase in a wellhead tax on existing supplies of domestic oil, equal to the difference between the present controlled price of oil and the world price, and return that money collected by this tax to the consumers and the workers of America.

We should also end the artificial distortions in natural gas prices in different parts of the country which have caused people in the producing States to pay exorbitant prices, while creating shortages, unemployment and economic stagnation, particularly in the Northeast. We must not permit energy shortages to divide or balkanize our country.

We want to work with the Congress to give gas producers an adequate incentive for exploration, working carefully toward deregulation of newly discovered gas as market conditions permit.

I propose now that the price limit for all new gas sold anywhere in this country be set at the price of the equivalent energy value of domestic crude oil, beginning next year, 1978. This proposal will apply both to new gas and to expiring intrastate contracts. It would not affect existing contracts presently in effect.

We must be sure that oil and natural gas are not wasted by industries that could use coal. Our third strategy will be, therefore, conversion from scarce fuels to coal wherever possible.

Although coal now provides only 18 percent of our total energy needs, it makes up 90 percent of our energy reserves. Its production and use do create environmental difficulties, but I agree we can cope with them through strict strip-mining and clean air standards.

To increase the use of coal by 400 million tons, or by 65 percent—we now use about 600 million tons—in industry and utilities by 1985, I propose a sliding scale tax, starting in 1979, on large industrial users of oil and natural gas. Fertilizer manufacturers, crop dryers and so forth which must use gas, will be exempt from the tax. Utilities would not be subject to the tax until 1983, because it will simply take them longer to convert to coal.

I will also submit proposals for expanded research and development in coal. We need to find better ways to mine it safely and to burn it cleanly, and to use it to produce other clean energy sources like liquefied and gasified coal. We have already spent billions of dollars on research and development of nuclear power, but very little on coal. Investments here can pay rich dividends.

Even with this conversion effort, we still face a gap between the energy we need and the energy that we can produce or import. Therefore, as a last resort we must continue to use increasing amounts of nuclear energy.

We now have 63 nuclear power plants, producing about 3 percent of our total energy and we also have about 70 more working power plants which are licensed for construction. Domestic uranium supplies can support this number of plants just by the most conservative estimates for another 75 years, at least. Effective conservation efforts can minimize the shift toward nuclear power. There is no need to enter the plutonium age by licensing or building a fast breeder reactor such as the proposed demonstration plant at Clinch River.

We must, however, increase our capacity to produce enriched uranium fuel for light water nuclear power plants using the new centrifuge technology, which consumes only about one-tenth the energy of existing gaseous diffusion plants.

We must also reform the nuclear licensing procedures. New plants should not be located near earthquake fault zones or near population centers, safety standards should be strengthened and enforced, designs standardized as much as possible, and we need more adequate storage for spent fuel supplies.

However, even with the most thorough safeguards, it should not take ten years to license a plant. It only takes three years to license, design, and build a plant in a country like Japan. I propose that we establish reasonable, objective criteria for licensing, and that plants which are based on a standard design not require extensive individual design studies before the license is granted.

Our fourth strategy is to develop permanent and reliable new energy sources.

The most promising of course is solar energy, for which most of the technology is already available. Solar water heaters and solar space heaters are ready now for commercialization. All they need is some initiative to initiate the growth of a large new market in our country.

Therefore, I am proposing a gradually decreasing tax credit, to run from now through 1984, for those who purchase approved solar heating equipment. Initially, it would be 40 percent of the first $1,000 and 25 percent of the next $6,400 invested to provide solar heating for homes.

Increased production of geothermal energy can be insured by providing the same tax incentives as exist for gas and oil drilling operations.

Our guiding principle, as we develop this plan, was that above all it must be fair.

None of our people must make an unfair sacrifice.

None should reap an unfair benefit.

The desire for equity is reflected throughout our plan: in the wellhead tax, which encourages conservation but is returned to the public; in a dollar-for-dollar refund of the wellhead tax as it affects home heating oil, particularly in the Northeast; in reducing the unfairness of natural gas pricing; in ensuring that homes will have the oil and natural gas they need, while industry turns toward the more abundant coal that can also suit its needs; in basing utility prices on true cost, so every user pays a fair share; in the automobile tax and rebate system, which rewards those who save our energy and penalizes those who waste it.

I propose one other step to insure proper balance in our plan. We need more accurate information about the supplies of energy, and about the companies which produce energy.

If we are asking sacrifices of ourselves, we need facts that we can count on. We need an independent information system that will give us reliable data about energy reserves and production, emergency capabilities and financial data from the energy producers.

I happen to believe in competition, and we don't have enough of it right now.

During this time of increasing scarcity, competition among energy producers and distributors must simply be guaranteed. I recommend that individual accounting be required from energy companies for production, refining, distribution, and marketing—separately for domestic and foreign operations. Strict enforcement of the antitrust laws based on this data may prevent the need for divestiture. Profiteering through gas tax shelters should be prevented and independent drillers should have the same intangible tax credits as the major corporations.

The energy industry should not reap large unearned profits. Increasing prices on existing inventories of oil should not result in windfall gains but should be captured for the people of our country.

We must make it clear that from now on to everyone that our people through their government will now be setting the energy policy for our country.

The new Department of Energy that the Congress is already considering should be established without delay. Continued fragmentation of government authority and responsibility of our energy's program for this Nation is both dangerous and unnecessary.

Two nights ago, I said that this difficult effort which I have outlined would be the moral equivalent of war. If successful, this effort will protect our jobs, it will protect our environment, it will protect our national independence, it will protect our standard of living, it will also protect our future. Our energy policy will be innovative but it will be fair and predictable. It will not be easy. It will demand the best of us—our vision, our dedication, our courage, and our sense of common purpose.

This is a carefully balanced program, depending for its fairness on all its major component parts. It will be a test of our basic political strength and ability.

But we have met challenges before and our Nation has been the stronger after the challenge was met. That's the responsibility that we face, you in the Congress, the members of my own administration, and all the people of our country.

I am confident that together we will succeed. Thank you very much.

[Applause, the Members rising.]

At 9 o'clock and 34 minutes p.m., the President, accompanied by the committee of escort, retired from the Hall of the House of Representatives.

The Doorkeeper escorted the invited guests from the Chamber in the following order:

The members of the President's Cabinet.

The Ambassadors, Ministers, and Charges d'Affaires of foreign governments.

JOINT SESSION DISSOLVED

The SPEAKER. The Chair declares the joint session of the two Houses now dissolved.

Accordingly, at 9 o'clock and 41 minutes p.m., the joint session of the two Houses was dissolved.

The Members of the Senate retired to their Chamber.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 9 o'clock and 41 minutes p.m.

ADJOURNMENT

Mr. HALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agree to; accordingly (at 9 o'clock and 42 minutes p.m.) the House adjourned until tomorrow, Thursday, April 21, 1977, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1302. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report covering the transition quarter on receipts and disbursements pertaining to the disposal of surplus military supplies, equipment, material, and the production of lumber and timber products, pursuant to section 712 of Public Law 94–212; to the Committee on Appropriations.

1303. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–21, "To order the closing of the public alley system in Square 551, bounded by Florida Avenue, 1st, Q, 3d, and R Streets, NW. (S.O. 74–152)," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1304. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–22, "To order the closing of Portner Place, NW., between U and V Streets, NW., and of the public alleys in Square 204, bounded by 14th, U, 15th, and V Streets, NW. (S.O. 75–280)," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1305. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–23, "To order the closing of 9th Street, NE., between G and H Streets, NE., and of the public alleys in Squares 912 and 934, bounded by G, 8th, H, and 10th Streets, NE. (S.O. 74–268)," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1306. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–24, "To order the closing of Clifton Street, NW. between University Place, NW. and the north-south public alley in Squares 2662 and 2663 (S.O. 71–220)," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1307. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–25, "To order the closing of Neal Place, NW. between 4th and 5th Streets, NW.; of 4th Street, NW., between Neal Place and O Street, NW.; and of public alleys in Square 512, bounded by 4th, N, O, and 5th Streets, NW. (S.O. 74–208)," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1308. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–27, "To amend the Police Regulations of the District of Columbia to allow outdoor sidewalk cafes in districts zoned R and SP upon approval of the Board of Zoning Adjustment," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1309. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–28, "To abolish the Board of Consumer Goods Repair Services," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1310. A letter from the Acting Assistant Secretary of the Interior, transmitting a copy of an application by the city of Fort Collins, Colo., for a loan under the Small Reclamation Projects Act, as amended, pursuant to section 4(c) of the act; to the Committee on Interior and Insular Affairs.

1311. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

1312. A letter from the Chairman, Interstate Commerce Commission, transmitting the Commission's report on rail transportation services on the Delmarva Peninsula, pursuant to section 302 of Public Law 94–555; to the Committee on Interstate and Foreign Commerce.

1313. A letter from the Director, Administrative Office of the U.S. Courts, transmitting a draft of proposed legislation to amend the Canal Zone Code with respect to the appointment and service of probation officers and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, and the Judiciary.

By Mr. WHITEHURST (for himself and Mrs. HECKLER):

H.R. 6456. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for State and local public utility taxes; to the Committee on Ways and Means.

By Mr. WIRTH (for himself, Mr. HANNAFORD, Mr. BENJAMIN, Mr. HIGHTOWER, Mr. HYDE, Mr. NEAL, Mr. VENTO, Mr. WALGREN, and Mr. WEISS):

H.R. 6457. A bill to prohibit the use of Federal funds for certain activities designed to support or defeat any legislation or legislative issue on the ballot in any State; to the Committee on the Judiciary.

By Mr. WON PAT:

H.R. 6458. A bill to provide countercyclical fiscal assistance funds for Guam and the Virgin Islands; to the Committee on Government Operations.

H.R. 6459. A bill to regulate certain interstate commerce and to assure that essential maritime transportation is provided, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 6460. A bill to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide social security coverage (for both benefit and tax purposes) with respect to wages paid certain nonimmigrant alien residents of the Republic of the Philippines while in Guam; to the Committee on Ways and Means.

By Mr. BEDELL (for himself, Mr. JOHN L. BURTON, Mr. DELLUMS, and Mr. MILLER of California):

H.J. Res. 396. Joint resolution to support the goals of the U.S. Delegation to the Law of the Sea Conference in reaching an equitable and effective international agreement; to the Committee on International Relations.

By Mr. BURLISON of Missouri (for himself, Mr. CARR, and Mr. PATTERSON of California):

H.J. Res. 397. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and the Vice President of the United States; to the Committee on the Judiciary.

By Mr. RISENHOOVER:

H.J. Res. 398. Joint resolution to designate the square dance as the national dance of the United States; to the Committee on Post Office and Civil Service.

By Mr. TEAGUE (for himself, Mr. FUQUA, Mr. WINN, Mr. BROWN of California, Mr. FREY, Mr. MILFORD, Mr. PURSELL, Mr. HARKIN, Mr. RUDD, Mr. AMBRO, Mr. DORNAN, Mr. KRUEGER, Mrs. LLOYD of Tennessee, Mr. DOWNEY, Mr. WALGREN, Mr. FLIPPO, Mr. GLICKMAN, Mr. GAMMAGE, and Mr. TONRY):

H.J. Res. 399. Joint resolution requesting the President to proclaim the period of July 16 through 24 of each year as U.S. Space Observance; to the Committee on Post Office and Civil Service.

By Mr. WHITEHURST (for himself and Mr. COUGHLIN):

H.J. Res. 400. Joint resolution calling for a wildlife preserve for humpback whales in the West Indies; to the Committee on International Relations.

By Mr. WHITEHURST (for himself, Mr. BONIOR, and Mr. WEISS):

H. Con. Res. 197. Concurrent resolution calling for a regional conservation treaty to protect northern hemisphere pinnipeds; to the Committee on International Relations.

By Mr. BURKE of Massachusetts (for himself, Mr. D'AMOURS, Mr. LUKEN, and Mr. TUCKER):

H. Res. 503. Resolution expressing the sense of the House of Representatives with respect to the President's action of April 1, 1977, regarding import relief for the nonrubber footwear industry; to the Committee on Ways and Means.

By Mr. KOSTMAYER:

H. Res. 504. Resolution concerning com mittee hearings on the future telecommunication policy of the Nation; to the Committee on Interstate and Foreign Commerce.

By Mr. MOTTL:

H. Res. 505. Resolution directing the Committee on Ways and Means to investigate and study the feasibility of increasing the Social Security Trust Fund through the imposition of a severance tax on certain natural resources and, if such tax is found to be feasible, to direct such committee to draft legislation based on the findings of that investigation and study; to the Committee on Rules.

By Mr. SAWYER:

H. Res. 506. Resolution to express the disapproval of the House of Representatives with respect to a proposed increase by the Small Business Administration in the size of businesses, in certain industries, which are eligible for Government procurement contract assistance under the Small Business Act; to the Committee on Small Business.

By Mrs. SMITH of Nebraska:

H. Res. 507. Resolution to authorize the President to issue a proclamation designating the first week in April each year, as National Rural Health Week; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. PHILLIP BURTON:

H.R. 6461. A bill for the relief of Francisco Munoz; to the Committee on the Judiciary.

H.R. 6462. A bill for the relief of Jose Munoz; to the Committee on the Judiciary.

By Mr. McKAY:

H.R. 6463. A bill providing for reinstatement and validation of U.S. oil and gas leases Nos. U-12871, U-12872, U-12874, U-12875, U-12876, U-12876, U-12877, U-12878 and U-12881, and U-13666; to the Committee on Interior and Insular Affairs.

PETITIONS, ETC.

Under clause I of rule XXII,

88. The SPEAKER presented a petition of the city council, Santa Fe, N. Mex., relative to providing funds for low-cost spaying and neutering clinics; to the Committee on Interstate and Foreign Commerce.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5970

By Mr. CORNWELL:

Page 22, line 2, strike out "1½" and insert in lieu thereof "3".

By Mr. ERTEL:

Page 28, after line 2, insert the following new section:

SEC. 810. (a) Notwithstanding any other provision of law, and except as provided in subsection (c), no action may be taken to effect or implement—

(1) the closure of any military installation;

(2) a reduction in the authorized level of civilian personnel at any military installation by more than one thousand or 50 per centum, whichever is smaller, in any twelve-month period; or

(3) any construction, conversion, or rehabilitation at any military facility other than a military installation referred to in paragraph (1) or (2) (regardless of whether such military facility is a military installation as defined in subsection (d)) which will or may be required as a result of any relocation of civilian personnel to such military facility by reason of any closure or reduction in force to which this section applies,

unless and until the provisions of subsection (b) are complied with.

(b) No action described in subsection (a) with respect to the closure of, or a reduction in force at, a military installation may be taken—

(1) unless the Secretary of Defense or the Secretary of the military department concerned—

(A) notifies Congress in writing that such military installation is a candidate for such a closure or significant reduction in force;

(B) after complying with subparagraph (A), complies with all terms, conditions, and requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) with respect to the proposed closure or reduction in force; and

(C) after complying with subparagraph (B), notifies the Committees on Armed Services of the Senate and House of Representatives of the final decision to carry out the proposed closure or reduction in force and submits to such committees a detailed justification for such decision, including statements of the estimated fiscal, local economic, budgetary, environmental, strategic, and operational consequences of such closure or reduction in force; and

(2) until a period of sixty days has elapsed following the date on which the justification required by paragraph (1)(C) is received by such committees.

(c) This section shall not apply to the closure of a military installation or a reduction in force at a military installation if the President certifies to the Congress that such closure or reduction in force must be implemented for reasons of national security or a military emergency.

(d) For purposes of this section:

(1) The term "military installation" means any camp, post, station, base, yard, or other facility under the authority of the Department of Defense—

(A) which is located within any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, or Guam; and

(B) at which not less than five hundred civilian personnel are authorized to be employed.

(2) The term "civilian personnel" means direct-hire, permanent civilian employees of the Department of Defense.

(e) This section shall apply with respect to the closure of any military installation and any reduction in force at any military installation which is first publicly announced on or after January 1, 1976.

Page 28, line 3, strike out "810" and insert in lieu thereof "811".

By Mr. HUGHES:

On page 28, after line 2, insert the following new section (and redesignate section 810 as 811):

SEC. 810. (a) No officer who is on a retired list of the Army, Navy, Marine Corps, or Air Force in the grade of colonel or captain (Navy), or above, and no former officer of the Army, Navy, Marine Corps, or Air Force who served in such grade at any time during the 12-month period preceding his separation from the armed forces may, during the 3-year period beginning on the date such officer is discharged or released from active duty, be employed by, or accept compensation for employment from, any person who is or has been a party to any contract for the provision of goods or services to the United States if such officer or former officer, while serving on active duty in the grade of colonel or captain (Navy), or higher, during the 3-year period ending with such discharge or release from active duty, participated personally and substantially, through decision, recommendation, investigation, or otherwise, in the awarding of such contract.

(b) Any person who violates subsection (a) shall be assessed a civil penalty of the amount of compensation received by such person in the course of, or as a result of, such violation.

(c) This section shall apply to any retired officer or former officer described in subsection (a) who is discharged or released from active duty after the end of the six-month period beginning with the date of enactment of this section.

By Mr. LE FANTE:

(Offered to the Amendment Offered by Mr. COHEN.)

Strike out paragraph (2) of subsection (a) of the proposed section 810 and insert in lieu thereof the following:

(2) a reduction in the authorized level of civilian personnel at any military installation—

(A) by more than one thousand or 50 per centum, whichever is smaller, in any twelve-month period; or

(B) by more than 250 in any twelve-month period, if the average rate of unemployment in the labor market area (as determined by the Secretary of Labor) in which the military installment is located is in excess of 8.5 per centum when measured over the three-year period ending with the date of the first public announcement of such reduction by the Department of Defense; or

By Mr. GARY A. MYERS:

Page 28, after line 2, insert the following new section:

SEC. 810. (a) (1) Each civilian officer or employee of the Department of Defense and each member of the Armed Forces who performs a decision-making function in the handling of any contract, or any bid or proposal for any contract, for which funds are authorized to be appropriated under this Act shall provide for the record a written statement identifying any significant financial interest he has in the contract or the person submitting the bid or proposal, as the case may be. Notwithstanding any other provision of law, if such officer, employee, or member has a significant financial interest in any such contractor, the statement required by this subsection shall be made available to the public.

(2) The Secretary of Defense shall take appropriate disciplinary action (which may include removal from office, termination of employment, or separation from the Armed Forces, as appropriate) against any civilian officer or employee of the Department of Defense or any member of the Armed Forces who knowingly violates paragraph (1).

(b) (1) Not later than the end of the 90-day period beginning on the date of enactment of this Act, the Secretary of Defense shall issue regulations to implement this section. Such regulation shall define "significant financial interest" and "decision-making function" for purposes of this section.

(2) The Secretary of Defense shall submit a report to the Congress not later than June 1, 1978, and annually thereafter, concerning the administration and enforcement of this section during the preceding calendar year.

Page 28, line 3, strike out "810" and insert in lieu thereof "811".

By Mr. QUAYLE:

Page 25, line 24, insert "(a)" after "Sec. 808.".

Page 26, after line 15, insert the following new subsection:

(b) (1) The Secretary of Defense may not conduct any test, experiment, or study involving the use of any chemical or biological agent on civilian populations unless local civilian officials in the area in which the test, experiment, or study is to be conducted are notified in advance of such test, experiment, or study, and such test, experiment, or study may then be conducted only after the expiration of the 30-day period beginning on the date of such notification.

(2) Paragraph (1) shall apply to tests, experiments, and studies conducted by Department of Defense personnel and tests, experiments, and studies conducted on behalf of the Department of Defense by contractors.

FACTUAL DESCRIPTIONS OF BILLS AND RESOLUTIONS INTRODUCED

Prepared by the Congressional Research Service pursuant to clause 5(d) of House Rule X. Previous listing appeared in the CONGRESSIONAL RECORD of April 6, 1977, page 10838:

H.R. 1101. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a medical deduction, without regard

to the three percent floor, for those expenses paid for the medical care of the taxpayer, his spouse, or any dependent of the taxpayer, if that individual is mentally retarded or handicapped.

H.R. 1102. January 4, 1977. Ways and Means. Establishes on the books of the Treasury a fund to be known as the "United States Olympic Fund." Allows an individual taxpayer to designate that $1 of any overpayment of his tax, or $1 of any contribution which he makes with his return be available to such fund.

Provides that amounts in the fund shall be available as stated in appropriation Acts, to the United States Olympic Committee, for specified purposes.

H.R. 1103. January 4, 1977. Ways and Means. Directs the Secretary of Labor to reimburse States for unemployment compensation paid to a member of a group of employees certified by the Secretary as having a significant number or proportion of members totally or partially unemployed, or threatened with such unemployment, primarily due to the inability of an employer to obtain an adequate supply of natural gas.

H.R. 1104. January 4, 1977. Post Office and Civil Service; House Administration. Expands to cover the legislative branch the prohibition of the employment by any public official of any relative of such public official in an agency in which such official serves or over which such official exercises jurisdiction or control.

H.R. 1105. January 4, 1977. Armed Services. Makes it unlawful for any individual or organization to enroll, or attempt to enroll, any member of the Armed Forces serving on active duty in any organization which would act as a representative of such member with respect to terms and conditions of service in the Armed Forces. Sets forth penalties for violations of this act.

H.R. 1106. January 4, 1977. Veterans' Affairs. Provides that the Administrator of Veterans' Affairs shall establish the Fort Mitchell Regional Veterans' Cemetery in Russell County, Ala., if the Russell County Commission donates land in the Fort Mitchell area and the Administrator and the Commission mutually agree to pay for it.

H.R. 1107. January 4, 1977. Education and Labor. Amends the Civil Rights Act of 1964 to include as an unlawful employment practice discrimination on the basis of physical handicap.

H.R. 1108. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to prohibit air carriers from denying air transportation to physically handicapped individuals solely because of such handicap.

H.R. 1109. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 1110. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited, refundable tax credit to persons age 65 or over for the real property taxes, or 25 percent of the rent, they pay for their principal residences.

H.R. 1111. January 4, 1977. Judiciary; Education and Labor. Removes the authority of any United States court to make any decision, enter any judgment, or issue any order whose effect would be to require a pupil to attend a public school other than the one nearest his residence.

Forbids any Federal department, agency, officer, or employee empowered to extend financial assistance to any program or activity to withhold or threaten to withhold such funds in order to induce implementing or continuing a plan or program whose effect would be to assign a pupil to a public school other than the one nearest his residence.

H.R. 1112. January 4, 1977. Ways and Means. Amends the Tariff Schedules of the United States to repeal the duty imposed on articles assembled abroad with components produced in the United States.

H.R. 1113. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) and Title XIX (Medicaid) of the Social Security Act to include in the coverage provided under such programs the services of licensed (registered) nurses.

H.R. 1114. January 4, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to authorize the Secretary of Health, Education, and Welfare to make grants to assist in the development of additional personnel training programs in geriatrics.

Amends the National Labor Relations Act to make it an unfair labor practice for an employer to discriminate against any employee who has given testimony before any congressional committee or Federal agency or department.

H.R. 1115. January 4, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to eliminate age limitations with respect to the requirement that all personnel actions affecting employees or applicants for employment in Federal agencies, the United States Postal Service, or the District of Columbia government be taken without regard to such employees' or applicants' age.

H.R. 1116. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to remove the limits on the number of home health visits covered by Medicare. Expands the coverage of Medicare to include periodic chore services, hospital outreach services, and coverage of health and supportive services furnished in elderly day care centers.

Requires the establishment of a review plan which is adapted to meet the non-institutional nature of home health services.

H.R. 1117. January 4, 1977. Interstate and Foreign Commerce; Ways and Means. Establishes within the Department of Health, Education, and Welfare a Home Health Clearinghouse to consolidate information on services and benefits available to the elderly.

Creates in the Department an Assistant Secretary for Elderly Health.

H.R. 1118. January 4, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to make grants to States having approved comprehensive plans for providing counseling assistance to the elderly, such grants to be distributed on the basis of statewide need and priorities. Permits the use of grants to fund preretirement and career counseling programs, referral services, community activities, and counseling for families of sick and disabled senior citizens.

H.R. 1119. January 4, 1977. Education and Labor; Judiciary. Amends the Older Americans Act of 1965 to authorize the Commissioner of the Administration on Aging to make grants to public or nonprofit private agencies or organizations for the purpose of providing legal assistance to individuals who are 60 years of age or older and who are unable to afford legal assistance in connection with their eligibility for home health care pursuant to Title XVIII (Medicare), Title XIX (Medicaid), and Title XX (Grants to States for Services) of the Social Security Act.

H.R. 1120. January 4, 1977. Ways and Means. Amends Title XX (Grants to States for Services) of the Social Security Act to reallot unused social services funds to States which will use such funds during the succeeding year in preventing or reducing inappropriate institutional care.

Allocates additional Federal matching funds for multipurpose senior center programs. Directs the Secretary of Health, Education, and Welfare to clarify and standardize the eligibility requirements applicable to the provision of assistance to multipurpose senior centers.

H.R. 1121. January 4, 1977. Banking, Finance and Urban Affairs. Amends the National Housing Act to direct the Secretary of Housing and Urban Development to give special emphasis to insuring mortgages covering medical practice facilities which are primarily for the purpose of providing preventive, diagnostic, and treatment services to elderly outpatients, and to insure mortgages made in connection with senior centers offering health, nutritional, recreational, and social facilities to elderly persons, regardless of whether such centers offer housing facilities.

Amends the Housing and Community Development Act of 1974 to authorize additional grants for the construction or maintenance of a senior center providing recreational, health, and nutritional services.

H.R. 1122. January 4, 1977. Ways and Means. Authorizes a tax deduction, under the Internal Revenue Code, for any taxpayer who contributes the right to use any real property owned by the taxpayer to a tax-exempt organization for use by a multipurpose senior citizen center or outpatient geriatric clinic.

H.R. 1123. January 4, 1977. Education and Labor; Interstate and Foreign Commerce; Ways and Means. Amends the Older Americans Act of 1965 by specifying the amount authorized to be appropriated in fiscal year 1978 for purposes of informational exchange on the subject of retraining programs for older Americans. Allows the Secretary of Health, Education, and Welfare to make grants under such Act to cover the cost of administering and operating multipurpose senior centers.

Declares it the sense of Congress that any Federal legislation establishing a national health insurance program should include specified provisions relating to the availability of home health service.

H.R. 1124. January 4, 1977. Appropriations. Appropriates a supplemental amount for carrying out the home health services provisions of the Health Revenue Sharing and Health Services Act. Appropriates specified sums for the purpose of making multipurpose senior center grants under the Older Americans Act of 1965.

H.R. 1125. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XI (General Provisions) of the Social Security Act to provide that any patient of a nursing home or intermediate care facility which is participating in the hospital insurance program under Title XVIII (Medicare) or Title XIX (Medicaid) of the Social Security Act shall have the right to terminate any contract entered into for his or her care in such home or facility upon giving the home or facility at least 30 days' written notice. Prohibits such a facility from requiring any patient to turn over to it any periodic benefit check or other income received after the patient has given such notice.

H.R. 1126. January 4, 1977. Interstate and Foreign Commerce. Amends the Health Revenue Sharing and Health Services Act and the Social Security Act to allow the Secretary of Health, Education, and Welfare to make grants and loans to fund home health services, annual health fairs, community care services, and mobile health facilities for the elderly. Expands the medical coverage of the Social Security Act to include preventive health care, diagnostic services, hearing aids, food care, dental care, vision aids, and specified care and services for the elderly.

Amends the Public Health Service Act to require that $20,000,000 be obligated for grants and contracts for emergency medical services systems for the elderly.

H.R. 1127. January 4, 1977. Ways and

Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for one comprehensive physical examination a year, dental care including dentures, eye examinations including eyeglasses, hearing aids including examination, treatment of foot conditions, and immunizations under the supplementary medical insurance program.

Sets forth measures to safeguard against consumer abuse in the provision of these items and services.

H.R. 1128. January 4, 1977. Interstate and Foreign Commerce. Amends Title XIX (Medicaid) of the Social Security Act to prohibit any expenditure to an individual to the extent to which an entity (other than a member of the individual's family) would be liable for payment for such care and services but for a provision of a contract or a State law which has the effect of limiting or excluding such liability. Allows a State to impose a lien against the estate of a deceased individual after the death of his surviving spouse on account of medical assistance paid on his behalf.

H.R. 1129. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Titles XVIII (Medicare) and XIX (Medicaid) of the Social Security Act to require automatic sprinkler systems in all skilled nursing facilities and intermediate care facilities certified for participation in the Medicare or Medicaid programs unless a waiver of such requirement is granted in accordance with conditions set forth in this Act.

Establishes a program of low-interest Federal loans to assist such facilities in constructing or purchasing and installing automatic sprinkler systems.

H.R. 1130. January 4, 1977. Interstate and Foreign Commerce; Ways and Means. Establishes a Long-Term Care Services program under the Medicare program of the Social Security Act to provide home health, homemakers, nutrition, long-term institutional care, day care, foster home, and outpatient mental health services. Specifies that these services shall be delivered by community long-term care centers under the direction and control of a State long-term care agency.

H.R. 1131. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to authorize reduced air fares for persons 60 years of age or older.

H.R. 1132. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exempt from excise tax buses purchased by tax exempt organizations or by other persons for exclusive use in furnishing transportation for a State or local government or a tax exempt organization (currently, transportation must be limited to students and employees of schools).

H.R. 1133. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide that the charitable deduction allowed for expenses incurred in the operation of a motor vehicle shall include the depreciation, operation and maintenance costs allocable to such operation and shall be determined in the same manner as for a business related deduction.

H.R. 1134. January 4, 1977. Ways and Means. Removes the limitation on the amount of outside income which an individual may earn while receiving benefits under Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act.

H.R. 1135. January 4, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to make the provisions, formerly applicable to persons between 40 and 60 years of age, applicable to anyone 40 years of age or older.

H.R. 1136. January 4, 1977. Banking, Finance and Urban Affairs; Interstate and Foreign Commerce; Ways and Means. Amends title XI (General Provisions) of the Social Security Act to authorize the establishment of an experimental program to provide in-home care for elderly individuals.

Amends title XVIII (medicare) to provide for in-home care, day care centers, and extended and intermediate care for the elderly under the supplementary medical insurance program. Amends title XVIII to provide for the creation of an alternative reimbursement formula which will allow specified hospitals to provide long-term care without applying proportional allocation of overhead costs to all patients in such facilities.

H.R. 1137. January 4, 1977. Education and Labor. Directs the Coordinating Council on Juvenile Justice and Delinquency Prevention to organize and convene a National Conference on Learning Disabilities and Juvenile Delinquency.

Directs the Conference to formulate methods of disseminating extant knowledge and the results of ongoing research related to learning disabilities and handicaps to appropriate agencies and individuals.

H.R. 1138. January 4, 1977. Education and Labor. Authorizes grants to assist States in providing high quality education in elementary and secondary schools and in equalizing educational opportunity within each State. Directs that States expend a portion of their grant in providing services to children enrolled in private nonprofit elementary and secondary schools.

H.R. 1139. January 4, 1977. Education and Labor. Amends the National School Lunch Act to extend through fiscal year 1982 food service programs for children in service institutions and the special supplemental food program.

Amends the Child Nutrition Act of 1966 to extend through fiscal year 1982 provisions to assist schools without a food service program and schools without the facilities to prepare or receive hot meals.

H.R. 1140. January 4, 1977. Government Operations. Establishes the Department of Education within the Executive branch of the Federal Government to take over specified functions of the Department of Health, Education, and Welfare and all of the functions of the Education Division of the Department of Health, Education, and Welfare.

Establishes the Federal Interagency Committee on Education to coordinate all Federal programs affecting education.

H.R. 1141. January 4, 1977. Interstate and Foreign Commerce. Amends the Railroad Retirement Act of 1974 to reduce the age at which railroad employees and their spouses become eligible for annuities under such act.

H.R. 1142. January 4, 1977. Science and Technology. Amends the Federal Nonnuclear Energy Research and Development Act of 1974 to authorize the Administrator of the Energy Research and Development Administration to guarantee loans for the development of synthetic fuels from domestic coal resources.

H.R. 1143. January 4, 1977. Veterans' Affairs. Provides that monthly social security benefit payments shall not be considered income for the purposes of determining the eligibility of veterans receiving a pension prior to June 30, 1960, and the eligibility of veterans for a non-service-connected disability pension.

H.R. 1144. January 4, 1977. Ways and Means. Amends the Social Security Act to provide that an individual who would be fully qualified at age 62 for benefits under the Old-Age, Survivors, and Disability Insurance program may qualify for disability benefits under such program if such individual has 40 quarters of coverage, regardless of when such quarters were earned.

H.R. 1145. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to eliminate the reduction in disability insurance benefits which is presently required in the case of an individual receiving workmen's compensation benefits.

H.R. 1146. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to revise the eligibility requirements for disability insurance benefits for blind persons. Revises the method of computing the primary insurance amount for blind persons under such act.

H.R. 1147. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act by entitling an individual to child's insurance benefits in the case of a child whose benefits were terminated by marriage and who becomes divorced before attaining age 22.

H.R. 1148. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to specify that entitlement of an employee's survivor to an annuity under the Railroad Retirement Act of 1937 will not prevent a lump-sum death payment from being made on such employee's wage record under title II provided that the survivor is not also entitled to a death payment under the Railroad Retirement Act.

H.R. 1149. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to decrease from 60 to 45 the entitlement age for otherwise qualified women to receive widow's insurance benefits.

H.R. 1150. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to increase to $750 the amount of lump-sum death payment allowed thereunder.

H.R. 1151. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) and title XVIII (medicare) of the Social Security Act and the Railroad Retirement Act to make an individual eligible to participate in the hospital insurance program if such individual was eligible to participate in such program on the basis of disability during a coverage preceding the first month in which he is under the disability on the basis of which he currently claims entitlement to such benefits.

H.R. 1152. January 4, 1977. Ways and Means. Interstate and Foreign Commerce. Amends title XVIII (medicare) of the Social Security Act to provide for optometric and medical vision care under the supplementary medical insurance program.

H.R. 1153. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exempt corporations organized solely to provide reserves and deposit insurance for credit unions from the income tax.

H.R. 1154. January 4, 1977. Ways and Means. Amends the policy of Congress to restrict to 750,000,000 pounds the annual aggregate importation of fresh, chilled, or frozen beef, goat, or sheep meat after December 31, 1974. Prescribes a formula for adjustment of such quota. Directs the Secretary of Agriculture to allocate such quota among supplying countries according to certain criteria.

H.R. 1155. January 4, 1977. Interstate and Foreign Commerce; Judiciary. Amends the Federal Trade Commission Act to prohibit the application of a per se rule of illegality under the antitrust laws in the case of territorial market allocation agreements made as part of a licensing agreement: (1) for the manufacture, distribution, and sale of a trademarked soft drink product; or (2) for the distribution or sale of a trademarked private label food product.

H.R. 1156. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XI (general provisions) of the Social Security Act to require the participation of optometrists in the activities of the National Professional Standards Review

Council and of local professional standards review organizations.

H.R. 1157. January 4, 1977. Interstate and Foreign Commerce; Public Works and Transportation; Ways and Means; Merchant Marine and Fisheries. Directs the Secretaries of Transportation and the Treasury to promulgate cargo security regulations. Establishes an Office of Cargo Security within the Department of Transportation. Creates an Interagency Council on Cargo Security to coordinate governmental activities in the field of cargo security.

H.R. 1158. January 4, 1977. Interstate and Foreign Commerce. Amends the Railroad Retirement Act of 1974 to reduce the age at which railroad employees and their spouses become eligible for annuities under such act.

H.R. 1159. January 4, 1977. Judiciary. Removes the jurisdiction of the Supreme Court of the United States and the Federal district courts over any case arising out of any State statute, ordinance, rule or regulation, which relates to voluntary prayers in public schools and public buildings.

H.R. 1160. January 4, 1977. Veterans' Affairs. Directs the Administrator of Veterans' Affairs to insure that burials in national cemeteries be permitted on weekends and holidays.

H.R. 1161. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 1162. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to decrease from 60 to 50 the entitlement age for otherwise qualified women to receive widow's insurance benefits. Eliminates actuarial reduction and disability requirements by directing that such individual shall be entitled to a widow's insurance benefit for each month, beginning with the first month in which she becomes so entitled to such insurance benefits and ending with the month preceding the first month in which any of the following occurs: she remarries, dies, or becomes entitled to an old-age benefit equal to or exceeding the primary insurance amount of her deceased husband.

H.R. 1163. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to limit the application of the Tax Reform Act's elimination of the sick pay exclusion for persons who have not retired on total disability, to taxable years beginning after December 31, 1976.

H.R. 1164. January 4, 1977. Banking, Finance and Urban Affairs. Amends the National Housing Act to establish a guaranteed loan program for the acquisition and installation of solar energy heating and cooling systems in dwelling units.

H.R. 1165. January 4, 1977. Science and Technology; Agriculture. Amends the Solar Heating and Cooling Demonstration Act of 1974 to establish a program of solar thermal conversion technology demonstration in nonresidential agricultural structures. Directs the Administrator of the Energy Research and Development Administration to administer such program, with the assistance of studies conducted by the Secretary of Agriculture.

H.R. 1166. January 4, 1977. Agriculture. Amends the Consolidated Farm and Rural Development Act to authorize the Secretary of Agriculture to make and insure loans under such act for the solar heating or cooling of residential structures of family farms.

H.R. 1167. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an amortization deduction for qualified solar heating and cooling equipment placed in service for nonresidential structures. Makes qualified solar heating and cooling equipment eligible for the investment credit.

H.R. 1168. January 4, 1977. Banking, Finance and Urban Affairs. Authorizes the Federal Energy Administrator to make grants to States and localities for the construction, purchase, and installation of solar energy systems in public buildings.

Directs the Secretary of Housing and Urban Development to prescribe standards governing the operation of such equipment.

H.R. 1169. January 4, 1977. Agriculture. Directs the Secretary of Agriculture to conduct a study and institute a pilot project regarding anaerobic digesters and to issue reports relating to such study and project. Defines "anaerobic digester" as any combination of machines, devices, and structures whose combined functions include anaerobic digestion. Authorizes the Secretary to make grants to specified small farmers for the construction of digesters which shall have been proven to be safe and efficient.

H.R. 1170. January 4, 1977. Banking, Finance and Urban Affairs. Amends the United States Housing Act of 1937 to authorize the Secretary of Housing and Urban Development to make contributions to enable public housing agencies to enter into security arrangements designed to prevent crimes and insure the safety and well-being of tenants.

H.R. 1171. January 4, 1977. Education and Labor; Post Office and Civil Service. Establishes within the Department of Labor a Mid-career Development Service, through which the Secretary of Labor is authorized to make loans and grants for training designed to upgrade the work skills of middle-aged persons. Authorizes specified studies and programs designed to aid in retraining older workers in needed job skills, alleviating the effects of local mass lay-offs and promoting work opportunities in the community and in the executive branch of the Federal Government.

H.R. 1172. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) for the Social Security Act to decrease from 20 to 5 the number of years a divorced woman must have been married to an insured individual in order for her to qualify for wife's or widow's benefits on his wage record.

H.R. 1173. January 4, 1977. Judiciary. Requires specified minimum prison sentences for felons using or carrying a firearm during the commission of a felony which may be prosecuted in a Federal court. Subjects such felons to possible increased sentence as dangerous special offenders.

H.R. 1174. January 4, 1977. Public Works and Transportation. Amends the Urban Mass Transportation Act of 1964 to increase the Federal share for specified types of mass transportation projects under such Act.

H.R. 1175. January 4, 1977. Veterans' Affairs. Provides that recipients of veterans' pensions and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits.

H.R. 1176. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 1177. January 4, 1977. Interstate and Foreign Commerce. Creates an Emergency Coal Administration in the Federal Energy Office of the President to increase the production, transportation, and conversion of coal as a source of energy.

H.R. 1178. January 4, 1977. Judiciary. Amends the Civil Rights Act of 1964 by prohibiting any department, agency, officer or employee of the United States from using the withholding of Federal funds to coerce changes in the racial distribution of teachers or students within a school system when a freedom of choice system, as defined by this Act, is used for the assignment of students.

Prohibits Federal courts from requiring school boards to make changes in the racial distribution of teachers or students when students are assigned in conformity with such a system.

H.R. 1179. January 4, 1977. Ways and Means. Amends Title IV (Aid to Families with Dependent Children) of the Social Security Act: (1) to revise eligibility requirements for grants; (2) to revise the procedure for adjusting the amount of grants; (3) to authorize Federal financial participation in the investigation and prosecution of fraud conducted by State agencies; (4) to require States to provide evidentiary hearings; and (5) to impose criminal sanctions for misuse of grants by recipients.

H.R. 1180. January 4, 1977. Judiciary. Requires specified organizations which employ lobbyists to register and file quarterly expense reports with the Comptroller General. Makes such reports available to the public. Establishes civil and criminal sanctions to enforce this Act.

H.R. 1181. January 4, 1977. Judiciary. Directs the President to appoint, by and with the advice and consent of the Senate, additional district court judges to specified judicial districts of the United States.

H.R. 1182. January 4, 1977. Judiciary. Establishes within the judicial branch a United States Commission on Sentencing to promulgate sentencing guidelines.

Specifies factors to be considered by a sentencing court in imposing a term of imprisonment.

Requires courts to disclose in open court and in the record reasons for imposing imprisonment.

Sets forth guidelines for court of appeals review of sentences.

H.R. 1183. January 4, 1977. Judiciary. Directs the Attorney General to make grants to qualified State programs for the compensation of victims of crime.

Establishes an Advisory Committee on Victims of Crime to advise the Attorney General with respect to the administration of such grant program and to the compensation of victims of crime.

H.R. 1184. January 4, 1977. Agriculture. Establishes a Food Research Advisory Committee within the Department of Agriculture to oversee agricultural research activity.

Directs the Secretary of Agriculture to convene annual Conferences on Food Research and Development.

H.R. 1185. January 4, 1977. Agriculture. Establishes a Commission on the Humane Treatment of Animals to study the treatment of animals.

H.R. 1186. January 4, 1977. Armed Services. Provides that no veteran may be denied care or treatment under the CHAMPUS program for any service-connected disability solely because care or treatment for such disability is available at Veterans' Administration facilities.

H.R. 1187. January 4, 1977. Banking, Finance and Urban Affairs. Requires any person who makes a federally related mortgage loan to maintain facilities to insure availability of information concerning such mortgages, and to provide adequate notification of foreclosure proceedings.

H.R. 1188. January 4, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings into community centers, senior citizen centers and specified educational, medical or social service centers.

Directs the Secretary to serve as a na-

tional clearinghouse for local agencies by providing information on possible alternative uses for closed school buildings.

H.R. 1189. January 4, 1977. Banking, Finance and Urban Affairs. Amends the National Housing Act to direct the Secretary of Housing and Urban Development to give special emphasis to insuring mortgages covering medical practice facilities which are primarily for the purpose of providing preventive, diagnostic, and treatment services to elderly outpatients, and to insure mortgages made in connection with senior centers offering health, nutritional, recreational, and social facilities to elderly persons, regardless of whether such centers offer housing facilities.

Amends the Housing and Community Development Act of 1974 to authorize additional grants for the construction or maintenance of a senior center providing recreational, health, and nutritional services.

H.R. 1190. January 4, 1977. Banking, Finance and Urban Affairs. Requires the developers of all federally assisted condominium projects to disclose specific information on proposed new condominium construction or conversion to condominium units of existing structures.

Establishes the office of Assistant Secretary for Condominiums in the Department of Housing and Urban Development. Authorizes the Secretary of Housing and Urban Development to make grants to State and local governments to establish similar programs.

H.R. 1191. January 4, 1977. Banking, Finance and Urban Affairs. Amends the Federal Fire Prevention and Control Act of 1974 to authorize the Administrator of the National Fire Prevention and Control Administration to make grants to voluntary fire departments to enable them to purchase firefighting equipment which they cannot afford due to post-1972 inflation.

H.R. 1192. January 4, 1977. Education and Labor. Amends the Elementary and Secondary Education Act of 1965 to authorize the Secretary of Health, Education, and Welfare to make grants to a local education agency which demonstrates that: (1) for bona fide budgetary reasons it has been forced to reduce the expenditure of funds for essential elementary and secondary education services, making it impossible to maintain such services at a quality level; and (2) it or the local government unit responsible for providing its revenues has made bona fide efforts to raise the revenue necessary to support essential elementary and secondary educational services and maintain quality education.

H.R. 1193. January 4, 1977. Education and Labor. Amends the Higher Education Act of 1965 to authorize the Commissioner of Education to make grants to institutions of higher education for the development and operation of student internship programs in the office of elected officials at the local, State, and Federal levels of government.

H.R. 1194. January 4, 1977. Education and Labor. Establishes in the Office of Education a National Student Financial Assistance Data Bank to provide information on available financial assistance to students at institutions of higher education.

H.R. 1195. January 4, 1977. Education and Labor. Amends the Higher Education Act of 1965 to require recipients of Federal aid to higher education to give senior citizens access, on a space available basis, to scheduled courses and programs.

H.R. 1196. January 4, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to make grants to States having approved comprehensive plans for providing counseling assistance to the elderly, such grants to be distributed on the basis of statewide need and priorities. Permits the use of grants to fund preretirement and career counseling programs, referral services, community activities, and counseling for families of sick and disabled senior citizens.

H.R. 1197. January 4, 1977. Education and Labor. Amends the National Labor Relations Act to provide that the duty to bargain collectively includes bargaining with respect to retirement benefits for retired employees.

H.R. 1198. January 4, 1977. Education and Labor. Amends the National Labor Relations Act to include as an unfair labor practice an employer's discharge of or discrimination against an employee because such employee gave testimony before a Congressional committee or a federal department or agency.

H.R. 1199. January 4, 1977. Education and Labor. Amends the Comprehensive Employment and Training Act to reduce from 100,000 to 50,000 the minimum population of local governments which may be prime sponsors in the comprehensive manpower program.

H.R. 1200. January 4, 1977. Education and Labor. Amends the Civil Rights Act of 1964 to include as an unlawful employment practice discrimination on the basis of physical handicap.

H.R. 1201. January 4, 1977. Education and Labor. Amends the Comprehensive Employtics Commission to review the present method of collecting and analyzing employment and unemployment information and statistics, to identify weaknesses in such method, and to formulate any necessary or appropriate new methods of collecting and analyzing such information and statistics.

H.R. 1202. January 4, 1977. Education and Labor. Amends the Comprehensive Employment and Training Act of 1973 to direct the Secretary of Labor to enter into agreements with local governments forced to reduce the number of public safety officers due to severe financial hardship in order that such governments may increase the number of public safety officers to adequate levels.

H.R. 1203. January 4, 1977. Government Operations. Establishes the Department of Education within the Executive branch of the Federal Government to take over specified functions of the Department of Health, Education, and Welfare and all of the functions of the United States Office of Education.

Establishes the Federal Interagency Committee on Education to coordinate all Federal programs affecting education.

H.R. 1204. January 4, 1977. Government Operations. Establishes a Department of Senior Citizens Affairs. States that the Department shall serve as a clearinghouse for information related to the problems of the elderly and shall assume specified responsibilities from other government agencies.

H.R. 1205. January 4, 1977. Government Operations. Amends the Budget and Accounting Act, 1921, to require that all departmental budget requests made to the Office of Management and Budget with respect to any fiscal year be submitted to the Congress along with the President's budget for such year. Requires officials requested by the appropriate committees of the Congress to testify before such committees on the President's budget and on such departmental budget requests.

H.R. 1206. January 4, 1977. House administration. Establishes within the Information Systems of the Congress an office to compile and disseminate information to the public relating to pending legislative proposals. Directs the Committee on House Administration to establish and administer such system.

H.R. 1207. January 4, 1977. Interior and Insular Affairs. Designates specified lands in the following national forests as components of the National Wilderness Preservation System: (1) Umatilla National Forest, Washington and Oregon; (2) Inyo and Sequoia National Forests, California; (3) Coronado National Forest, Arizona; (4) Tongass National Forest, New Mexico; (5) Wasatch and Uinta National Forests, Utah; (6) Cibola National Forest, New Mexico; (7) Los Padres National Forest, California; (8) Mendocino National Forest, California; (9) Angeles and San Bernadino National Forests, California; and (10) Williamette National Forest, Oregon.

Directs the Secretary of Agriculture to review the suitability of designating as Wilderness other specified National Forest System lands.

H.R. 1208. January 4, 1977. Interior and Insular Affairs. Prohibits mining activities within any area of the National Park System. Repeals specified existing provisions which permit moving in national parks, monuments, and memorials.

H.R. 1209. January 4, 1977. Interior and Insular Affairs. Establishes the Hudson River Compact Commission. Authorizes the Commission to negotiate a compact relating to the preservation and continued use of the lands and waters of the Hudson Riverway.

H.R. 1210.—January 4, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to establish within the District of Columbia a National Law Enforcement Heroes Memorial.

H.R. 1211. January 4, 1977. International Relations. Amends the United Nations Participation Act of 1965 to revise the formula by which appropriations may be authorized for United States contributions to the United Nations and affiliated agencies, except the International Atomic Energy Agency and the International Civil Aviation Agency.

Prohibits the President from making payments to the United Nations in excess of such formula out of funds appropriated prior to this Act.

Declares it the sense of Congress that the President should direct the Ambassador to the United Nations to take steps to assure that assessments among the member nations take into consideration the wealth of the oil producing nations.

H.R. 1212. January 4, 1977. International Relations. Amends the Mutual Security Act of 1954 to require the President, upon approval of any munitions export license, to notify Congress of the total dollar amount of the items in the approved application. Amends such Act to prohibit issuance of such export license if the Congress objects to its issuance by concurrent resolution within 20 days of receipt of the President's notification of approval, unless the President certifies that a state of emergency exists which requires the granting of such license in the national security interests of the United States.

H.R. 1213. January 4, 1977. Interstate and Foreign Commerce. Establishes a National Foreign Investment Control Commission to restrict or prohibit foreign ownership or control of certain domestic securities or resources deemed essential to the national or economic security of the United States. Prohibits foreign ownership or control of specified types of securities. Authorizes the Commission to determine which securities or resources are essential and to regulate their acquisition. Requires the Commission to maintain a National Registry of Foreign Investment which indicates all foreign holdings in domestic interests or resources. Imposes a penalty for failure to comply with this Act.

H.R. 1214. January 4, 1977. Interstate and Foreign Commerce. Establishes a program of financial and technical assistance for the development of resource recovery systems in the Environmental Protection Agency. Directs the Administrator of the Environmental Protection Agency to regulate wastes which are hazardous to health.

Establishes criteria for approval and implementation of State and regional discarded materials plans. Creates a nonprofit corporation to assist in stimulating the market for resource recovery facilities.

Authorizes financial and technical assist-

ance to States and localities for the removal of sludge and waste from waters and shorelines.

H.R. 1215. January 4, 1977. Interstate and Foreign Commerce. Require that electric utility rate charges for a subsistence quantity of electric energy provided to residential consumers not exceed the lowest rate charged any other electric consumer.

H.R. 1216. January 4, 1977. Interstate and Foreign Commerce. Amends the Flammable Fabrics Act to extend the provisions of that act to construction materials used in interiors and to require the Secretary of Commerce to determine toxicity standards or promulgate other regulations, when there is determined to be a danger from toxic byproducts produced by the burning of such substance.

H.R. 1217. January 4, 1977. Interstate and Foreign Commerce. Directs the Secretary of Health, Education, and Welfare to expand the problems for the treatment of burn injuries, research on burns, and the rehabilitation of burn victims by establishing additional burn centers and burn units and by supporting research and training programs in the treatment and rehabilitation of burn injury victims.

Authorizes funds for the continuation of present burn treatment programs and authorizes the appropriation of additional funds for such expanded programs.

H.R. 1218. January 4, 1977. Interstate and Foreign Commerce. Authorizes the Secretary of Health, Education, and Welfare to offer reinsurance to any insurer or pool against liability for damages arising from medical malpractice. Directs the Secretary to conduct a comprehensive study of the problems that arise from medical malpractice litigation.

Authorizes the Secretary to establish a National Medical Malpractice Reinsurance Development Fund.

Establishes a Federal Medical Malpractice Reinsurance Advisory Board.

H.R. 1219. January 4, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to authorize the Secretary of Health, Education, and Welfare to make grants to colleges and universities to assist them in the establishment and operation of programs for the training of physicians' assistants.

H.R. 1220. January 4, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to authorize the Secretary of Health, Education, and Welfare to make grants to schools of medicine to assist such schools in meeting the costs of developing and conducting special training programs to prepare qualified veterans of the Armed Forces to perform services as medical assistants in long-term health care facilities.

H.R. 1221. January 4, 1977. Interstate and Foreign Commerce. Directs the Secretary of Health, Education, and Welfare to establish a National Diabetes Advisory Board to insure the implementation of a long range plan to combat diabetes. Authorizes the Secretary to make grants to scientists who have shown productivity in diabetes research for the purpose of continuing such research. Authorizes, under the Public Health Service Act, the appropriation of specified sums for the purposes of making grants to centers for research and training in diabetic related disorders.

H.R. 1222. January 4, 1977. Interstate and Foreign Commerce. Amends the Community Mental Health Centers Act to establish the Office of Mental Health and Disability Advocacy Services. States that such Office shall enter into contracts with States to assist them in meeting the costs of establishing and maintaining programs of mental health advocacy services for patients in mental health facilities.

H.R. 1223. January 4, 1977. Judiciary. Authorizes individuals to whom the proceeds of a child support order are payable to register such order in any court in any State in which the individual responsible for making such payments resides.

Allows courts in which such an order is registered to entertain contempt proceedings against an individual who fails to comply with support order in the same manner as if such court originally issued the order.

H.R. 1224. January 4, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to require that comprehensive State plans which must be submitted in order to receive certain assistance thereunder contain a comprehensive program relative to the special problems of prevention, treatment, and other aspects of crimes against the elderly.

H.R. 1225. January 4, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to condition certain assistance to States, local governments, and agencies thereunder on the adoption of a law enforcement officers' bill of rights.

H.R. 1226. January 4, 1977. Judiciary. Makes it a Federal crime for any person to assault or kill any firefighter or law enforcement officer on account of such firefighter's or officer's performance of duty.

Stipulates that any person: (1) conspiring to commit an offense in violation of this Act; or (2) transporting or aiding in transporting, or receiving or aiding in receiving, in interstate commerce any dangerous weapon knowing or intending that it will be used to commit an act in violation of this Act shall be punished the same as a person committing such an Act.

H.R. 1227. January 4, 1977. Judiciary. Increases the maximum fine and the maximum term of imprisonment which may be imposed for: (1) damaging, destroying, or disabling any civil aircraft; (2) damaging, destroying, disabling, or placing any destructive substance near any aircraft part with the intent to damage, destroy, or disable any such aircraft; (3) damaging, destroying, disabling or placing any destructive substance in or near any aircraft facility with such an intent; or (4) incapacitating a crew member of an aircraft with such an intent.

H.R. 1228. January 4, 1977. Judiciary. Requires specified minimum prison sentences for felons using or carrying a firearm during the commission of a felony which may be prosecuted in a Federal court. Subjects such felons to possible increased sentence as dangerous special offenders.

H.R. 1229. January 4, 1977. Judiciary. Amends the Legal Services Corporation Act to direct the Corporation to provide financial assistance to qualified programs designed to furnish legal assistance to eligible older persons in connection with any determination relating to eligibility or payment for home health services or specified health-related hearings under the Social Security Act.

H.R. 1230. January 4, 1977. Judiciary. Grants an exemption from antitrust liability to professional retail pharmacists who negotiate collectively for reimbursement for dispensing prescription drugs under a government or private prepaid prescription program.

H.R. 1231. January 4, 1977. Judiciary. Grants a Federal charter to the Gold Star Wives of America.

H.R. 1232. January 4, 1977. Judiciary. Grants a Federal charter to the Italian American War Veterans of the United States.

H.R. 1233. January 4, 1977. Judiciary. Grants a Federal charter to the Athenia Veterans Post, Inc.

H.R. 1234. January 4, 1977. Merchant Marine and Fisheries. Amends the National Environmental Policy Act to require the filing of supplemental environmental impact statements with respect to individual Outer Continental Shelf leases prior to preproduction exploration and development and prior to commencement of production activities.

H.R. 1235. January 4, 1977. Post Office and Civil Service. Repeals the Postal Reorganiza- employee health benefits plans from reducing benefits or excluding any class of provider of health services unless the Civil Service Commission gives notice of, and conducts hearings relative to, the proposed change within prescribed time limits.

H.R. 1236. January 4, 1977. Post Office and Civil Service. Repeals the Postal Reorganization Act. Reenacts provisions relating to the Postal Service which were in effect immediately prior to the enactment of such act.

H.R. 1237. January 4, 1977. Post Office and Civil Service. Applies to the United States Postal Service provisions requiring that buildings built, leased, or financed by the United States be designed and constructed to insure ready access and use by the physically handicapped.

H.R. 1238. January 4, 1977. Post Office and Civil Service. Extends to 25 years the period during which preferential mail rates shall apply to publications mailed by any veterans' organizations.

H.R. 1239. January 4, 1977. Post Office and Civil Service. Prohibits any Federal employee from interfering with Postal Service employees' communication with any Member or committee of Congress in connection with any matter pertaining to the Postal Service.

H.R. 1240. January 4, 1977. Public Works and Transportation. Amends the Urban Mass Transportation Act of 1964 to increase the Federal share for specified types of mass transportation projects under such Act.

H.R. 1241. January 4, 1977. Public Works and Transportation. Directs the Secretary of the Treasury to determine for each fiscal year the amount of taxes attributable to each State which are paid into the Highway Trust Fund. Directs the Secretary of Transportation to insure that each State will be apportioned an aggregate amount of at least 80 percent of the amount of such taxes in Federal-aid highway program funds.

H.R. 1242. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to authorize reduced rate air transportation for persons between the ages of 12 and 21, inclusive on a space-available basis.

H.R. 1243. January 4, 1977. Public Works and Transportation. Authorizes the Secretary of Transportation, with the approval of the Secretary of the Treasury, to guarantee any person against loss of principal and interest on securities, obligations, or loans issued to enable certain motor carriers engaged in express service to refinance existing obligations and for other corporate and related purposes consistent with their responsibilities as common carriers.

H.R. 1244. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 and the Interstate Commerce Act to authorize free or reduced transportation rates for persons over age 65 and handicapped individuals and their attendants. Amends the Urban Mass Transportation Act of 1964 to give funding priority under such Act to public bodies which offer reduced rates to such individuals. Authorizes the Secretary of Transportation to prescribe standards for facilities funded under such Act to insure ready access to such facilities by these individuals. Amends the Older Americans Act of 1965 to authorize a grant program for special transportation research and demonstration projects for such individuals.

H.R. 1245. January 4, 1977. Public Works and Transportation. Directs the Secretary of Transportation to require that all projects

receiving Federal financial assistance for mass transportation purposes be designed and operated so that such transportation facilities, equipment and services can be utilized by elderly and handicapped persons.

H.R. 1246. January 4, 1977. Public Works and Transportation. Directs the Administrator of the Environmental Protection Agency to establish research and demonstration programs for the control of sludge. Authorizes financial assistance for sludge removal programs. Establishes a permit program to control hazardous sludge.

H.R. 1247. January 4, 1977. Public Works and Transportation. Authorizes the Administrator of the Environmental Protection Agency to provide financial and technical assistance to States and localities for the construction or acquisition of sewage sludge disposal facilities.

H.R. 1248. January 4, 1977. Public Works and Transportation. Amends the Federal Water Pollution Control Act to authorize the Administrator of the Environmental Protection Agency to accept certification by State water pollution control facilities of responsibility for treatment projects within such State.

Authorizes financial assistance to State programs so certified an amount not to exceed 2 percent of the Federal allotment for waste treatment works projects.

H.R. 1249. January 4, 1977. Rules. Requires review of Federal programs to determine if they warrant continuation. Requires the President to conduct such review of the programs covered by the annual budget. Requires Congress to make such review every four years.

H.R. 1250. January 4, 1977. Rules. Creates a Congressional Joint Committee on Foreign Investment Control in the United States to study the manner in which the National Foreign Investment Control Commission established by the Foreign Investment Control Act of 1975 fulfills its functions.

H.R. 1251. January 4, 1977. Small Business. Amends the Small Business Act to provide additional assistance to farming and agriculturally related small business concerns.

Amends the Small Business Investment Act of 1958 to create a control financing program for small business.

H.R. 1252. January 4, 1977. Science and Technology. Authorizes and directs the Secretary of Commerce to make grants to local fire departments to pay up to one-half the cost of purchasing firefighting equipment.

H.R. 1253. January 4, 1977. Science and Technology. Authorizes and directs the Secretary of Commerce to make grants to local fire departments to pay up to 90 percent of the cost of purchasing heat-protective firefighting suits and breathing apparatus.

H.R. 1254. January 4, 1977. Veterans' Affairs. Changes the authority of the Administrator of Veterans' Affairs with regard to expenditures to correct structural defects in dwellings securing loans guaranteed or insured by the Administrator.

H.R. 1255. January 4, 1977. Veterans' Affairs. Authorizes the Administrator of Veterans' Affairs to assist certain totally disabled veterans, including hemiplegics, in acquiring suitable housing units with special fixtures.

H.R. 1256. January 4, 1977. Veterans' Affairs. Authorizes the Administrator of Veterans' Affairs to make scholarship grants to individuals who are medical students or who are accepted at an approved medical school and who agree to practice at a Veterans' Administration facility after the completion of their professional training.

H.R. 1257. January 4, 1977. Veterans' Affairs. Authorizes the Administrator of Veterans' Affairs, in providing therapeutic and rehabilitation activities, to provide for the participation of patients and members in Veterans' Administration health facilities in the assemblage of poppies or other similar projects carried out at such facilities, which are sponsored by a national veterans service organization or its auxiliary.

H.R. 1258. January 4, 1977. Ways and Means. Amends the Internal Revenue Code of 1954 to establish lower tax rates on employees, employers, and the self-employed for purposes of old-age, survivors and disability insurance after fiscal year 1977.

Decreases the tax rate on self-employment, employee, and employer income for purposes of hospital insurance.

Amends Title II (Old-Age, Survivors, and Disability Insurance) in order to provide that one-third of the costs of the program shall hereafter be borne by the Federal Government.

Increases the earnings counted for benefit and tax purposes.

H.R. 1259. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to require that in the case of an individual whose income tax prepayments exceed such individual's liability for the income tax with respect to any taxable year, interest shall be allowed and paid at a rate of five percent upon the excess portion of each such tax prepayment.

H.R. 1260. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to require an automatic cost-of-living adjustment in the income tax rates, the amount of the standard deduction, personal exemption, and depreciation deduction, and the rate of interest payable on certain obligations of the United States.

H.R. 1261. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals an income tax credit equal to one half the amount paid for health insurance premiums up to a maximum credit of $250.

H.R. 1262. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude $7,500 from the gross income of any individual who has attained the age of 65 at the end of the taxable year.

H.R. 1263. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion for persons aged 65 or over for amounts received as an annuity, pension, or other retirement benefit, and for all persons receiving retirement benefits under a public retirement system.

H.R. 1264. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited exclusion from gross income of interest on savings deposits paid or accrued by an individual taxpayer.

H.R. 1265. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to increase the deduction for individual retirement savings.

H.R. 1266. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow the amortization of up to $5,000 in expenses incurred for an addition to the taxpayer's principal residence and a limited deduction for other improvements to his principal residence.

H.R. 1267. January 4, 1977. Ways and Means. Entitles taxpayers, under the Internal Revenue Code, to elect to take a deduction with respect to the amortization of any qualified school or hospital property, which was purchased from a tax-exemption organization, based on a period of 180 months.

H.R. 1268. January 4, 1977. Ways and Means. Amends the Internal Revenue Code with respect to the retirement income credit.

H.R. 1269. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a deduction for depreciation on capital expenditures incurred in connecting a sewage line from the taxpayer's residence to a municipal sewage system.

H.R. 1270. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited, refundable tax credit to persons age 65 or over for the real property taxes, or 25 percent of the rent, they pay for their principal residences.

H.R. 1271. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow income tax deduction for 25 percent of the rent paid for the taxpayer's principal residence. Applies to rent paid for mobile home sites for individuals whose principal residence is a mobile home.

H.R. 1272. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for 25 percent of the rent paid for the taxpayer's principal residence.

H.R. 1273. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to disallow the deduction of oil company advertising expenses incurred for purposes other than the sale of products or services.

H.R. 1274. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a deduction for donations of blood to charitable organizations in an amount equal to $25 for each pint donated.

H.R. 1275. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to prohibit the taking of a business deduction for expenses paid or incurred to advertise alcoholic beverages.

H.R. 1276. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a medical care deduction for the costs paid for the custodial care of a dependent suffering Down's syndrome.

H.R. 1277. January 4, 1977. Ways and Means. Authorizes a tax deduction, under the Internal Revenue Code, for any taxpayer who contributes the right to use any real property owned by the taxpayer to a tax-exempt organization for use by a multipurpose senior citizen center or outpatient geriatric clinic.

H.R. 1278. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude from the income tax, pensions paid to retired policemen and firefighters, or to their dependents, widows or other survivors to the extent that such benefits are based on full-time service for a governmental entity.

H.R. 1279. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude certain payments to volunteer firemen and rescue workers from their gross income.

H.R. 1280. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude certain payments to volunteer firemen and rescue workers from their gross income.

H.R. 1281. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exempt nonprofit volunteer firefighting or rescue organizations from the excise tax on sales of special fuels, automotive parts, petroleum products, and communication services.

H.R. 1282. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide an additional $750 tax exemption for certain volunteer firefighters.

H.R. 1283. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction by volunteer firefighters for their firefighting clothing expenses.

H.R. 1284. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a credit against the income tax, instead of the existing deduction, for the State and local sales taxes paid or accrued by the individual.

H.R. 1285. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for State and local taxes paid or incurred for the furnishing of public utility services.

H.R. 1286. January 4, 1977. Ways and Means. Amends the Internal Revenue Code

to provide that payments to independent municipal sewer services shall be treated as deductible real property taxes where they are billed independently from property taxes.

H.R. 1287. January 4, 1977. Ways and Means. Authorizes a taxpayer, under the Internal Revenue Code, to elect to treat qualified architectural and transportational barrier removal expenses which are paid or incurred during the taxable year as expenses which are not chargeable to capital account. Deems such expenses so treated as allowable tax deductible expenditures.

H.R. 1288. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to increase by 15 percent the monthly benefits and lump-sum death payments payable under such Title.

H.R. 1289. January 4, 1977. Ways and Means. Establishes, as a new executive agency, the Social Security Administration.

Revises the administration of Old-Age, Survivors, and Disability Insurance, Medicare, and Supplemental Security Income under the Social Security Act. Transfers the responsibility for administering these programs and the health standards provisions of the Federal Coal Mine Health and Safety Act from the Department of Health, Education, and Welfare to such newly established Administration.

H.R. 1290. January 4, 1977. Ways and Means. Amends the Social Security Act to provide that an individual who would be fully qualified at age 62 for benefits under the Old-Age, Survivors, and Disability Insurance program may qualify for disability benefits under such program if such individual has 40 quarters of coverage, regardless of when such quarters were earned.

H.R. 1291. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to make all benefits based upon the attainment of age payable at age 60, subject to actuarial reduction.

H.R. 1292. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 1293. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to revise the eligibility requirements for disability insurance benefits for blind persons. Revises the method of computing the primary insurance amount for blind persons under such Act.

H.R. 1294. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to allow, under specified circumstances, persons who have acquired retirement credits under both the civil service and the old-age, survivors, and disability insurance system to exchange such credits between the two systems in order to obtain maximum benefits based on their combined service.

H.R. 1295. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to allow a State to terminate social security coverage for policemen and firemen without affecting the coverage of other public employees.

H.R. 1296. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the remarriage of a widow, widower, or parent shall not terminate his or her entitlement to widow's, widower's, or parent's insurance benefits or reduce the amount thereof.

H.R. 1297. January 4, 1977. Ways and Means. Prohibits any reduction in old-age insurance benefits under the Social Security Act of an insured individual by reason of the fact that such individual receives outside earnings from either wages or self-employment.

H.R. 1298. January 4, 1977. Ways and Means. Amends the program of Supplemental Security Income for the Aged, Blind, and Disabled of the Social Security Act to require the Secretary of Health, Education, and Welfare, in determining the value of the house of an applicant for benefits under such Title, to take into account the current market price of homes in the area in which the applicant's home is located and to periodically review such determinations.

H.R. 1299. January 4, 1977. Ways and Means. Amends Title XVIII (Medicare) of the Social Security Act to authorize payment for emergency inpatient hospital services furnished outside the United States, to a qualified individual whose principal residence is within the United States, without regard to where the emergency occurred.

H.R. 1300. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to require that reports and payments by the States for voluntary agreements for coverage of State and local employees shall be made to the Secretary of the Treasury on a calendar-quarter basis no more frequently than the fifteenth of the second month following each calendar-quarter.

H.R. 1301. January 4, 1977. Ways and Means. Amends the Tariff Schedules of the United States to repeal the duty imposed on articles assembled abroad with components produced in the United States.

H.R. 1302. January 4, 1977. Education and Labor; Banking, Finance and Urban Affairs. Amends the Fair Labor Standards Act of 1938 to authorize the Secretary of Labor to investigate any proposed business closing or relocation and to provide assistance to certain employees and local governments affected by such action.

Denies specified tax benefits to a business closing or transferring an operation upon certain findings by the Secretary.

Establishes a National Employment Relocation Administration within the Department of Labor and a National Employment Relocation Advisory Council.

H.R. 1303. January 4, 1977. Education and Labor; Ways and Means. Amends the Employee Retirement Income Security Act of 1974 to repeal the provision permitting pension plans providing annuities before normal retirement age to pay such benefits in a form other than one having the effect of a qualified joint and survivor annuity.

Requires a plan to provide a survivors annuity to the spouse of a participant who dies before the earliest retirement age.

Amends the Internal Revenue Code to make similar revision with respect to requirements for qualifying pension trusts thereunder.

H.R. 1304. January 4, 1977. Interior and Insular Affairs; Rules. Amends the Outer Continental Shelf Lands Act to require submission of proposed oil and gas leases by the Secretary of the Interior to the Congress. Stipulates that such lease shall be issued only if neither House of Congress passes a resolution of disapproval within 90 days of such submission.

Establishes procedures governing congressional action or resolution to disapprove such leases.

H.R. 1305. January 4, 1977. Interior and Insular Affairs; Science and Technology. Establishes a National Energy and Conservation Corporation to undertake programs of exploration, development, and production of public land and tideland oil, natural gas, oil shale, and coal resources. Directs the corporation to administer programs consistent with objectives of land use planning, conservation, and environmental protection.

H.R. 1306. January 4, 1977. Interstate and Foreign Commerce; Interior and Insuar Affairs. Establishes a Bureau of National Resource Information and a National Resource Information System within the Department of Commerce to maintain information and statistics on natural resources.

Requires major natural resource companies engaged in commerce to file reports with the Bureau.

Directs the Secretary of the Interior to compile an inventory of all mineral reserves in the public lands of the United States.

H.R. 1307. January 4, 1977. Interstate and Foreign Commerce; Ways and Means. Establishes within the Department of Health, Education, and Welfare a Home Clearinghouse to consolidate information on services and benefits available to the elderly.

Creates in the Department an Assistant Secretary for Elderly Health.

H.R. 1308. January 4, 1977. Judiciary; Banking, Finance and Urban Affairs. Amends the Civil Rights Act of 1968 to prohibit sex discrimination in the sale, rental, financing, or provision of brokerage services for housing and to prohibit housing intimidation based on sex or marital status.

Amends the National Housing Act to prohibit marital status discrimination in the extension of mortgage assistance.

H.R. 1309. January 4, 1977. Public Works and Transportation: Government Operations. Amends the Public Buildings Act of 1959 and the Federal Property and Administrative Services Act of 1949 to require the Administrator of General Services, when acquiring or managing space necessary for Federal agencies, to: (1) utilize space in buildings of historic, architectural, or cultural significance where feasible: (2) encourage the location of commercial, cultural, educational, or recreational activities within or near public buildings; and (3) encourage the public use of public buildings outside of regular Federal working hours.

Requires reports by the Administrator to Congress on Federal agencies' activities on standards relating to accessibility of the physically handicapped to public buildings.

H.R. 1310. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XI (general provisions) of the Social Security Act to require that skilled nursing facilities covered by the medicare program and intermediate care facilities covered by the medicaid program, adopt a statement of the rights and responsibilities of the patients who are receiving treatment in such facilities.

H.R. 1311. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) of the Social Security Act to provide payment for certain clinical psychologists' services under the supplement medical insurance program.

H.R. 1312. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) of the Social Security Act to authorize payment for specified services performed by chiropractors, and physical examination, and related routine laboratory tests.

H.R. 1313. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends title XVIII (medicare) of the Social Security Act to provide payment for nutritional counseling as part of the home health services provided under the supplementary medical health insurance program.

H.R. 1314. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to extend coverage to include expenses incurred in providing diagnosis of uterine cancer, if the individual receiving the

test has not had such a test on a routine basis during the preceding six months.

H.R. 1315. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for diagnostic tests and examinations given for the detection of breast cancer under the supplementary medical insurance program.

H.R. 1316. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) and Title II (Old-Age, Survivors', and Disability Insurance) of the Social Security Act to extend Medicare hospital coverage to include drugs. Establishes a Formulary Committee within the Department of Health, Education, and Welfare to prepare and maintain a listing of qualified drugs.

H.R. 1317. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) and Title XIX (Medicaid) of the Social Security Act to include in the coverage provided under such programs the services of licensed (registered) nurses.

H.R. 1318. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to require skilled nursing facilities participating in the Medicare program to comply with relevant provisions of the 1973 edition of the Life Safety Code of the National Fire Protection Association.

H.R. 1319. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) and Title XIX (Medicaid) of the Social Security Act to require automatic sprinkler systems in all skilled nursing facilities and intermediate care facilities certified for participation in the Medicare or Medicaid programs unless a waiver of such requirement is granted in accordance with conditions set forth in this Act.

Establishes a program of low-interest Federal loans to assist such facilities in constructing or purchasing and installing automatic sprinkler systems.

H.R. 1320. January 4, 1977. Government Operations. Amends the Buy American Act by defining unreasonable cost of American goods as greater than the price of foreign-made goods plus 50 percent. Permits States or their political subdivisions to enact laws giving preference in procurement to American-made goods.

H.R. 1321. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to limit the application of the Tax Reform Act's elimination of the sick pay exclusion for persons who have not retired on total disability, to taxable years beginning after December 31, 1976.

H.R. 1322. January 4, 1977. Interior and Insular Affairs. Transfers the Mar-A-Lago National Historic Site from the United States to the Marjorie Merriweather Post Foundation of the District of Columbia.

H.R. 1323. January 4, 1977. Interstate and Foreign Commerce. Amends the National Traffic and Motor Vehicle Safety Act of 1966 to direct the Secretary of Transportation to promulgate safety standards for school bus external warning devices.

H.R. 1324. January 4, 1977. Public Works and Transportation. Amends the Interstate Commerce Act to authorize the Interstate Commerce Commission to issue certificates of public convenience and necessity to aid in construction of certain coal pipelines. Allows certified pipeline carriers to exercise the power of eminent domain in the United States district courts to acquire rights-of-way.

Prohibits the transportation of coal by carriers who have a financial interest in such coal.

H.R. 1325. January 4, 1977. Public Works and Transportation. Amends the National Traffic and Motor Vehicle Safety Act of 1966 to authorize motor carrier employees to request the Secretary of Transportation to conduct an investigation regarding motor carrier safety regulation violations. Prohibits discrimination against employees who request such an investigation. Prohibits discrimination against employees who refuse to operate equipment because of an apprehension of death or serious injury to themselves or others.

H.R. 1326. January 4, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to develop and implement youth camp safety standards, including standards for day camps, resident camps, and travel camps.

Establishes the Advisory Council on Youth Camp Safety within the Department of Health, Education, and Welfare.

H.R. 1327. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 by directing the Secretary of Labor to: (1) render on-site consultation and advice to any employer, upon the request of such employer, concerning compliance with the Act; and (2) establish programs for the education and training of employers and employees concerning hazards in particular industries.

H.R. 1328. January 4, 1977. International Relations. Repeals the provision of the Agricultural Trade Development and Assistance Act of 1954 that allocates food aid commodities among those countries that are and those countries that are not seriously affected by inability to produce or purchase sufficient food for their immediate requirements.

H.R. 1329. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act to prohibit the issuance of a citation to an employer if at all times 30 days prior to an inspection or investigation such employer employed ten or fewer employees.

Exempts an employer charged with a second violation under this Act from the assessment of a civil penalty if his first violation was of a non-serious nature and he was charged with fewer than ten violations.

H.R. 1330. January 4, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to direct the Secretary of Health, Education, and Welfare to make grants to health agencies of States or their political subdivisions, or to any qualified nonprofit agency for programs of prenatal health care for adolescents, health care for infants of adolescent mothers, family planning services, social services and funds to purchase adoption services for adolescent mothers.

H.R. 1331. January 4, 1977. Post Office and Civil Service; Rules. Grants certain employment preference within a Federal agency to agency employees who have been affected by a closing, relocation, or reduction in services.

Directs the Chairman of the Civil Service Commission to assist specified employees affected by such agency reorganization in finding substantially equivalent employment.

Subjects certain agency closings, relocations, and reductions in services to the same Congressional oversight as a reorganization plan submitted by the President.

H.R. 1332. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude from gross income amounts received under tuition-remission programs at institutions of higher education.

H.R. 1333. January 4, 1977. Banking, Finance and Urban Affairs. Amends the Flood Disaster Protection Act of 1973 to: (1) abolish prohibitions against the granting of Federal financial assistance and secured loans for aquisition or construction in a flood hazard area, unless the community in which such area is located is participating in the national flood insurance program; and (2) repeals the requirement that a community tentatively identified as having special flood hazards apply for participation in the program.

H.R. 1334. January 4, 1977. Education and Labor. Authorizes the Secretary of Health, Education, and Welfare to establish a national adoption information exchange system, utilizing computers and other data processing methods to assist in the placement of children who are awaiting adoption, and in locating such children for prospective parents.

H.R. 1335. January 4, 1977. Education and Labor. Includes within the coverage of the Occupational Safety and Health Act of 1970 State and local government employees where a pattern or practice of unsafe or unhealthful working conditions or imminent dangers exists.

Subjects State and local governments to the safety and health standards imposed upon employers by such Act.

H.R. 1336. January 4, 1977. Judiciary. Grants a Federal charter to the American Political Items Collectors, Incorporated.

H.R. 1337. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide that the constructive retail sales prices for computing the manufacturers excise taxes on heavy buses, trucks, and bus and truck chassis and bodies shall be based on the highest price such articles are normally sold for by manufacturers and producers.

H.R. 1338. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude from gross income interest on industrial development bonds used to provide drydocks for servicing (not manufacturing) vessels.

H.R. 1339. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to permit the payment of child's insurance benefits to certain qualified minor children legally adopted by an individual entitled to old-age or disability insurance benefits.

H.R. 1340. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to require the Secretary of the Treasury to make an annual report to Congress on the effects of inflation or deflation on taxpayers' income tax liabilities.

H.R. 1341. January 4, 1977. Interior and Insular Affairs; Merchant Marine and Fisheries. Authorizes the Secretary of the Interior to make payments to local governments based on the amount of public lands within the boundaries of such governmental units.

H.R. 1342. January 4, 1977. House Administration. Amends the Federal Election Campaign Act of 1971 by requiring radio and television stations to provide free broadcast time to eligible candidates for election to Federal office.

H.R. 1343. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to increase the amount authorized to be appropriated under such Act.

H.R. 1344. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a credit against the income tax for 30 percent of the aggregate amount paid during the taxable year for tuition and fees for education of the taxpayer or any other individual at a postsecondary, nonprofit educational institution.

H.R. 1345. January 4, 1977. Ways and Means. Amends Title IV (Aid to Families with Dependent Children) and Title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act, and the law relating to veterans' pensions to provide that recipients of supplemental security income benefits, recipients of aid or assistance under the various

Federal-State public assistance and medicaid programs, and recipients of assistance or benefits under the veterans' pension and compensation program and specified other Federally assisted programs including the food stamp program and the public housing program, will not have the amount of such benefits, aid, or assistance reduced because of post-1973 increases in monthly social security benefits.

H.R. 1346. January 4, 1977. Interstate and Foreign Commerce; Public Works and Transportation. Limits the power of the Federal Government to determine the navigability of waters of the United States which are located within a single State in determining the application of specified laws to such waters.

H.R. 1347. January 4, 1977. Judiciary. Repeals the Gun Control Act of 1968.

H.R. 1348. January 4, 1977. Education and Labor. Repeals the Occupational Safety and Health Act of 1970.

H.R. 1349. January 4, 1977. Agriculture. Requires, under the Federal Meat Inspection Act, that imported meat and meat food products made in whole or part from imported meat be labeled "imported" or "imported in part" at all stages of distribution until reaching the ultimate consumer.

Prohibits the importation of any dairy product into the United States unless the foreign farms and plants in which such products were produced comply with all inspection, grading and other standards prescribed by the Secretary of Agriculture.

H.R. 1350. January 4, 1977. Judiciary. Removes Federal court jurisdiction over school assignment.

H.R. 1351. January 4, 1977. Education and Labor; Judiciary. Stipulates that failure of an educational agency to attain a racial balance within its schools or the assignment of a student to the school nearest his home shall not constitute a denial of equal educational opportunity or equal protection of the laws.

Sets forth limitations on the use of judicial remedies, transportation of students, desegregation plans and allocation of Federal resources to achieve equal educational opportunity.

H.R. 1352. January 4, 1977. Judiciary; Education and Labor. Eliminates the jurisdiction of Federal courts to issue busing orders based on race, color, religion or national origin.

Prohibits any Federal agency from inducing such busing through withholding or threatening to withhold Federal assistance.

H.R. 1353. January 4, 1977. Judiciary; Education and Labor. Eliminates the jurisdiction of Federal courts to issue busing orders based on race, color, religion or national origin.

Prohibits any Federal agency from inducing such busing through withholding or threatening to withhold Federal assistance.

H.R. 1354. January 4, 1977. Judiciary; Education and Labor. Imposes a moratorium on the implementation of Federal court orders that require local educational agencies to transport students and on the implementation of certain desegregation plans. Extends the moratorium until Congress establishes a uniform standard for the use of busing.

H.R. 1355. January 4, 1977. Education and Labor. Amends the Service Contract Act of 1965 to extend its applicability to contracts performed in the Panama Canal Zone.

H.R. 1356. January 4, 1977. Education and Labor. Amends the National Foundation on the Arts and the Humanities Act of 1965 to: (1) authorize the Chairman of the National Endowment of the Arts to award grants to specified groups for projects designed to make unused or underused railroad passenger depots available to communities for cultural activities; (2) require the Chairman to establish an advisory council for consultation with respect to the awarding of such grants.

H.R. 1357. January 4, 1977. Judiciary. Declares that the name and symbol "Tree City USA" is the property of the United States to be used in conjunction with the Arbor Foundation and its cooperators.

Authorizes the Secretary of Agriculture to establish and collect use and royalty fees with respect to such symbol.

Authorizes injunctive relief and specifies criminal penalties for unauthorized use of such symbol.

H.R. 1358. January 4, 1977. Science and Technology. Establishes an Energy Extension Service in the Energy Research and Development Administration to assist in the development of energy conserving practices.

Establishes criteria for the development of State energy conservation implementation plans. Directs the Administrator of Energy Research and Development to develop energy conservation plans for Federal programs.

H.R. 1359. January 4, 1977. Agriculture. Requires, under the Food Stamp Act of 1964, that any food or food product to be purchased with food stamps be approved by the Secretary of Agriculture and Congress as having a high nutritional value, and to be so labeled. Eliminates any requirement that an eligible household purchase a minimum amount of food stamps in order to participate in the food stamp program.

H.R. 1360. January 4, 1977. Judiciary. Requires specified minimum prison sentence for felons using or carrying a firearm during the commission of a felony which may be prosecuted in a Federal court. Subjects such felons to possible increased sentence as dangerous special offenders.

H.R. 1361. January 4, 1977. Veterans' Affairs. Provides that recipients of Veterans' pensions and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits.

H.R. 1362. January 4, 1977. Ways and Means. Directs the Secretary of Health, Education, and Welfare to pay all costs (including related administrative expenses as well as the cost of the actual aid, assistance, or benefits involved) incurred by any State or local government or agency thereof in carrying out a welfare or public assistance program.

H.R. 1363. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow volunteer workers in Veterans' Administration hospitals an income tax deduction equal to the number of hours of services worked multiplied by $2.00 or the minimum hourly wage applicable under the Fair Labor Standards Act, whichever is greater.

H.R. 1364. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow volunteers, aged 65 or more, working for charitable organizations, to take an income tax deduction equal to the number of hours worked multiplied by either $2.00 or the applicable minimum hour wage under the Fair Labor Standards Act, whichever is greater.

H.R. 1365. January 4, 1977. Post Ofice and Civil Service. Amends the Federal Salary Act of 1967 and the Legislative Reorganization Act of 1946 to specify when an adjustment in the rate of pay for Members of Congress proposed during any Congress shall take effect.

H.R. 1366. January 4, 1977. Banking, Finance and Urban Affairs. Directs the Secretary of Housing and Urban Development to require any lease or rental agreement entered into or renewed by a person aged 62 or over with respect to a dwelling unit assisted by a Federal housing program shall contain provisions entitling such person to terminate, without penalty, the lease or rental agreement if such person or his or her spouse dies or incurs any mental or physical disability during the period of the lease or rental agreement.

H.R. 1367. January 4, 1977. Interior and Insular Affairs. Amends the Outer Continental Shelf Lands Act to require that leases under such Act be issued or transferred only to United States citizens and domestic corporations.

H.R. 1368. January 4, 1977. Judiciary. Requires specified minimum prison sentences for felons using or carrying a firearm during the commission of a felony which may be prosecuted in a Federal court. Subjects such felons to possible increased sentence as dangerous special offenders.

H.R. 1369. January 4, 1977. Veterans' Affairs. Authorizes the Administrator of Veterans' Affairs: (1) to arrange for educational and vocational counseling for eligible veterans; (2) to accelerate the monthly educational assistance allowance of veterans who apply therefor; and (3) to authorize payment for nonaccredited courses which meet certain criteria.

H.R. 1370. January 4, 1977. Veterans' Affairs. Authorizes the Administrator of Veterans' Affairs to pay a supplemental tuition allowance to eligible veterans for their "excess tuition costs" as determined by deducting from the actual or estimated tuition costs for the veteran for that year an amount equal to the national tuition average for that year.

H.R. 1371. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 1372. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals an income tax deduction for 25 percent of the amounts paid to rent their principal residences.

H.R. 1373. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited exclusion from gross income of interest on savings deposits paid or accrued by an individual taxpayer.

H.R. 1374. January 4, 1977. Ways and Means. Amend the Internal Revenue Code to provide: (1) a new limited income tax deduction for loss from theft; (2) a limited income tax deduction for amounts paid for certain anti-theft devices; and (3) unlimited income tax deductions for medical expenses paid for the taxpayer, his spouse or his dependents, and for anyone's funeral expenses, where the expenses are attributable to a death or injury arising from certain crimes.

H.R. 1375. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for the reasonable and necessary expenses incurred when commuting to and from work on mass transportation facilities.

H.R. 1376. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow handicapped individuals who are blind or cannot use mass transportation an income tax deduction for any taxicab fares paid for their transportation.

H.R. 1377. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion for persons aged 65 or over for amounts received as an annuity, pension, or other retirement benefit, and for all persons receiving retirement benefits under a public retirement system.

H.R. 1378. January 4, 1977. Ways and Means. Amends the Internal Revenue Code of 1954 to exempt from the excise tax imposed on the use of civil aircraft, aircraft which are owned and operated by the Civil Air Patrol if such aircraft are used in search and rescue missions by the Patrol.

H.R. 1379. January 4, 1977. Education and Labor; Ways and Means. Authorizes the Secretary of Health, Education, and Welfare to make grants to the States for the equaliza-

tion of public elementary and secondary education within each State.

Amends the Internal Revenue Code to allow an income tax credit for the tuition paid by an individual for the enrollment or attendance of a dependent at a private nonprofit elementary or secondary school.

H.R. 1380. January 4, 1977. Ways and Means. Amends title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 1381. January 4, 1977. Armed Services. Makes it unlawful for any individual or entity to solicit to enroll or enroll any member of the armed forces in any labor organization or for any member of the armed forces to join, or encourage others to join any labor organization. Sets forth penalties for violations of this Act.

H.R. 1382. January 4, 1977. Judiciary. Amends the Hobbs Act to impose penalties for interfering with commerce by willfully causing property damage of at least $2,000 at or near a factory, construction site, or other place where work or business of an employer or owner is carried on or where such employer or owner transports, stores, or maintain property.

Stipulates that a violation of such provision or of the provision prohibiting interference with commerce through robbery, violent acts, or extortion shall not be nullified or mitigated by certain factors.

H.R. 1383. January 4, 1977. Merchant Marine and Fisheries. Amends the Marine Mammal Protection Act of 1972 to prohibit the issuance of permits thereunder which authorize the taking of marine mammals in connection with fishing.

Amends such Act to grant the Secretary of the Interior exclusive jurisdiction over such Act.

H.R. 1384. January 4, 1977. Post Office and Civil Service. Provides, under the Legislative Reorganization Act, that pay adjustments for Members of Congress may take effect no earlier than the beginning of Congress next following the Congress in which they are approved.

H.R. 1385. January 4, 1977. Veterans' Affairs. Provides that recipients of Veterans' pensions and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits.

H.R. 1386. January 4, 1977. Veterans' Affairs. Directs the administrator of Veterans' Affairs to pay a pension to eligible veterans of World War I or to the widows or children of such veterans. Establishes maximum incomes at which point no pension is to be paid.

H.R. 1387. January 4, 1977. Veterans' Affairs. Entitles Veterans of the Mexican border period and of World War I and their widows and children to pensions on the same basis as veterans of the Spanish-American War and their widows and children. Increases the pension rate for all these veterans and their survivors.

H.R. 1388. January 4, 1977. Veterans' Affairs. Directs the Secretary of the Army to establish one or more national cemeteries in the central west coast area of Florida, and to acquire such land as may be necessary for such establishment.

Directs the Administrator of the General Services Administration, upon request, to transfer to the Department of the Army without reimbursement or transfer of funds any Government-owned land in the central west coast of Florida which the Secretary may determine suitable for a national cemetery.

H.R. 1389. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors', and Disability Insurance) of the Social Security Act to increase to $4,800 the amount of outside earnings which is permitted an individual each year without any deduction from benefits.

H.R. 1390. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that any individual who is entitled to a monthly benefit under such title for the month preceding the month in which such eligible individual dies shall be entitled for the month in which he dies to a prorated benefit based upon a specified formula.

H.R. 1391. January 4, 1977. Ways and Means. Amends the Social Security Act to maintain the inpatient hospital deductible under the medicare program at the level which was applicable during calendar year 1976.

H.R. 1392. January 4, 1977. Judiciary. Provides that a certain individual be classified as a child under the Immigration and Nationality Act.

H.R. 1393. January 4, 1977. Judiciary. Authorizes the Secretary of the Treasury to pay a certain individual a specified sum representing the value of personal property abandoned in Vietnam during the evacuation.

H.R. 1394. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay sums of money to certain individuals in full settlement of their claims against the United States.

H.R. 1395. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain corporation in full satisfaction of its claims against the United States.

H.R. 1396. January 4, 1977. Judiciary. Provides that a certain individual is conditionally admitted to the United States for permanent residence.

H.R. 1397. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of his claim for refund of amounts paid by him to the Internal Revenue Service.

H.R. 1398. January 4, 1977. Judiciary. Specifies the tax treatment of a certain corporation under the Internal Revenue Code.

H.R. 1399. January 4, 1977. Judiciary. Provides that certain individuals be classified as children under the Immigration and Nationality Act.

H.R. 1400. January 4, 1977. Judiciary. Provides that a certain individual is classified as a child under the Immigration and Nationality Act.

H.R. 1401. January 4, 1977. Judiciary. Deems a certain individual to have died on his 60th birthday in order to make his widow eligible for an annuity.

H.R. 1402. January 4, 1977. Judiciary. Provides that a certain individual be considered lawfully admitted to the United States for permanent residence.

H.R. 1403. January 4, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to convey the interest of the United States in specified lands in Adams County, Mississippi, to certain citizens.

H.R. 1404. January 4, 1977. Ways and Means. Directs the Secretary of the Treasury to admit, duty free, specified articles for the use of a certain college.

H.R. 1405. January 4, 1977. Judiciary. Provides that a certain individual be considered lawfully admitted to the United States for permanent residence.

H.R. 1406. January 4, 1977. Judiciary. Provides for the classification of a certain individual as a child under the Immigration and Nationality Act.

H.R. 1407. January 4, 1977. Judiciary. Specifies the tax treatment of a certain individual under the Internal Revenue Code.

H.R. 1408. January 4, 1977. Judiciary. Provides that a certain individual is conditionally admitted to the United States for permanent residence.

H.R. 1409. January 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1410. January 4, 1977. Judiciary. Provides that a certain individual be conditionally retained in the United States as a permanent alien resident.

H.R. 1411. January 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1412. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 1413. January 4, 1977. Judiciary. Directs the Secretary of Housing and Urban Development to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 1414. January 4, 1977. Judiciary. Authorizes classification of a certain individual as a widow for purposes of Civil Service retirement.

H.R. 1415. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain college and a certain association in full settlement of their claims against the United States.

H.R. 1416. January 4, 1977. Armed Services. Specifies the rental charge of a certain individual's quarters at the United States Naval Academy.

H.R. 1417. January 4, 1977. Judiciary. Declares certain individuals lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1418. January 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1419. January 4, 1977. Judiciary. Declares certain individuals lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1420. January 4, 1977. Judiciary. Provides that a certain individual be conditionally admitted to the United States for permanent residence.

H.R. 1421. January 4, 1977. Judiciary. Declares certain individuals lawfully admitted to the United States for permanent residence under the Immigration and Nationality Act.

H.R. 1422. January 4, 1977. Judiciary. Provides that a certain individual be conditionally admitted to the United States for permanent residence.

H.R. 1423. January 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1424. January 4, 1977. Judiciary. Authorizes classification of a certain individual as a child for purposes of the Immigration and Nationality Act.

H.R. 1425. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 1426. January 4, 1977. Judiciary. Provides that a certain individual be conditionally admitted to the United States for permanent residence.

H.R. 1427. January 4, 1977. Judiciary. Provides that a certain individual be deemed eligible for a civil service survivor annuity as of August 26, 1969.

H.R. 1428. January 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1429. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 1430. January 4, 1977. Judiciary. Authorizes classification of certain individuals as children for purposes of the Immigration and Nationality Act.

H.R. 1431. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 1432. January 4, 1977. Judiciary. Provides that a certain individual be conditionally admitted to the United States for permanent residence.

H.R. 1433. January 4, 1977. Judiciary. Consents to the employment of a certain retired U.S. Army Officer by a certain corporation owned by the Indonesian Government, in accordance with the Constitution.

H.R. 1434. January 4, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 1435. January 4, 1977. Judiciary. Provides that a certain company is relieved of liability for a certain sum to the United States.

H.R. 1436. January 4, 1977. Judiciary. Relieves a certain individual of all liability to the United States previously imposed for postage on certain mailings.

H.R. 1437. January 4, 1977. Judiciary. Authorizes classification of a certain individual as a child for purposes of the Immigration and Nationality Act.

H.R. 1438. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individuals claims against the United States.

H.R. 1439. January 4, 1977. Judiciary. Directs the Secretary of the Treasury to entertain the claims of a certain individual for replacement, by reason of nonreceipt, of certain Treasury checks.

H.R. 1440. January 4, 1977. Judiciary. Provides that certain individuals be classified as children under the Immigration and Nationality Act.

H.R. 1441. January 4, 1977. Judiciary. Waives the six-year time limit for filing claims with regard to the Correction of Military Records for a certain individual.

H.R. 1442. January 4, 1977. Judiciary Directs the payment of a claim by a member of the United States Air Force for household effects destroyed by fire while being transported at Government expense.

H.R. 1443. January 4, 1977. Judiciary. Provides that a certain individual shall be held lawfully admitted to the United States for permanent residence.

H.R. 1444. January 4, 1977. Judiciary. Provides that a certain individual shall be considered lawfully admitted to the United States for permanent residence.

H.R. 1445. January 4, 1977. Judiciary. Provides that a certain individual be held and considered to have been promoted to captain in the Regular Navy, and to have been retired in that grade.

H.R. 1446. January 4, 1977. Judiciary. Provides that a certain individual is conditionally admitted to the United States for permanent residence.

H.R. 1447. January 4, 1977. Judiciary. Provides that a certain husband and wife may file a claim for credit or refund of any overpayment of Federal income taxes paid for 1965 and 1966.

H.R. 1448. January 4, 1977. Judiciary. Provides that a certain sum will be paid to a particular construction company in full settlement of all claims against the United States arising out of a certain construction contract.

H.R. 1449. January 4, 1977. Judiciary. Provides that a certain individual be considered lawfully admitted to the United States for permanent residence.

H.R. 1450. January 4, 1977. Judiciary. Provides that a certain individual be considered lawfully admitted to the United States for permanent residence.

EXTENSIONS OF REMARKS

IT NEED NOT HAPPEN HERE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. RANGEL. Mr. Speaker, this evening President Carter will present his energy policy before a joint session of Congress. The formulation of a national energy policy is of utmost importance to all Americans. We have built a society based upon a cheap inexhaustible supply of energy and now we must redesign our society and technology to eliminate waste and inefficiency. If we do not change our patterns of conspicuous consumption of energy, we will have to pay dearly. In the short run, our economy will falter due to ever-increasing energy prices, and we will be precipitously vulnerable to an oil embargo, thus severely handicapping our freedom of action in foreign affairs. In the long run, we face a total breakdown of our society as we know it, a return to a preindustrial society, and an unstable world order.

These consequences need not be suffered if we act quickly and prudently to reduce our consumption through a vigorous campaign of energy conservation in order to buy us the time needed to develop environmentally sound alternative sources of energy.

The following is an essay from the April 25 issue of Time magazine by the noted science writer Isaac Asimov. Mr. Asimov paints a grim picture of the world in the year 1997 based on the premise that we failed to heed the warnings of the mid-1970's with respect to the energy shortage. It need not happen if we act now.

The essay follows:

THE NIGHTMARE LIFE WITHOUT FUEL

(Americans are so used to limitless energy supplies that they can hardly imagine what life might be like when the fuel really starts to run out. So Time asked Science Writer Isaac Asimov for his vision of an energy-poor society that might exist at the end of the 20th century. The following portrait, Asimov noted, "need not prove to be accurate. It is a picture of the worst, of waste continuing, of oil running out, of nothing in its place, of world population continuing to rise. But then, that could happen, couldn't it?")

So it's 1997, and it's raining, and you'll have to walk to work again. The subways are crowded, and any given train breaks down one morning out of five. The buses are gone, and on a day like today the bicycles slosh and slide. Besides, you have only a mile and a half to go, and you have boots, raincoat and rain hat. And it's not a very cold rain, so why not?

Lucky you have a job in demolition too. It's steady work. Slow and dirty, but steady. The fading structures of a decaying city are the great mineral mines and hardware shops of the nation. Break them down and re-use the parts. Coal is too difficult to dig up and transport to give us energy in the amounts we need, nuclear fission is judged to be too dangerous, the technical breakthrough toward nuclear fusion that we hoped for never took place, and solar batteries are too expensive to main on the earth's surface in sufficient quantity.

Anyone older than ten can remember automobiles. They dwindled. At first the price of gasoline climbed—way up. Finally only the well-to-do drove, and that was too clear an indication that they were filthy rich, so any automobile that dared show itself on a city street was overturned and burned. Rationing was introduced to "equalize sacrifice," but every three months the ration was reduced. The cars just vanished and became part of the metal resource.

There are many advantages, if you want to look for them. Our 1997 newspapers continually point them out. The air is cleaner and there seem to be fewer colds. Against most predictions, the crime rate has dropped. With the police car too expensive (and too easy a target), policemen are back on their beats. More important, the streets are full. Legs are king in the cities of 1997, and people walk everywhere far into the night. Even the parks are full, and there is mutual protection in crowds.

If the weather isn't too cold, people sit out front. If it is hot, the open air is the only air conditioning they get. And at least the street lights still burn. Indoors, electricity is scarce, and few people can afford to keep lights burning after supper.

As for the winter—well, it is inconvenient to be cold, with most of what furnace fuel is allowed hoarded for the dawn; but sweaters are popular indoor wear and showers are not an everyday luxury. Lukewarm sponge baths will do, and if the air is not always very fragrant in the human vicinity, the automobile fumes are gone.

There is some consolation in the city that it is worse in the suburbs. The suburbs were born with the auto, lived with the auto, and are dying with the auto. One way out for the suburbanities is to form associations that assign turns to the procurement and distribution of food. Pushcarts creak from house to house along the posh suburban roads, and every bad snowstorm is a disaster. It isn't easy to hoard enough food to last till the roads are open. There is not much in the way of refrigeration except for the snowbanks, and then the dogs must be fought off.

What energy is left cannot be directed into personal comfort. The nation must survive until new energy sources are found, so it is the railroads and subways that are receiving major attention. The railroads must move the coal that is the immediate hope, and the subways can best move the people.

And then, of course, energy must be conserved for agriculture. The great car factories make trucks and farm machinery almost exclusively. We can huddle together when there is a lack of warmth, fan ourselves should there be no cooling breezes, sleep or make love at such times as there is a lack of light—but nothing will for long ameliorate a lack of food. The American population isn't going up much any more, but the food supply must be kept high even though the prices and difficulty of distribution force each American to eat less. Food is needed

for export so that we can pay for some trickle of oil and for other resources.

The rest of the world, of course, is not as lucky as we are. Some cynics say that it is the knowledge of this that helps keeps America from despair. They're starving out there, because earth's population has continued to go up. The population on earth is 5.5 billion, and outside the United States and Europe, not more than one in five has enough to eat at any given time.

All the statistics point to a rapidly declining rate of population increase, but that is coming about chiefly through a high infant mortality; the first and most helpless victims of starvation are babies, after their mothers have gone dry. A strong current of American opinion; as reflected in the newspapers (some of which still produce their daily eight pages of bad news), holds that it is just as well. It serves to reduce the population, doesn't it?

Others point out that it's more than just starvation. There are those who manage to survive on barely enough to keep the body working, and that proves to be not enough for the brain. It is estimated that there are now nearly 2 billion people in the world who are alive but who are permanently braindamaged by undernutrition, and the number is growing year by year. It has already occurred to some that it would be "realistic" to wipe them out quietly and rid the earth of an encumbering menace. The American newspapers of 1997 do not report that this is actually being done anywhere, but some travelers bring back horror tales.

At least the armies are gone—no one can afford to keep those expensive, energy-gobbling monstrosities. Some soldiers in uniform and with rifles are present in almost every still functioning nation, but only the United States and the Soviet Union can maintain a few tanks, planes and ships—which they dare not move for fear of biting into limited fuel reserves.

Energy continues to decline, and machines must be replaced by human muscle and beasts of burden. People are working longer hours and there is less leisure; but then, with electric lighting restricted, television for only three hours a night, movies three evenings a week, new books few and printed in small editions, what is there to do with leisure? Work, sleep and eating are the great trinity of 1997, and only the first two are guaranteed.

Where will it end? It must end in a return to the days before 1800, to the days before the fossil fuels powered a vast machine industry and technology. It must end in subsistence farming and in a world population reduced by starvation, disease and violence to less than a billion.

And what can we do to prevent all this now?

Now? Almost nothing.

If we had started 20 years ago, that might have been another matter. If we had only started 50 years ago, it would have been easy.

ADVICE FROM A CONSTITUENT

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. JACOBS. Mr. Speaker, what follows is sage advice from a constituent:

Come home often enough to keep your head on straight but stay up in Washington long enough to keep me from losing mine . . . along with what little savings I've got left in the bank after Congress bought so many things for me that I didn't want!

DWAYNE LAWS.

INDIANAPOLIS, IND.

EXCESSIVE GOVERNMENT REGULATION

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mrs. HOLT. Mr. Speaker, excessive Government regulation is of concern to me, as it ought to be of everyone in this country. For this reason, I am asking that a letter I have received from a constituent be inserted in the RECORD. I believe my colleagues will be interested in why a million dollar business is going out of operation:

APRIL 1, 1977.

HON. MARJORIE S. HOLT,
Longworth House Office Building,
Washington, D.C.

MY DEAR MRS. HOLT: I have been a resident of Anne Arundel county since 1964 when I was transferred to duty in Washington by the Navy. In 1969 I resigned from the Naval Service and formed a deep sea diving firm that over the years has employed up to 40 divers with gross revenues that have averaged around $1,000,000 per annum.

* * * * *

It is with regret that I now inform you that this firm is being dissolved and that my family and I are moving from the State of Maryland.

* * * * *

Of primary importance are three areas: (1) OSHA and its effects on future overhead, (2) Insurability has already been affected as a result of pending OSHA regulations of the diving industry, and (3) the recent voiding of the East Coast Offshore Petroleum leases.

Recall our correspondence in the spring of 1976 concerning OSHA's attempt to place Emergency Temporary Standards (E.T.S.) on the diving industry. Since that time the E.T.S. has been stayed by the U.S. Fifth Circut Court of Appeals. OSHA has proceeded to develop permanent standards which will be published sometime in the near future. I have enclosed a copy of the history of OSHA's actions in regards to the diving industry, and I strongly urge you to read this report.

The proposed standard will cause otherwise unnecessary expenses to add equipment, personnel, and administrative burdens beyond the means of the average small diving contractors. At the present time some diving equipment manufacturers are requiring letters of indemnification from diving contractors prior to shipment of life support equipment.

The insurability of my company, which has had an exemplary safety record, has also been affected by this proposed legislation. Assigned risk workman's compensation coverage is inadequate for diving contractors due to the need for coverage against claims under the Longshoreman's and Harbor Worker's Act and the Jones Act. In December of 1976, my insurance carrier elected not to renew our policies. After extensive inquiries, I was able to obtain quotes for coverage from the London market only. The stipulation for this coverage however, was a requirement for a deposit premium of $190,000 versus $37,000 quoted in 1974. Such a sum is not available to firms of our size. Although I can not document the fact, discussions with insurance representatives indicate that OSHA's forthcoming involvement in the diving industry has had an effect on various underwriter's decisions to no longer insure in this industry.

As a result of minimum Federal expenditures in the public works domain over the past three years, value of business in the marine construction field has been low. We had, therefore, expended a large effort at obtaining future work from the offshore petroleum industry.

The recent cancellation of the East Coast Offshore Lease Sale became the "last straw" in my efforts to continue operating a business in this climate of government regulations, red tape and indecision.

* * * * *

Sincerely yours,

HARTER UNDERWATER CORP.
JOHN V. HARTER,
President and Treasurer.

ATTACHMENT NO. 1

In the early 1970's OSHA conducted a study into the necessity of regulating the safety and health of commercial diving. Testimony before several hearings convinced them that the industry was not in need of regulation, and further, that no agency in government, especially OSHA, possessed the necessary expertise to write such regulations.

One argument was, and partially is now, that up to their involvement in diving, OSHA has never attempted to regulate all facets of an entire industry. Rather they had (wisely so) only dealt with particular, specific hazards which cross many industrial/work place activities (e.g., ladders, guardrails, electrical equipment, etc.) With the commercial diving industry, however, an attempt was being studied on regulating everything: training, medical exams (including specific physical tests), tools, systems, decompression techniques, operational modes and conduct, etc.

Their present attempt, which began in November, 1975, is just such an effort. At that time, acting in response to a petition filed by the United Brotherhood of Carpenters and Joiners (AFL-CIO), OSHA held a two-day hearing in Washington to assess the situation. Based on testimony at that hearing, OSHA determined that divers were "in immediate peril" and in need of regulation. Suspending the normal rule-making procedure specified under the OSHA Act, the agency issued on June 15, 1976, an "Emergency Temporary Standard" which was to go into effect on July 15, 1976—30 days later.

The Association of Diving Contractors had, since November of 1975, been attempting to discuss with OSHA any Standard they planned to issue. Each and every attempt was ignored by OSHA. The only time the industry ever got near to the planned document was when ——— the OSHA standards officer, met with several ADC members to discuss the proposed document in the spring of 1976 [but] refused to let the industry representatives see the actual draft or even read the wording. Instead he agreed to summarize OSHA's position.

As a result of this attitude of OSHA coupled with the content of the E.T.S., the ADC filed before the U.S. Fifth Circuit Court of Appeals for a Stay Order. Two days before the E.T.S. was to go into effect, on July 13, 1976, the Court granted the ADC request and issued a Temporary Stay Order against the implementation of the E.T.S. This was followed in August, 1976, by the Court's issuance of a permanent order pending a decision on the merits of the case. At this time the Court added "we conclude that the appellant's (ADC) chances of prevailing on the merits are good."

The ADC based their successful court challenge on the fact that the E.T.S. was a technically unsound, unworkable document, that such regulation would have a serious

adverse effect on the industry, that the Secretary (of Labor) had exceeded his authority and that "no emergency existed."

Because the OSHA Act requires the agency to issue a Permanent Standard within six months of issuance of an E.T.S., OSHA began the normal rule-making procedure in August, 1976. The ADC argued that since the E.T.S. had been stayed by the Court, no such urgent timetable existed, and that OSHA instead should begin finally to sit down with all interested parties to discuss the need and substance of any regulation. OSHA insisted, however, that the six-month deadline still applied, and that because of this they had to move rapidly.

OSHA began their efforts by conducting a hearing before the Advisory Committee on Construction Safety and Health on 9–10 August 1976 in Washington, D.C. The ADC had a delegation present at this meeting. We challenged the fact that OSHA was asking this Committee to discuss and approve a document (the E.T.S.) which had been stayed by the court, with virtually no chance of success on the merits. The OSHA solicitor stated that it was OSHA's intention to use the E.T.S. as a base from which to arrive at a later Permanent Standard. After one full day of discussion, the Advisory Committee agreed that they were unable to render a decision and requested that OSHA provide them a more definitive document at a later date. OSHA agreed and the Committee set another hearing for 26–27 August 1976. The ADC was provided an advance copy of the new draft proposal and generated a written submission for the Committee to supplement their physical testimony. As a result of the ADC input, the Committtee recommended over fifty substantive changes in the OSHA document, some of which OSHA ultimately ignored.

On November 5, 1976, OSHA published in the Federal Register "Proposed Permanent Standards for Commercial Diving Operations" At the same time and in the same issue of the Federal Register, they formally withdrew the E.T.S. This latter act surprised the ADC legal counsel, as only shortly before, OSHA had made a routine submission to the Court indicating a continued desire to try the case on the merits. It was apparent that OSHA withdrew the E.T.S. because they were unable to meet the six-month deadline for a Permanent Standard as laid down by the Act. We were then faced with the complicated issue of a Proposed Permanent Standard based by law on the E.T.S., which was simultaneously withdrawn, thus removing the urgent timetable.

Further, since the Court had already ruled that the E.T.S. would probably not stand on the merits for the reasons stated in the ADC petition, we could see no technical or other merit in having the new document using the E.T.S. as a base. OSHA has never commented on this point of argument. Upon publishing the November 5, 1976, Proposed Standard, OSHA also set dates for formal public hearings to be held in New Orleans in December, 1976, and January, 1977.

The ADC provided over thirty witnesses who testified at these hearings. These people consisted of scientists, doctors, insurance and legal experts, management, diving supervisors and divers themselves. Also appearing at the invitation of the ADC, but testifying as a "neutral" was Commander S. A. "Jackie" Warner of the United Kingdom Department of Energy, the man responsible for the diving regulatory effort in that country. In addition to these people, even OSHA-sponsored witnesses testified to the fact that OSHA had done a poor job of standard writing, both from a philosophical and practical point of view.

The formal record pertaining to OSHA's effort on diving regulations closed on February 28, 1977, resulting in a stack of paper over five feet high, spanning almost two years of involvement.

Under Section 6(b)(4) of the OSHA Act, the agency is required to publish a standard within six months of the close of the record. We have been informed by sources in OSHA that publication will not take place for "many months yet."

Finally, in conjunction with the issuance of the November 5 document, OSHA also issued an Inflationary Impact Assessment prepared by the Agency with information obtained in a survey conducted by Arthur Young and Company. Perhaps the most damaging (to OSHA's case) testimony that the ADC presented at the public hearings was a critique of this assessment. The ADC critique was prepared by Professor Arnold Levine of Tulane University of New Orleans and Virginia Simons, an economist from the New Orleans area. * * *

The President's Council on Wage and Price Stability also issued a report severely criticizing OSHA's efforts at diver safety.

Several outstanding issues have been raised as a result of OSHA's continuing effort:

1. OSHA has never conducted a study as to diving accidents and their causes. Thus, there is no proof that their regulations will save lives. The only such study which exists has been conducted by the U.K. Department of Energy, and their findings are in direct conflict with the OSHA legislative mandate.

2. This is OSHA's first attempt at regulating an entire industry. Diving in particular is a unique industry in the OSHA frame of operations. This is because while the diver is exposed to the greatest hazards, when he is underwater, he is outside of the direct control of the employer. Even if he could be seen and found to be acting in an unsafe manner, he could not be recalled to the surface immediately because of possible decompression problems.

3. The Federal courts have ruled (562 F2 1213) that in Jones Act liability litigation the simple act of receiving an OSHA citation may be interpreted as negligence on the part of an employer. This fact may make our industry uninsurable.

5. In OSHA's Inflationary Impact Assessment, the Agency made the startling statement that "it is expected that a number of small firms may be forced to go out of business" as a result of the Standards. They have never withdrawn and appear willing to accept such a statement.

TRIBUTE TO MR. FLORINDO PICCININI, A LEADER IN THE ITALIAN-AMERICAN COMMUNITY

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. HYDE. Mr. Speaker, perhaps the single most important quality which makes our country so distinct from all others is its unique ethnic composition. I feel particularly fortunate to represent a congressional district which possesses a very diverse ethnic constituency. And I am proud that the ethnic groups in my district have tried to preserve much of the culture and traditions of their homeland. It is not only good for them and for their descendants, but it is a wonderful opportunity for all of us to learn about the customs and traditions of all countries.

I would like to pay tribute today to one of my constituents from Cicero, Ill., who understands perhaps more than many of us, the importance of preserving the heritage of his homeland.

Mr. Florindo Piccinini emigrated from Italy to the United States in 1920. Soon after he arrived in Cicero he helped organize and charter the Unione Operaia Di Mi A, a social club for the Italian community in my district.

Mr. Piccinini was elected president of this organization in 1930 and has been reelected every year for the past 47 years. The membership of Unione Operaia Di Mi A is now over 500 strong and includes a ladies' auxiliary. Its headquarters, located at 5116 W. 14th Street in Cicero, is open daily so that the membership can socialize and discuss community issues.

The club's many varied activities which includes dinners and dances, gives its members and many of its non-Italian friends, the opportunity to learn more about the Italian people and their heritage and customs.

Social clubs of this type are an important thread in the fabric of our American way of life, and we are most fortunate to have in our country the best of many worlds.

I congratulate Mr. Piccinini for his many contributions to the Italian-American community of Cicero, Ill., and pay tribute to him for his many years of service to the Unione Operaia Di Mi A.

YESHIVA UNIVERSITY HONORS PHILADELPHIA COMMUNITY LEADERS

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. LEDERER. Mr. Speaker and my fellow colleagues of the House, I wish to commend to your attention a tribute to eight dedicated community leaders of my hometown, Philadelphia.

On Sunday, April 24, 1977, the Yeshiva University will present its National Scholarship Program Awards to eight Philadelphians. These awards are in recognition of the outstanding leadership of these people in the fields of education, humanitarianism, and communal causes. At a time when our country faces many problems and needs leadership and dedication on all fronts, I think it only fitting that we take this time in the Congress today to pay tribute to these exemplary community leaders.

The National Scholarship Program Awards will be presented to:

Morton L. Amon of Congregation Beth El Suburban.

Morton Diamond of Congregation Ner Zedek-Ezrath Israel.

Edward Fishman and Jack Persky of Congregation Beth Tifilath Israel of Pennypack Park.

Kalman Silver of Congregation Sons of Israel.

Joseph Yondorf of Congregation Shaare Shanayim GNJC.

Thelma Berman and Morton Mozenter of Congregation Beth Chaim.

The awards will be presented by Dean Jacob Rabinowitz of Yeshiva University at a testimonial brunch to be held at Temple Beth Tifilath Israel of Pennypack Park in Philadelphia. This annual

testimonial is sponsored by the Greater Philadelphia Friends of Yeshiva University made up of over 100 rabbis and other alumni of the Yeshiva who now live in the Philadelphia area.

The award recipients were selected by their respective congregations and their rabbis who attended the Yeshiva—Rabbis Samuel Wohlgelernter, David M. Wachtfogel, Charles Lacks, Bernard Rothman, Arnold Feldman, and Maurice E. Novoseller. Their congregations will make donations in honor of the recipients to the Yeshiva University Scholarship Fund. In this way, needy students will be better able to continue their studies at that fine university.

The dedication of these eight Philadelphians serves as a guiding light to all Americans. More importantly, it will serve as an inspiration to the students, the leaders of tomorrow, who will benefit from their dedicated work.

THE 50TH ANNIVERSARY OF MSGR. JOHN POWERS' ORDINATION

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. MOAKLEY. Mr. Speaker, I would like to take this opportunity to commemorate the 50th anniversary of Msgr. John Powers' ordination into the priesthood. The monsignor has long been an invaluable citizen of the city of Boston, and it is only fitting that we recall his years of public service on this anniversary.

Monsignor Powers, born in Lowell, Mass., the son of John and Catherine Powers, was first ordained into the priesthood by the late Cardinal William O'Connell, at the Cathedral of Holy Cross in 1927. This ceremony, 50 years ago, marked the beginning of a long and honorable career of service to the citizens of Boston and the Commonwealth of Massachusetts.

The monsignor's career is filled with charitable deeds known to many thousands of Bostonians.

He began his life of devoted service as curate for St. Joseph's Church in the west end of Boston. He then served as pastor of St. Agnes' Church in Middleton and St. Vincent's Church in South Boston.

His next assignment was to be pastor of the Chapel of Our Lady of Good Voyage on the waterfront of Boston. Here, Monsignor Powers became known as the "Waterfront Priest." Those were rough years, filled with difficult work. There were numerous troubles on the waterfront, with many confrontations between the unions and the waterfront businesses. Monsignor Powers was chosen to mediate the disputes. He labored over difficult decisions, arbitrating to the best of his ability. In time, he became the official arbiter for the Boston Shipping Association and for the International Longshoreman's Association.

The monsignor also continued in his efforts to provide the most troubled of his parishioners with strong spiritual guidance. He became the chaplain of the Charles Street Jail, of the Boston Juvenile Court, and of Boston's Port Authority. On March 13, 1956, John Powers was elevated to the rank of domestic prelate.

Monsignor Powers continues his influence in Boston today. His fame as the waterfront priest is legend. More importantly, his reputation as arbiter over difficult situations was severely tested and sustained during Boston's periods of racial tension in which he worked diligently for harmony in our torn community.

I am personally indebted to Monsignor Powers for his years of service to the citizens of Boston. His work is to be commended, and his integrity saluted. I place his accomplishments and our gratitude before my colleagues in the U.S. Congress, because we need more citizen participation of the quality displayed by Msgr. John Powers.

Fifty years is too long a time before receiving public recognition and thanks for the work he has done for our community. I only hope that monsignor can continue his fine record of public service and devotion to God for years to come.

EXPORTS AND THE ARAB BOYCOTT

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. BLANCHARD. Mr. Speaker, I am pleased to be able to cast my vote today in favor of legislation to strengthen the antiboycott provisions of the Export Administration Act.

Although I, like many other Members of this body, would have supported even stronger language, I believe H.R. 5840, the Export Adminstration Act amendments, will do much to put into practice, in our dealings with Arab countries, the high ideals which have characterized our country's foreign policy at its best.

It was those ideals which I sought to express in my own antiboycott amendment to the International Banking Act last year, which was accepted in the House but, because of inaction by the Senate, failed to become law.

The provisions of H.R. 5840 which bar domestic companies from discriminating in employment or otherwise against any American on the basis of race, religion, sex, or national origin and also from participating in many other boycott-related activities are long overdue, and I welcome them.

The record of Congress and the previous administration in this area following disclosures of the severity of the boycott in February of 1975 was, charitably stated, unfortunate.

It has been a record filled with misleading statements and remarkable events—the most remarkable no doubt being the recommendation of a contempt citation by a House subcommittee against the then Secretary of Commerce—and I sincerely hope that we can now put it behind us.

American technology remains the finest in the world today, and it will always be in demand wherever there is a market for quality products. We should not, and do not, have to compromise the principles we stand for, and humiliate ourselves, to sell our goods overseas.

I hope that the House will stand firm on this matter, so that the antiboycott language which is finally written into law will be a clear statement to all who may have had reason over the last 2 years to question our conviction.

DEL CLAWSON LEAVING CONGRESS

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. MOORHEAD of California. Mr. Speaker, over this last weekend one of the most respected Members of the House of Representatives announced that he would not be a candidate for reelection in 1978. The Southeast News published in Los Angeles County, Calif., carried an article commending DEL CLAWSON for his many years of exemplary service to the people of the district and the Nation. A copy of that article follows:

DEL CLAWSON LEAVING CONGRESS WITH HIS HEAD HIGH

(By Bill Godfrey)

Del Clawson has served the Southeast area faithfully for the past 14 years in Congress. He plans to step down at the completion of his present term next year.

It is typical of Clawson that he would make his announcement early in his last term in order for his party to lay plans for an effective campaign in 1978. He has always been a "party man", working within the party organization to get things done.

Clawson beat a strong Democratic contender for the seat made vacant in the old 23rd Congressional District when Clyde Doyle died. His victory was considered such an upset that it made headlines across the country. The area had been—and still is—a Democratic stronghold.

But Del's low-key approach to politics made him many long-lasting friends among both Republicans and Democrats.

After Reapportionment cut away much of his traditional voting strength in 1973, removing all but the city of Downey in his old district, Clawson took the changes in stride. He won new friends and new supporters to put him back in office twice more with relative ease.

It is also typical of him that he didn't forget his friends just because the courts changed the boundary lines of his district. He was as much in demand as a luncheon and dinner speaker as ever, even though many of his audiences couldn't vote for him.

Although not involved in the scandals that wracked Congress in recent years, Clawson nonetheless was affected by them. He spoke on several occasions of his concern for the moral problems facing Congress.

His honesty and integrity captured the attention of the leadership of the Republican

Party when he first was put on the powerful Rules Committee, and then more recently was made a member of the Republican Policy Committee.

Del will be around for the remainder of this year and next. After that here's hoping he receives a well-deserved rest.

VETERANS' BENEFITS

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. HILLIS. Mr. Speaker, I am today introducing a measure which is designed to deny veterans' benefits to those Vietnam-era veterans who receive an upgraded discharge under the administration's special discharge review program implemented April 5, 1977. According to the Defense Department, during the first week of this program over 10,000 veterans applied to have their discharges upgraded. If this rate continues, 240,000—or half of those eligible—will have applied for an upgraded discharge by the time the program is due to terminate October 5, 1977. The budgetary impact on the Veterans' Administration could be well over $100 million. Although this is reason enough for Congress to deny these veterans entitlement to VA benefits, it is not the only reason, nor is it the most important reason.

Throughout the history of our Nation we have paid honor to those who served in our Armed Forces. While past Presidents have at times seen fit to grant amnesty to those who refused military duty, never before have they been entitled to receive veterans' benefits. This country has in the past forgiven those who refused military duty. However, it has always kept a sharp distinction between those who served honorably and those who failed, or refused to serve honorably. There are a number of people who believe that the Vietnam veteran who deserted, or the young man who evaded the draft illegally, did so out of moral commitments against the war and therefore should be respected. I cannot agree. Let there be no mistake about it—our best men are the ones who responded to their country's request for military duty. We must continue to recognize this fact. That is the underlying reason why Congress must enact legislation as soon as possible to insure that veterans who receive an upgraded discharge do not get even $1 in VA benefits.

On April 6, I joined with Congressman JOHN PAUL HAMMERSCHMIDT and 16 other cosponsors in introducing a measure identical in intent to the bill I am introducing today. Since that time, I have received support from constituents, newspapers, and local veterans' organizations in my district. Grassroots support for denying VA benefits to those veterans who received undeserved and unearned upgraded discharges is growing. This support from different sectors of our society is due to the belief that any individual who opposes a law should use every legitimate peaceful means at his disposal to change that law, and if those efforts are unsuccessful, be prepared to obey the law or face the consequences. If we do not abide by this basic principle, we undermine the nature of our judicial system.

President Carter made a mistake in approving the Department of Defense's special discharge review program. Congress will be making a greater mistake in allowing his decision to stand unchallenged.

JUDGE HJALMAR ANDERSON: IN THE GREAT TRADITION OF PUBLIC SERVICE

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. SARASIN. Mr. Speaker, on April 30 the people of the town of Redding, Conn., will gather to pay tribute to an outstanding individual who has devoted almost four decades to public service to his community and State. Judge Hjalmar Anderson is a truly remarkable man who has earned the respect and admiration of all who know him and I wish to bring his record of long and devoted service to the attention of my colleagues in the House of Representatives.

Judge Anderson is being honored at a testimonial in recognition of his 34 years as Republican Town Committee Chairman in Redding and his 37 years as judge of probate for the town of Redding, among other distinctions, but also for epitomizing the very best in the great tradition of public service.

A lifetime resident of the local area, son of Swedish-born parents who settled in the Georgetown, Conn., area, Hjalmar Anderson also represents success in the time-honored American mold. Educated in local schools through high school, and with 2 years training in commercial law, Judge Anderson entered public life in 1938 when he ran for judge of probate and local representative to the Connecticut General Assembly, winning both. Four years later, Judge Anderson took over leadership of the Redding Republican Town Committee.

Thus was laid the foundation for a remarkable career that continues to this day with the judge's continuing service as a justice of the peace. Some aspects of that career bear noting:

Mr. Anderson served continuously as Redding judge of probate for 36 years until reaching the mandatory retirement age of 70 in 1974. This is a position of great importance and sensitivity in small New England towns, dealing as it does with people's wills and the disposition of property, the guardianship of children, and the protection of the mentally incapacitated. Yet with meager formal legal training, Judge Anderson presided for 36 years and never had a decision reversed.

The judge also served as leader and spokesman for the Republican Party in Redding for 34 years until stepping down in 1975. Politics can cause ill feelings and successful political leaders frequently make enemies, yet Hjalmar Anderson is looked upon with almost universal respect and affection by all who know him. His political acumen and steadying hand were recognized on a wider basis, and he was elected for two terms as chairman of the Fairfield County Republican Organization.

Over these years he also served in the State legislature, on the town board of selectmen, as moderator of the town meeting, member of the board of education and of the board of tax review. In addition he devoted hours of service to community and charitable affairs, conducted a successful real estate business, and became an acknowledged expert on antiques.

A remarkable man and a remarkable career, fully deserving of the high praise and accolades in which I am proud to join.

GENERAL TOFTOY'S DEFENSE CONTRIBUTIONS RECALLED

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. FLIPPO. Mr. Speaker, although it has been 10 years today since the death of Maj. Gen. Holger N. Toftoy, former commanding general of Redstone Arsenal in Huntsville, Ala., the memory of him is still keen in the minds of Americans who recognize his accomplishments in the development of our Nation's guided missile system.

Fifth District Alabamians feel a particular fondness for General Toftoy. He believed in us—in the potential of north Alabama as a breeding ground for remarkable strides in our Nation's space program. The technical and administrative ability he displayed in the space effort in north Alabama is exemplary.

Known as the father of the Army's guided missile system, his foresight and ensuing achievements abide yet in the annals of scientific history, particularly his significant role in the development of the famous Redstone missile.

Another reason General Toftoy will long be remembered even when an additional 10 years have elapsed is his prominent part in the recruitment of the German rocket scientists following World War II. Their technical knowledge combined with his own abilities did so much to foster the success of the United States in the missile field.

General Toftoy commandeered the launching of the first U.S. rocket flight while he was chief of the Rocket Branch of the Research and Development Division of the Ordnance Corps. Later he served as Director of the Ordnance Missile Laboratory at Huntsville and then was commanding general of Redstone Arsenal from 1954 to 1958. Until his retirement in 1960 he served as commanding general of the Aberdeen Proving Ground in Maryland.

It is a distinct honor for me to highlight General Toftoy's achievements to-

day and recognize him as a truly great American. For the fruits of his labors, this country will forever remain indebted to him.

A SPECIAL INSTITUTE FOR THE AGING

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. WIRTH. Mr. Speaker, the values, virtues, and special problems associated with age and aging are beginning to get considerable attention in Congress, the press, and health and social circles.

In Denver, there is a special effort being made to devote energy, expertise, and experience to the study of aging. The Davis Institute for the Care and Study of Aging, currently nearing completion, has begun this effort.

Unlike the usual nursing home facility, the Davis Institute is being specially designed to help patients regain self-sufficiency, while engaging in a therapeutic program. The concept of integration rather than isolation of the aged holds a lot of promise. I would like to share with my colleagues the following article about the Davis Institute:

DAVIS INSTITUTE FOR THE CARE AND STUDY OF AGING

All but unnoticed, a complex of two handsome red brick buildings is being built and completed on the grounds of Denver General Hospital.

The official name of the facility is The Davis Institute for the Care and Study of the Aging.

Unofficially, it marks the first concentrated effort to set up an innovative program for treating the problems of aging and to study means of preventing or forestalling the onset of those problems.

The physical plant plays a major role in the proposed programs.

It will serve in-patients and out-patients.

"The reason for the in-patient facility," Dr. Eric Pfiffer, director of the facility, said, "is to handle people with more than one problem—to study them thoroughly and to observe them with an eye to increasing function."

There is a second reason—to provide rehabilitation.

"Self-care is critical," Pfiffer commented.

Unlike the usual nursing home accommodations, each living unit within the Davis Institute has been designed to help the patients regain self-sufficiency and to support a therapeutic program planned to help them live outside an institution.

According to the director, an example of the many kinds of patients who could be admitted to the in-patient facilities is an elderly person who has been living in a nursing home and would like to move to private quarters. He or she would be assigned to a double room.

Another type might be a couple who would be assigned a suite after either the husband or the wife has suffered a stroke. There, with the professional staff and perhaps the assistance of a son or a daughter, the couple would learn to handle the problems the changed status imposes. The couple would be there as long as necessary to build confidence within themselves and to learn the ways of compensating for handicaps.

The 70-bed hospital unit will be made up of double rooms and one- and two-bedroom units all with private baths especially equipped for the elderly.

The entire effect will be homelike.

In walking through the still uncompleted facility, the unit rooms look surprisingly small. There is a reason for it.

Patients will be, as part of the therapy, urged to socialize—to share with others rather than to withdraw within themselves.

"For that reason televisions in the units or rooms will be discouraged," Pfiffer said, "in favor of having people gather in the lounges to share programs."

Lounges have been designed to accommodate the almost life-size screens of large TV sets and to provide the stimulus for interaction among in-patients.

It would have been simpler to deliver meals to individual rooms and units, but Pfiffer and his staff believe it is important to create social occasions for people who often withdraw from contacts.

According to Dr. Abraham Kauvar, the facility will confine itself to those who can be rehabilitated.

"We will have to work with those people with the capacity of coming back," he said. "For someone with the problems of aging and cancer there is nothing we can offer them. If, however, they have arthritis we could work with them."

The entire purpose of the program as presently conceived is to prevent or slow down the onslaught of the mental and physical problems of aging and to equip those already afflicted with the tools for self-care. In the process, the staff hopes to learn valuable information for the future.

The Davis Institute plans to open Aug. 1.

USE THE EQUAL OPPORTUNITY TO COMBAT REDLINING

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROSENTHAL. Mr. Speaker, I want to urge consumer, civil rights, and housing groups around the country not to overlook the antidiscrimination provisions of the new Federal Equal Credit Opportunity Act in their fight against "redlining."

Some mortgage lenders systematically exclude certain neighborhoods and geographic areas from mortgage investment without considering the creditworthiness of individual applicants. This kind of credit discrimination has become known as "redlining" and is unquestionably the single greatest threat to neighborhood preservation and urban development. "Redlining" is generally thought of as credit discrimination on the basis of geography. However, why one locality and not another? The answer is simple: At the bottom of every documented instance of "redlining" is some sort of racial, ethnic or age discrimination.

The new Equal Credit Opportunity Act strictly forbids loan discrimination, and makes it easy for borrowers to sue mortgage lenders to halt "redlining" practices.

The new law went into effect on March 23, 1977, and prohibits loan discrimination on the basis of sex, marital status, race, color, religion, national origin, age, receipt of income from public assistance programs, and a borrower's efforts to exercise Consumer Protection Act rights. The law also requires lenders to tell a borrower why they were turned down for a loan, to keep detailed records for 25 months on all loan applications, and to maintain financial records under both names of married couples.

If borrowers want further information about how to use the Equal Credit Opportunity Act to combat loan discrimination, they should contact: Office of Saver and Consumer Affairs, Board of Governnors of the Federal Reserve System, Washington, D.C. 20551.

The following list indicates which Federal agency enforces the Equal Credit Opportunity Act for a particular kind of lender:

For Information About the Lending Practices Of:

National Banks: Contact Comptroller of the Currency Consumer Affairs Division, Washington, D.C. 20219.

State Member Bank: Contract Federal Reserve Bank serving the area in which the State member bank is located.

Nonmember Insured Banks: Contact Federal Deposit Insurance Corporation Regional Director for the Region in which the nonmember bank is located.

Savings Institutions Insured by the FSLIC and Members of the FHLB System (except for Savings banks insured by FDIC): Contact The FHLBB's Supervisory Agent in the Federal Home Loan Bank District in which the institution is located.

Federal Credit Unions: Contact Regional Office of the National Credit Union Administration serving the area in which the Federal Credit Union is located.

Creditors Subject to Civil Aeronautics Board: Contact Director, Bureau of Enforcement Civil Aeronautics Board, 1825 Connecticut Avenue, N. W., Washington, D.C. 20428.

Creditors Subject to Interstate Commerce Commission: Contact Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20523.

Creditors Subject to Packers and Stockyards Act: Contact Nearest Packers and Stockyards Administration area supervisor.

Small Business Investment Companies: Contact U. S. Small Business Administration, 1441 L Street, N. W., Washington, D.C. 20416.

Brokers and Dealers: Contact Securities and Exchange Commission, Washington, D.C. 20549.

Federal Land Banks, Federal Land Bank Associations, Federal Intermediate Credit Banks and Production Credit Associations: Contact Farm Credit Administration, 490 L'Enfant Plaza, S.W., Washington, D.C. 20578.

Retail, Department Stores, Consumer Finance Companies, All other Creditors, and All Nonbank Credit Card Issuers (Lenders operating on a local or regional basis should use the address of the F.T.C. Regional Office in which they operate): Contact Federal Trade Commission Equal Opportunity, Washington, D.C. 20580.

IN RECOGNITION OF MR. RICARDO ZAZUETA

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROYBAL. Mr. Speaker, today I would like to bring to my colleagues' attention the recognition given by the U.S. Civil Service Commission to Mr. Ricardo Zazueta, National Director of SER-Jobs for Progress, Inc. Not only is Mr. Zazueta

one of the two individuals given this special award this year, but he is also the first Hispanic American to receive such an honor.

The special citation presented to Ricardo Zazueta from the Commission reads as follows:

For developing a closer relationship between Hispanic groups and Federal agencies; for increasing managers' awareness of their EEO responsibilities; and for strengthening the Commission's field leadership in advancing the Spanish-speaking program. Participating in most of the ten field conferences held to date, he has played a vital role in articulating to Federal managers the employment concerns of Hispanic Americans.

SER has done a commendable job in the area of training and development of Hispanic Americans for the past decade in more than 60 cities throughout the country. The efforts of Mr. Zazueta and the SER network should be commended for the effective services they are providing to the Spanish speaking in order to alleviate the drastic problem of unemployment.

RULES AND PROCEDURES OF SELECT COMMITTEE ON ETHICS

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. PREYER. Mr. Speaker, on March 22, 1977, the Select Committee on Ethics, which I am privileged to chair, held its first business meeting. At that meeting, the select committee adopted rules of procedure incorporating all applicable House rules, and agreed to procedures for issuing advisory opinions and regulations, pursuant to its authority under House Resolution 383.

Mr. Speaker, for the benefit and information of the Members, I insert in the RECORD at this point the text of the select committee rules and the procedures for issuing advisory opinions.

The material follows:

RULES OF THE SELECT COMMITTEE ON ETHICS

RULE I: RULES OF THE HOUSE

The Rules of the House shall be the rules of the Select Committee so far as applicable. The procedure in the Select Committee shall follow the procedure of the House.

RULE II: COMMITTEE MEETINGS

(a) The Chairman of the Select Committee may call and convene, as he considers necessary, meetings of the Select Committee for the consideration of any bill or resolution pending before the Select Committee or for the conduct of other Select Committee business. The Select Committee shall meet for such purpose pursuant to that call of the Chairman.

(b) If at least three Members of the Select Committee desire that a special meeting of the Select Committee be called by the Chairman, those Members may file in the offices of the Committee Clerk their written request to the Chairman for that special meeting. Such request shall specify the measure or matter to be considered. Immediately upon the filing of the request, the Clerk of the Select Committee shall notify the Chairman of the filing of the request. If, within three calendar days after the filing of the request, the Chairman does not call the requested special meeting, to be held within seven calendar days after the filing of the request, a majority of the Members of the Select Committee may file in the offices of the Committee their written notice that a special meeting of the Select Committee will be held, specifying the date and hour of, and the measure or matter to be considered at that special meeting. The Select Committee shall meet on that date and hour. Immediately upon the filing of the notice, the Clerk of the Committee shall notify all Members of the Committee that such special meeting will be held and inform them of its date and hour and the measure or matter to be considered; and only the measure or matter specified in that notice may be considered at that special meeting.

(c) If the Chairman of the Select Committee is not present at any meeting of the Committee, the ranking Member of the majority party on the Select Committee who is present shall preside at that meeting.

(d) The Select Committee may not sit, without special leave, while the House is reading a measure for amendment under the five-minute rule.

(e)(1) Each meeting for the transaction of business, including mark-up of legislation, of the Select Committee shall be open to the public except when the Committee, in open session and with a majority present, determines by rollcall vote that all or part of the remainder of the meeting on that day shall be closed to the public: Provided, however, that no person other than Members of the Select Committee and such Congressional staff and such departmental representatives as the Members may authorize shall be present at any business or mark-up session which has been closed to the public. This paragraph does not apply to open Select Committee hearings, which are provided for by subparagraph (2) of this paragraph, or to any meeting that relates solely to internal budget or personnel matters.

(2) Each hearing conducted by the Select Committee shall be open to the public except when the Select Committee, in open session and with a majority present, determines by rollcall vote that all or part of the remainder of that hearing on that day shall be closed to the public because disclosure of testimony, evidence, or other matters to be considered would endanger the national security or would violate any law or rule of the House of Representatives: Provided, however, that the Select Committee may, by the same procedure, vote to close one subsequent day of hearing.

RULE III: COMMITTEE PROCEDURES

(a) One-third of the Members of the Select Committee shall constitute a quorum for the purpose of transacting Committee business, other than reporting a measure or recommendation when a majority of the Committee must be present. However, testimony may be taken and evidence received at any meeting at which there are present not fewer than two Members of the Committee.

(b) A record vote may be ordered by one-fifth of the Members present or, in the apparent absence of a quorum, by any one Member.

(c) A Member may vote by special proxy only on a specific measure or matter and any amendments or motions pertaining thereto; except that a Member may authorize a general proxy only for motions to recess, adjourn, or other procedural matters. In order to be considered a valid and duly executed proxy, the proxy authorization shall be in writing, shall assert that the Member is absent on official business or is otherwise unable to be present at the meeting of the Select Committee, and shall designate the person who is to execute the proxy authorization. If it is desired to give a proxy for sessions on succeeding days, it must be so stipulated in the proxy, and if not so stipulated, it cannot be voted. Each proxy to be effective shall be signed by the Member assigning his or her vote and shall contain the date and time of day that the proxy is signed. Proxies may not be counted for a quorum. All executed proxies shall be turned over to the Clerk for inclusion in the official records of the meeting after they have been voted. Points of order as to the validity of proxies must be made at the time the proxies are voted.

RULE IV: RECORDS OF COMMITTEE ACTION

(a) A complete record of all Select Committee action shall be kept which shall include a record of the votes on any question on which a record vote is demanded.

(b) There shall be made available for inspection by the public, at reasonable times in the offices of the Select Committee, a record of the votes on any question on which a record vote is demanded, a description of the amendment, motion, order, or other proposition on which a record vote is demanded, and the name of each Member voting for and each Member voting against such amendment, motion, order or proposition, and whether by proxy or in person, and the names of those Members present but not voting.

(c) All Select Committee hearings, records, data, charts, and files shall be kept separate and distinct from the congressional office records of the Member serving as Chairman of the Committee; and such records shall be the property of the House and all Members of the House shall have access thereto, except that in the case of records respecting the conduct of any Member, officer, or employee of the House, no Member of the House (other than a Member of such committee) shall have access thereto without the specific prior approval of the Select Committee.

RULE V: HEARING PROCEDURES

(a) Members of the Select Committee shall be advised and a public announcement shall be made of the date, place and subject matter of any hearing to be conducted by the Committee at least one week before the commencement of that hearing, unless the Chairman determines that there is good cause to begin the hearing at an earlier date, in which event he shall make public announcement at the earliest possible date. Any announcement made under this paragraph shall be promptly published in the Daily Digest of the Congressional Record.

(b) Each witness who is to appear before the Select Committee shall file with the Committee, at least 24 hours in advance of his appearance, a written statement of his proposed testimony and limit his oral presentation at his appearance to a brief summary of his statement. The requirement of this rule may be waived, in whole or in part, by the Chairman, without objection, or pursuant to a motion duly adopted.

(c) Select Committee Members may question witnesses only when they have been recognized by the Chairman for that purpose. Each Committee Member shall be allowed 5 minutes to question a witness until each Member who so desires has had such opportunity. The Chairman shall, insofar as practicable, recognize alternately on the basis of seniority those majority and minority Members present at the time the hearing was called to order and others on the basis of their arrival at the hearing. Thereafter, additional time may be extended at the discretion of the Chairman.

(d) Whenever any hearing is conducted by the Select Committee on any measure or matter, all Members shall be entitled to recommend in writing to the Chairman the names of witnesses to appear. The Minority Members of the Select Committee shall be entitled, prior to completion of the hearings and upon request to the Chairman by a majority of them, to call witnesses selected by the Minority to testify with respect to

that measure or matter during at least one day of such hearings.

(e) No point of order shall lie with respect to any measure reported by the Select Committee on the ground that hearings on such measure were not conducted in accordance with the provisions of Rule XI, clause 2(g); except that a point of order on that ground may be made by any Member of the Select Committee which reported the measure if, in the Select Committee, such point of order was (A) timely made and (B) improperly overruled or not properly considered.

RULE VI: BROADCAST OF COMMITTEE MEETINGS AND HEARINGS

The Select Committee, by majority vote, may permit any of its public hearings or meetings to be televised, broadcast by radio, or photographed subject to the following requirements:

(1) If the television or radio coverage of the hearing or meeting is to be presented to the public as live coverage, that coverage shall be conducted and presented without commercial sponsorship.

(2) No witness served with a subpoena by the Committee shall be required against his or her will to be photographed at any hearing or to give evidence or testimony while the broadcasting of that hearing, by radio or television, is being conducted. At the request of any such witness who does not wish to be subjected to radio, television, or still photography coverage, all lenses shall be covered and all microphones used for coverage turned off. This subparagraph is supplementary to clause 2(k)(5) of Rule XI of the Rules of the House, relating to the protection of the rights of witnesses.

(3) Not more than four television cameras, operating from fixed positions, shall be permitted in a hearing or meeting room. The allocation among the television media of the positions of the number of television cameras permitted in a hearing or meeting room shall be in accordance with fair and equitable procedures devised by Executive Committee of the Radio and Television Correspondents' Galleries.

(4) Television cameras shall be placed so as not to obstruct in any way the space between any witness giving evidence or testimony and any Member of the Committee or the visibility of that witness and that Member to each other.

(5) Television cameras shall not be placed in positions which obstruct unnecessarily the coverage of the hearing or meeting by the other media.

(6) Equipment necessary for coverage by television and radio media shall not be installed in, or removed from the hearing or meeting room while the Committee is in session.

(7) Floodlights, spotlights, strobelights, and flashguns shall not be used in providing any method of coverage of the hearing or meeting, except that the television media may install additional lighting in the hearing room, without cost to the Government, in order to raise the ambient lighting level in the hearing or meeting, between the witness level necessary to provide adequate television coverage of the hearing or meeting at the then current state of the art of television coverage.

(8) Not more than five press photographers shall be permitted to cover a hearing or meeting by still photography. In the selection of these photographers, preference shall be given to photographers from Associated Press Photos and United Press International Newspictures. If request is made by more than five of the media for coverage of the hearing or meeting by still photography, that coverage shall be made on the basis of a fair and equitable pool arrangement devised by the Standing Committee of Press Photographers.

(9) Photographers shall not position themselves, at any time during the course of the hearing or meeting, between the witness table and the Members of the Select Committee.

(10) Photographers shall not place themselves in positions which obstruct unnecessarily the coverage of the hearings by other media.

(11) Personnel providing coverage by the television and radio media shall be then currently accredited to the Radio and Television Correspondents' Galleries.

(12) Personnel providing coverage by still photography shall be then currently accredited to the Press Photographers' Gallery.

(13) Personnel providing coverage by television and radio media and by still photography shall conduct themselves and their coverage activities in an orderly and unobstrusive manner.

RULE VII: PROCEDURES FOR REPORTING BILLS AND RESOLUTIONS

(a)(1) It shall be the duty of the Chairman to report or cause to be reported promptly to the House any measure approved by the Select Committee and to take or cause to be taken necessary steps to bring the matter to a vote.

(2) In any event, the report of the Select Committee on a measure which has been approved by the Select Committee shall be filed within seven calendar days (exclusive of days on which the House is not in session) after the day on which there has been filed with the Clerk of the Select Committee a written request, signed by a majority of the Members of the Select Committee, for the reporting of that measure. Upon the filing of any such request, the Clerk or Counsel of the Committee shall transmit immediately to the Chairman of the Committee notice of the filing of that request.

(b)(1) No measure or recommendation shall be reported from the Select Committee unless a majority of the Select Committee was actually present.

(2) With respect to each record vote on a motion to report any bill or resolution, the total number of votes cast for, and the total number of votes cast against, the reporting of such bill or resolution shall be included in the Select Committee report.

(c) If, at the time of approval of any measure or matter by the Select Committee, any Member of the Select Committee gives notice of intention to file supplemental, Minority, or additional views, that Member shall be entitled to not less than three calendar days (excluding Saturdays, Sundays, and legal holidays) in which to file such views, in writing and signed by that Member, with the Clerk or Counsel of the Select Committee. All such views so filed by one or more Members of the Select Committee shall be included within and shall be part of, the report filed by the Select Committee with respect to that measure or matter. The report of the Select Committee upon that measure or matter shall be printed in a single volume which—

(1) shall include all supplemental, Minority, or additional views which have been submitted by the time of the filing of the report, and

(2) shall bear upon its cover a recital that any such supplemental, Minority, or additional views are included as part of the report.

This subparagraph does not preclude—

(i) the immediate filing or printing of a Select Committee report unless timely request for the opportunity to file supplemental, Minority, or additional views has been made as provided by this section, or

(ii) the filing by the Select Committee of any supplemental report upon any measure or matter which may be required for the correction of any technical error in a previous report made by the Select Committee upon that measure or matter.

(d) A measure or matter reported by the Select Committee shall not be considered in the House until the third calendar day (excluding Saturdays, Sundays, and legal holidays) on which the report of the Select Committee upon that measure or matter has been available to Members of the House. If hearings have been held on any such measure or matter so reported, the Select Committee shall make every reasonable effort to have such hearings printed and available for distribution to the Members of the House prior to the consideration of such measure or matter in the House.

(e) If, within seven calendar days after a measure has, by resolution, been made in order for consideration by the House, no motion has been offered that the House consider that measure, any Member of the Select Committee which reported that measure may be recognized in the discretion of the Speaker to offer a motion that the House shall consider that measure, if the Select Committee has duly authorized that Member to offer that motion.

RULE VIII: POWER TO SIT AND ACT

For the purpose of carrying out any of its functions and duties, the Committee is authorized to sit and act at such times and places as it considers appropriate whether the House is sitting, has recessed, or has adjourned.

RULE IX: AMENDMENT OF THE RULES OF THE SELECT COMMITTEE

The Rules of the Select Committee may be modified, amended, or repealed, by a majority vote of the Select Committee, provided that two legislative days written notice of the proposed change has been provided each Member of the Select Committee prior to the meeting date on which such changes are to be discussed and voted upon.

PROCEDURES FOR ISSUING ADVISORY OPINIONS

1. Acceptance of Requests for Advisory Opinions: The Select Committee will accept requests from Members, officers, employees or spouses of those individuals affected by House Rules. Corporations, businesses, or individual citizens may ask for clarification or information concerning House Rules, but responses to these requests would be on an informal basis.

2. Submission of Requests for Advisory Opinions: All requests for advisory opinions must be in writing and state the factual situation to which the Select Committee will be responding.

3. Response to Requests for Advisory Opinions: All responses to such requests will be in writing and directed only toward the specific situation in question.

Requests will be addressed by the Committee in the following manner:

(a) The Select Commitee will exercise discretion in responding to any request in order to assure the privacy of the individual.

(b) Those cases which involve the application of House Rules to a particular situation and do not require new interpretation or policy decisions will be answered by letter signed by the Chairman and Ranking Minority Member. The Chairman and the Ranking Minority Member may designate another Member of the Committee to assume this responsibility in their absence.

(c) Those cases which involve interpretation of House Rules or the "breaking of new ground" will be considered by the full Committee.

(d) Advisory Opinions which have widespread application or involve new interpretation will be published in the Congressional Record and distributed to the Members. Again, the privacy of the individual will be fully protected by the Committee.

THE DICKEY-LINCOLN HYDROELECTRIC PROJECT

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. DRINAN. Mr. Speaker, we are all aware of the very great need for energy which this country will increasingly experience in the coming years. This week, President Carter will be focusing on the steps which we must take to reduce our energy dependence on the Arab nations and other foreign countries. Yet amidst this new awareness in the energy area, we must also adhere to the President's third overriding principle which he recently referred to in his address to the Nation—that is, we must protect the environment as well.

The Dickey-Lincoln hydroelectric project is one energy proposal which I believe should be scrapped in deference to the environment. Scheduled to be constructed in the wilds of Maine, the Dickey-Lincoln dam would result in the flooding of 88,600 acres of wildlands and deer yards. The damage to the environment in that area would be incalculable, and all for less than 1 percent of New England's energy supplies.

It is never easy to stop a major project for which a great deal of money has been expended. It is doubly difficult given the energy shortage in New England. But after the completion of numerous analyses on Dickey-Lincoln, I think it has become clear that the costs outweigh the benefits. I therefore believe that the project should no longer be built, and I have informed the President of my opposition. The letter to President Carter, signed by 12 Members of Congress, follows, along with a fine letter in opposition which I received from Mr. Allen H. Morgan of the Massachusetts Audubon Society. I am also including several editorials which appeared in the Boston Globe on this issue:

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 5, 1977.

President JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We are as disappointed by your decision to remove the Dickey-Lincoln project from your list of projects recommended for deletion of funding in FY 1978, as we were supportive of your original action February 21.

The Dickey-Lincoln project has been, is and will continue to be economically and environmentally unacceptable, regardless of what stage it is in. In size, in cost, and in damage to the environment, the project is enormous. We oppose any further funding of Dickey-Lincoln on economic, energy, and environmental grounds.

ECONOMICS

1. The cost of the project has tripled since it was authorized twelve years ago in 1965. The Corps of Engineers now estimates that it would cost $669 million to construct at 1976 prices; other estimates go higher.

2. An updated analysis of the benefits and costs of Dickey-Lincoln, based on the latest figures available from the Corps of Engineers and the Federal Power Commission, was completed this spring by A. Myrick Freeman, Professor of Economics at Bowdoin College, Maine. (Enclosed) His report states: "One surprising conclusion which emerges from this new data is that despite rising oil prices the economic case for Dickey-Lincoln is getting weaker . . . the benefit-cost ratio is declining because the costs of building Dickey-Lincoln are rising faster than the costs of building and operating alternative sources of power."

At the time the project was authorized, its benefit-cost ratio, as computed by the Corps of Engineers, was 1.81 to 1.00. A recent benefit-cost ratio by the Corps, using the discount rate of 6⅜% applied by the federal government in evaluating new water resource projects, shows a ratio of 1.2 to 1.0. A Corps economic efficiency analysis shows a comparative ratio of only 1.02 to 1.00.

3. A major economic resource will be destroyed: 106,000 acres (166 square miles) of prime timber land. Seven Islands Land Company, which manages most of this land for private owners, estimates that approximately 200,000 cords of wood could be produced annually on a sustained yield basis. The estimated value of this resource to the state's economy is $40 million per year. If this figure were included in the project's cost-benefit ratio, the ration would fall below 1 to 1, even if the 3¼% discount rate were used.

ENERGY

The proponents of the Dickey-Lincoln project justify its enormous cost on the grounds that it will provide needed electricity to New England. This argument is faulty for several reasons:

1. Dickey-Lincoln will generate very little electricity for its size and cost. Since the St. John River has a low flow for most of the year, the Dickey dam will have only a 15% annual capacity factor. This means that it can be operated an average of only 3–4 hours per day; if it ran continuously it would run out of water in 35 days. The total electricity output of Dickey-Lincoln would be only about 1% of the electricity generated in New England in 1986, when the project would be fully operational.

2. The growth rate of peaks in energy demand is slowing, according to NEPOOL (New England Power Pool) because of higher prices and energy conservation programs, including rate structure changes, thus reducing the need for peaking generators such as Dickey-Lincoln.

3. Most important, Dickey-Lincoln will not be needed even in 1986. A NEPOOL forecast dated December 31, 1976 states that New England has a present reserve margin of 49% above peak demand. (Peak demand in 1976 was 14,000 MGW, capacity was 21,000 MGW). The forecast predicts that in 1986 the Pool will have a reserve margin of 30% over peak demand, without Dickey-Lincoln. (The report predicts a 24,000 MGW peak demand and a 31,800 MGW capacity. Furthermore, Dickey-Lincoln would only offer about 800 MGW of peaking power).

4. Other hydropower alternatives which are economically feasible and environmentally sound exist in New England. An Army Corps of Engineers survey counts over 3,000 already existing dams in the region, very few of which currently produce electricity.

Some study and field work have been completed by the Mitre Corporation and the Maine Hydroelectric Corporation which indicate that small site dams could be retrofitted with turbine generators for $600–$2000 per kilowatt.

ENVIRONMENTAL CONSEQUENCES

The Dickey dam would be 2 miles long and 335 feet high. In total volume it would be the eleventh largest dam in the world, larger than Egypt's Aswan Dam. In addition to the two dams, five dikes would be constructed to prevent the reservoir from spilling over into adjacent watersheds. Total acreage required is 127,000 acres. Numerous studies have documented the environmental consequences of the Dickey-Lincoln project:

1. It would destroy finally and irrevocably the great free-flowing St. John, the longest wilderness river in the Northeast.

2. Some of the best white-water canoeing, surpassing the already overused Allagash Waterway in its magnificent rapids, would be lost forever.

3. It would wipe out some 267 miles of streams, including the outstanding brook trout fishery of the upper St. John, the Little Black and the Big Black Rivers.

4. It would inundate 17,600 acres of deer-yards, critical winter habitat for over 2,000 deer, with the attendant disruption of as many as 30,000 hunter days each year.

5. It would flood the habitat of moose, bald eagles, and many rare and endangered species of plants and animals.

6. The project would create a 57-mile long, 88,000 acre reservoir, whose water level would fluctate approximately 22 feet in an average year, with a 17,700 acre (27 square mile) "bathtub ring". At minimum lake level, there would be 50 square miles of bathtub ring. Maine already has over 3,000 lakes, many of superlative quality; the recreational value for the reservoir was considered so lowly by the Northeast Regional Office of the Bureau of Outdoor Recreation that it declined to do serious recreational studies for the project.

PUBLIC AND POLITICAL OPPOSITION

1. A survey conducted in 1975 by Congressman Emery of Maine disclosed that two-thirds of his constituents opposed the project. Petitions in opposition circulated by the Maine Natural Resources Council have been signed by over 30,000 persons, including 17,000 Maine residents.

2. The President of the Maine Senate, Joseph Sewall (Mr. Sewall requested he be quoted as follows: "Unless it were proven by competent engineers that Dickey-Lincoln was essential to the development of tidal power"), and the Maine Senate Minority Leader, Gerard Conley, both oppose the project.

3. The Maine Young Democrats and the Americans for Democratic Action adopted resolutions against the project.

4. The Boston Globe, the major newspaper of New England, the Bangor Daily News, the Kenebec Journal, and the Maine Times, all have taken editorial positions against Dickey-Lincoln, the Globe reversing its former position supporting the project.

5. All major American, Canadian, local and regional environmental groups oppose the project, including:

LOCAL AND REGIONAL GROUPS

Appalachian Mountain Club.
Conservation Law Foundation of New England.
Federation of Western Outdoor Clubs.
Maine Natural Resources Council—the "umbrella" environmental coalition in Maine, with 28 Statewide and 98 Regional and local Affiliates.
Massachusetts Council of Sportsmen's Clubs.
Massachusetts Forest and Park Association.
Northeast Audubon Society.
Sierra Club—New England Chapter.

NATIONAL GROUP

American Canoe Association.
American Rivers Conservation Council.
Environmental Policy Center.
Friends of the Earth.
Friends of the St. John (Coalition).
National Audubon Society.
National Wildlife Federation.
Sierra Club.
Trout Unlimited.
Union of Concerned Scientists.
The Wilderness Society.

INTERNATIONAL GROUPS

Alberta Wilderness Associates.
Canada-United States Environmental Council.
Canadian Coalition for Nuclear Responsibility, Ontario.
Canadian Environmental Law Association.
Canadian Nature Federation.
Conservation Council of New Brunswick.
Energy Probe, Ontario.
Greenpeace Foundation.
National Survival Institute.
Saskatoon Environmental Society, Saskatchewan.
Save Tomorrow Oppose Pollution, Alberta.
Societé Vaincre la Pollution, Quebec.
SPEC (Society for Poilution and Environmental Control), British Columbia.
Yukon Conservation Society.

Respectfully yours,

PAUL E. TSONGAS, M.C., DAVID F. EMERY, M.C., TOBY MOFFETT, M.C., ROBERT F. DRINAN, M.C., EDWARD J. MARKEY, M.C., CHRISTOPHER J. DODD, M.C., SILVIO O. CONTE, M.C., JAMES M. JEFFORDS, M.C., STEWART B. MCKINNEY, M.C., JAMES C. CLEVELAND, M.C., ROBERT N. GIAIMO, M.C., and GARY E. STUDDS, M.C.

MASSACHUSETTS AUDUBON SOCIETY,
Lincoln, Mass., April 7, 1977.

Hon. ROBERT F. DRINAN,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN DRINAN: Your letter of March 28 had just arrived on my desk when I also received some calculations done by Dr. James MacKenzie of our Scientific Staff, which compare the energy savings by spending the cost of building the Dickey-Lincoln Dam Project on energy conservation measures—namely installing attic and wall insulation and installing storm windows.

His calculations use a figure of $668 million—a recent estimate of the Dickey-Lincoln construction. He also used the predicted energy production of Dickey-Lincoln of 1.2 billion kw hours, or 4.1 trillion BTU.

It works out, using average figures supplied us by contractors, that if $668 million is spent on installing attic insulation it would save 43 times as much energy as Dickey-Lincoln would ever produce—similarly $668 million spent on wall insulation would save 7.5 times as much energy as Dickey-Lincoln would produce—and for storm windows the figure is somewhat over 4 times what Dickey-Lincoln would produce.

We tried to figure out the number of jobs that these three different kinds of energy conservation would generate and we hesitate to quote those figures because they are so difficult to calculate without leaving ourselves wide open to challenge. In other words, what are reasonable assumptions for how rapidly one contractor can install insulation vs. another? But in any event, our calculations (which I don't want quoted for the reasons stated above) indicated that the attic insulation would create almost 50% more jobs than Dickey-Lincoln, the wall insulation over twice as many; the storm windows somewhat less than Dickey-Lincoln.

It seems to me that these are significant figures which should be entered into the debate on this subject.

ALLEN H. MORGAN,
Executive Vice President.

A COST/BENEFIT COMPARISON BASED ON THE DICKEY-LINCOLN HYDROPOWER PROPOSAL

	Cost (millions)	Energy produced (billion kWh)	Energy saved (trillion Btu)
Dickey-Lincoln (1976)	$668	[1] 1.2	None
Conservation alternatives:			
Attic insulation (9-in fiberglass, contractor installed at 30 cents per square foot)	668	None	[2] 177
Wall insulation (foam installed at 70 cents per square foot)	668	None	[3] 31
Storm windows ($30 each, installed)	668	None	[4] 18

[1] Equal to 4,100,000,000,000 Btu.
[2] 43 times as much as Dickey-Lincoln.
[3] 7.5 times as much as Dickey-Lincoln.
[4] More than 4 times Dickey-Lincoln.

[From the Boston Globe, Feb. 23, 1977]

THE CANCELED DAMS

President Carter opened a political can of worms when he announced over the weekend that 19 dam, reservoir and irrigation projects would be deleted from his revised budget for the next fiscal year.

The amount involved is small (on the scale of Federal budgets)—only $270 million in a total of $459.4 billion, or a tiny fraction of 1 percent. Even the ultimate total cost of the 19 projects, more than $5 billion over a period of about 10 years, is a modest amount in the context of total Federal spending.

Certainly the President was aware that he could ruffle congressmen and governors from the states involved. He must also be aware that he was cutting back on work for the construction industry, which has a national unemployment rate of 15 percent and local unemployment rates that run far higher in some areas.

But the message of the cutbacks is clear. No sacred cows among public works projects. As though to underline that intent the President added the 19th name of deleted projects at the last minute—a dam in Georgia.

Controversy has marked many of the projects involved, perhaps none quite as much as the lone New England proposal, the Dickey-Lincoln dam project in Maine.

The Dickey-Lincoln project got its first serious legislative boost in 1965 when the U.S. Senate voted $227 million for the project—without debate. It was attacked then primarily by private utilities who challenged the need for it and claimed that, whatever the benefits, it would be too costly. Last October the Army Corps of Engineers estimated the cost of the project at $668 million for a two-dam project that would deliver electric power only at hours of peak demand—and possibly only during part of the year.

The dam project has subsequently been challenged by increasing numbers of environmentalists on the grounds that it would be unacceptably disruptive to wildlife displaced or destroyed by the 90,000-acre lake that would be created by the larger of the two dams.

It has lost some liberal support on the grounds that the project had failed to go through full environmental review and had not proved itself economically. Even some friends of public power for New England who envision it as a "yardstick" for measuring the performance of private utilities, question whether a dam complex that can at best supply electricity at periods of peak demand is in any way useful for making judgments about fossil or nuclear power plants run by private utilities.

Elsewhere in the country, much of the protest about the Carter cutbacks has come from areas where there have been serious drought problems in recent months—but the water projects in those areas cannot bring rain, only store it.

The Carter Administration is not adamant on the cutbacks. If Congress reinstates funds for the projects, there will be no attempt to impound the money. But the Administration has said it is time to take a close look at the justification for all capital projects of this sort.

Historically, river and harbor projects have been local pork barrels with entirely inadequate cost-benefit studies. The Dickey-Lincoln project has certainly failed to prove itself on that score. Those projects that can be justified should be reinstated. But the Administration is right to remind Congress that such projects should not be taken for granted.

[From the Boston Globe, Mar. 3, 1977]

RETHINKING DICKEY-LINCOLN

President Carter's deletion of funds for the proposed Dickey-Lincoln dam project on the St. John's River in Maine has forced everyone to rethink the issues that originally justified the project. That rethinking process leads us to the conclusion that the project, which once seemed valid, no longer is so. We backed the project in the past on what appeared to us good grounds. We now urge Congress to take account of changed circumstances and to vote no funds for Dickey-Lincoln.

Initial supporters of the project viewed it as a means of introducing significant amounts of public and cheaper power into New England. Dickey-Lincoln was to become New England's Tennessee Valley Authority, producing low-priced electricity itself and forcing private utilities, by competition and by example, to lower their rates. New England power costs are the nation's highest.

But Dickey-Lincoln never lived up to its original promise. Even in the planning stage, it was never to become a massive source of electricity. As now designed, it would include two dams that between them would provide electricity only at hours of peak demand, since rainfall in the St. John watershed is inadequate to sustain continuous operation.

The concept of competition from publicly owned utilities has been given a much better chance to prove itself with the development of a wholesale electric company organized by the municipal light departments in Massachusetts. This wholesale company now has the authority to construct electric generating facilities either by itself or in partnership with private companies—and is already doing both.

Dickey-Lincoln was conceived in an era before there was full awareness of the real value of the natural environment—which is no one's fault. No power project can be built without some disruption of the locale but Dickey-Lincoln would create a lake covering 90,000 acres—a lot of land for a project that would perform its function only intermittently. The costs to wildlife are immeasurable. Added to them are the losses from displaced forestry operations.

The dam project itself has become a potential sink for money. When the first supporting legislation passed in 1965, the cost was estimated at $227 million. Last year the Corps of Engineers recalculated it at $068 million. The real cost could easily be about $1.3 billion—double the Engineers' estimate.

Dickey-Lincoln was once seen as an idea whose time had come. Now President Carter has provided an opportunity to see it for what it is—an idea whose time has gone.

PETER KIRK OF EUROPE

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROSENTHAL. Mr. Speaker, Sir Peter Kirk, of the British House of Commons, died last weekend in London at the early age of 48. His death represents an enormous loss to his own country and to

the cause of a united Europe for which he worked so energetically.

I first met Sir Peter in 1973 when he led a delegation from the European Parliament to Washington for meetings with a House delegation. Those meetings have now flowered into a full and regular parliamentary exchange which marked its tenth meeting last September in Washington. Sir Peter was here for that meeting and made his usual exemplary contribution to the important discussions on human rights, political relations and social and economic developments concerning both the European community and the United States.

Sir Peter Kirk had many friends in the Congress, some of whom did not even know him. For he was the true friend of all those committed to a better understanding of the crucial importance of American-European relations. He worked vigorously for that understanding. His death, indeed, is a tribute to the vigor which he devoted to all he did. Sadly, his heart was not an adequate match to the spirit.

FINANCIAL DISCLOSURE BY REPRESENTATIVE LONG

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. LONG of Maryland. Mr. Speaker, although not required to do so by law, I make a yearly disclosure of my income, taxes, assets, and liabilities.

For 1976, I paid net taxes totalling $21,057.79; my gross income was $56,046.74. My Federal income taxes were $14,764.14; State and local income taxes were $3,295.96; property and sales taxes were $2,996.69.

My major source of income in 1976 was $44,600 annual salary as a Congressman. Other taxable income included a small annuity of $1,981.10 from the Teachers Insurance and Annuity Association; $5,781.84 from congressional allowances in excess of official expense; and net rents of $3,683.80 from my farm in Harford County. In 1976 I accepted no outside earned income for speeches or services and followed my long-standing practice of accepting no gifts of any kind, however small or in whatever form—not even flowers or fruit.

My real property consists of my home in Ruxton, Md., purchased in 1946, currently mortgaged for $7,660, and my 112-acre farm in Harford County, purchased in 1965 for $118,000. I owe $11,500 in short-term notes to the Mercantile Safe Deposit and Trust Co. of Baltimore.

My contributions to the Federal retirement system for 1976 were $3,568.44. Total contributions to the retirement system since I was elected to Congress have accumulated to $39,106.20. This is not a liquid asset.

Other assets include a 1976 Buick, a 1977 Plymouth station wagon, home furnishings, and a small checking account sufficient to pay current expenses.

BROADCASTING CONGRESS

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ANDERSON of Illinois. Mr. Speaker, the House is now in the midst of an in-House broadcast test to determine the feasibility and advisability of such a system both as an information source for Members and as an additional source of information for the public about our proceedings. This 90-day test, begun on March 15, will conclude in mid-June. Under the terms of House Resolution 404, adopted on March 15, the Rules Committee will then evaluate the impact of the test on our proceedings and recommend to the House whether such coverage should be made available to the public.

During the last Congress, our Rules Subcommittee on Broadcasting surveyed State legislatures and found that 44 have at least partial broadcast coverage of their proceedings. Almost without exception, the reports on public broadcasting of the legislature were favorable. In the April 12, 1977, Washington Post, Neal R. Peirce wrote about the broadcast experience in these State legislatures and how it bears on the decision we will soon make. He concludes his article with the following paragraph:

The time seems ripe for the proud barons of Capitol Hill to take a leaf from the experience of their "junior" partners in the state legislatures, where the experiment with television has been tried—and proven successful.

Mr. Speaker, at this point in the RECORD I include the full text of the Peirce article, and commend it to the reading of my colleagues. The article follows:

[From the Washington Post, April 12, 1977]

CAN TELEVISION GET INTO CONGRESS?

(By Neal R. Peirce)

While Congress continues to block broadcast coverage of its debates, the legislatures of 44 states—including Maryland and Virginia—now permit radio microphones and television cameras in their official sessions.

The total blackout of floor debates continues on Capitol Hill 53 years after the first bill to allow radio coverage was introduced, 33 years after the first bill to allow television cameras.

But the broadcast experience in most state legislatures is positive. Television and radio coverage is heping legislators to increase interest in lawmaking, heighten understanding of issues—and even improve their own image.

"Broadcasts of our debates have done more than anything else to sensitize citizens to what's going on in Tallahassee" says Florida state Sen. Kenneth Myers.

Viewer response seems to be equally enthusiastic. One Nebraska citizen wrote that he was "as addicted to" the television coverage of his state legislature "as some people are to soap operas." Another said television coverage "has altered my opinion of the quality of the legislature and given me heightened respect for the service these people perform."

Many legislators initially feared that television would make a circus of floor proceedings, turn members into performers and encourage glibness and demogogery instead of deliberation. Privately, many feared that they wouldn't present a positive image on television.

In isolated instances, those fears have been borne out. After Florida started televising its sessions, 88 per cent of the capitol press corps said the cameras led to more grandstanding.

But in most states television coverage has produced change for the good. At a minimum, decorum has improved: Florida legislators, for instance, dress better and no longer eat during sessions. "Instead of acting like publicity-hunting candidates," one Southern state senator noted, "the legislators put their best foot forward by removing them from their desks."

The substance of legislating has also improved. Connecticut legislators, for instance, stopped scheduling debate and committee meetings simultaneously and ceased rushing through stacks of bills on the last day of their session. "The same individuals who sloppily conducted or participated in committee meetings are now so well prepared, and are so conscious of their staff effort and opportunity, that I think we have progressed light years," a Connecticut legislator claims.

Spurred by the state's pioneering "sunshine law," Florida has the nation's most extensive electronic coverage of the legislature: a nightly hour-long wrap-up broadcast over nine public television stations during the annual 60-day sessions, plus a fair amount of coverage on commercial television news shows.

Public television stations in most states cover legislative action on a smaller scale, through a weekly half-hour or hour format including footage of floor action and committee hearings interspersed with commentary. The most succesful show is probably New York's 30-minute weekly "Inside Albany" program, which also covers the governor and courts. Pennsylvania last year started a similar weekly program, "The People's Business: Harrisburg Report."

A problem with public television broadcasts is that audiences are small and heavily weighted toward highly educated people interested in public affairs. And because public stations must rely on legislative appropriations, there's always the danger of retaliation by disgruntled legislators.

Commercial stations have both audiences and financial resources superior to those of the public television stations. But in most states their record on televising—or even reporting on—legislatures is dismal. Despite high profits, television executives generally refuse to purchase cameras to cover the legislatures. Viewers are lucky if their local television stations even send reporters to the state capital.

When the CBS outlet in Los Angeles closed its Sacramento bureau on Christmas day, only one station—KNBC in Los Angeles—was left with a camera crew permanently assigned to California's state capital. The other 66 California television stations, according to California Journal editor Ed Salzman, "have decided that the state government stories are too dull and too complicated to broadcast."

While Congress continues to drag its feet on the broadcasting issue, other leading world legislative bodies—including the parliaments of West Germany, Japan, Denmark, Norway, Finland, Sweden and Holland—have permitted television coverage.

But there could be a breakthrough in Congress this session. Senate Majority Leader Robert C. Byrd (D–W. Va.) says he supports network coverage of Senate sessions "on a selective basis." Pressures are building to provide live television and radio coverage of House floor sessions through a network pool of ABC, CBS, NBC, and PBS. Speaker Thomas P. O'Neill, then Majority Leader,

kept a measure authorizing such broadcasts from coming to a vote last session. This year, O'Neill has introduced a test of closed-circuit coverage to member's offices.

Younger congressmen in particular argue that televised sessions could help Congress improve its poor performance ratings with the public and regain some of the visibility—and power—that has been shifting to the executive branch ever since Franklin Roosevelt's fireside chats. President Carter's plans to take his positions to the people on national television will likely shift the power balance to the White House even further if Congress doesn't act.

Opponents of televised Capitol Hill debates raise the same tired arguments previously heard in the states—that the cameras will prompt grandstanding and place members in an unfavorable light. But now the evidence is in from the states: Television actually enhances a legislatures stature, and often its effectiveness.

The time seems ripe for the proud barons of Capitol Hill to take a leaf from the experience of their "junior" partners in the state legislatures, where the experiment with television has been tried—and proven successful.

NARBERTH COUPLE DENIED ENTRY BY THE SOVIET UNION

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. COUGHLIN. Mr. Speaker, it is with dismay that I must bring to the attention of my colleagues yet another incident of Soviet disregard for basic human rights.

According to an April 19 Philadelphia Inquirer article, Mr. and Mrs. Arnold Silvers of Narberth, Pa., were expelled from the Soviet Union allegedly for attempting to bring "Zionist scribblings" into Moscow.

The Soviet news agency Tass reported that the Silvers, who live in my congressional district, were detained Sunday when they arrived from New York at Moscow's international airport. Although the Silvers have not confirmed the Tass story as yet, Soviet officials purportedly found leaflets, handbills, and appeals addressed to Soviet Jews in one of their suitcases. Mr. and Mrs. Silvers were just beginning a 1-week vacation in the Soviet Union which was to include visits to Moscow, Kiev, and Leningrad when they were expelled. They returned home on Monday.

Both Arnold and his wife, Florence, are very active in the local Jewish community and are directors of the Har Zion Temple, a conservative Jewish congregation in Narberth. Mrs. Silvers is also a founder of the local Soviet Jewry Council prominent in efforts to publicize the oppressive policies directed against Soviet Jews.

During the last 2 years, about 25 Americans have been expelled from the Soviet Union for attempting to bring in what the Soviet officials consider contraband, mostly materials aimed for the Soviet Jews.

In light of the Helsinki Accord where the Soviet Union pledged to respect human rights and to allow freer international exchanges and travel, the continued Soviet violations of American and Soviet citizens' rights are very disturbing. The American people must continue to press the Soviet Union to honor its international agreements and fully acknowledge that certain human rights are not purely "internal affairs" but basic rights of all people.

I am inserting in the CONGRESSIONAL RECORD the article which appeared in the April 19, 1977, edition of the Philadelphia Inquirer at this point:

NARBERTH COUPLE EXPELLED FROM SOVIET UNION

(By Howard S. Shapiro)

A Narberth lawyer and his wife were expelled from the Soviet Union yesterday for attempting to bring "Zionist scribblings" into Moscow, according to the official Soviet news agency, Tass.

Arnold J. Silvers and his wife, Florence, were detained Sunday, when they arrived from New York at Moscow's international airport. Tass said Soviet officials had found leaflets, handbills and appeals, apparently addressed to Soviet Jews, in a suitcase. Mr. and Mrs. Silvers were beginning a one-week tour of the Soviet Union.

Silvers, who is in his 50s, is a former national president of Brith Shalow, a Jewish fraternal organization. Mrs. Silvers is a founder of the local Soviet Jewry Council, which tries to publicize the plight of Soviet Jews. Both are active in local affairs in the Jewish community and are directors of Har Zion Temple, a conservative Jewish congregation in Narberth.

Details of the Silver's detention and expulsion were sketchy. A son, Nate, said that both were unharmed and safe in Helsinki, Finland, yesterday afternoon, and would return home Monday.

"I just happened to be in the city (yesterday) and I was doing some work at my father's office. Some friends from Philadelphia called and told me, and they (the Silvers) called at about 3:15," said the younger Silver, 20, a sophomore majoring in accounting at Syracuse University.

He would not answer any questions about the nature of his parents' trip or the details of their detention. "I really cannot tell you that," he responded several times. "When they get back into the city they will have something to say."

About 25 Americans have been expelled from the Soviet Union during the last two years for attempting to bring in what Soviet officials consider contraband, mostly material aimed at Soviet Jews.

The Silvers, of Pawn Hill Lane near Sprague Road in Narberth, departed Saturday afternoon from Kennedy International Airport in New York on a Finnair Boeing 747 and were to arrive in Moscow Sunday afternoon.

The trip, booked through Bartlett Travel in center city, was a package trip to Moscow, Leningrad and Kiev and included airfare, sightseeing, theater tickets and hotels.

"They are just terrific people," Rabbi Gerald I. Wolpe of Har Zion said. "They are very, very charitable, and involved in every cause that is legitimate and worthwhile."

A friend who works with the couple on the Soviet Jewry Council said that "they just went over for vacation, and took the things that you'd normally take when you go to the Soviet Union for vacation. They did not take any aidlurim (prayer books) or religion articles of any kind."

Silvers, whose law practice is at One East Penn Square, concentrates on negligence and estate law. Mrs. Silvers works in the office as a paralegal.

HEAD START: AN INVESTMENT IN OUR FUTURE

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. PICKLE. Mr. Speaker, when the Johnson administration initiated the Head Start program 12 years ago, it was conceived as a way to prevent the potential waste of our Nation's human resources. Head Start is still alive today, providing educational opportunities to millions of children, because of the dedication of the many people who have worked hard and believed in this program.

Mrs. Lyndon Johnson, who served as the first national chairman of the program and indeed was the inspiration for the project, recently spoke to the Region VI Head Start Conference in Dallas and shared her memories of the program's infancy and its development.

Mrs. Johnson points out in her speech that only 18 percent of the potential participants are able to attend the program. As the House begins its serious discussions on our national priorities that will shape the Federal budget for next year, I hope that my colleagues will take note of Mrs. Johnson's remarks:

MRS. LYNDON B. JOHNSON—REMARKS FOR THE REGION VI HEAD START CONFERENCE

Friends of Head Start—

Thank you for that beautiful and moving introduction.

The word "Head Start" is, for me, one of the most thrilling and personal words in the vocabulary of the Johnson years in the White House. I was there at its birth and watched it closely through its growing pains, so I am happy to see it has matured into this strong strain of accomplishment. It is reflected here in the faces of you, the educators and the parents and graduates themselves.

For me, Head Start began one day when a small group of believers—some social workers, Sargent Shriver and I sat in the Red Room of the White House to explore whether something of this kind really could work or not.

Our hope with Head Start was to rescue the next generation, to throw a life-line to families who—except for the number of children—were lost in a sea of too little of everything—jobs, education and hope. If it could be done, it might mean a real break-through in education for the thousands of children who became drop-outs in the third and fourth grades.

In its most materialistic terms, it was the taxpayer's insurance program against costs of delinquency and truancy—for a small welfare roll in the future.

It was a heady afternoon for all of us, everyone talking excitedly, but one line still stands out to me—the bare-bones description: "What we are trying to do is to take human material that may be potential waste and transform it into usefulness."

The speaker was talking of the whole war on poverty of which Head Start was only one program—but Head Start was the program which always excited me most and, so, with the urging of Sargent Shriver, I became its first national chairman.

Despite the pitfalls and the frequent disappointments and the cutbacks that came, I see its rewards more vividly today than I did back in the program's infancy.

Near my home the little Head Start project across the river from the Ranch meets in the Lutheran Church—where your friend and mine, Kent Bohls, is the director. Some twenty children attend. Before Head Start came to our part of the world, there was no opportunity for pre-school education. And, if your family was poor or your cultural opportunities meager, it was just too bad. You started at six—and some of the children on an uneven basis. It seemed you were somehow defeated before you even began.

Some of the happiest hours of Lyndon's days of retirement were spent dropping in on those children and watching them color a picture, or try writing their name, or standing up to say the pledge of allegiance.

I remember one really hot day when everything was going wrong at the Ranch. (And those of you who have lived on a ranch know there are days like that). We hadn't had any rain for weeks and none was in sight. All day long the men who worked on the Ranch had been struggling with the heavy irrigation pipes in the fields. Lyndon was thoroughly exasperated and disgusted with the weather and everything in general, and he exclaimed: "This has been an awful day!"

"Oh no sir," one of the men who had been hauling pipe spoke up, "this has been a wonderful day. My little boy came home from Head Start today and he has already learned how to write his name."

Knowing the alphabet, being able to write your name, not being afraid of a policeman, knowing that those big brick buildings—which will one day be school—are not cages but places of color and fun and learning something new each day! All these fairly simple steps seem so small—unless you are denied them.

Thinking on the years of Head Start my mind is filled with a hundred memories:

A day in the East Room of the White House when a little Mexican American boy named Pancho was hoisted up to Lyndon's shoulders—it was the start of a movie we had just shown for the first time about Head Start trying to explain the value of the program to thousands of people through one little five year old boy from California.

Some of you doubtless saw the film—or perhaps, as Lyndon said at the time, you have been knowing "Panchos" all of your life.

This Pancho's health problems were discovered in a Head Start physical check-up and then corrected. From a drab, dull-eyed—thought-to-be-backward child—Pancho was transformed to a bright-eyed eager youngster. He was full of so much spirit that he was into the big bowl of strawberries on the White House dining table the minute the reception began!

I remember a few days later walking through some of the one-room schools that still exist in Appalachia where families have been, for generations, literally land-locked in those hills. I think of Gertie Moss—a school superintendent in Canada Township, North Carolina, and "pure gold," in my book. "One of the things the government has done," she said, "is to provide a bowl of hot cereal and milk to about thirty children who don't have anything to eat at home before they come to school. By about the second month they begin to take notice, get lively—start learning."

There was another day in the crowded ghetto of a New Jersey town, where the drug stores in the neighborhood bore the signs "Bedbug Spray Sold Here." From the endless rows of colorless flats emerged each day, small children who walked a few blocks to the basement of a public school to Head Start. Not an ideal place, but an improvement over the life they had been living. Some of them had vocabularies of about 50 words, others less. Their world was so distant from the school teaching staff that it was obvious the parent program had to be used to make it work at all. And quite wisely, parents were hired to be the translators of these children to the teaching staff.

I have never liked statistics, unless you cloak them in flesh and blood and you have certainly done that for me tonight.

The end of the story of Head Start has not been reached. I hope it never will be. But we saw one chapter, the four proud young Head Start gradautes of some 11 years ago from Lorenzo, Texas who led the Pledge of Allegiance. Listen to their record:

Cynthia Watson, high school senior with a history of above average academic records. Among Cynthia's honors are state finalist in track, head cheerleader, basketball player, treasurer of the student council, FHA vice president, homecoming maid, and queen of her sorority. Between these jobs, she is a member of the high school band. Her mother started as a volunteer worker and teacher aide, and is now a part-time staff member at Texas Tech. All of this is due to career development training for parents. The Watsons are a real Head Start family.

Roy Puente, president of the student council, a national honor society member, Spanish club vice president, FHA high award in 1976.

Lilia Ybarra, another senior with an impressive record of above-average grades, treasurer of FHA, student council representative, regional finalist in track, class favorite, annual and newspaper staff member, and time for basketball, too.

Darell Lawson, a sophomore, who continues to exhibit the Lorenzo High School slogan, Head Start—Future Success! A varsity football player, band member and a member of the student council.

A satisfying aside is that someone told me "Head Start united our town." A proud record—and I am assured by Superintendent Andrews and Dr. Riley, there are thousands of Head Start graduates with similar records.

So, the years have counted. The lives of six million children have been touched by Head Start in a most significant way. And, the lives of millions more in their families have been, too. What we have learned from Head Start is really three-fold:

(1) When you educate a Head Start child that education stretches out to a whole family.

(2) It stands out that the real heart and genius of Head Start is not found in Washington, or in the regional office in Dallas, but in the firm hold it has taken at the grass roots and the quality of the leadership there.

(3) We know Head Start has become an established part of the fabric of life in this country. Head Start works.

What is the outlook for Head Start? I cannot predict it. But I feel that so much has been accomplished with the past that a civilized society can only help it grow.

We know that only 18 percent of the potential Head Starters are able to attend the program, for the simple fact that there is never enough money to go around for all the needs of this unfinished democracy.

But, I firmly believe the future of this country will only be as good as the investment we make in the education of the present generation.

As a citizen, as a taxpayer, I can think of no wiser investment. I hope Head Start will be a permanent word in the national vocabulary.

I am thrilled that it has been such a happy and gratifying word in yours.

And, you will be happy, though not surprised, to hear that Joe Califano, the Secretary of Health, Education, and Welfare, who was one of Lyndon's top assistants at the White House in our day, is a Head Start booster. "There is no chance Head Start will be abandoned," he told me. And, I for one, will be watching it grow with anticipation and hope.

AIR FORCE COMMENDATION MEDAL AWARDED TO SGT. WILLIAM J. CLECKNER

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. CARNEY. Mr. Speaker, I would like to take this opportunity to pay tribute to Sgt. William J. Cleckner of 162 Market Street, Cortland, Ohio, who recently received a citation from the U.S. Air Force, commending him for his meritorious service.

I congratulate this fine young man on his dedication and outstanding service in behalf of this Nation. At this time, I would like to insert an article from the Western Reserve Democrat, pertaining to Sergeant Cleckner's award:

SERGEANT CLECKNER RECEIVES COMMENDATION MEDAL

Sgt. William J. Cleckner, son of Edward Cleckner, 162 Market St., Cortland, and the late Mary Lou Cleckner has recently received a citation from the United States Air Force, commending him for his meritorious service, while assigned to the Clinical Records Section of the U.S. Air Force Hospital at Langley Air Force Base in Virginia.

Sgt. Cleckner has many awards and citations to his credit for his performance at all installations where he has been assigned. A few of the awards include, the Air Force Good Conduct Medal, National Defense Medal, Outstanding Unit Citation. Outstanding NCO and the Tactical Air Command Certificate of appreciation in recognition of resourcefullness and devotion to duty.

While stationed at Hickam Airfield in Hawaii he was with the 1957 Communications Group as a ground radio operator. He was responsible for the in-station handling of all messages between aircraft in flight and controlling agencies.

His duty performed during the President's trip to the Far East was a contributing factor to Hickam AFB receiving letters of appreciation from Major General Werbeck, Commander of AFCS and Brigadier General Yost, former Commander of Pacific Communications for outstanding communication support.

Sgt. Cleckner has been credited with consistently demonstrating an outstanding ability to carry out assigned tasks with accurate professionalism. He has provided support for the President and Vice President of the United States, Secretary of State, top military leaders and communication for planes covering the astronauts splashdown.

Col. James Hightower, Hospital Commander and Director of Base Medical Service, presented "the Air Force Commendation Medal" to Sgt. Cleckner at Langley Air Force Base. The citation that accompanied the award read as follows "Sergeant William J. Cleckner distinguished himself by meritorious service while assigned to the Clinical Records Section, United State Air Force Hospital, Langley Air Force Base, Virginia, from Sept. 9, 1975 to Dec. 10, 1976. During this period, the sustained superior job performance and knowledge demonstrated by Sergeant Cleckner resulted in superior report-

ing accuracy to the Office of the Surgeon General, Tactical Air Command. The distinctive accomplishment of Sergeant Cleckner reflect credit upon himself and the United States Air Force."

HEARINGS ON EDUCATION OF THE HANDICAPPED

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. BRADEMAS. Mr. Speaker, on April 25 and May 2, 1977, the Subcommittee on Select Education, which I have the honor to chair, will hold hearings on the proposed extension of Public Law 91–230, the Education of the Handicapped Act, that is, those programs providing discretionary authority to the Department of Health, Education, and Welfare to fund special projects dealing with early childhood education, resource centers, services for deaf-blind children, research, innovation, and training.

During 1975, part B of the Education of the Handicapped Act was extended and amended by Public Law 94–142, the Education for All Handicapped Children Act, which mandates that all handicapped children have available to them by September 1, 1980, a free appropriate education. The programs and resources supported by these other parts of the Education of the Handicapped Act will assist State and local schools to meet the commitment to educate handicapped children.

At our hearings on the extension of this important education measure, the Subcommittee on Select Education of the Education and Labor Committee will hear testimony from witnesses representing parents, educational institutions, representatives of the administration, and other public witnesses.

The hearings on April 25 will take place in room 2175, Rayburn House Office Building, and that of May 2 in room 2261, Rayburn House Office Building. The hearings both days will commence at 9:30 a.m.

A list of witnesses scheduled to appear follows:

WITNESS LIST

MONDAY, APRIL 25, 1977

Panel—Organizations representing handicapped

Paul A. Marchand, Director, Governmental Affairs, National Association for Retarded Citizens, Washington, D.C.

Frederick Weintraub, Director, Governmental Relations, Council for Exceptional Children, Reston, Virginia.

Accompanied by Barry Unger, Executive Vice President.

MONDAY, MAY 2, 1977

Panel—Arts education

Vivienne Anderson, Chairperson, National Committee, Arts for the Handicapped, Acting Asst. Commissioner for Instructional Services, Albany, New York.

Phyllis Wyeth, Arts Advocate, National Bloomingdale, Delaware.

Jean Kennedy Smith, National Chairperson, Very Special Arts Festivals, Executive Committee, Alliance for Arts Education, New York, New York.

Henri Viscardi, President, Human Resource Center, Alberton, Long Island, New York.

Harold Russell, Chairman, President's Committee on Employment for the Handicapped Washington, D.C.

Panel—Projects funded by the Bureau of Education of the Handicapped

Don Weston: Part C, Section 622, Centers & Services for Deaf/Blind Children—Director, Division of Special Education, Texas Education Agency, Austin, Texas.

Mary W. Wood: Part C, Sec. 623, Early Education—Project Director, Rutland Center, Division of Exceptional Children, University of Georgia, School of Education, Athens, Georgia.

Timothy Crowner: Part C, Sec. 624, Research, Innovation, Training and Dissemination—Centers and Services—Project Director, Madison Public Schools Program for Severely Handicapped Children and Youth, Madison, Wisconsin.

William C. Chasey: Part D, Sec. 634, Training of Physical Educators and Recreation Personnel for Handicapped Children—Project Director, Special Training Project, National Consortium for Physical Education of the Handicapped, Washington, D.C.

Mary Moore: Part E, Section 641, Research and Demonstration—Project Director, Department of Special Education, University of Pittsburgh, Pittsburgh, Pennsylvania.

Deborah Murphy: Part G, Section 661, Research, Training & Model Ctrs.—Project Director, Learning Disabilities, Oklahoma Childrens Services Demonstration Center, Hillside School, Cushing, Oklahoma.

SOME THOUGHTS ON THE NATURE OF MILITARY PENSIONS

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. HAMMERSCHMIDT. Mr. Speaker, I noted recently a most interesting "letter to the editor" of the Washington Post regarding military pensions. The letter was from the executive vice president of the Retired Officers Association and I believe that it clarifies the true nature of military pensions.

When I hear some say that we need to overhaul the existing pension system because it is getting so "out of line," I think immediately of the fact that retired military personnel have clearly fulfilled their obligations and commitments to the defense of this country and are therefore entitled to those benefits promised to them. I believe it is important that this side of the story be told.

As the author of the Post letter said: "Military retirees have nothing to apologize for."

I submit these comments for the serious consideration of my colleagues:

MILITARY PENSIONS: "NOTHING TO APOLOGIZE FOR"

"Runaway Military Pensions" by Michael D. Mosetting (Op-Ed, March 1) is nothing more than a rehash of two intellectually dishonest stories sent out over the Associated Press wire.

First of all, military "retired pay" is not a "pension." Webster defines "pension" as "a gratuity granted as a favor." Military retired pay is a significant element of the military career package. It is unlike any other retirement system in the public or private sectors. It is not solely paid for services rendered but, in addition to its deferred compensation aspects, it is a retainer payment that keeps recipients under the Uniform Code of Military Justice and subject to recall to active duty.

Your writer says military retired pay is "the single fastest growing item in the Defense Department budget." He bases his statement on a comparison of 1964 figures and those of today. What he conveniently forgets to mention is that use of the 1964 date provides a distorted base; the 1964 retired population (410,853) largely reflects the abnormally small standing forces maintained prior to World War II, while the present number of military retirees (1,096,184—not the 2.1 million in your article), is a result of the large standing forces this nation required over the last three decades.

Retired pay costs are not out of control, as Mosettig alleges. They reflect the realities of an inflating economy. Average retired pay is $6,648—only slightly above the poverty level for a family of four. How can you tell the retiree who has given 20, 30, or more of the best years of his life that his poverty level retired pay is out of line? Every dime was earned through honest service in the defense of the United States and the free world.

Your writer suggests that "within 25 years, the annual cost of military pensions could reach $30 billion or more in constant dollars." Using the same inflation factor (5 percent annually), your $5,000 automobile will cost about $17,000 and an Army private would be making over $25,000. Ludicrous, isn't it, that the writer who should put those figures into perspective for the reader didn't even try?

We certainly do recognize that compensation needs to be reviewed from time to time to insure that it continues to be based on conditions today and is designed to attract quality men and women to make the sacrifices necessary in our defense in the future. Logic dictates a fair remuneration for this important segment of our society.

By selective omission of pertinent facts, the writer managed to imply that most mili-

tary personnel voluntarily retire after 20 years service, regardless of age. To be objective, he should have mentioned that only one of every 10 individuals who enter the military service ever reach retirement eligibility. Not only is the military career more hazardous than the civilian occupation, but it also demands a unique degree of dedication to duty even above self and family. Few are able and willing to stay in service, despite the possibility of early retirement. Consider, too, that many who have served honorably are forced out early—some prior to retirement eligibility—victims of the "up or out" policy that is designed to keep only the best leaders. Others, having served 20 or more years, are retired involuntarily to keep the ranks filled with young, vigorous personnel.

Serious factual inaccuracies were repeated in stating that the military retiree "gets from 50 to 75 per cent of active duty pay as pension." Military retired pay is computed on base pay, not on active duty pay. The military equivalent of active duty pay for purposes of compensation comparison is Regular Military Compensation (RMC). RMC is defined in law as the sum of basic pay plus quarters allowance plus subsistence allowance plus federal tax differential. For retirement at 20 years service, military retired pay is between 33 and 40 per cent (depending on grade) of RMC. The maximum possible retired pay for 30 or more years of service is between 49 and 51 percent of RMC. Therefore, the range of retired pay as a percentage of "salary" is 33 to 61 per cent—not your 50 to 75 per cent.

Military retirees fulfilled the provisions of their contract stipulated by the American people through the Congress. Military retirees have nothing to apologize for.

At the very time President Carter has granted amnesty to those who refused to serve their country in time of war, it is a gross paradox that some short-sighted persons would suggest the American people renege on the benefits promised those who served their nation faithfully.

DONALD C. FOSTER,
Colonel, USAF, retired; Executive Vice President, the Retired Officers Association.

VETERANS EDUCATION DAY PLANNED IN PHILADELPHIA

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. EILBERG. Mr. Speaker, Saturday, April 23, has been proclaimed as "Veterans Education Day in Philadelphia," in an effort to acquaint area veterans with the educational benefits available to them under the GI bill of rights.

William F. Gormley, executive director of the city's veterans advisory commission, presented the proclamation to Richard Shaffner, assistant chief of the State's department of education, and Joseph Baker of the Veterans' Administration, in ceremonies at city hall.

Pennsylvania ranks fourth in the Nation in veteran population but it rates 46th among the States in the percentage of its veterans who are taking advantage of the GI bill provisions.

Federal, State, and local organizations, including representatives from area colleges and vocational schools, will conduct a day-long counseling session at the Philadelphia Athletic Club to explain the educational benefits of the GI bill.

CONFLICT OF INTEREST

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. SNYDER. Mr. Speaker, President Carter established guidelines requiring all of his appointees to divest themselves of corporate holdings to prevent the appearance and the possibility of self-serving skulduggery by high level public officials. Such guidelines could effectively diminish the possibilities of flagrant conflicts of interest, but only if they are applied. If the guidelines are ignored—if exceptions are made to the ground-rules—the nobility behind them becomes rather stained and their effectiveness rather tarnished.

Apparently the President did just that—he made an exception and allowed Charles Duncan, the newly confirmed Deputy Secretary of Defense, to retain his sizable holdings of Coca-Cola common stock.

The Spotlight recently published a series of articles questioning the propriety of such a decision and I think it is a subject that should be considered. Although the stories were picked up and carried by a national wire service, many of our liberal friends in the press have effectively ignored the stories, so I share one now with my colleagues and readers of the RECORD:

DEFENSE DEPUTY KEEPS COKE STOCK DESPITE CONFLICT

(By Mark Allan and Tracey Ehre)

Charles W. Duncan, recently confirmed deputy secretary of defense, was allowed to retain his more than $12 million worth of Coca-Cola common stock, despite the fact that the multinational Coca-Cola Company does extensive business with the Department of Defense and with other government agencies that go far beyond the superficially harmless sale of soft drinks.

The Spotlight has learned that the sale of soft drinks is far from the only activity of Coca-Cola. Among its other business dealings Coca-Cola owns and sells through its food division both Snow Crop and Minute Maid Orange Juice and through a subsidiary corporation presently located in New York State sells both Taylor Wines and Great Western Champagne.

The Defense Personnel Support Center in Philadelphia, which is a division of the Department of Defense (DOD), has confirmed that Snow Crop orange juice, Minute Maid orange juice, and Taylor Wines (of which there are 63 separate varieties) are all purchased by the Department of Defense.

At recent White House state dinners President Carter has served Taylor Wines.

The Spotlight is attempting to obtain figures on exactly what quantities of these food products are purchased by DOD as well as whether the White House is actually paying for supplies of Taylor Wines, which are produced by the President's good friends in the Coca-Cola Company.

The Spotlight has determined that the Coca-Cola Company is a direct importer and distributor of both coffee and tea.

According to company spokesman John White, the firm may quite possibly sell these products to DOD also. The Spotlight has not yet been able to file a request for information with DOD on these possible transactions.

These findings raise a serious question of conflict-of-interest on the part of Deputy Secretary Duncan. But there is another division of Coca Cola where the potential for the abuse of defense contracting procedures is even greater. This little-known division, headquartered in Milwaukee, is known as Aqua-Chem, Inc., and it had established itself as a substantial defense contractor even before the coming of the Carter Administration.

According to figures supplied by DOD, this Coca Cola subsidiary had received 54 separate contracts in excess of $10,000 each between fiscal years 1970 and 1976. According to Coca Cola, this firm, which was acquired in 1970, is a manufacturer of equipment for purification of domestic water and industrial waste water, solid waste incineration, and packaged steam generators.

Aqua-Chem, which had only $57,000 in DOD contracts in the year immediately prior to its acquisition by Coca Cola immediately increased its defense contracting to almost $1.5 million in 1970. Indeed, during the seven fiscal years for which DOD provided data, the company accumulated contracts worth well in excess of $6 million, and in 1975 was awarded a single contract for $3,144,000 by the Naval Facilities Engineering Command for the construction of water supply treatment and storage facilities in Guantanamo Bay, Cuba.

Moreover, the DOD has acknowledged that there may have been even more contracts awarded to Aqua-Chem during this period. The Spotlight is still waiting for information requested from the individual branches of the armed forces. It has been confirmed that the company has also done some work for the Environmental Protection Agency under an Aqua-Chem subsidiary, Cleaver Brookes. Additional data has been requested on other government contracts that many have been awarded to Aqua-Chem and its subsidiaries—all of which were owned by Coca Cola during the years 1970 through 1976.

Information on all contracts that have been awarded since the beginning of the current fiscal year which began on October 1, 1976 has been requested.

That serious questions exist regarding conflict-of-interest in the appointment by President Carter of former Coca Cola President Duncan as deputy defense secretary appears beyond dispute. The exemption granted to Duncan from the Carter-Mondale conflict of interest guidelines (Spotlight, April 18) and particularly the provision that permits him to maintain absolute control over his more than $13 million in the company's common stock must now be re-examined by both Congress and the President.

Whether the President—whose closest advisors and some of whose key cabinet appointees are intimately linked to Coca Cola—could have possibly been ignorant of this multi-national corporation's highly diversified interests is doubtful.

It appears highly unlikely, in light of Carter's close association with Coca Cola Chairman J. Paul Austin, who was one of his most ardent supporters in the 1976 presidential campaign, that the President could have been ignorant of the activities of this mammoth Atlanta-based corporation whose very existence is vital to the economy of Georgia.

Given this information the statements issued in the February 9 White House press release which stated that "Mr. Duncan's. . . . disqualification on matters affecting the firm in question (i.e., Coca Cola) would rarely inhibit" his actions, seem out of touch with reality.

The myth of Coca Cola as merely a soft-drink manufacturer has been destroyed. And how could Duncan possibly disqualify himself from matters affecting the vital interests of this firm?

PANAMA CANAL DEVELOPMENTS ARE WORRISOME

HON. J. KENNETH ROBINSON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROBINSON. Mr. Speaker, on April 14, here in Washington, President Carter addressed the permanent council of the Organization of American States and promised to pursue a new Panama Canal treaty. He told the OAS representatives:

In the first days of my own administration, just a few weeks ago, I directed a new approach to our negotiations with Panama on a new Canal treaty. In the light of the changes which I discussed before, the Treaty of 1903, which combines (defines) our relationship with Panama on the Canal, is no longer appropriate or effective.

I am firmly committed to negotiating in as timely a fashion as possible a new treaty which will take into account Panama's legitimate needs as a sovereign nation and our own interests and yours in the efficient operation of a neutral Canal, open on a nondiscriminatory basis to all users.

The President is certainly correct in describing his post-election, protreaty attitude as a "new approach." Millions of Americans can well recall when Mr. Carter accused President Ford of having "directed his diplomatic representatives to yield to the Panamanians full sovereignty over the Panama Canal Zone at the end of a certain period of time" during last year's televised Presidential campaign debate of October 6 in San Francisco.

Candidate Carter went on to say:

I would never give up complete control or practical control of the Panama Canal, but I would continue to negotiate with the Panamanians.

He wound up his statement before a nationwide television audience by declaring:

I would not relinquish practical control of the Panama Canal Zone anytime in the foreseeable future.

The President's "new approach" is confirmed by a report by Don Oberdorfer of the Washington Post indicating that the Carter administration is seeking to conclude negotiations with Panama on a new treaty by summer, "hoping for Senate ratification before 1978, an election year in which the controversial treaty could become an issue."

Mr. Carter is reported to have advised his Democratic leadership on Capitol Hill that he regards the treaty as a "high priority matter."

Also, to help sell it to the understandably skeptical American people, Oberdorfer reports that Panama has hired two former Presidential campaign aides "to plan and execute a nationwide public relations drive backing a new Panama Canal treaty."

The former aides, identified as F. Clifton White of the 1964 Goldwater campaign staff and Joseph Napolitan of the 1968 Humphrey campaign staff, are now associated with former Democratic National Chairman Lawrence F. O'Brien in running Public Affairs Analysts of New York, the company handling the drive.

They are apparently charging Panama $150,000 to $200,000 for the first 6 months of this year to publicize Panama's views to some 6,000 "influential" politicians, journalists, academicians, and business personnel, as well as to monitor the activities of groups opposing a canal treaty.

Mr. Speaker, these latest developments cannot help but be deeply alarming to millions of Americans who recognize the strategic necessity of maintaining undiluted American control over this waterway. As a member of the House Defense Appropriations Subcommittee, I visited Panama briefly earlier this year where I obtained a firsthand look at the situation.

The mission in general reinforced my conviction that we should not dilute our sovereignty there in any respect. The canal continues to be important to our national defense, the mobility of our naval forces, and to international trade.

It would be foolhardy to permit a volatile, unstable Panamanian government to become involved in the management of the water artery. Americans must bear in mind that the dictatorial leader of Panama gives consideration to friendly advice from Castro. We cannot chance having a Communist Cuban calling the shots on which U.S. or other vessels use the canal, or at what cost.

It is important that we consider the contrast between the language of the existing treaty—and our historic view of it—with the position of our negotiators in the current talks.

The treaty of 1903 granted us, in perpetuity, rights over the Canal Zone of the highest order—power and authority which the United States would possess, in the words of the treaty, "if it were the sovereign."

The purpose of this grant, of course, was for—again in the language of the treaty—"construction, maintenance, operation, and protection" of a canal across the isthmus.

Any review of the circumstances which led to the signing of that treaty between the United States and the young Republic of Panama makes evident that the United States never would have undertaken the canal project at that time and place—Guatemala, in fact, was the preferred location—if it were not for this broad grant of territorial authority, explicit in both extent and term.

While there were revisions in 1936 and 1955, the basic element of the original document—control amounting to sovereignty over the Canal Zone in perpetuity—has remained undisturbed.

In 1964, however, President Johnson proposed, in his words, "the negotiation of an entirely new treaty," recognizing the sovereignty of Panama and abandoning by abrogation of the existing treaty the element of perpetuity in our rights with respect to the zone and the canal.

In national policy statements since that time, the perpetuity language of the 1903 treaty has been dismissed as unrealistic and unreasonable in an international agreement. In fact, the entire treaty has been dismissed from the minds of our negotiators as if it were not a binding document. We have not been engaged in negotiating modifications in this treaty, as was the case in 1936 and again in 1955. This valid international agreement is not even the basic working paper of the talks, as it should be. Instead, as the Department of State in its summary of current policy sets forth, the negotiations involve "how soon and under what arrangements will U.S. jurisdiction terminate."

We are not negotiating the modification of rights granted to the United States in perpetuity. We are assuming, in our base position, their nullification.

As to the reasonableness of perpetual grants, I think it pertinent to recognize that an unique concept is not involved here. At law, rights in property are transferred routinely on a basis of perpetuity. Absent reservations in the agreement of transfer, the grantor divests himself of all right, title, and interest in the property for all time. This is understood as realistic and reasonable. If, at some future time, the grantor develops a desire to recapture all or a portion of his interest, the terms of the original divestment are not subject to challenge. They are a reality on which the acquiring party can stand.

I believe the United States should never acknowledge any cloud on our title to the Canal Zone, as conveyed to this country by the Republic of Panama in the treaty of 1903, any more than we do, for example, with respect to our acquisition of the Virgin Islands from Denmark, or, for that matter, the Louisiana Purchase, the purchase of Alaska, or any one of the other territorial acquisitions arrived at by international agreement.

It is known that the Panamanian government continues to agitate to end all U.S. jurisdictional rights there no later than 3 years after a new treaty enters into force and to abolish the Canal Zone and the Canal Zone government from the very first day of the entry into force of the new treaty.

These terms are now and should remain totally unacceptable to the American people. In some form or fashion, this Congress must do a better job of educating the negotiators in the Carter administration to the fact that a sell-out of historic U.S. sovereign rights in Panama will not be tolerated.

THE BATTLE AGAINST INFLATION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report of Wednesday, April 20, 1977, into the CONGRESSIONAL RECORD:

THE BATTLE AGAINST INFLATION

The battle against inflation is heating up. Despite 7% unemployment and substantial unused industrial capacity in the economy, the inflation rate rolled along at a 9.1% annual rate for the three months ending in February. Wholesale prices jumped 1.1% in March, the sharpest increase since October 1975. It is distressingly clear that the high unemployment and wasted capacity are not helping to cool off inflation. Once implanted in the economy, inflation is proving remarkably difficult to root out.

A number of pending government decisions may have an unfavorable impact on the course of inflation. These include decisions to increase milk price supports, tariffs on television sets, sugar and shoes, and prices for natural gas. A boost in the minimum wage is also being considered. This does not mean that no action should be taken where it is required in the interests of equity or efficiency. However, the cumulative effect of such action on inflation must be assessed. Experience dictates that any price increases should be put into effect gradually. Also, we should never permit several potentially inflationary actions to take hold simultaneously.

This week, in a major policy turnabout, President Carter abandoned his $50 tax rebate plan, and clearly shifted the focus of his economic policy away from unemployment and toward holding down the rate of inflation. He presented an anti-inflation program with the modest goal of gradually slowing the rate of wage and price increase. He played down government intervention in wage and price decisions, rejected any "shock mechanism" to affect wages and prices, and called for a collaborative effort by business, labor and government over a period of years.

In my view the government must consider taking these steps to fight inflation:

1. Buffer Stocks: Carefully managed buffer stocks of oil, food and metals would help stabilize prices. The stockpiling of certain commodities, whose prices fluctuate and often drift upward, would tend to restrain increases in prices.

2. Bottlenecks: Bottlenecks and shortages could be avoided by alert monitoring, and corrective steps should be taken, ranging from changes in import regulations to alterations in defense procurement and tax policy.

3. Energy Program: The energy program will have to be handled carefully. Steps must be taken to limit the impact of the inevitable rise in energy prices. Production must be stimulated and wasteful use of energy curbed.

4. Jobs: Persons who cannot get jobs even in a high employment economy will have to be assisted. Training and work programs can help them become productive citizens.

5. Investment and Productivity: Increased investment in plant, equipment, research and development is needed to increase capacity, cut costs and expand productivity. Production is still the best weapon against inflation. Some form of labor-management committee, charged with finding ways to augment productivity and hold down wages and prices, could also be useful.

6. Tax Reduction: Further reductions in taxes could support the fight against inflation. For example, cutting the payroll tax for employers and employees would reduce costs and wage demands at the same time.

7. Competition: Competition could be stimulated with stiff anti-trust action, deregulation, and freer trade.

8. Monitor Impact: The government should monitor rigorously the inflationary impact of new legislation, programs and regulations.

9. Government as Consumer and Regulator: The government should be a prudent consumer by demanding competition in procurement contracts, discouraging cost-plus contracts and "shopping around" for the best buy. The government should also try to eliminate practices in government which either push prices upward, restrict output or create shortages.

10. Spotlight on Wage-Price Increases: The government should systematically and publicly spotlight the inflationary impact of wage negotiations and price decisions, and insist that big business and big labor work together in these matters. Labor management committees could serve as a forum to discuss the problems of inflation, employment and productivity.

Other steps should also be taken. No anti-inflationary policy can succeed without the appropriate mix of fiscal and monetary policy, the two most important tools that government has to control inflation. Continued emphasis must be placed on spending restraint and a balanced budget. It may be that even tougher measures will be necessary to conquer the inflationary tendencies of the American economy, but such measures should not be tried until the powers of persuasion and example have been used. While there are disagreements on the steps to be taken, a consensus seems to be developing that affirmative, voluntary measures—but not outright, rigid controls—should be adopted by government, business and labor.

Everything is at stake in this effort to bring down inflation. If we fail, there will be slow growth, high unemployment, big deficits and no progress on the social agenda. If we succeed, there is a good chance that we shall reach the cherished goals of jobs, growth and a higher standard of living for everyone.

REALISM IN POLLUTION CONTROL

HON. J. KENNETH ROBINSON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROBINSON. Mr. Speaker, Prof. S. Fred Singer of the department of environmental sciences at the University of Virginia is a former Deputy Assistant Administrator of the Environmental Protection Agency, as well as a former Deputy Assistant Secretary of the Interior.

Last year, when amendments to the Clean Air Act of 1970 were under consideration, he wrote an article which appeared in the Miami Herald under date of June 13, 1976.

As his observations remain pertinent in connection with consideration of pending legislation in this area, I take the liberty of bringing his article to the attention of the House at this time, as follows:

JUST HOW MUCH POLLUTION IS TOO MUCH?

(By S. Fred Singer)

As Congress wrestles with the Amendments to the Clean Air Act of 1970, it is well to keep some truths in mind. No one, not even the most extreme environmentalist, would argue that we should clean up the environment just for its own sake. Nor would the most hardnosed polluter deny that there are real economic benefits to be gained from a cleaner environment. The reasonable man, somewhere in the middle, will ask himself: How much do we gain by spending money and resources? Some steps must be taken, but even if it were technically possible, it does not make economic sense to remove all of the pollutants from the natural environment. There must be an optimum degree of pollution, and the question is, how can we tell when we are there?

The idea is of course to have some knowledge of the costs involved in clean-up and of the benefits that are to be gained. The costs are relatively easy to specify. They involve various pieces of capital equipment, perhaps a catalytic converter on a car, or a scrubber to remove sulfur dioxide from smokestacks. Then there are operating, maintenance, and also inspection and enforcement costs. The benefits are more difficult to specify and put into dollar terms. One has to quantify improved health and esthetics, reduced damage to equipment, buildings, crops and animals, as well as the direct economic benefits to many industries from cleaner water and air.

There is, of course, much controversy on the details of how to measure costs, and especially on how to measure benefits, and different people hold different views. But let us assume that we can reach agreement on the dollar costs and dollar benefits for various strategies of cleaning up the environment and for various degrees of cleanup. Where do we go from here? How do we weigh costs vs. benefits? There is a major fallacy in how costs and benefits are often compared.

Suppose someone offered you a program where you would get $90 worth of benefits for every $100 of cost invested. Would you do it? Of course not—unless they happen to be someone else's dollars and the benefits accrued to you. But let us eliminate such crass inequities and assume that the political process leads to rational economics. How would you react to benefits worth $110? Should you jump at this opportunity and adopt this environmental program? The only prudent answer is: No, not before you look at alternatives which may be even better. You may find a program which will give you, say, $100 of benefits for only $10 of cost. You would then have $90 left over to invest in other projects which advance the welfare of society—not necessarily through pollution control.

This kind of thinking is standard textbook stuff for economists, but it has not penetrated widely among politicians, lawyers, and even scientists. A case in point is the $550,000 landmark study by the prestigious National Academy of Sciences, which attempts to express in dollar terms all the benefits and costs of controlling emissions from automobiles. This year-long study, completed in September 1974, was sponsored by the Senate Committee on Public Works, which also wrote the 1970 Clean Air Act that sets very tight numerical standards for the emission of carbon monoxide, hydrocarbons, and nitrogen oxides from automobiles.

Their numbers have been criticized, with much justification, for being inadequately supported by scientific data, for being technically and economically difficult to achieve, and above all, for being excessively strict in terms of the benefits to be gained. The NAS study, however, endorses the 1970 Act and sees "no substantial basis for changing the standards." It claims that the standards are justifiable in cost-benefits terms. It reaches this conclusion by finding "that the benefits in monetary terms . . . are commensurate with the expected cost of about $5

billion to $8 billion per year." But the NAS report does not spell out explicitly that alternative approaches costing only a small fraction of the cost can achieve a substantial fraction of the benefits.

The point to operate is not where the benefits equal the cost, i.e. where net benefits are zero, but at the point where the benefits exceed costs by the greatest possible amount. This greatest value of net benefits occurs where the marginal benefits equal marginal (or incremental) costs. In any investment program one must always ask the question about the marginal dollar. Will an additional dollar of cost yield an additional dollar of benefits? At the point where benefits are equal to costs, an additional dollar of cost is likely to yield only a few cents' worth of benefits.

In the case of automobile pollution there are several strategies that are preferred to the present approach from a cost-benefit point of view. For example, a modest relaxation of the present numerical emission standards for just nitrogen oxides (NOX) would make it possible to use much cheaper technology—or even existing engines.

In fairness to EPA it should be pointed out that they have sought an amendment to the Clean Air Act to ease the statutory nitrogen oxide standard for cars now scheduled for imposition in 1978. But the governing legislation does not grant EPA the authority to take economic facts into account. On the other hand, the recent discovery that the use of catalytic converters on cars creates sulfuric acid mist—a new health hazard—may force a complete rethinking of our current approach. It is for these reasons that President Ford's proposal makes eminent sense—namely to "freeze" present automobile emission standards for five years. One can only hope that Congress will keep in mind that imposition of the much tighter statutory standards on 1978 cars will not make an appreciable impact on ambient air quality, but will certainly raise costs and waste gasoline.

A specious argument is often advanced that the money spent on pollution control recycles in the economy, creates jobs and new industry, and therefore represents no loss in the real welfare of the population. To the extent that the benefits exceed the costs by a large margin the nation benefits from pollution control. But when the marginal dollar of pollution control can only purchase less than a dollar's worth of benefits, the nation loses productive resources which could have been used to advance the standard of living of the population. And of course, it is always the consumer who pays in the end, even though the initial costs are borne by the automobile industry or by electric utilities. These costs are passed along through price increases, in some cases with the full blessing of regulatory commissions. Since the less affluent in our population need transportation, any excess pollution control expenditures hit them particularly hard through price increases.

That is why consumer organizations above all should have the greatest interest in making sure that the nation operates as efficiently as possible, that productivity is at the highest possible level, and that all kind of waste is minimized, and especially waste in public expenditures and for pollution control.

In March 1973, Sen. Philip Hart called for a reexamination of environmental standards and for proper cost-benefit analyses. "If it can be credibly said . . . that we have caused the expenditure of billions to no purpose or to questionable purposes, the clean air cause will be dealt a blow from which it will be difficult to recover." In fact, the whole cause of environmental protection may be set back by unreasonable or unworkable programs.

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. SARASIN. Mr. Speaker, tonight we will receive President Carter's energy message. All indications are that it will contain some bitter medicine for our country's energy addicts and that its emphasis will be on conservation.

While I can certainly agree with the President that we must pursue all methods which will reduce the tremendous amount of energy wasted every day by Americans, we must not, however, limit our search for a solution to this single aspect of the problem. A truly national energy program must be more comprehensive.

I have received an excellent overall synopsis on energy which was prepared by the Congressional Action Committee of the Greater Waterbury Chamber of Commerce which I believe addresses itself to the total energy problem and provides a reasonable approach which Congress would be well advised to enact.

I am including the report for my colleagues' use and information:

GREATER WATERBURY CHAMBER OF COMMERCE POLICY STATEMENT ON ENERGY

Implementation of sound management techniques for energy organization, and production of sufficient supplies of energy are both necessary to meet the energy requirements of business and consumers. To accomplish effective energy planning and development activities, the Chamber offers the following five-point program:

1. Establishment of a cabinet-level energy department, coordinating energy functions now dispersed in a variety of agencies. Present lack of consolidation and coordination produces waste, duplication of efforts, fragmented authority and needless costs and conflicts. The department should assume all energy activities associated with policy, research, and regulation, including management of mineral-rich lands now under the jurisdiction of the Department of the Interior. Since regulatory functions would be placed in a department that operated programs to be regulated, an internal system of administrative judges and an appeals board not responsible to the department head should also be established to preserve the credibility of the regulatory processes. A comprehensive energy and natural resources department would therefore serve to increase governmental efficiency, create improved governmental accountability to the public, and help produce adequate domestic energy supplies, eliminating dependence on foreign sources.

2. Develop immediate conservation efforts to reduce dependency on foreign oil and promote fuel and dollar savings. Tax credits for insulation materials and related devices and for solar and geothermal heating equipment should be available for residential, commercial and industrial facilities. Implementation of conservation measures would further involve considerable private investment and provide jobs for the production and installation of conservation equipment. Greater incentives must also be developed in transportation to encourage carpooling and use of public transportation. A major comprehensive media effort would be beneficial in portraying the benefits and cost savings associated with conservation.

3. In addition to investment opportunities to promote conservation, investment tax credits should be offered to firms involved in research and development of alternate sources of energy, including nuclear, solar and geothermal. Federal loans and grants are also needed for planning and financing public facilities required for development of federally-owned reserves of oil, gas, coal, and other energy sources.

4. Permanent deregulation of natural gas and gasoline to promote competition in our private enterprise economy and permit American energy corporations to compete more favorably with foreign producers. Deregulation would encourage investment needed for further petroleum exploration and remove the costly regulatory requirements for the estimated 200,000 businesspeople operating neighborhood gasoline stations.

5. With a need for greater and diversified energy research, legislation calling for vertical and horizontal divestiture of the petroleum industry must be defeated. Without integrated oil companies, the cost-effectiveness of operations would be significantly reduced and petroleum research and development capabilities would be severely jeopardized. Divestiture could therefore lead to decreases in domestic petroleum investment and consequent increasing dependence on foreign oil producers. National interest in energy development requires full use of proven organizational resources.

With the above recommendations, the Nation can insure present and future energy supplies meet the needs of American consumers and businesses while preserving the spirit of the free enterprise system.

NEW FREEDOM OF INFORMATION ACT CASE LIST

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. PREYER. Mr. Speaker, as chairman of the Government Information and Individual Rights Subcommittee, I would like to call the attention of the Members to an extremely useful list of court decisions under the Freedom of Information Act, which has just been provided to me by the Department of Justice's Freedom of Information Committee. One of the significant features of the Freedom of Information Act is its granting of the right to citizens to go to court to obtain review of agency denials of information. This review is an important check on the improper withholding of documents from the public. In addition, the resulting court cases provide both the Government and the public with guidance on interpreting the FOIA.

Copies of this updated list of cases pending or decided under the Freedom of Information Act can be obtained from the Government Information and Individual Rights Subcommittee, B-349C, Rayburn House Office Building, Washington, D.C. 20515. Copies can also be secured by writing Mr. Robert L. Saloschin, chairman, Freedom of Information Committee, room 5234, Department of

Justice, Constitution Avenue at 9th Street, Washington, D.C. 20530.

I want to commend Mr. Saloschin of the Office of Legal Counsel who, as chairman of the FOI Committee, has put together this compilation, which updates the earlier June 1976 edition of the FOI case list. The list is cross-referenced for easy use. It is a valuable research tool for those interested in effectively using the act.

TOP ECONOMIC PRIORITY FOR THE NATION

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ADDABBO. Mr. Speaker, a delegation of my constituents from Forest Hills recently met with White House aides to discuss issues they felt to be of top economic priority for the Nation.

These interested citizens stated their viewpoints enthusiastically, and whether or not all of the Members of the House would agree with all or any of the positions taken by these citizens, I think it would be instructive for the membership to see how people view the top three economic issues when given an opportunity to present their ideas to a top Presidential aide.

I want to compliment the White House on its willingness to meet and listen to groups of interested citizens. That is the basic premise of democracy and it is good to see it restored to the White House which, for so many years, had been less than accessable to most Americans.

I include a letter to President Carter from the members of the Adlai E. Stevenson Reform Democratic Club as part of the RECORD:

MARCH 23, 1977.

President JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As a group of ordinary citizens from Forest Hills, Queens, New York, concerned for our city and our country, we earnestly urge on the Executive and the Congress the following priorities:

1. Attain full employment *now.* 8,000,000 unemployed (and there are that many for it is intolerable to exclude from the unemployed those not seeking work out of despair) is an unbearable burden on the nation. Unemployment in two years has cost us $200 billion in direct loss of production of goods and services which the country needs grievously. We cannot wait for years for "recovery". We call for immediate action to achieve in this year, 1977, a job for every man and woman who can work, and to exert the same all-out effort and dedication as though the country were at war. Every American stands to gain from full employment!

2. Federalize welfare now. The strain on our cities must be eased lest they sink beyond recovery. We should do this without delay. It must not be a case of "too little, too late" Furthermore, without Federal action, local insufficiency of resources threatens to bring about breadlines and souplines in our cities—a course already recommended by a public official in New York. Aside from the inhumanity involved, such a sad condition in our great cities could hardly serve us well in the world.

3. Encourage labor organizations, especially in the South. It is about time that the positive role of unions be recognized in our economy. Labor organization in the South is the only way to preserve jobs in our northern cities against cheap competition. The Federal government should act to eliminate right-to-work laws and should compel J. P. Stevens & Co., to respect the rights of its employees and to bargain with their union.

We pledge our help in these tasks.

Respectfuly yours,

ADLAI E. STEVENSON,
Reform Democratic Club.

TRIBUTE TO "DUTCH" HAMANN

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. EDWARDS of California. Mr. Speaker, on March 27 the world was shocked by the worst airplane crash in history. Hundreds of people lost their lives and thousands more were very personally saddened by the tragic loss of relatives and friends. I am among those who grieved for the loss of dear and longtime friends. Two such friends were "Dutch" and Frances Hamann from San Jose, Calif. Mort Levine, editor of the East San Jose Sun, wrote an editorial on Mr. Hamann which seems to me to express the affection and admiration that all local people felt for these two civic minded and "can-do" citizens:

"DUTCH" HAMANN . . . THEY DON'T MAKE THEM LIKE THAT ANYMORE

(By Mort Levine)

His name was Anthony P., but you wouldn't have known it except for the fact that newspapers have a thing about nicknames and want to always shove them in the middle of a name and between quotations marks. "Dutch" Hamann he was to one and all. And whether you cussed him or praised him, it was likely done to the extreme.

His fiery death in the Tenerife airport collision last week was a tragic loss of a man who gave of himself so unstintingly that his retirement several years ago only meant a change of duties not a change of pace.

As San Jose's manager for two boisterous decades, Dutch is credited (and/or blamed) for the shape which our valley took in its most explosive growth era, 1950–1970. But, although he came to symbolize expansion above all else, he actually understood, believed in, and could very logically explain the need for what he and his city were doing.

Something that is widely forgotten today as history gets revised (and some of its movers get reviled), Hamann was not alone in his belief that San Jose should grow and sprawl out as fast and far as it could. He had his city council with him 100%. He had the community with him by well over two-thirds . . . that was the margin for passing bond issues financing the growth. And Dutch's well-trained bond issue committees did their work well time and again.

Even though the animosity between San Jose and its smaller city neighbors reached feverish heights, Dutch always got along well personally with everyone. It was his rare talent as a compromiser and reconciler that often broke the logjam of opposed political forces.

Some might say that Dutch was the product of an era.

He grew up in the America that prized a "can-do" attitude. In that special kind of booster mystique that came out of the 1920s, the highest status went to the salesman—rather than to the administrator, the engineer or the lawyer. Today a city manager is much more likely to come from those ranks. And some of the specialized skills and characteristics city managers need, Dutch didn't possess. His internal operations in San Jose raised eyebrows and sometimes raised hackles on the part of more fastidious San Joseans.

But for the leadership group in San Jose, Dutch was absolutely the right man and the right time. He was a man who could get the job done. Vigorously aggressive in "selling" the city to outsiders and to its own citizens, Dutch never flagged in his enthusiasm and pride in San Jose's accomplishments.

Back when the late Look magazine was still selecting its annual All-American city for major achievements, San Jose won it for its social concerns and racial equality. Even though, the main focus for Dutch was the physical growth, major new buildings, and population expansion, the recognition that San Jose was still among the best places in the country to live, made him extremely proud.

Although he symbolized much that the main stream of America admires, and he was a stereotyped figure to his enemies, the reality was that Dutch Hamann was a unique mixture of very human qualities. He had a rare combination of talents and the good fortune to be in a position to use them to the fullest. You could battle him hard (as our newspapers did frequently). But you couldn't help but like and respect him.

IS PHILANTHROPY AN ENDANGERED SPECIES?

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. PURSELL. Mr. Speaker, on March 28, 1977, the First Annual Michigan Legislative Seminar on Philanthropy was held in Ann Arbor, Mich., which is in my congressional district. I would like to share with my colleagues a summary of that seminar:

[The First Annual Michigan Legislative Seminar on Philanthropy]

IS PHILANTHROPY AN ENDANGERED SPECIES?

Private voluntary financial support is part of the fabric of American Life, but can be indelibly affected by legislative actions. This was the conviction of lawmakers, fund raisers, charitable foundation personnel, trustees and concerned citizens who attended the First Annual Michigan Legislative Seminar on Philanthropy.

More than 100 participants considered the question, "Is philanthropy an endangered species?" while affirming its importance to society at the conference held in Ann Arbor, March 27–28. The conference was co-sponsored by the Development Councils of The University of Michigan and St. Joseph Mercy Hospital, and organized by Michael Radock, U-M Vice President for University Relations and Development, and Barbara B. Janes, St. Joseph's Director of Development and Public Relations.

As far as known, this was the first such statewide effort in the country to initiate a comprehensive positive dialog between lawmakers and the private non-profit sector on

issues of public policy and the preservation of philanthropy.

Speakers included two current members and a former member of the House Ways and Means Committee; Congressman William Brodhead, Congressman Guy Vander Jagt, and the Honorable Martha Griffiths. Other speakers included were: Michigan State Majority Leader William Faust, Michigan Assistant House Republican Leader John S. Mowat, Washington D.C. attorney John Holt Myers, and National Health Council representative Barney Sellers. Governor William G. Milliken was honorary seminar chairman, and U-M Regent Emeritus Robert P. Briggs served as chairman of the sessions. For many years Briggs was Executive Vice President of Consumer Power Company in Jackson, Michigan and more recently was Commissioner of Finance for the State of Michigan.

THE IMPORTANCE OF PHILANTHROPY IN SOCIETY TODAY

Governor Milliken, in a message to the participants, stated, "Philanthropy has played a major role in the development of the nation and the state, and our great institutions—churches, universities, hospitals, health, welfare, and cultural agencies—owe their existence and survival to strong conscientious private support. Government cannot, and should not, entertain the notion of usurping the charitable process."

"This view of the importance of philanthropy is shared by many in government," Chairman Briggs pointed out.

Considering the delivery of human services through charitable organizations, Congressman Vander Jagt said, "In a democracy, human needs do not go unmet." He added that the government should "foster" private philanthropy as an alternative to government "transfer payments" from those who earn to those who do not. "America is great because of what people do for themselves," he added.

"Charity forms the foundation of productivity and prosperity of free enterprise, motivated by compassion for human needs, contributing to a better today and tomorrow."

Philanthropy is an important cornerstone of the American way of life to many, as illustrated by former Congresswoman Martha Griffiths who described the positive effects in Washington from an outpouring of letters when lawmakers were considering earlier legislation affecting philanthropy.

This desire to help one's fellow man was further illustrated by Chairman Briggs who said, "Almost $27 billion was contributed from private sources in 1975—and nearly six billion volunteer hours. Volunteer time alone is estimated to be worth more than $25 billion."

"Our citizens give of their resources and talents for the betterment of our society and it is refreshing to note that government recognizes the objective as complimenting the efforts of government and being uniquely capable of responding quickly and flexibly to fill new needs and by experimenting with new and untested methods in meeting existing needs.

The role of philanthropy is clear, it is recognized and our mission is to see that impediments are not permitted to appear that will place in jeopardy the necessary life blood of philanthropy, contributed dollars and services", he emphasized.

During 1974–75, he noted that contributions grew at a rate of 6.5%, outstripped by a 9.2% level of inflation. In addition, universities, hospitals, and other labor-intensive non-profit organizations face rates for human services that are increasing even more rapidly. The Commission on Private Philanthropy and Public Needs (Filer Commission) found that the budgets of non-profit institutions and agencies need to grow at an annual rate of at least 11%, partly because of their reliance on personnel, and partly because of the unique services they render.

John Holt Myers, an advisor to the Filer Commission, pointed out that the issue of tax subsidy vs. the charitable tax deduction was firmly supported.

"All of the Commission recommendations point toward greater public participation in charitable activities and more accountability. The report recommends standardization of state laws with reciprocal privileges through a federal law that would prevent much of the duplication and confusion that now exists due to the proliferation of multiple and dissimilar state laws."

Myers further commented on former Secretary of the Treasury William E. Simon's January 18 proposals to Congress for legislation on private philanthropy based on the report of the Filer Commission. According to Myers, these would extend the negative aspects of the Commission's recommendations and ignore the positive recommendations. These negative recommendations have to do largely with regulation and reporting, and virtually ignore the Commission's recommendations with respect to increasing and improving the private support of charitable institutions. He warned that these proposals could impose crippling restrictions and reporting requirements upon public charities.

Myers states that Secretary Simon's proposals did not act on the basic Filer Commission recommendations with respect to encouraging charitable giving and increasing and broadening its base. The most important of these recommendations was that those who utilize the standard deduction be permitted in addition to deduct their charitable contributions. A second was to provide a special bonus deduction to those reporting less than $30,000 of adjusted gross income. He said, "No mention was made of the important recommendation that the present unlimited estate tax deduction for bequests to charity be retained."

TAX REFORM

"Tax Reform," Myers said, is a relative term more accurately referred to as tax change, which may be either good or bad."

Congressman Brodhead stated that tax reform was one of the centerpieces of President Carter's campaign. "The idea is developing that simplification of the tax system is desirable. Largely, that might consist of the elimination of many exemptions, deductions, and credits. If the charitable deduction is eliminated, the ability to raise funds would be very substantially reduced."

The Federal Charity Disclosure Legislation sponsored by Congressman Charles H. Wilson, (HR 41), was described by Myers as "not regulatory in substance." No attempt is made in the bill to pre-empt any state legislation affecting fund raising. "Further," Myers said, "disclosure of fund-raising costs can be misleading, particularly for organizations such as universities and hospitals which have heavy administrative costs for other purposes."

Congressman Vander Jagt stated, "The House Ways and Means Committee would be a better body to analyze the recommendations of the Wilson Bill."

FUND RAISING IN MICHIGAN

Michigan is one of the more than 30 states that have enacted laws regulating fund raising, according to William Faust, Senate Majority Leader. "It has some of the highest standards for charitable organizations in the country," he said. Senator Faust is convinced that state licensure adds a "seal of approval" which imparts integrity, but he believes that a Federal pre-emptive disclosure and reporting law would be acceptable to the State of Michigan.

Michigan Assistant House Republican Leader, John S. Mowat commented that of the annual charitable dollars contributed in Michigan (a billion dollars for churches and 800 million for other non-profit organizations) only 8 to 9% comes from foundation grants. "This fact should tell us of the importance of individual contributions," he said. Mowat also recognized and supported the possibility of preemptive federal legislation. However, he cautioned against any law or regulations which would add appreciably to the administrative costs of the organizations.

RECOMMENDATIONS

Myers, speaking for many of the participants, summarized; "Legislators should not impose significant burdens on all charities. Everyone should not be penalized for the actions of a few."

Congressman Brodhead, who described philanthropy as "a unique way of meeting the needs of society that should not be restricted by governement action," also said that, "The charitable deduction on income tax must be maintained as well as freedom from bureaucratic control. Questions raised about the ethics of charitable organizations should be resolved through self-regulation and self-control to preclude the possibility of additional state and local regulations."

The seminar participants strongly endorsed the following recommendations:

1. Any federal law that is passed to regulate fund raising should be administered by the Internal Revenue Service (currently responsible for oversight of tax-exempt organizations) rather than through the Postal Service.
2. A federal law should pre-empt state and local laws.
3. Whatever system of reporting and accountability is developed should not add unreasonable costs, thereby reducing the effectiveness of contributed funds.
4. Congress should not enact legislation that would reduce incentives for giving.
5. Legislative language should be definitive so that regulatory agencies cannot impose rules beyond the intent of the legislation.

ITALY'S WORLD AIRLINE PICKS PHILADELPHIA INTERNATIONAL AIRPORT FOR ROME-UNITED STATES FLIGHTS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. EILBERG. Mr. Speaker, I am delighted to be able to report the resumption of service between Rome and Philadelphia by Alitalia Airlines—an action which Philadelphia's Mayor Frank L. Rizzo has called a "major impetus" to the growth of international traffic at Philadelphia International Airport.

In a public statement, the mayor expressed his pleasure at the decision, and pledged that the city would intensify its marketing efforts to attract additional airlines and passengers to our great new airport facilities.

Alitalia, Italy's world airline, began direct single plane service between Philadelphia and Italy on Sunday, April 17.

To mark the occasion, a representative of the mayor presented a miniature replica of the Liberty Bell to the pilot of the Alitalia aircraft upon its arrival at Philadelphia Overseas Terminal. The pilot was to deliver the Liberty Bell to Umberto Nordio, director general of Alitalia, in Rome.

The new route will utilize wide-bodied DC–10 jets three times a week to Rome and Milan until June 16 when a fourth direct flight to Rome will be added. All flights are via Boston.

According to Enrico M. Striano, director of Alitalia's North American Division, the service demonstrates the Italian airline's "commitment to providing passengers and cargo with the best possible service between Philadelphia and Italy."

MEDICAL FREEDOM OF CHOICE

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. SYMMS. Mr. Speaker, the problem of a "drug lag" in the United States is a very real problem and one to which this Congress should address itself. The mass of economic, medical, and pharmacological literature points to the "effectiveness" provisions of the 1962 amendments to the Food, Drug and Cosmetic Act as being primarily responsible for the "drug lag" which this country is experiencing.

The following article, "Dilemmas of the Drug Lag," appeared in the April 1977 edition of Drug Therapy. The author is Rita Ricardo Campbell, Ph.D., who has been a member of the National Advisory Drug Committee—NADC—and the National Advisory Food and Drug Committee—NAFDC—which were top-level advisory committees to the Food and Drug Administration.

Dr. Campbell traces the background of the drug lag and describes some of the difficulties the FDA has created. Her conclusion is that the 1962 amendments should be repealed. On March 16, 1976, I introduced the medical freedom of choice bill in the 94th Congress and I reintroduced the legislation on January 4 of this year. The medical freedom of choice bill repeals the "effectiveness" provisions from the 1962 amendments.

I urge my colleagues to read the following article and to help in correcting the FDA's regulatory abuses by joining the 87 Members who have already cosponsored the medical freedom of choice bill, H.R. 54.

The article follows:

DILEMMAS OF THE DRUG LAG

(By Rita Ricardo Campbell, Ph. D.)

(Note.—Dr. Campbell is Senior Fellow, Hoover Institution, Stanford University, Palo Alto, California.*)

William Wardell first used the phrase "drug lag" to define (as of December 1971) the lag or lead time between the different marketing dates of the same drug in the United States and Great Britain. He was describing the effect of the 1962 FDA omnibus law that regulates drug development in this country.

Wardell (Oxford education, British practice) first became aware of his new American colleagues' innocence of British drugs in March 1971, when, on hospital rounds, he discovered accidentally that his colleagues were ignorant of the bronchodilator Alupent (metaproterenol), available in Great Britain in 1963 but not approved in the United States until 1975. The preliminary draft of his speech (to the Fifth International Pharmacological meeting, San Francisco, June 1972) on comparative marketing dates of new drugs in Great Britain and the United States had been circulated for comment for at least 6 months prior to delivery. Yet the term was not used in an article published in 1971 by FDA's then Associate Commissioner Jennings, although he wrote directly on the subject of drug development and FDA regulations.[1]

Wardell's position was supported by the now-famous correspondence of Dr. Dripps and othr well-known medical scientists, including deBakey and Nobel prizewinner D. W. Richard, who were among the signers of the first and last of a series of four letters (February 29, 1972–September 24, 1973) charging that a drug lag existed in the United States as compared to Great Britain.

DRUG-LAG DILEMMA

During 1973–1974, Wardell specifically documented the extent of the drug lag.[2] By September 27, 1974, the position of FDA had shifted from one that denied the existence of a drug lag to one of acknowledgment. Richard Crout, head of the Bureau of Drugs, in testimony to the Senate Health Subcommittee, stated: "The data cited by Dr. Wardell are correct. There were no approvals in hypertensive drugs in the first decade after the amendments (of 1962). There were no approvals in the cardiovascular area in the years between 1967 and 1972, and . . . the . . . gap . . . was limited to the cardiovascular and pulmonary (areas)."[3]

On November 2, 1975, Senator Kennedy, Chairman of the Senate Subcommittee on Health, stated: "There are fundamental defects in our nation's current regulatory procedures for prescription drugs . . . lack of any follow-up, once the drugs have reached the market. . . . Badly needed drugs are delayed from joining the fight against disease. . . ."[4]

During debate in February 1976, FDA Commissioner Schmidt agreed that an aerosol form of the steroid beclomethasone (Vanceril) that had been available for several years in Great Britain was an effective antiasthmatic not yet approved in the United States.

PRESCRIBING DILEMMA

In April 1976, an article in the New England Journal of Medicine called attention to the status of propranolol[5] (Inderal), which at that time, although available for other indications, was still not approved by the FDA for the treatment of hypertension. The authors pointed out that propranolol is used to treat hypertension in several advanced countries and also ". . . is being widely used by practitioners [in the United States] for this purpose."[6]

The whole tone of the article is that since propranolol has been successfully used in Great Britain for a 10-year period in antihypertensive therapy, it should be more widely prescribed for this condition in the United States. In many patients, propranolol has fewer side effects than some of the other drugs currently used in the United States for hypertension, and although these side effects are not life threatening, their absence is highly valued by patients. One potential side effect, for example, is impotence. It is, of course, not illegal to prescribe an FDA-approved drug for an indication that has not been approved by FDA; however, in a malpractice suit, such prescribing might be held against the physician. The history of pharmaceuticals contains many examples of second uses of drugs that become more important than the initial indication Government regulations should encourage innovative use of drugs already approved as "safe." Meanwhile the lack of beta blockers for antihypertensive therapy has made it difficult for the U.S. physician to tailor treatment to his patient's unique biology and thus have greater assurance of patient compliance to a drug regimen that could be life saving.

ETHICAL DILEMMA

What of the ethics of insisting on extensive trials for a drug already proved safe and effective elsewhere? If controlled clinical trials are required in the United States before a specific indication for a drug such as propranolol can be approved, even if that drug has been approved and well-tested abroad, how can one justify a placebo control group? What about the patient? Would the "fully informed" patient be willing to chance being placed in the placebo group?

In May 1975, FDA's regulation to accept controlled clinical double-blind studies on new drugs conducted outside of the United States became law. It was anticipated ". . . to promote the public safety by eliminating unnecessary duplication of human research and to expedite the availability to the American public of important new drugs being studied abroad."[7]

However, the current effectiveness of this regulation appears to be small. Once companies establish overseas research plants and hire research scientists, it is difficult to reverse the process. For example, on January 21, 1977, "G. D. Searle & Co. said it introduced a cardiovascular drug in Mexico called Duloctil. The agent, generically known as suloctidil, is prescribed primarily for older patients to relieve painful walking and coldness in hands and feet caused by poor circulation. Suloctidil is already sold in Belgium. . . . After initial marketing in Mexico . . . the concern plans to introduce the drug in France, West Germany, Australia, Southeast Asia and other parts of Latin America. Then U.S. marketing approval will be sought."[8]

TOWARD ALTERNATIVES

It is especially worrisome that FDA appears again to be unaware of the costs to the American society in the loss of potential net benefits from nonacceptance of new, effective, and relatively safe drugs, and even questions whether there ever was, or there is, a drug lag. The associate director of the new drug evaluation program of FDA, D'Aguanno, stated in a British publication[9] that "the possible adverse effects of 'drug lag' became a matter of considerable discussion and some study in the USA. After extensive analysis it has been concluded that, despite the fact that a significant number of drugs marketed in other countries are not available in the USA, there are no therapeutic breakthroughs currently marketed in other countries for which an acceptable alternative therapy does not exist in the USA. There are, however, a number of drugs marketed elsewhere which represent modest therapeutic gains over available therapies in the USA."

As an economist, I appeal again, as I did in my monograph *Drug Lag: Federal Government Decision Making*,[10] that the public interest requires "an in-depth study of the benefits and costs of the present United States regulatory system of drugs" and also of the several new alternative legislative options now being discussed; for example, better postmarket surveillance and reduction of the pounds of paper submitted in support of one NDA, as by the use of certified summaries.

The passage of the new medical device legislation has widened the impact of FDA's regulations. This may mean a new lag in marketing of medical devices. Although FDA now permits use of foreign clinical data in support of an NDA, it has never seriously considered accepting as even partial supportive evidence the stastical experience of large numbers exposed to a new drug in a country similar to the United States, such as Great Britain, which happens to require even stricker postmarket surveillance. If the

Footnotes at end of article.

populations of the United States and Great Britain are not too disparate, it seems that the use over a 5-year period of an often-prescribed drug, and, therefore, accepted in that country as yielding a net therapeutic benefit, could be at least supportive evidence for acceptance of the drug in the United States. To ignore these data raises ethical questions on how to conduct double-blind trials with placebo controls when the results, at least among scientists in Great Britain, are considered to be known.

Scientists as well as physicians do not agree as to what is the preferred therapy for a given condition of a given seriousness, partly because their relevant data bases may differ, but also because their value judgments differ. Political pressures and the fear of adverse publicity, not logic, appear to be dominating government decisions on the marketing of drugs. Repeal of the 1962 amendments would permit the physician/patient to choose among relatively safe therapeutic options tailored to the patient's unique needs, would decrease the administrative costs of FDA, and would increase the net benefit to society.

FOOTNOTES

*In the spring of 1972 and into January 1975, Dr. Campbell was a member of the National Advisory Drug Committee (NADC), and from January 1975 through September 1975, a member of the newly merged National Advisory Food and Drug Committee (NAFDC). These were top-level advisory committees to the Food and Drug Administration (FDA).

SIR PETER KIRK

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. FRASER. Mr. Speaker, the death of Sir Peter Kirk in London last weekend is a tragedy for the House of Commons, for the European Parliament, and for European-American relations.

Sir Peter was one of the leaders in the parliamentary exchange between the Congress and the European Parliament. He was here most recently last September as a member of the Parliament's delegation for the 10th meeting with a congressional delegation. At the time of his death, Sir Peter was actively preparing the London meeting of the two delegations which will take place in July.

The heavy responsibilities of Sir Peter for both his constituency in the House of Commons and his work in the European Parliament were undoubtedly related to his untimely death at the age of 48. He was, for example, in addition to this dual mandate, also chairman of the European Conservation Group of the European Parliament. In this capacity, he was working with full energy for the forging of ties among several conservative parties in the community in preparation for the first direct elections to the European Parliament, scheduled for next spring.

Sir Peter's great devotion to a united Europe will remain embodied in a stronger European Parliament for which he worked so well and so long.

CONSUMERS GET REPRESENTATION AT SUGAR NEGOTIATIONS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. DRINAN. Mr. Speaker, I am pleased to report that the Department of State has agreed to place a consumer representative on the U.S. delegation at the international sugar negotiations which opened on April 18 in Geneva. In the past, American negotiators have been accompanied only by industry trade advisers at meetings to draft and implement international commodity agreements. The voice of the American consumer has never been heard at these crucial sessions. As a result, treaties such as the International Coffee Agreement protect the producers against falling prices while failing to protect consumers against price escalation.

The State Department's decision to depart from previous policy by permitting consumer representation at the negotiations to draft a new international sugar agreement is a long-overdue response to congressional criticism dating back to 1975. In reporting the International Coffee Agreement to the full Senate for ratification in August 1975, the Senate Committee on Foreign Relations noted the lack of consumer representation on the advisory group which accompanied the U.S. delegation and expressed the hope that consumer interests be represented at future commodity negotiations.

On February 22, 1977, the House Government Operations Subcommittee on Commerce, Consumer, and Monetary Affairs, on which I serve, held a hearing on the escalating price of coffee. During that hearing, I asked the State Department witnesses to invite a consumer representative to all future meetings of the International Coffee Organization. Assistant Secretary Julius L. Katz refused to commit himself to satisfy that request, but agreed to look into it.

On March 30, 1977, 15 other Members of Congress joined me in writing to Secretary Vance to ask that he invite a qualified consumer representative to serve in an advisory capacity to the U.S. delegation during the Geneva negotiations to formulate an international sugar agreement. The text of the letter follows:

WASHINGTON, D.C.,
March 30, 1977.

Hon. CYRUS R. VANCE,
Secretary of State,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: It is our understanding that an American delegation will participate in discussions designed to produce an International Sugar Agreement beginning on April 18 in Geneva.

The outcome of these negotiations will have a significant impact upon American consumers who purchase approximately 11 million tons of sugar in various forms each year. Each one cent increase in the wholesale price of a pound of sugar costs American consumers more than $200 million in added food costs. It is imperative that any new sugar agreement protect consumers against a reenactment of the Sugar Boom of 1974 when prices rose 400 percent in less than a year, peaking at 64 cents per pound.

International commodity agreements negotiated by the Department of State in recent years have been notorious for their neglect of consumer interests. The International Coffee Agreement, drafted in 1975, provides for quotas to insure a floor price and operates to maximize coffee consumption without giving consumers any source of relief from the excessive prices currently charged by coffee producers.

At negotiations preceding the formulation of the International Coffee Agreement, the United States was represented by a delegation which included trade advisors from the domestic coffee industry. It is our understanding that advisors representing the domestic sugar industry will participate in the delegation which will attend the upcoming negotiations at Geneva. We believe it is imperative that a representative of American retail consumers participate in the delegation as well. We therefore request that you invite a qualified consumer representative to serve in an advisory capacity to the United States delegation at Geneva next month and in any future meetings of an International Sugar Organization.

Cordially yours,

Robert F. Drinan, Frederick W. Richmond, Millicent Fenwick, Joshua Eilberg, Augustus F. Hawkins, James H. Scheuer, Herman Badillo, Edward I. Koch, Peter W. Rodino, Robert N. C. Nix, Richard L. Ottinger, Leon E. Panetta, Parren J. Mitchell, Herbert E. Harris, Allen E. Ertel, and Thomas J. Downey.

On April 6, 1977, I sent a telegram to Assistant Secretary Katz asking for the names of any consumer representatives or trade advisers which would accompany the U.S. delegation to Geneva. Mr. Katz responded on April 9 that the composition of the delegation had not yet been finalized. On April 18, the day the negotiations opened, I was pleased to re-

ceive the following telegram from Assistant Secretary Katz:

TELEGRAM

Congressman ROBERT F. DRINAN,
House of Representatives,
Washington, D.C.:

In my telegram of April 9 I promised to inform you of the names of the consumer advisors on the delegation to the negotiations for an international sugar agreement as soon as they were available.

They are:

Dr. Carmen Busquet, Secretary of Consumer Affairs, Commonwealth of Puerto Rico.

Mrs. Joan Braden, Consumer Affairs Coordinator, Department of State.

Professor Steward Lee Richardson, Jr., Chairman, Department of Marketing, Louisiana State University, and President, Consumer Federation of America.

You also asked for the names of all trade advisors. They are:

Richard W. Blake, National Sugar Beet Growers Federation, Greenley, Colorado.

David C. Carter, United States Beet Sugar Processors Association, Washington, D.C.

Charles Harry Falk, New York Coffee and Sugar Exchange, New York, New York.

Horace D Godfrey, American Sugar Cane League, New Orleans, Louisiana.

Edward B. Holyrode, Hawaiian Sugar Planters Association, Washington, D.C.

Andrew J. Mair, American Farm Bureau Federation, Washington, D.C.

Charles Azerow of Sucrest Corporation representing United States Cane Sugar Refiners Association, Washington, D.C.

Henry Francis Wanning of the Coca Cola Co., representing Industrial Sugar Users, Atlanta, Georgia.

These are all the non-governmental advisors accredited at the present time. Some of the industry advisors may be replaced by others representing the same trade or industry group. However, no more than one representative from each association will be accredited at any given time. Only officially accredited members of the delegation are authorized to participate in conference sessions.

JULIUS L. KATZ,
Assistant Secretary of State for Economic and Business Affairs.

It is my understanding that only one of the three consumer advisers will be in Geneva at any time during the 6 week-long set of negotiations. Thus, the consumer presence will obviously be overwhelmed by the large number of industry representatives. Nevertheless, the presence of any consumer voice at all constitutes a major step forward. I am certain that the presence of these consumer advisors will help to prevent the formulation of an international sugar agreement which would serve to "rip-off" American consumers by raising sugar prices to the excessive level they reached in 1974 and 1975. Rather, I am hopeful that any agreement resulting from these negotiations will insure adequate supplies of sugar available to consumers at a reasonable price.

The presence of consumer advisors at these negotiations marks the beginning of a new, more enlightened approach toward American participation in international commodity agreements. We must insist that this approach be furthered through the appointment of other qualified consumer representatives to all forthcoming commodity meetings which exert an impact upon consumer prices. As the Geneva sugar negotiations continue, I will provide my colleagues in the House with periodic status reports. I am certain that we will all be interested in reading the report of the three consumer advisers when they return from Geneva.

PRIVATE COLLEGES ARE OFFERING LOAN PLANS TO HELP PARENTS PAY TUITION COSTS

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. COUGHLIN. Mr. Speaker, I am reintroducing today with four more cosponsors my measure to provide tax credits to help meet the soaring costs of tuition and fees at our institutions of higher learning. A total of 46 colleagues are sponsoring my measure in this Congress.

For those of you familiar with the history of this legislation, I will not bore you with a detailed litany. I only want to note that similar bills passed the Senate in four of the past five Congresses while the House never has been permitted to vote on the legislation.

I am inserting in the CONGRESSIONAL RECORD an article by Sam W. Pressley which was published in the April 17, 1977 edition of the Philadelphia Sunday Bulletin.

His story again illustrates—if there is one among us who ever harbored any doubts—the financial crunch on the middle-income Americans who want to educate their children at colleges and universities.

Moreover, it shows how difficult circumstances are becoming with private institutions beginning to provide their own loan plans to aid hard-pressed parents. Bryn Mawr College, in my congressional district, has created a loan program. Other universities in the East and the West also are offering these loans.

I also am inserting a chart which lists tuition costs and other expenses of colleges and universities in the Philadelphia area. The dollar figures speak far more eloquently than I could of the escalating costs of higher education and the need to provide a measure of assistance to the middle-class Americans—traditionally, the segment of our population which pays the most taxes, provides the stability our Nation enjoys and which, just as often, is forgotten in the talk of "tax reform" and "social justice."

COLLEGE LOANS AID AFFLUENT

(By Sam W. Pressley)

Bryn Mawr College conducted its annual spring rite on Friday.

The private, four-year college on Philadelphia's Main Line sent out letters telling student applicants whether or not they had been accepted for admission in the fall.

But along with 250 of the acceptance letters to those requesting financial aid—something new was added.

Included were brochures informing the students' parents that they could take advantage of a new way of paying for a college education: a Parent Loan Plan.

Several private colleges, aware that their tuition rates are higher than those of public colleges are offering to make loans to families earning between $15,000 and $75,000, at interest rates from 8 to 8.5 percent.

Significantly, this new type of student aid program would make it easier for middle-income families to meet soaring college costs by offering long-term repayment plans.

The plan would enable eligible parents to pay four years of college costs in monthly installments of principal and interest spread out over a six to eight year period. Payments start shortly before the student enters college.

The parent loan plan is a "godsend" to many American families caught in the "middle income crunch," says Jerrold Gibson, director of fiscal services at Harvard University.

The Ivy League university in Cambridge, Mass., pioneered the loan program a year ago.

"Today," says Gibson, "many middle-income families are either too poor to afford ever rising college costs or too rich to qualify for financial aid."

Bryn Mawr is the only Philadelphia area college which has decided to implement the plan this fall. The University of Pennsylvania, Princeton University and Haverford College are considering it.

Most government-subsidized or guaranteed financial aid programs are closed to the relatively affluent.

And in the past, middle-income families either had to borrow at high interest rates to send their sons or daughters to private college; seek low-cost alternatives such as community colleges, or simply forego college for their children.

"In this country, we've been saying a long time about how college should be made available to anyone who wants it, regardless of income," said Deborah Wolk, a financial-aid officer at Bryn Mawr.

But, she said, over the last few years, middle-income families have found it difficult keeping up with the rising costs of living and college costs.

Specifically, the Bryn Mawr program will be geared to this fall's incoming freshman class, but also will be made available to upperclass students, according to Paul Klug, the college's controller.

Other private colleges starting the loan program are Cornell University, Ithaca, N.Y.; Yale University, New Haven, Conn.; Amherst College, Amherst, Mass.; Massachusetts Institute of Technology (MIT), Cambridge, Mass.; and Stanford University, Stanford, Calif., according to the Richard C. Knight Insurance Agency in Boston.

The Knight agency has been retained by the private colleges to administer the program, which involves running credit checks and insuring the loans.

Without such plans, the private colleges fear the middle-income family student will be "squeezed" out of private higher education and the student body will be comprised of the rich who can afford the big bills and the low-income family student who qualifies for subsidized grants from the government and scholarships.

"For most middle-income families," reports the Chronicle of Higher Education, in Washington, D.C., "the problem is not that they don't have the money for college. They don't have it in one lump sum."

Under the Bryn Mawr plan, for example, parents who borrow $6,000 per year, over four years, could pay $360 a month in 80 monthly installments. The maximum repayment term is eight years, with interest on the loans being tax deductible.

For many private colleges and middle income families, the new loan program couldn't arrive at a better time.

Next fall, the highest college costs and the greatest tuition increases will take place at private colleges, according to a recent study by the College Scholarship Service (CSS), the financial-aid arm of the College Entrance Examination Board, in Princeton, N.J.

In the academic year 1977–78, reports CSS, students at private, four-year colleges will face a 6.3 percent increase in tuition and fees.

At Bryn Mawr, for example, tuition and fees will be raised from the current annual rate of $4,225 to $4,275 per year.

In comparison, the College Scholarship Service reported that the average tuition and fees charge at public, four-year colleges will remain virtually unchanged.

Why the disparity?

Essentially, the majority of private institutions earn 70 to 80 percent of their operating revenue from tuition, according to the Washington, D.C.-based Higher Education General Information Systems Office, in the U.S. Office of Education.

Tuition provides about 25 percent of operating revenue at most public-supported institutions, says the Office of Education.

And that's why public colleges cost less.

AREA COLLEGE COSTS

Following are 1977–78 (tuition and fees, room, board and other) charges at Philadelphia area colleges and universities.

College	Tuition and fees	Room board, and other [1]	Total
U of P	$4,450	$3,125	$7,575
Princeton U	4,650	2,875	7,495
Bryn Mawr C	4,725	2,440	7,165
Haverford C	4,420	2,550	6,970
Swarthmore C	4,100	2,460	6,560
Phila. C. of Art	3,630	2,600	6,230
Villanova U	3,150	2,975	6,125
Widener C	3,260	2,340	5,600
Phila. Musical Acad	2,800	2,600	5,400
Spring Garden C	2,660	2,660	5,320

FEDERAL ANNUITY AND VA BENEFITS

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. GONZALEZ. Mr. Speaker, I am reintroducing a bill that I proposed in the last Congress that would discount any Federal annuity when determining VA benefits.

I am hopeful that the Veterans' Affairs Committee will consider this legislation and take a long, hard look at the problems confronting our veterans, especially the elderly, when they receive an increase in other Government annuities including social security benefits.

Those receiving veterans benefits are in a catch-22 situation. They receive an increase in benefits, generally to offset the increase in the cost of living and then find that their VA pensions are cut. They then find themselves continually trying to live in today's economy with yesterday's income as the Government continues to give with one hand and take away with the other.

I do not believe that Congress meant for this type of situation to develop and I feel that we must give this matter serious and immediate consideration.

A veterans' benefits should not be reduced since he is essentially being repaid for the service that he gave to his country in time of need. We must remove the veteran from his current position of financial insecurity and assure him that he should and will receive the benefits that he justly deserves.

LOREL POLLACK: THE VOICE OF AMERICA TO SOVIET JEWS

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. HYDE. Mr. Speaker, many of my colleagues are already familiar with the work of Mrs. Lorel Pollack, a constituent of mine from Oak Park, Ill., but for those who are not, I believe her achievements deserve mention in the CONGRESSIONAL RECORD.

Mrs. Pollack is chairman of the Chicago Action for Soviet Jewry, an organization she founded to provide encouragement, support, and hope to thousands of oppressed Russian Jews.

Mrs. Pollack began her campaign to publicize the plight of Soviet Jews in 1971, and since that time she has helped educate and enlighten many of us to the problems of Jews living in Russia. Perhaps, more importantly, through her personal letters and phone calls to the "refuseniks"—those Soviet Jews who have been denied exit visas—Mrs. Pollack has let them know that we in the free world are aware of their circumstances and are dedicated to the cause of human rights. Many of the Soviet Jews whom Mrs. Pollack personally contacted, were allowed to emigrate only after her tireless efforts in their behalf.

I take great pride in paying tribute to Lorel Pollack for all that she has done—and will continue to do—to advance the cause of human rights and justice for thousands upon thousands of Soviet Jews.

Following are two recent articles about Mrs. Pollack, one from the Chicago Tribune and one from People magazine. I know my colleagues share my pride in her accomplishments to date, and join me in wishing her continued success in her very inspiring and fulfilling work.

The articles follow:

[From the Chicago Tribune, Mar. 27, 1977]

RUSS JEW ASKS: WHAT'S MY CRIME?

(By Jeff Lyon)

The voice coming out of the desktop telephone speaker was crackling like a broadcast from wartime London.

It was fitting As it fought through the static, the voice was a reminder that if the Nazi floodcrest of those times has receded, the water table of human wickedness remains high.

"I am . . . very glad . . . to hear from you, Lorel," Naum Salansky said. He spoke the words like a man fingering suitcoats on a rack, with the deliberation of someone new to English. "The situation is without change," he sighed before the crackle drowned him out.

Lorel Pollack grimaced at the bad connection. She considered hanging up and trying again. But it had taken two hours to reach Salansky in Vilnius, Lithuania. It might take that long a second time, and there would be no guarantee of a better line. So she pressed on.

"No change?" she asked.

"No," Salansky replied in a reedy voice. "Tomorrow will be the next interrogation. And before, it was a week ago another one. It is now more than three months in this investigation work and still now I haven't any information about what is my crime."

Salansky, 41, is a noted Soviet physicist. He is also Jewish and has been denied an exit visa to emigrate to Israel. He's been appealing this.

In December, he was accused of "slanderous fabrications" against the Soviet Union's policy toward Jews. The accusations stem from a seminar in Jewish culture he conducted in his own home.

He has been interrogated repeatedly. His apartment has been ransacked. Searchers confiscated the letters from his mother, who is sick with cancer in Israel.

Salansky's voice crackled out of the speaker again. "My health and the health of my wife is not well," he said. "It is a very serious hard time for us, and the health is not well."

"Is she more ill than she has been?" Lorel Pollack asked.

"The heart is not well. She is only 37, but the heart is not well."

"I am so sorry to hear that," Lorel Pollack said. "But maybe we will hear something new and good soon. We are bringing your message to Cyrus Vance, as you asked us. We are trying to help you because we are your friends and we're concerned and worried about you."

Lorel Pollack is chairman of the Chicago Action for Soviet Jewry. On her desk in her seventh floor office at 618 S Michigan Av., is a thick sheaf of green computer paper with the names of 1,100 Russian families, including the Salanskys. These families are "refuseniks," Soviet Jews who have been refused exit visas.

Merely being Jewish in the Soviet Union is hard enough. The religion and the culture may not be taught. One's internal passport, the document Soviet citizens must use to travel within the country, carries a designation that the bearer is Jewish. No other religion is so treated.

And then there are those guilty of the double crime of being Jewish and wanting to leave.

Some are allowed to go. Others aren't. And life for them becomes dreadful. They lose their jobs. Their homes are vandalized. They are harassed by the secret police [KGB]. Their children are beaten on the playgrounds and ridiculed by teachers in the classroom.

And many refuseniks are put in prison.

"It is bad. Things are getting very bad," Lorel Pollack told me when I walked into her office before the Salansky call.

Several weeks ago, a letter from a refusenik appeared in the government publication Izvestia. The writer said he was repenting his traitorous deeds and accused several of the most prominent and outspoken Jewish activists in Moscow of working with the Central Intelligence Agency to undermine the Soviet state.

The letter claimed the activists had tried to steal state secrets and named some U.S. Embassy officials and American newsmen as their CIA contacts.

Soon after the letter appeared, several activists were arrested, including mathmatician Anatoly Scharansky, the gutsy spokesman for the Moscow Jewish group that has been publicly monitoring the Soviet failure to live up to the Helsinki accord.

Scharansky, a charismatic figure of courage who once reported his KGB tail to superiors for getting drunk and falling asleep on the job, may be charged with espionage. His fate is unclear.

"These Moscow activists enjoyed a certain amount of immunity from the worst persecution for years," Lorel Pollack said. "Up to now, they were protected by their ties to the West because they were well known and had established relations with the foreign correspondents.

"They had been a source of strength and encouragement to their fellows in the Soviet Union," she said, asserting that the Kremlin may be trying to intimidate and demoralize the rest of the Jewish activists.

It will make Chicago Action and its 20 counterpart volunteer organizations in such other cities as Philadelphia; San Francisco; and Montgomery, Ala., work all the harder.

Their activities include an intensive lobbying effort to get congressmen and senators to pull whatever strings they can on behalf of the refuseniks. They prod the media to publish the most dramatic cases of repression.

At the heart of Chicago Action is Lorel Pollack, an energetic woman who traces her Jewish heritage back to Don Yitzak Abravanell, a Sephardic Jew who served in the court of Ferdinand and Isabella of Spain. Lorel Pollack's grandfather escaped Russia by swimming across a river in peasant woman's clothes as Czarist soldiers shot at him.

"The Jews in Moscow are in shock," she says. "They say it is almost like being thrust back into the dark days of Stalin."

But she thinks there are some things that will continue to sustain the 3 million Soviet Jews. One is a certain grim courage; the other is an improbable sense of humor.

"The Jews there tell a lot of jokes," she says. "You die if you don't hang onto your humor."

It is noon and Lorel Pollack is talking to Salansky. She is asking him if he and his family will be able to celebrate Passover, which begins next weekend.

"We will try to do it. We will try. We have matzos. We were able to prepare it here," Salansky's crackling voice answers.

"Naum," Lorel Pollack says. "At our home, we will set aside a place at our Seder table to remember you and all our friends in the Soviet Union. I'll try to call you during the holiday. Our love to you. Shalom."

A very faint voice answered "Shalom." And then the static took over.

FOR DOZENS OF OPPRESSED SOVIET JEWS, LOREL POLLACK IS THE VOICE OF AMERICA

They call themselves "refuseniks"—Soviet Jews who have applied to leave the USSR and have paid for it in persecution. For many of these would be refugees, virtual prisoners in a hostile society, Lorel Pollack and hope are synonymous. Consider the testimony of Dr. Irma Chernyak, a Soviet mathematician who emigrated to Israel in 1975. "Immediately after applying for an exit visa I was thrown out of my job," he recalls. "My telephone was cut off. I was alone. Then one evening I went home and found Lorel. She came like a light in the darkness—like someone from another planet."

Actually, Mrs. Pollack is profoundly terrestrial—a 43-year-old Jewish mother from Oak Park, Ill., who has adopted the refuseniks like so many orphans. Working out of a cramped office in Chicago's Spertus College of Judaica, or the surburban home she shares with her ad executive husband, Sheldon, and their two sons, she offers aid and encouragement to those whose visas are still in doubt. Keeping the overseas circuits humming, she has run up phone bills of $300 and $400 a month before the irritated Soviets began taking out the telephones of some refuseniks. "Those calls were cheap," Mrs. Pollack maintains. "I always assume that the secret police listen in, and that everything I say to my friends I say to the KGB too. So I end up sending direct messages to the Soviet government for a mere four dollars a minute. I tell them, in effect that this person is known, and if you harass or arrest him all hell will break loose in the Western press."

The descendant of a Russian refugee grandfather (who fled the czar's troops dressed as a woman), Lorel was born and brought up in Oak Park. Though she taught kindergarten in Jewish schools, she was neither devout nor politically active. Her conversion came at a 1971 meeting of her Hadassah group. "The speaker was saying, 'You can write. You can call,'" she remembers. "I saw all these people in the audience nodding in agreement, but no hands went up. Suddenly I found myself on my feet saying, "Why sure, we can call Russia!'"

Using phone numbers provided by a loosely strung global network of Jewish volunteer groups, Lorel placed her first call that November. It was to Vladimir Slepak, now a member of the committee monitoring the Helsinki agreement, which, like Jimmy Carter, has been challenging the Soviet position on human rights. As Lorel's involvement deepened, she began devoting up to 60 hours a week to the refuseniks, phoning, writing and lobbying furiously in their behalf all over the Midwest and in Washington. For awhile she slept in the kitchen to grab the phone so that late calls wouldn't wake up her family. Once, in 1972, she got through to a refusenik (now in Israel) moments after the KGB had broken into a Moscow dinner party and arrested New York Congressman James Scheuer. Lorel called the *New York Times* and the wire services, and western newsmen were hounding Soviet officials with queries even before the embarrassed Soviets could notify the U.S. embassy of Scheuer's detention.

Though Lorel has cut down on her phone contacts with the refuseniks—partly out of fear that Moscow might retaliate by isolating them entirely—she still believes that some calls should continue. "Sometimes we wonder if it helps," she admits, "but the people on the other end always tell us to keep it up. And the Russians do fear U.S. opinion," she adds proudly. "In 1969 the Soviet Union allowed almost no Jews to emigrate. Now the figure is a fairly steady 1,000 a month."

AG RESEARCH AND EXTENSION EARN THEIR KEEP

HON. JOSEPH S. AMMERMAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. AMMERMAN. Mr. Speaker, a recent headline in one of my State's most important agricultural journals, the Pennsylvania Farmer, quickly caught my eye. It reads, "Ag Research and Extension Earn Their Keep."

There is little question in my mind that our cooperative extension service and agricultural research are two of our most important agricultural programs. I have observed that firsthand in a longtime acquaintance with one of the Nation's best ag research programs, as well as a highly effective cooperative State extension service, operated by the Pennsylvania State University.

Yet both of these activities are in financial trouble across the Nation, caught in a vise between constant or declining budgets on the one hand, and the inexorable push of inflation on the other. I was surprised to learn that my neighboring State of New Jersey is actually proposing to cut its ag research funds by $1 million this year.

The extension program is undergoing a continuing decline in the purchasing power of the resources it receives. We saw the loss of 453 professional positions nationwide in fiscal 1976, and a further decline of at least 500 is expected in fiscal year 1977. In Pennsylvania alone 40 such positions have been lost as a result of the funding crunch.

Mr. Speaker, I want to make known my intention to work to provide sufficient financing to maintain these vital services, and in my opinion that will require more funds. I am informed, for example, that the Carter administration's $115 million fiscal year 1978 request for the extension service represents no change in the funding level from fiscal year 1977, would mean a 13.5-percent decline in real dollars over the last 5 years, and would necessitate the loss of still another 500 professional positions. I plan—and I urge my colleagues to do likewise—to work hard to convince our Appropriations Committee of the need to provide enough additional funds to maintain the purchasing power of the research and extension service budgets.

At this point I would like to include in the RECORD the Pennsylvania Farmer article that I referred to earlier:

AG RESEARCH AND EXTENSION EARN THEIR KEEP

State officials are playing games with ag research and extension funds again.

In Pennsylvania, the cooperative extension service has been forced to "collapse" 40 key positions due to the appropriation droughts of recent years; and ag research has been seriously stunted. Now comes word from Governor Shapp that he has no plans to correct the matter.

In New Jersey, a major battle looms over a $1 million slash in ag research funds. And there is the ominous word that extension funds also have felt the executive axe.

Why this annual hijinks continues is beyond our comprehension. There are few places where the tax buck earns a higher return. There are few public agencies or institutions that perform a greater service.

Article after article in recent issues of this magazine has documented the work of ag research and extension. They include:

The release of the Tetrastichus julis parasitic wasp in Pennsylvania to control the cereal leaf beetle that threatens the state's 375,000-acre oat crop.

Field seeding tomatoes in New Jersey with a "plug" mixture to hasten germination and shorten field time between planting and harvest.

No-tilling corn in crown vetch to save 70 pounds of nitrogen per acre.

Halving fuel requirements in New Jersey greenhouses by solar energy and new insulation techniques.

Blood profiling of dairy cattle to help spot health problems in Pennsylvania herds.

In the March 12 issue alone editors printed dozens of recommendations from extension specialists, ranging from minor elements in cropland to planning new potato storages to controlling nutsedge in corn.

This is technical know-how that helps farmers grow that better crop or store that better potato. In the long run, it'll also keep them in business . . . a $2.3 billion business in Pennsylvania and New Jersey alone.

Information on ag research and extension funding problems are fragmented in our other states, but we can report that in Pennsylvania, the governor completely ignored a special request of $800,000 to restore extension services to the 1970–71 level. And in his proposed budget for the 1977–78 fiscal year, Mr. Shapp, squeezed out a mere 1.9% increase for ag research and extension. In these inflationary times that's like throwing a bucket of water to a drowning man.

The University estimates inflationary cost increases at 7.7%, so ag research and extension will slip even further in the economic quicksand if the governor has his way.

How bad is it? In 1934, Pennsylvania's Cooperative Extension Service ranked 25th among the states in support from state funds. That year 42.4% of total extension expenditures were provided by the state. In 1976, the Keystone State ranked 50th as state support plummeted to 26.4%.

The whole land grant college program got its lumps in the governor's budget, actually. And Penn State President John W. Oswald came charging off Mount Nittany earlier this month to lay the facts before the Senate and House Appropriations Committees. They make the ultimate decisions.

Penn State seeks an $18,648,000 increase in appropriations for the whole University system—research as well as resident instructions; the main campus with its 31,777 students as well as the Hershey Medical Center with its 479 future doctors; and Behrend College, Capitol Campus, King of Prussia and 17 Commonwealth campuses with their 21,107 pupils.

That works out to only $368 more per pupil even if the whole bag of cash were being laid on the students . . . which it isn't. Ag research, the cooperative extension service, fuel and utilities, student aid and such mandated benefits as social security and retirement programs also are covered in the budget request.

What the governor recommended in way of extra dollars was $3,002,000.

Dr. Oswald came to the Assembly hearings with enough facts and charts to choke a computer. Rampant inflation happens to be Penn State's biggest financial problem. And President Oswald stated it well.

While Commonwealth appropriations to Penn State increased $74 million between 1971–72 and 1976–77, he said net purchasing power increased just six-tenths of 1%. Yet during the same period enrollment increased 15%.

In terms of 1971–72 dollars, that means appropriations per full-time student declined from $1398 five years ago to $1218 during the current college year.

Even if the total appropriation requested by Penn State was approved by the General Assembly, the number of dollars in 1971–72 purchasing power would be $1323 per pupil in the upcoming college year—still $65 shy of the 1971–72 school days.

But back to ag research.

"Conservative calculations place the current potential economic values to the Commonwealth of Penn State's applied research development in agriculture and food production at a minimum of $118 million annually," Dr. Oswald testified. And we think him modest.

And about extension.

Dr. Oswald, an old aggie, pointed out that extension continues to be a primary source of information for Pennsylvania's billion-dollar agricultural industry. For specifics, he mentioned the Pesticide Certification Program with 16,000 signed up the first year and another 29,000 to go.

We cannot help but wonder how dairymen James and Furry Eshelman of Bedford county, Pa., would have made out with their near epidemic of repeat breeders if Penn State hadn't provided a blood profiling service as part of its research.

By drawing blood and sampling the feed, we report in the March 12 issue, scientists found the cows had an excessive calcium intake but were not getting enough phosphorus or magnesium.

The Eshelman's reworked their rations, and the problem all but disappeared.

Such demand for first-aid from ag research and extension specialists is endless—by orchardists with fire blight, potato growers with late blight, farmers trying to pick and choose herbicides for their corn crop. You name it.

And with farmers tightening their belts this year due to their own problems with inflation and income, this help becomes even more critical.

This is the year for the state legislators to pump in those extra dollars . . . to bring ag research, extension and the full land grant college system up to 1971–72 standards.

That's not asking for more. It's only asking for as much as we once had.

JOINT FINANCIAL STATEMENT

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mrs. SCHROEDER. Mr. Speaker, continuing a practice I have followed since my election to Congress in 1972, I am releasing information from my 1976 Federal and State income tax returns.

I and my husband, filing jointly, paid $19,359 in Federal income and self-employment taxes and $2,329 in Colorado State taxes. Our 1976 gross income was $77,948.

I am also releasing a joint financial statement with my husband showing net worth as of December 31, 1976, of $139,929.

Details from our tax returns are set out below:

Line 9 of my joint personal Federal income tax return, form 1040, filed with my husband, James, shows my congressional salary of $44,600. Line 10c shows net dividends of $631. Line 11 shows interest income of $1,778. Line 12 shows other income of $30,939 consisting of: the net income from my husband's law practice of $29,006; income from the rental of our house in Denver of $1,061; net losses on stock and from partnership investments of $3,874; and my net income from honoraria and fees of $4,746.

Our total income as noted on line 13 was $77,948. Line 14 shows $5,077, adjustments to income that included certain congressional expenses in excess of amounts reimbursed, such as travel expenses, an allowance for living expenses while attending Congress in Washington, and payments to my husband's individual retirement account. Line 15 shows an adjusted gross income of $72,871.

Form 1040, schedule A, shows total deductions of $15,095 on line 40, consisting of medical expenses of $150; State and local taxes of $2,366; interest expense of $4,715; charitable contributions of $3,332; miscellaneous congressional expenses of $4,332; and political contributions of $200.

The total Federal income tax and self-employment taxes due and paid, as shown on line 22 was $19,359. In addition my husband and I paid State income taxes to the State of Colorado of $2,329.

All receipts and expenditures of campaign funds have been handled by the Schroeder for Congress Committee, which has, in accordance with Federal laws, filed periodic reports with the Federal Election Commission and the Colorado secretary of state. The committee has also filed appropriate Federal tax returns.

I include the following:

Joint Financial Statement: James W.—JWS—and Patricia Schroeder—PS—December 31, 1976

ASSETS

A. Bank savings and other deposits—excluding current checking account balances and miscellaneous cash on hand on December 31, 1976; and deposits credited to PS Federal Retirement Fund and JWS Individual Retirement Account.

Patricia Schroeder (PS)	$26,417
James W. Schroeder (JWS)	7,614
Joint (JT)	176
Total	34,207

B. Securities—excluding stock owned in closely-held, family-owned companies without readily ascertainable market value and in JWS HR–10 plan trust.

100 Colorado National Bankshares, Inc. (PS)	[1] 1,578
200 Goodyear (JWS)	4,750
200 Rival MFG Co. (JWS)	4,050
100 Public Service Co. of Colo. (JWS)	1,900
50 RCA (JWS)	1,343
1500 Timpte Inds Sub SF Debs (JWS)	1,470
100 Purex (JWS)	1,900
80.6 Affiliated Fund (JWS)	684
230.7 Founders Growth Fund, Inc. (JWS)	1,089
1 "E" Bond (JT)	25
Total	18,798

C. Miscellaneous—excluding JWS law partnership investment and capital account.

1.2 percent limited partnership interest in Larimer Square, Associates (JT)	8,084
Life insurance cash value (JWS)	2,740
Total	10,824

D. Personal property:

Automobiles (1973 Olds and 1969 VW)	2,500
Miscellaneous (estimated)	17,500
Total	20,000

E. Real estate:

1440 High, Denver, Colo.	68,000
4102 Lester Ct., Alexandria, Va.	66,300
	134,300
Total assets	218,129

LIABILITIES

A. Real estate mortgages:
1440 High, Denver, Colo. (Capital

[1] Purchased July 25, 1972.

Federal Savings, Denver, Colo.)	15,600
4102 Lester Court, Alexandria, Va. (B. F. Saul Mortgage Co., Bethesda, Md.)	48,600
Total	64,200
B. Other—excluding current credit card, utility and miscellaneous accounts payable December 31, 1976, paid monthly as due.	
Bank Loan (JWS) (United Bank of Denver)	5,000
C. Contingent:	
Federal and state taxes estimated due in excess of withholding	9,000
Total liabilities	78,000
Net worth	139,929

SLICING THE USDA'S BUREAUCRACY

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. SYMMS. Mr. Speaker, the examples of governmental waste and inefficiency are numerous and the excessive Federal bureaucracy has become a very popular topic in Washington these days. It is my hope that this talk and interest can be transformed into true reform and that we can begin curbing and cutting back on the Federal Government's budget. The best line of defense against inflation and unemployment is a balanced budget. The best way to get to a balanced budget is to cut back on the ever-enlarging Federal Government bureaucracy.

The following article on the U.S. Department of Agriculture's Bureaucracy appeared in the April 16 issue of the Packer newspaper. I urge my colleagues to read the article that follows and ask themselves how many other Government agencies have the same problems.

The article follows:

SLICING USDA'S BUREAUCRACY

Much attention has been given in recent years to the excessive federal bureaucracy and the frustrations involved in trying to cut it down to an efficient size. President Carter seems to be serious in his efforts to finally do something about it, but only time will tell.

A good place to start, according to a recent article in the Wall Street Journal, is the U.S. Department of Agriculture (USDA), which with 80,000 full-time employees, has one bureaucrat for every 34 U.S. growers, which appears to us to be a gross oversupply of manpower.

Admittedly, we have not conducted our own investigation into the subject, but our observations over the years would confirm some of what the Journal reports.

This is not to say, of course, that all USDA employees are "loafers." In fact some segments of the USDA, such as the Beltsville (Maryland) research station, are actually understaffed and underfunded. The industry also is aware of the financial problems of the Perishable Agricultural Commodities Act, which is funded by the produce industry and thus is not a taxpayer burden.

Nevertheless, it does appear that many USDA programs have been kept alive long after they were necessary. The Journal reported, for example, that one employee, whose annual pay is $28,000, spent the entire year trying to assess the adequacy and timeliness of the department's fats and oils publications. This year he is planning another study, this one designed to justify the use of satellites to forecast crop production.

The department is also reportedly one of the government's top three publishers, with a $16 million annual printing bill. Part of that goes to print 28,000 type of forms used internally to keep track of department activities.

The report also states that "dead weight" is rewarded at the USDA, rather than abolished. An internal memo shows that of the 45,000 employees eligible last year for merit pay increases, 44.956 received them.

Motivation is difficult for many employees, according to the article, because their tasks seem pointless. One USDA man in the department's Agriculture Marketing Service spent much of last year drafting a standard for watermelons, including sketches illustrating a good one.

"He concedes that the standard which defines a bad melon in terms of its deformities and disfiguring spots is rarely used by growers or retailers. Anyway, he said, most consumers know a good watermelon when they see one," according to the Journal.

The report went on to say that Ava Rodgers, the department's deputy assistant administrator for home economics, spends half her time traveling the country to coordinate activities of 4,000 home economists. Asked to describe a typical day in her office, Rodgers said, "I've answered the phone a couple of times this morning. That's about it. It's a normal day" She is paid $33,700 a year.

Such a bureaucratic mess has at least one consolation—it offers an excellent lesson in the advantages of the free enterprise system. Private companies, who have the profit motive as an incentive, cannot afford to keep the waste and "dead weight" around. They must be efficient to stay alive and prosperous. The government, on the other hand, has grown accustomed to large deficits and the easy solution of printing money.

The situation also raises many questions, such as whether the government is involved in too many areas that should be left to private industry.

We would venture to say that the agriculture department budget and programs could be cut by 33 per cent without losing effectiveness. The ideal thing to do with some of the money saved would be to beef up steadily dwindling agricultural research funds. This would be a great service to consumers and farmers alike and would be an efficient use of taxpayers money.

MR. AND MRS. FRANCIS PARRISH RETIRE

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. APPLEGATE. Mr. Speaker, this past March, Mr. and Mrs. Francis Parrish retired from the auditor's office of Harrison County, Ohio, after 18 dedicated and loyal years. Mr. Parrish was the county auditor while his wife, Pauline, served as deputy auditor.

During their employment they kept all of Harrison County's financial records in order and updated. They always managed the office with a high degree of efficiency and served the people of Harrison County well.

Their dedication, civil mindedness, and willingness to promote and manage the financial affairs of the county will be greatly missed.

NEW LOOK AT FEDERAL DOCUMENTS

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. BYRON. Mr. Speaker, on May 12 and 13, 1977, the College of Public Affairs of American University will sponsor a Federal Publishing, Printing, and Information Policy Institute.

This institute will address such questions as what are the policies that affect publishing, printing, and information services of the Federal Government? What are the problems? How can they be solved? What are the economics behind them? And, is the public interest maintained?

This institute will be of benefit to all who have an interest in Federal publishing, printing, and information policy, including users, librarians, publishers, printers, Federal editors, micropublishers, information specialists and others both within the Federal agencies and in the private sector.

The cosponsors of the institute are the American Society for Information Science, the Association of American Publishers, the Government Documents Roundtable of the American Library Association, the Graphic Communications Computer Association, the Information Industry Association, the National Association of Government Commmunicators, and the Printing Industries of America.

I would like to enter into the RECORD at this point a copy of the program of this institute, since I am sure that it will be of interest to many of my colleagues and the other readers of the RECORD. I would encourage interested individuals to contact the Institute on Federal Publishing, Printing and Information Policy, College of Public Affairs, the American University, Washington, D.C. 20016 (202/686-2513). The Institute Director is Prof. Lowell Hattery, who is to be commended for his foresight and dedication in putting this outstanding program together.

The program of the institute follows:

NEW LOOK AT FEDERAL DOCUMENTS—PROBLEMS AND SOLUTIONS

For the first time the views of all interested parties will be brought together to focus on a single, baffling, multifaceted problem—moving Federally developed information to the user expeditiously, economically and effectively. At the forum, experts from printing, publishing, information sciences and the user community—government and private—will share their viewpoints. Participants will take part in the discussion.

Background papers, along with other relevant documents, will be distributed to participants to achieve better knowledge, understanding and assessment of Federal policies.

PROGRAM

May 12, 1977:

8:00-9:00, Registration.

9:00-9:15, Federal Publishing, Printing and Information—System Looking for a Policy; Lowell H. Hattery, Institute Director and Professor of Management and Public Administration.

9:15-10:00, GPO Policy—Past, Present, Future, Thomas McCormick, Public Printer,

U.S. Government Printing Office. A National Information Policy, Quincy Rodgers, Former Executive Director, Committee on the Right of Privacy, the Domestic Council.

10:45-11:00, Coffee.

11:00-12:00, An "Ideal" Federal Printing Program, Frederick Dyer, Former Director, Program Analysis, U.S. Navy Publications and Printing Service.

Discussant, James Murray, Former Chief, Publishing Services, U.S. Internal Revenue Service.

12:00-1:15, Lunch.

1:15-2:45, Federal Document Availability, James Adler, President, Congressional Information Service, Dr. Mabel Deutrich, Assistant Archivist, U.S. National Archives and Records Service; William T. Knox, Director, National Technical Information Service.

2:45-3:00, Coffee.

3:00-4:30, Government Documents and the Library, Bernard Fry, Dean, School of Library Science, Indiana University, Bloomington, Indiana.

Disscussants: Bernadine Hoduski, Special Library Assistant, U.S. Congressional Joint Committee on Printing; Marylou Knobbe, Librarian, Metropolitan Washington Council of Governments.

May 13, 1977:

9:00-10:30, Federal Micropublishing Policy, Henry Powell, Manager, Federal Programs, Bell & Howell.

Discussants: Jim Livsey, Director, Library and Statutory Distribution Service, U.S. Government Printing Office; James Meredith, Chief, Learning Resources Center, Governor's State University, Park Forest South, Ill.; Stevens Rice, Vice President, Editorial Development, University Microfilms, Inc., Ann Arbor, Mich.

10:30-10:45, Coffee.

10:45-12:00, Future of Printing: Impact of Technological and Other Changes; Gilbert Bassett, Executive Director, Graphic Arts Technical Foundation, Pittsburgh, Pa.

Discussants: Paul Howerton, Consultant, Information Science & Technology; Hans Nickel, President, International Computaprint Corp., Fort Washington, Pa.

12:00-1:15, Lunch.

1:15-2:00, What Is a "Government" Publication: A Legal Inquiry, Charles Lieb, Attorney, Paskus, Gordon and Hyman, New York, N.Y.; Copyright Counsel Association of American Publishers.

2:00-3:15, Pricing Government Publications, Henry Lowenstern, Associate Commissioner, Bureau of Labor Statistics.

Discussants: Robert E. Ewing, President, Van Nostrand Reinhold Company, New York, N.Y.; H. William Koch, Director, American Institute of Physics, New York, N.Y.

3:15-4:00, Opportunities for Change, E. R. Lannon, Acting Director, Office of Advanced Systems, U.S. Social Security Administration.

4:00-4:30, Closing Remarks—Discussion, Lowell H. Hattery, Institute Director.

ROSA CARTER, NEW PRESIDENT OF UNIVERSITY OF GUAM

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. WON PAT. Mr. Speaker, on April 3, 1977, Dr. Rosa Carter became the third president of the University of Guam. This marks the first time in the 25-year history of the University of Guam that a woman has held the position of president. Dr. Carter is also only the second native Guamanian female to earn a doctoral degree. I would like to take this opportunity to extend my congratulations to Dr. Carter and bring to the attention of my colleagues some of the accomplishments of this fine woman. The following is from the March 1977 issue of the Guam Teacher Corps Newsletter:

For the first time in the 25 year history of the University of Guam, a woman has been selected President. Dr. Rosa Roberto Carter has been named President of the University of Guam. She succeeds Dr. Antonio C. Yamashita.

On Wednesday, March 9, 1977, the Board of Regents announced the selection of Dr. Rosa Roberto Carter as the next President of the University of Guam effective April 3, 1977. Board Chairman, Mr. Mark Pangilinan said that Dr. Carter was selected unanimously by the Regents.

Board Chairman Mr. Pangilinan said that the task of selecting a President for the University was not an easy one for the Board as the other applicants have meritorious qualifications. But the Regents felt that in selecting Dr. Carter, it has chosen the candidate who will be most effective in providing the kind of leadership which the University of Guam needs to enhance the advancement of higher education in Guam and to foster public confidence in and support for the institution and the academic community.

A native of Guam, President Carter received her B.A. in history and elementary education from Northern State Teachers College, Aberdeen, South Dakota; her M.S. in counseling and guidance from the University of Northern Colorado, and her Ph.D. in educational administration from Bowling Green State University, Ohio. Dr. Carter formerly served the University of Guam as Director of Admissions and Registration and as a faculty member for 12 years.

She is a member of several civic and professional organizations.

She is married to Mr. Lee D. Carter, Assistant Professor at the University of Guam.

OUR NATION SALUTES MISS HEATHER ROBIN GANCARCIK OF CLIFTON N.J., FOR HER VOLUNTEER WORK WITH THE YOUTH DEPARTMENT OF THE DIOCESE OF PATERSON

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ROE. Mr. Speaker, lest there be any doubt the American Dream and the ability of future generations to cope with the challenges that lie ahead, I would like to call to the attention of you and our colleagues here in the Congress the story of a young lady in my congressional district, Miss Heather Robin Gancarcik, who personifies the youth of America in their dedication to people, purpose and progress that has placed our country, second to none, among all nations throughout the world. The spirit of '76—the inspiring, pioneering, enterprising spirit of our forefathers in the founding of America over 200 years ago—continues to be held steadfast within the principles and ideals of our youth.

Miss Gancarcik is a young lady who resides in my congressional district and at the young age of 12 years has drawn the admiration and appreciation of all of us for her volunteer work with the youth department of the Diocese of Paterson. Her standards of excellence and initiative in seeking to help her fellow man have truly enriched our community, State, and Nation.

Heather's outstanding contribution to our American way of life was brought to my attention through a letter addressed to me by an American Women's Committee to Help Honor Heather. I am pleased to share the pride of the people of our community so eloquently expressed in the preamble of the committee's letter to me which stated:

Our purpose in writing this letter is to tell you about a little girl that lives in our home town which is in your district. A girl that comes but once in a lifetime, a girl who we believe typifies the ideal American. A young energetic girl so different, good, unselfish with so much love it makes one proud to be an American. . .

Mr. Speaker, I would like to insert at this point in our historical journal of Congress a recent news article that appeared in a local newspaper which was forwarded to me by the committee to tell the story of Heather Gancarcik and let our people know that Heather and her deeds are appreciated and not taken for granted. The news article reads, as follows:

TWELVE-YEAR-OLD CLIFTON GIRL SPENDS HOLIDAY TIME AT YOUTH DEPARTMENT

PATTERSON.—An enterprising 12-year-old Clifton girl has found an excellent way of utilizing free time during school holidays.

She is Heather Robin Gancarcik, daughter of Joseph Gancarcik and the late Mrs. Gregg Gancarcik, and she is a sixth grade student at SS. Cyril and Methodius School.

Heather thought she "had too much time" on her hands during the school holidays so she offered her services to the diocesan Youth Department here.

At the office, she has performed many light clerical functions, assisting with filing, typing, stapling, the operation of the photostat machine, helping in the print shop, and being a good "gofor" for the CYO staff, according to Dr. Daniel Graser, department director.

Dr. Graser paid high tribute to Heather, indicating "she is indeed a well mannered young lady with a strong desire to be of public service."

Heather is a member of Girl Scout Troop 348 in Clifton and a member of the Clifton Girls' Club. She also belongs to the school-sponsored Human Rights Club and the Junior Sodality. Her many activities include classes in cheerleading, baton twirling, swimming, gymnastics, sewing, cooking, jazz, and acrobatic dancng.

She told Father Stephen Salata of the Youth Department staff that her favorite subject in school is English and that she has written several poems. Father Salata said the CYO staff was so impressed with her vitality that they got together and asked Dr. Graser to present Heather with a small check in appreciation for her cheerful services.

"This is my first paycheck," Heather said accepting the money.

Asked what she really likes to do. the most, she replied, "anything that helps keep me busy and helps other people at the same time."

Otherwise, she said, she likes to go horseback riding, engage in active sports, such as basketball; cook, sew and play the organ.

Mrs. Angie Naelon and Miss Dottie Boyko of the CYO administrative staff, both agree that "Heather's presence is like a breath of fresh air."

Mr. Speaker, it is indeed a privilege to seek this national recognition of Heather and ask that you join with me in saluting her unselfish, diligent endeavors to be of help to others, and by her good deeds, help make our country a better place to live in. We do indeed salute Heather Gancarcik for the difference she is making toward the future of America, adding to the quality of life for all of our people.

A-7E AIRCRAFT: LOW COST AND HIGH CAPABILITIES

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. TEAGUE. Mr. Speaker, during the consideration in the House tomorrow of H.R. 5970, Department of Defense authorizations for fiscal year 1978, an amendment will be made to delete funding for the A-7E light attack aircraft.

Before my colleagues vote on this amendment, I would like to make available to them several statements made by Admiral Turner, Deputy Chief of Naval Operations for Air Warfare, in testimony before the Senate Appropriations Committee on March 10, 1977.

Admiral Turner straightforwardly points out the low costs and high capabilities of the A-7E—good reasons for defeating the amendment and thereby continuing production of the A-7E, which the Navy needs in order to maintain the effectiveness of its carrier forces.

SUBJECT OF HEARING: AIRCRAFT PROCUREMENT, NAVY (APN)

A-7E CAPABILITY

Senator INOUYE. Is it not true that in the A-7E the Navy has a light attack aircraft capable of carrying very large loads of air-to-surface weapons to distant targets, for which the weapon control systems in the airplane provide highly accurate target impacts?

Admiral TURNER. The A-7E is a very capable light attack aircraft with excellent range and payload characteristics. It is capable of carrying and delivering most of the Navy's air-to-ground ordnance with extremely high accuracy.

A-7E DOLLAR VALUE

Senator INOUYE. It is my understanding also that the unit price of the A-7E is low—as combat aircraft costs go these days—so that this aircraft does in fact offer a high measure of target destruction potential for the dollar investment? In other words, is the A-7E very cost effective?

Admiral TURNER. With a flyaway cost of approximately $5.0M, the A-7E is the least expensive carrier-based tactical aircraft in production today. In view of its demonstrated capability and reliability, the A-7E would have to qualify as a very cost effective and very satisfactory light attack aircraft.

A-7E PROCUREMENT HALT

Senator INOUYE. Was it the Navy's decision to cancel A-7E procurement for Fiscal Year 1978?

Admiral TURNER. No. The decision to cancel A-7E procurement originated in the Office of the Secretary of Defense.

A-7E PROCUREMENT APPEAL

Senator INOUYE. Did the Navy appeal or reclama the decision to cancel the procurement of the A-7E?

Admiral TURNER. Yes, sir, the Navy did submit a reclama to the OSD decision to terminate A-7E procurement. The Navy requested the procurement of the six aircraft which were deleted from the FY-78 budget. That reclama further stated a requirement for the procurement of 36 A-7Es subsequent to the FY-77 buy to preclude a light attack force level shortfall.

THE REGIONAL ENERGY PERSPECTIVE

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. HARRINGTON. Mr. Speaker, I would like to share with my colleagues a recent article by Amitai Etzioni entitled, "The American OPEC Versus New York." This article appears at a particularly opportune moment since it deals with an issue central to the energy message that President Carter will deliver in joint session this evening.

Mr. Etzioni convincingly reports on the massive regional redistribution of income that is occurring as energy-poor New England imports its energy supplies from producing States in the South and West. Unless extraordinary remedial measures are instituted, future energy cost increases will only exacerbate this situation. That means, of course, that those States least able to afford the increases will again foot the energy bill while producing States which are comparatively well off will reap windfall profits. This violates the spirit of regional cooperation that has been evident over the first 200 years of our Nation's history and has social and economic consequences too serious to ignore. It will be one of the fundamental criterion against which Massachusetts and New England evaluate the President's proposals.

To better inform my colleagues on this most important issue I submit Mr. Etzioni's story from New York magazine for insertion in the CONGRESSIONAL RECORD:

THE AMERICAN OPEC VERSUS NEW YORK

(By Amitai Etzioni)

New York finds itself squeezed, this time, by an American OPEC. A coalition of energy-producing states is about to reap enormous fortunes, while energy-consuming states will pay through the nose. The point, hidden by the recent focus on the coming increases in the costs of all the main sources of energy, is that not all parts of America will be hit equally. President Carter is about to unveil to the public and send to Congress his energy policy, already heralded as his administration's single most important item of domestic policy, one which will affect every facet of American life. While the details of the policy will not be known until Congress is through tinkering with the legislative aspects of the program and until its impact works its way through the economy, much attention is focused on its key features; the higher costs of oil, gas, and electricity to be generated in order to encourage individuals and corporations to conserve energy and rely more heavily on coal; a negative view of autos and a favorable view of mass transit; a reluctant acceptance of nuclear energy as a measure of last resort; and a long succession of increases in the energy costs in the future, rather than one big jump.

The point, though, is to repeat that these "nationwide" changes will be much harder on some parts of the nation than on others—indeed, some will swim in money all the way to the bank. Quite simply, any societal change of the magnitude of President Carter's energy policies will mean a "reallocation" of wealth. New York is on the allotted "from" end, while quite a few other states are on the allotted "to" end. And what we are paying for is not just the oil, gas, or coal but, in effect, the tax bill of our fellow citizens who happen to reside in states which float on energy resources.

Leading the group is the American Saudi Arabia—rich in oil, thinly populated—the cold deserts of Alaska. The state already has banked $900 million for the sales of oil leases in 1969. This would not go very far in New York City, but it amounts to $2,250 per Alaskan. Notice we are dealing here not with personal income generated for the citizens but moneys set aside for the state to spend on various public services or to use to replace taxes. Next, Alaska expects to collect almost 20 percent on top of the $8 or so per barrel to flow into the soon to be completed pipeline. At the estimated rate of 1.2 million barrels a day, this amounts to an annual gush of nearly $700 million. This compares to $287 million, the state revenues before the oil "crisis" rained its black gold on Alaska.

Texas, Louisiana, and Oklahoma make up the other main oil sheikhdoms of the American OPEC. Not only do royalties and tax revenues flood into the coffers, but the intensified oil drilling, pumping, refining, and shipping make for more jobs and more local expenditures, which in turn spur all other local businesses. True, some of this largess trickles over into other states and regions, but the first and foremost benefits are local. Indeed, a recent study, "Southern Growth Trends and Future Growth Issues," shows that while the rest of the country suffered a recession, the South suffered much less, and the oil-rich states within it actually prospered. They experienced rapid growth of population, income, and employment, while New York languished. For example, between June, 1975, and June, 1976, the whole Northeast added a net 7,000 new jobs, compared to 521,000 in the South.

As for the future, the American oil sheikhs will attract industry by lower local costs of gas and oil, secure uninterrupted supplies, and lower taxes. Already the energy costs in the Northeast are a staggering 97 percent above the national average. A million BTU's of heat created by natural gas cost $1.23 in New England, compared to 33 cents in the Southwest. With oil revenues flooding in, Texas imposes no tax on personal income or corporate profits, and other taxes are comparatively low.

The American OPEC differs from the foreign one in that the states to benefit from the rising energy prices include not just those states which pump oil and gas, but also those that mine coal. Take Montana: It makes the coal it exports dearer by 30 percent by imposing a "severance" tax on it. This will yield an estimated $39 million in 1977, a hefty sum for a state which is also getting 50 percent of the royalties obtained for all coal extracted on huge federal lands in the state. With a population of only 730,000, the state faces an embarrassment of riches. Funds are flowing everywhere—school improvements, better parks, and so on. Other coal states—such as those in Appalachia—are still poverty-stricken, partly because in the past they let the corporations carry away their coal with litle or no local taxes. But they, too, are catching on.

Still other states, now hit by escalating energy costs, have at least a glowing future. South Carolina is touted as a leader in nuclear-power development. Florida, Arizona, and other Sunbelt states can bask in the

hope of becoming major beneficiaries of the least polluting, least labor-intensive, and most nearly inexhaustible energy source: the sun.

By contrast, New York—together with New England—is stuck for the foreseeable future with high dependency on oil and gas, costliest of the energy sources. For this and other reasons, New York electricity rates are among the highest in the nation. If scarcity requires converting utility plants to coal, an expensive undertaking, New York will have to bear more of the expense than states already relying heavily on coal or those which have their own supplies of gas and oil. There simply is no equal national sharing of these bounties. Sure, New York may benefit from a few oil leases off Long Island, and it may try to recycle its garbage—even set up windmills. But by and large, our energy future is one of costs which will be higher than those paid by many states, and continued pressure from industries and individuals who will threaten to move unless we offer them this or that concession.

Those of us who wish to stick around will have to work longer for whatever we buy. Instead of paying these higher prices to the Arabs, Norwegians, Scots, and Canadians, we shall be paying them to some of our fellow Americans to keep their taxes low and services high.

What can we do? One school of thought urges us, albeit not exactly in these words, to breathe less. If we would just lower our clean-air code a few notches, we are told, Con Edison could burn a lower-grade (higher in sulfur) oil, or even use coal, and we would save millions. Similarly, if we accept the risks and build more nuclear reactors, we may bring enegy costs under control one day. (However, according to Con Ed, even sites now under consideration will not be ready before mid-1990 or so.)

The principal alternative is to tighten our personal and public energy belts. It is not a question of just giving up candy but of truly cutting calories in our energy consumption. Turning off the pilot light, using lower-intensity bulbs, or turning off the lights in rooms you are not in—and damn the electric toothbrush—will save but a relatively few kilowatts per hour. More consequential: Drive less, and slower; walk more; insulate homes and apartments better; close schools in December and January; set thermostats lower; check each appliance for its BTU use; note the differences between self-defrosting refrigerators and the old type, between clothes driers which run for set periods and those which stop once the clothes are dry, between smooth-top and "open" ranges, between dishwashers which have a power dry-cycle and those which do not.

But even if we were to accept higher pollution, take more risks, and use less energy, we ought also to have a good long talk with our fellow states. Subject: the meaning of union. Object lesson: You have for years let us pick up the tab on your poor, sick, old, and many of the nation's immigrants. We have long shouldered an unequally high share of the nation's welfare bill. Why, even the Arabs put some of their riches into an inter-Arab welfare fund. Now that you can afford it, why not help us out by supporting the federalization of welfare and Medicaid, thereby reducing our burden immensely? While you're at it, why don't you support equal national standards for welfare payments? This way, if we must put up with your luring away our industries and middle classes, you'll also get to keep your share of the poor.

And if you are so inclined, you could buy for all families whose income is below, say, $7,500 a year a book full of energy stamps, to be used for purchases of electricity or heating fuel. This would ensure that at the least the poor and near-poor would not be set back too badly by the new energy costs.

We could back up our requests with some political muscle by getting together with the other Northeast states, all in similar predicaments. This might entail turning the Coalition of Northeastern Governors into something more potent than a set of initials which read CONEG, roughly the present status of the group. We would be ill-advised, though, to escalate things to a point where we speak, like Business Week, of the Second War Between the States, let alone call them the "American OPEC" to their faces. Governor David Boren of Oklahoma has already warned us that this phrase gives him a "complex." We are not exactly in a good position to aggravate the American energy-rich.

Finally, while we had better not mention our position as the nation's financial and cultural capital lest the energy-rich seek to buy and cart away those institutions, let us just ask them how they would feel were we to charge extra for our natural resources, such as they are or may one day be? Is not the purpose of union to share and share alike?

TRIBUTE TO KARL KATSU NOBUYUKI

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. ANDERSON of California. Mr. Speaker, on April 28, 1977, a very special individual will be honored at a banquet in the city of Gardena, Calif. Karl K. Nobuyuki, commu ity resources administrator for Gardena, is leaving to assume his new duties as national director of the Japanese American Citizens League.

Karl Katsu Nobuyuki was born on May 20, 1945 in Gila Rivers, Camp A, a relocation camp in Arizona during one of the darker periods of natio al policy toward any minority group in our country's history. His family moved to Los Angeles after the conclusion of World War II, and Karl grew up in East Los Angeles, graduating from Bishop Mora Salesian High School in 1963.

After obtaining an Associate of Arts degree from East Los Angeles College in speech/communications, Nobuyuki attended the University of Southern California. He obtained his A.B. degree in 1971, with the speech/communications major. Karl's outstanding academic record was reflected in his many awards, including a Bank of America Outstanding Student Award, a Forensics Scholarship to USC, and an Arthur J. Baum Scholarship Award. In addition, Karl was an active member of the debate team, and was a national finalist in the All Inter-Collegiate Forensics Events, and a runner-up in the Phi Rho Pi debate championships.

After working as a retail clerk and as program director for Go For Broke, Inc., a self help organization which he helped to establish, and as a consultant for affirmative action programs, La Raza Associates, Karl moved to the South Bay area. In 1971 he began to work for the city of Gardena as director of the Department of Youth and Community Services. He was responsible for reorganizing the department and expanding its services to include a broad range of services.

In 1974, Karl became the city of Gardena's first full-time grants administrator, and in 1975 added the duties of public information officer to his already busy schedule. In the same year his title became the city's Community Resources Administrator, where he served until his appointment by the Japanese American Citizens League.

The JACL is an organization consisting of over 100 chapters in 36 States. As a human rights organization, it should prove to be a line of work especially fitted to Karl Nobuyuki's talents and interests. Besides his varied official duties, Karl has long been an active and involved member of his community.

A commissioner on the Los Angeles County Manpower Advisory Council, Karl is Boy's vice president of Gardena Friends of Richard, third vice president of Japanese American Community Services, and is area chairman of the Boy Scouts of America, Explorers. In addition, he is actively involved with the Asian American Voluntary Action Center; the American Red Cross, Gardena chapter; the Mexican American Civic Organization; the Manpower Planning Council of Torrance; and the Japanese American Citizens League, Gardena chapter.

When Karl Nobuyuki moves to assume his new job in San Francisco, he will leave behind many friends and admirers in the city of Gardena and the South Bay area. However, we are pleased that he will be able to utilize his considerable talents and energy on a national level.

My wife, Lee, joins me in congratulating Karl Nobuyuki on his new position as national executive director for the Japanese American Citizens League. I am sure that his lovely wife, Hiromi, and their two children, Craig and Brian, must be very pleased and proud of Karl's latest advancement.

THE ODDS ARE 50–50 THAT YOUR PRIVACY WILL BE INVADED

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. KOCH. Mr. Speaker, there has been increasing concern among the public about the inadequacy of present privacy safeguards on records maintained on individuals by the private sector and on Government access to such records. Indeed a recent Harris poll reports that a 75- to 10-percent majority of Americans thinks that privacy safeguards similiar to those imposed on the Federal Government handling of records by the Privacy Act of 1974 should be applied to the private sector.

The application of such safeguards to the private sector, as well as State and local governments, is what the Privacy Protection Study Commission was set up to study by the Privacy Act of 1974. Representative GOLDWATER, JR., and I were the prime cosponsors of the Privacy Act of 1974 and are proud to have been named as the congressional appointees to

the Commission. After 2 years of extensive hearings and study, the Commission will issue its final report on June 10, 1977.

At that time, BARRY GOLDWATER and I intend to introduce legislation implementing recommendations of the Commission. The legislation will provide proper privacy safeguards for records in such fields as consumer credit, banking, insurance, education, medicine, employment, and research and statistics.

In line with this increasing concern, Businessweek has run a special supplement on the issue. The article covers the issue excellently, and therefore I would like to bring the article to the attention of my colleagues by inserting it into the RECORD:

PROTECTING YOUR PRIVACY

The odds are 50-50 that your privacy will be invaded . . . and before the year is out. Personal records or files concerning you or your family may be secretly gathered, distorted, or in some way misused. Such abuse could cost you a new job, a promotion, or an extension of credit. And it could taint your reputation or hurt you in other ways.

There are more sensational abuses of privacy, of course: the 1-in-100 chance of being wiretapped or "bugged" or even of being spied on by a Peeping Tom—or a wrongful police break-in such as the infamous "Collinsville raid," when Federal narcotics agents 'raided' the Illinois home of Mr. and Mrs. Herbert Giglotto. But the real need today is to safeguard the immense amount of personal information stored in vast files and computer data banks. The threat here is distortion and misuse.

These things can happen to anyone. President Carter appeared in a Justice Dept. file on a Sumter County (Ga.) school investigation. He was supposed to have told the parents of a black child that the child should leave an integrated school or the child's family would be forced to leave its farm. The file came to light in 1976 but proved to be totally false. Even the alleged accuser denied making the charge. The point: It was in the file and subject to misuse.

"Abuse of privacy is an issue that deeply worries more and more people," says Frank T. Cary, chairman and chief executive of International Business Machines Corp. Cary, who admits that computers and data banks have added to the problem, is a leading proponent of safeguarding employee privacy.

The scope of the problem is immense:

THE FILES

The federal government has 17 files on the average individual and sometimes more on executives whose companies deal with the government. The states have almost as much paperwork, and private business is not far behind. Sears, Roebuck & Co. alone has 24 million active credit accounts. Equifax Inc., the giant Atlanta-based credit reporting company, prepares up to 35 million reports a year, including more than 60% of all insurance investigations. "The numbers don't prove abuses," says Ronald L. Plesser, general counsel for the Privacy Protection Study Commission of Congress, "but they show the scope of the problem."

THE LEAKS

Too many files can be seen by too many people. A new study shows that personal medical records, including those of a psychiatrist or psychologist, are often seen by credit investigators, employers, and others. In a current case, a young St. Louis-area executive lost a good job offer because a long-outdated medical file was seen by a personnel manager.

Another new report shows that computerized medicare data—details on family and money affairs—are also not secure. "The problem of leaks of private records is serious in government and business alike," says Representative Barry M. Goldwater Jr. (R-Calif.), who is involved in privacy legislation.

THE LAWS

The Freedom of Information Act (as amended in 1974) (FOIA) and the Privacy Act of 1974 permit individuals to write for copies of personal records collected by federal agencies, to correct any inaccuracies in those records, and, within limits, to control disclosure of them to other agencies. "But these laws leave large gaps," warns Goldwater.

He cites a recent case: "A businessman wrote a rubber check at age 19, and seven years later was denied credit, without recourse, because of an outdated private credit report. In this situation, the privacy law gives no protection." The Tax Reform Act of 1976 prohibits the Internal Revenue Service from some of these excesses. The IRS, for instance, can no longer see your bank account without first notifying you, but it still can pry deeply into private affairs.

Because state and local governments are outside the scope of such federal laws, "this is a broad area for abuse," says Representative Edward I. Koch (D-N.Y.), who has cosponsored privacy legislation with Goldwater. And in the private sector, the only federal laws that apply are the Fair Credit Reporting Act of 1970, which gives the citizen a chance to correct false credit reports, and the Buckley Amendment, a law that lets parents and children (18 and older) see school and college records. But the FCRA gives limited protection, and the Buckley Amendment, though it looks good on paper, in practice presents problems to many families seeking enforcement.

IBM's Cary suggests that individual companies develop policies to protect their employees' privacy, adding: "CEOs should be aware, too, that they themselves are vulnerable." Privacy experts say that more business executives should be aware that they might successfully sue when their privacy has been violated. They also should resist signing waivers of privacy rights on license, insurance, and other applications.

Sometimes a breach of privacy can cause considerable anxiety, if nothing more. Dr. Wendell Ames, a Rochester (N.Y.) public official, tells about the problems his shotgun collection caused him: "I registered it with the Bureau of Alcohol, Tobacco, & Firearms, as required," says Ames, "and began to get sales literature from gun sellers. My worry was that anybody, including crime figures, could find out about my guns." Though the bureau no longer sells mailing lists, Ames notes: "I still don't know who can find out. If nothing else, it cost me $1,200 for an alarm system."

WHEN GOVERNMENT ABUSES YOUR RIGHTS

Governmental abuses of privacy rarely make the news, although the Nixon White House inspection of some individuals' tax returns produced headlines almost as big as those generated when former Senator Sam Ervin cited invasion of privacy as one of his personal indictments of the Nixon Administration. Indeed, the IRS may be more squarely in the middle of privacy disputes right now than any other agency. "Despite all the talk about privacy laws," says Goldwater, "an agency—HUD, for example—can get detailed personal information about you from the IRS."

A first major step designed to shelter individuals from IRS excesses, the Tax Reform Act of 1976, puts restraints on the agency's disclosure of personal files to the White House and the rest of government. Requests to the IRS must be made in writing and signed by the President, his delegate, or the top official of the requesting agency. Still, an individual's 1040 form can be disclosed.

Under new laws that became effective on Mar. 1, not only is the IRS restrained from invading private bank records without notice, but the taxpayer, in turn, can order the bank not to disclose his records except by court order—which means that the taxpayer can go to court and argue against the action. Previously, the law provided no such notice.

The IRS is bound by the same new rule, if it seeks personal records held by an individual's accountant, lawyer, or stockbroker, or a credit union, credit card issuer, or savings and loan company.

Sheldon S. Cohen, a Washington tax lawyer and former IRS commissioner, notes that despite the new laws, the IRS retains wide latitude to investigate. "They can verify your tax return information by going to third parties who know you," he says. "There is a lot of leeway." Moreover, the Tax Reform Act applies only to an IRS quest for information, and other federal agencies can invade even private bank accounts without giving notice. Some executives, say privacy experts, have successfully resisted such forays by means of quiet understandings with friendly bankers.

SELF-PROTECTION

A contest with the IRS can be quite lopsided. "If you are called in for an audit," says Cohen, "you normally have no right to see the IRS work papers. You'd have to go to court first." Conversely, any information a taxpayer gives to his tax preparer, including a CPA, cannot be withheld from the IRS.

"This is not like the client-lawyer relationship where information is privileged," notes CAP James B. Swenson, a partner in Price Waterhouse & Co., the accounting firm, and a specialist in government-related problems.

Swenson's firm counsels would-be clients who have failed to file tax returns for a year or longer to see a lawyer promptly. "We'll tell him to tell the lawyer before discussing his case with us," Swenson says. "This protects his information to a degree because of the client-lawyer privilege." An executive who, upon audit, is accused by the IRS of some costly negligence might similarly see a lawyer before seeing his CPA.

Military service records create privacy abuses when personnel managers see "SPN" numbers on veterans' discharge papers. SPN—Separation Program Note—code numbers were placed on service separation Form DD 214, which accompanies the formal discharge, from World War II until 1974. The SPN numbers stand for such things as antisocial, apathetic, bed wetter, homosexual tendencies, indebtedness, and poor personal relationships. "They're subject to abuse," says Representative Koch. "You apply for a job, show an honorable discharge—but it has an SPN code, and that could damn you."

David Addelstone, Washington (D.C.) attorney specializing in military law, tells of a recent case in Seattle where a young executive lost a job opportunity when the employer mistook an entirely innocent number for an SPN code meaning "homosexuality." Says Addlestone: "There are many cases."

AN ABUSIVE CODE

One solution for a veteran is to contact his or her service branch in Washington and request a new Form DD 214 with no SPN code. The service will comply, or if a request is for just the meaning of an SPN code appearing on a DD 214, will furnish the meaning. Koch warns, however, that some employers demand permission to seek a veteran's SPN code. "The veteran will apply for

a job and be asked to waive his right to have his SPN number kept confidential," Koch explains. "This is a classic abuse of privacy." He suggests that such waivers be resisted.

Licensing information and other state records also are subject to abuse. Personal information given for boating, driving, hunting, and other licenses, along with records of auto violations and lesser offenses, are often combed by credit investigators. "They're used in reports of all kinds," says Alan F. Westin, a Columbia University professor and an authority on privacy.

A marijuana charge or a reckless driving record dating back to college days may be used against a junior executive who long since has become a solid citizen. Says a 35-year-old Cincinnati sales supervisor: "I got a call one day to come into the office. The company had found out about an arrest because of a 'reinvestigation' when I applied for a management-level job. It was football weekend stuff, just raising Cain. I might have lost the job I had."

Mailing-list companies, Westin adds, use state license files to compile highly specialized lists and then make sales pitches by mail, phone, or door-to-door.

THE THIRD PARTY

Federal laws offer little help for such abuses. The most practical suggestion: Take special precautions in filling out license applications. "Give minimum information," warns Robert Ellis Smith, editor of *Privacy Journal*, a Washington newsletter. "Fill out any license form with the expectation that credit investigators will read it." Files maintained by the Veterans Administration contain many personal references that Smith says "might involve gossipy, misleading information." The Federal Trade Commission and the Securities & Exchange Commission, among other agencies, have background files on executives whose companies have been under investigation. "There is too much room for this information to slip around," says Smith. "An executive may want to see his file, amend incorrect parts, and, if possible, restrain any disclosure."

Goldwater—who, with Koch, is pushing for privacy laws on the state and local government level, as well as in the private sector—suggests certain practical steps to enforce your rights. His advice is similar to a series of recommendations formulated by the American Civil Liberties Union:

Make a written request to the agency, and ask for copies of the records needed, making your request as specific as possible. A reply should be received within 10 business days and the records sent within 30 business days.

If these deadlines are not met, write again before taking further action.

If the agency still does not send the records, write a letter stating that you are filing an appeal, and attach copies of all your earlier correspondence. If the agency does not comply within 20 business days, a suit can be filed. The FOIO and the Privacy Act entitle you to a review in federal district court. And if the agency fails to justify withholding your records, it must pay your court costs and legal fees, in addition to turning over the records.

If the records are false and damaging, ask for the right to change them or make additions. The agency should respond within 10 business days and take action within 30 business days.

If the agency refuses to change your record, a concise statement explaining why it is wrong can be filed, and this becomes a part of the record itself, to be seen by anyone who later reads it.

The Privacy Act requires that an agency receive your permission before disclosing records to another government agency, but numerous exceptions water down the provision, and legal advice may be needed.

Generally, you will not need a lawyer when seeking records or filing appeals, short of your going into federal court.

HOW TO UNBUG YOUR EMPLOYER

Telephone recording, taping, and room "bugging" make headlines when executives are discovered doing it, as shown by the recent press coverage of an in-house conflict in a large car rental company. But by far the greatest number of serious abuses of privacy in business occur in paperwork.

Background checks for employment of executives can be far-reaching, and there is little law that protects the applicant, says Goldwater. An executive who declined a job with a Connecticut manufacturer complains: "A guy called the golf club about me and made other so-called discreet inquiries about my wife. I damn well resented it."

RESUME-PEDDLING

The fact that employees have no legal right to see their own personnel files adds to abuses, partly because there is no chance to rebut false information. "When a former employer has been contacted," says Koch, "you can be the victim of an old vendetta by a former supervisor."

Recently a candidate for a key job in a Southwest corporation was passed over because his personnel file included the phrase, "has larcenous tendencies." His original file had been improperly summarized, and investigation showed that a prank played in the ninth grade had been the basis of the damning phrase.

"Headhunters" (executive search firms) routinely get resumes, and many are kept for future use. A danger is that an unethical recruiter may use a resume for job openings without permission. Gardner W. Heidrick of Heidrick & Struggles Inc., a leading Chicago-based recruiting company, warns that an executive is wise to "guard against having his name peddled."

One safeguard, says Heidrick, is to deal with a member of the Association of Executive Recruiting Consultants, a group of 40 leading search firms. Advises John F. Schleuter, executive director of the AERC, "Never send a resume to a recruiter who phones at the office. Wait until you've met him and checked his firm." When you do hand over a resume, as an added safeguard type a statement at the bottom saying that the resume may be shown to third parties only with permission.

NASTY NEIGHBOR

Insurance investigations have been in the limelight in recent weeks, capped by a Mike Wallace CBS-TV show that added to the negative publicity about abuses of privacy. The general complaint leveled at such companies as Equifax, Hooper-Holmes, American Service Bureau, and other reporting services is that many reports are done hurriedly or by unskilled agents.

Another line of criticism is that questioning neighbors can be misleading or destructive. A case in point is that of James C. Millstone, assistant managing editor of the St. Louis Post-Dispatch. An insurance investigator interviewed a disgruntled neighbor, who accused Millstone of being "a hippie" and user of marijuana. "The investigator embellished his report," says Millstone. "My wife and I had several bad months." Millstone had to go into federal court to clear his name—and, incidentally, win damages.

Equifax, which does more than 60% of all insurance investigations, says that only a small fraction of 1% of their reports are inaccurate and that they send reports initially to only one customer. The same report is sent to a second insurance company or other client only if a rejected applicant applies elsewhere within three months.

COSTLY LAWSUIT

Solutions to privacy abuses involving credit, insurance, and preemployment applications rest partly on the Fair Credit Reporting Act. The law stipulates that when a credit agency investigates an applicant, he must be informed. But in practice, this amounts to a routine notice appearing on the application form. An applicant who is turned down must be told which, if any, credit reporting company investigated him and the nature of the report. If the report proves false, it must be corrected or a "reinvestigation" made.

It is now the policy of Equifax and some other companies to give individuals copies of their own reports upon request. A drawback is that sources such as neighbors are deleted, and a court action might be needed to get the names.

Suing a credit reporting company, a field investigator, a past employer, or anyone else who has abused one's personal privacy is often difficult and costly, though such suits are more often successful than in the past. Says Ralph K. Winter, a practicing lawyer and a Yale University law professor: "You might, for example, get a court order restraining your present employer from giving out unfavorable information to another company, if you wanted to change jobs. But you'd have a tedious and doubtful action for defamation."

"Your best case is in libel or slander," advises Winter, "if the information against you is patently false, obviously damaging, and if proof is easy." Sometimes, he notes, the threat of a suit may bring the wanted result.

NO WAIVERS

Finding a lawyer who will work on a contingency fee basis is one possibility, partly because some lawyers are intrigued by the emerging practice in privacy cases. Generally, a lawyer experienced in libel, slander, and defamation actions would be logical, and there are some "FOIA lawyers" in Washington.

"Remember," says Washington lawyer Addlestone, "that the FOIA and the Privacy Act—if you have a government case—provide for attorney fees if you win the case." Generally, for any privacy action, a fee based on $50 an hour would be common, with the total bill running to $5,000 or more.

On a less costly plane, limiting the personal information you give out, where possible, and resisting any waivers of your privacy rights are practical, day-to-day ways to protect your privacy. If you sign a waiver permitting an application or other paper to be passed along, privacy experts suggest that you insist on a 30-to-60 day time limit, if possible. Insist also that the waiver be specific as to who will receive the information.

MORE ON PRIVACY

Data Banks and A Free Society, by Alan F. Westin, summarizes many facets of the personal privacy problem (Quadrangle) . . . Robert Ellis Smith's *Privacy Journal*, a newsletter, keeps up to date on court cases, legislation, and personal cases (P.O. Box 8844, Washington, D.C. 20003, $45 a year) . . . Copies of summaries of the Privacy Act and Freedom of Information Act may be available at your regional office of the American Civil Liberties Union . . . If seeing a student's records under the Buckley Amendment poses a problem at a local school, write HEW, room 514-E, Washington, D.C., 20201, for guidance.

SEVENTEEN FEDERAL FILES YOU MAY BE IN WHERE FILED AND TYPE OF FILE

Internal Revenue Service: Tax (1040).

Social Security Administration: Regular account.

Veterans Administration: Military service record.

Bureau of Alcohol, Tobacco & Firearms: Gun collections.

Clerk of Congress or Federal Election Commission: Political contributions over $100.

Coast Guard: Boat registrations.

Defense Intelligence Agency: Executives in companies with military contracts.

Federal Aviation Administration: Applicants for and holders of private plane licenses.

Federal Communications Commission: Ham operators, boat radio licensees.

Federal Trade Commission: Many top executives, multipurpose files.

Health, Education & Welfare Dept.: Parents of students seeking student loans.

Justice Dept.: Families of juvenile facing drug or similar charges in a court.

Securities & Exchange Commission: Corporate insiders.

Small Business Administration: Loan applicants.

State Dept.: Passports.

Treasury Dept.: Banking transactions over $10,000.

White House: Advisory commission appointees, candidates for federal jobs.

Data: Privacy Protection Study Commission.

AT IBM, PRIVACY IS A TOP PRIORITY

"CEOs should put employee privacy higher on their lists. Many don't appreciate that employees will respond greatly." Ironically, the words are those of Frank T. Cary, chairman and chief executive of International Business Machines Corp., whose products have made vast piles of personal information so easy to handle—and so easy to abuse.

Cary explains that IBM gives priority to employee privacy. "We keep personal information to a minimum," he says. "We also segregate personal information and make only part of it available to the supervisor. And we let employees see their own files. As for outsiders, we give them private information only with the approval of the employee."

Employee privacy at IBM begins with the hiring process. Applicants are asked to supply certain basic facts. But the company does not inquire about the employment of an applicant's spouse or about family members who have worked for IBM. Information about earlier treatment by a psychiatrist or psychologist is not sought, and although court convictions in the five years before hiring are considered pertinent, arrest records are not.

Formerly, outside credit agencies were used to investigate job applicants. Now, IBM personnel check references when necessary—but only with the applicant's approval.

STRICT RULES

The line supervisor or manager, Cary explains, gets such job-related information as performance ratings and past sales records. But facts unrelated to work—medical benefits, life insurance, and similar items relating to company benefit programs—are kept in the main personnel files or in the payroll department.

Outsiders wanting information are given only routine facts—verification of employment, job title, place of work, and hiring date—as a matter of course. Information about wages, job history with the company, and such are revealed only if the employee gives an O.K. Attorneys, creditors, and others who want special information must deal with the same strict rules, unless the law requires disclosure.

"The employees' right to see their personal files is a key part of our program," says Cary. The whole personnel folder is open to employee inspection, including performance appraisals.

KORYNE HORBAL'S SCALLOPED POTATOES

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. FRASER. Mr. Speaker, Koryne Horbal of my district has recently been appointed by President Carter to the National Commission on the Observance of International Women's Year. The Commission will sponsor a series of statewide women's meetings, culminating with a National Women's Conference in Houston, Tex., November 18–21, 1977. The objective of these meetings is to determine barriers preventing women from full participation in society, and to make recommendations for change. Minnesota's meeting will be held in St. Cloud the first week in June.

Koryne has also been nominated but not yet formally appointed to the position of U.S. representative to the U.N. Commission on the Status of Women. She is presently Chair of the women's caucus of the Democratic National Committee and one of Minnesota's Democratic national committeewomen. She has worked hard and effectively to increase the participation of women in politics and to expand the scope of that participation. Koryne worked for the DFL party, unpaid, for more than 17 years. However, she has shifted from making drapes for the DFL office to advising President Carter on women's issues. And she also makes great potato salad—from scratch.

I think Koryne's story is a good one to share with my colleagues. She is a Minnesota role model for feminists in politics—a group I hope will increase across the country. Accordingly, I would like to insert in the RECORD excerpts from a fine article on the Minneapolis winter meeting of the State's DFL feminist caucus. The article, by John Fleming, appeared in Metropolis, a Minneapolis publication, February 15, 1977. The title of the article is "Sexual Politics at the Capitol." The section discussing Koryne is headed, "Koryne Horbal and the DFL Machine." Excerpts follow:

KORYNE HORBAL AND THE DFL MACHINE

(By John Fleming)

The best thing about the recent conference of the DFL feminist caucus at the Women's Club in Minneapolis was the elevation of Koryne Horbal to superstardom. The next best thing was Governor Perpich's speech. . . .

This year's conference was the first held at the Women's Club. . . .

After the luncheon, Governor Perpich arrived to deliver his speech. The audience clearly expected something special from the Governor. Perpich was, after all, the first Governor to formally address the feminist caucus, and in his State of the State address to the Legislature the previous week he had made a point of declaring his interest in the concerns of women and minority groups. After entering the ballroom and receiving a standing ovation, Perpich said, "I can't think of any cause I'd rather see succeed than yours," and the audience rose again and applauded for a long time; it was an electric moment. In his brief speech, Perpich said that he planned "a determined effort to promote more women at all levels of state government. We're not doing this because it's the political thing to do, but because it's the right thing to do." He concluded the speech by promising to appoint a woman to the state Supreme Court when the next vacancy occurs. As Perpich walked through the crowd after the speech, dozens of women left their chairs to shake his hand.

The Governor's speech was a tonic for the members of the feminist caucus—a "demonstration of our clout" was the way Linda Donaldson, a caucus official, put it. Perpich's visit and the happy reception given his speech in some ways confirmed what Gloria Steinem said at a fund-raiser in Minneapolis last fall: The effectiveness of Minnesota feminists in lobbying, electoral politics, and education of women is a model for the rest of the country.

By the end of the conference, one anecdote—frequently and elaborately repeated—had become a matter of political myth, like the stories of Jimmy Carter making his bed while campaigning in Iowa. It was the story of Koryne Horbal's phone call.

Horbal was acclaimed by various speakers as the "embodiment of Minnesota feminism" and "one of the five most powerful women in American politics" and "our Kissinger." She is State Coordinator of the DFL feminist caucus and a representative to the Democratic Party's National Committee. As the story went, Horbal was preparing scalloped potatoes "from scratch" in her kitchen one evening early this year when the phone rang: It was long distance from Georgia. "Be in Plains by 11 tomorrow morning," the man on the phone said, "Jimmy wants your advice." Horbal flew to Georgia the next morning to join four other Democratic Party women meeting with Carter. In the month following her trip to Plains, Horbal has shuttled regularly between Minneapolis and Washington. She's met with Carter six times. Her status as a presidential adviser and national political figure will be assured, I suppose, when that recipe for scalloped potatoes becomes as widely known as Bella Abzug's love of floppy hats.

However, along with the optimism and self-congratulation that characterized the conference, there was also a curious undercurrent of insecurity. It occasionally surfaced when the twelve women legislators (the most ever) elected to the Minnesota House and Senate were hailed: Several times it was pointed out that not all of them are strong supporters of the Equal Rights Amendment (ERA) and the Supreme Court decision permitting abortions. Although the feminist caucus is less than five years old, its expectations have been lowered in the last few years. Mary Ziegenhagen, an original member of the caucus, recalled that in 1973 she was predicting in speeches that the Minnesota Legislature would be one-third women by 1980. "At the rate we're going," she said, "we'll be lucky to make that number by the year 2000."

Horbal's speech—the feminist State of the State address—was strangely understated. She discussed the failure of the New York and New Jersey legislatures to ratify the Equal Rights Amendment (38 states must ratify the ERA by 1979 in order for it to become part of the Constitution; so far 35 have approved it). She referred to accounts in the press that "the women's movements is dead." She worried about restrictions being placed on abortion services—"a woman's right to choose" was the expression she used. The Supreme Court giveth, but it can also take things like abortions away, Horbal said. "It is a highly political body. . . ."

However, Horbal also found much to be pleased with: That two women have cabinet-level positions in the Carter administration, that Ronnie Brooks is an aide to Gov-

ernor Perpich, that Sandra Gardebring is director of the Pollution Control Agency (PCA), that the "evolution of the Barbie doll into the Bionic Woman" is happening. The main question facing feminists, Horbal said, is "Do we work on the issues now in the public domain? Or do we also function as the cutting edge? . . . Will we go establishment?" Concluding her speech by quoting Rollo May (*The Courage to Create*), Horbal talked of "bringing a humane and feminist sensitivity to government," and she declared herself "cautiously optimistic" about the future of the women's movement.

Jimmy Breslin's description of political power as "smoke on blue mirrors"—power as the manipulation of symbols and signs—came to mind as I listened to Horbal talk about her career in the DFL Party one morning in the week following the conference. Normally, Horbal is full of energy. This morning, however, she was in a meditative, not-quite-somber mood. She talked about power as an alchemist might talk about gold. "My power is two things," she said. "First, the power I've accumulated. Second, what people perceive my power to be. Since I've been to Plains and Washington, my power has changed. Power comes to me now because people think I have it. I gather power through loyalty—that's the name of the game, it never changes—my loyalty to other people and their loyalty to me.

"I come from a family that didn't have a lot, in Northeast Minneapolis. We're Polish. When I graduated from high school, I had to go to work, I had to take care of a father at home while my mother was in a sanitarium. When I got into politics, it became an extension of my education, a place where I could really move up and get some power. The Party has been my vehicle for gathering self-power."

In 1968, when Horbal was DFL Chairwoman, she helped prepare a study called "Women in the DFL Party: Present but Powerless." It created "an incredible awakening among the women of the Party," she said. "After that, I became an advocate for women, I gained a different constituency, my role in the Party changed. I was no longer 'The lovely and gracious Koryne Horbal,' as I'd been introduced at 18,000 Party meetings before. I was controversial." As DFL Chairwoman, Horbal wasn't paid; the Chairman was. She made the drapes for the DFL offices. A truism among feminists, Horbal said, is that "The trail-blazers—the significant feminists—don't get the good government jobs." After seventeen years of work in the DFL Party, Horbal has never had a salaried job in government.

When the Minnesota Legislature is in session, Horbal is a familiar presence. "It's reached the point where a lot of legislators are frightened of me," she said. "When I have a meeting with one of them, I'm prepared, I have my mental agenda, I know exactly what I want. I'm willing to make the tough calls. We want votes, but more often it's leadership we want, for someone to get up on their feet and say something."

Sitting at her kitchen table and drinking coffee on the morning I talked with her, Horbal looked like an average Columbia Heights wife-and-mother. She was barefoot. The house was spotless. That Horbal is the "embodiment of Minnesota feminism" is probably true. She also represents, perhaps, an even larger idea: Minnesota's capacity to assimilate threatening social movements and make them safe. "In Minnesota," Horbal said, "the word 'feminist' is no longer dangerous. Now, it's very easy to say. . . ."

Horbal was busy that day at the caucus office in St Paul. A photographer and I wanted her to come with us to the Capitol for a picture. She agreed. Although she dislikes being photographed, Horbal posed on the Capitol's broad front steps, in the rotunda beneath the dome, and in front of a statue of Governor John A. Johnson ("Aren't there any women statues?" she wondered). As we drove back to her office, Horbal talked about her family's recent move from Coon Rapids to a new house in Columbia Heights. Her daughter was harassed in school the day before by a gang. Her husband, a contractor, was working on a job in South Dakota.

Driving to the Capitol, taking the photos, and driving back took over an hour. When we arrived at her office, Horbal stayed in the car several minutes and talked some more. She said President Carter was not fully meeting his pledge to hire women for major jobs in the administration. In spite of vigorous efforts by women and minority groups, Horbal said, the Carter Cabinet strongly represents the "old boy" network, the multinational corporations, the established foreign policy and economics think-tanks. Two women have high-level White House jobs: Midge Costanza is an assistant to the President, and Martha Mitchell is an assistant for special projects. "There's an old trick they like to play," Horbal said. "They'll try to send me to the highest woman, they'll want me to see Costanza. Well, I don't want to see Costanza. When I want something, I want the top. To get anything done, you've got to see the top person." As she left the car, Horbal made one prediction: The ERA will pass this year.

ANNUAL NATIONAL CHAMPIONSHIP IN INDIVIDUAL SPEAKING EVENTS

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. FISHER. Mr. Speaker, the following information about the Annual National Championship In Individual Speaking Events has been brought to my attention by the hosts of the 1977 tournament at George Mason University, Fairfax, Va.

I take this opportunity to welcome the participants in the championship tournament to the 10th Congressional District in Virginia and to recognize their achivements in intercollegiate forensics.

The article follows:

THE ANNUAL NATIONAL CHAMPIONSHIP IN INDIVIDUAL SPEAKING EVENTS

The Ancient Greeks defined "forensics" as public argument. That definition has been extended by the modern communicator and now includes a myriad of events. Although debate is still a part of modern forensics, it only accounts for one area of speech activity. The other portion is known as individual events. This area includes persuasive speaking, informative speaking, rhetorical criticism, after-dinner speaking, impromptu speaking and extemporaneous speaking, as well as the interpretive events such as oral interpretation of prose and poetry. During the school year, students travel to hundreds of colleges and universities in all parts of the United States in order to compete in various intercollegiate forensics tournaments. The forensics year culminates in the Annual National Championship in Individual Speaking Events. Founded in 1971 by Dr. Seth C. Hawkins of Southern Connecticut State College, this tournament is the official championship for anyone who has qualified as a finalist in approved tournaments during the year. In 1972, the National Forensic Association was founded as a non-profit organization and became the sponsoring agency for the championship tournament. The purpose of the organization is the professional development of intercollegiate competition in individual speaking events. The popularity of the championship tournament has grown tremendously since its inception. In 1971, the tournament was hosted at Ada, Ohio by Ohio Northern University and had a total of 21 schools entered. In 1975, at California State University at Los Angeles, approximately 130 schools attended, entering over 1500 entries.

This year, the tournament will be held at George Mason University in Fairfax, Virginia. Over 150 colleges and universities are entered with well over 1950 programs being performed. Thirty-five states as well as the District of Columbia and Canada will be represented. To exemplify the national distribution, a brief examination of the Executive Council will suffice:

Dr. Jack Howe, California State University at Long Beach.

Prof. Catherine Beaty, Parkersburg Community College, W. Va.

Prof. Al Montanaro, State University of New York, Plattsburgh.

Prof. Mike Leiboff, Mansfield State College, Pennsylvania.

Dr. Michael Kelley, California State University at Los Angeles.

Charles W. Letzgus, Student Representative, Ohio University.

Prof. Donald F. Peters, Tournament Director, Niagara University, Niagara, New York.

Host: Dr. Bruce B. Manchester and Prof. Janet Bury, George Mason University, Fairfax, Va.

George Mason University is proud to welcome the defending champions, Eastern Michigan University, as well as all potential champions from every section of the United States.

The time and effort expended by the people involved in intercollegiate forensics is a tribute to the beauty of the communicative arts and a continued belief in the power of free speech.

NATIONAL INSTITUTE FOR OCCUPATION SAFETY AND HEALTH

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. LUKEN. Mr. Speaker, yesterday I testified before the Labor-HEW Subcommittee in reference funds for construction of the permanent NIOSH research facility being appropriated in this fiscal year. The temporary NIOSH facility has been located in Cincinnati for the past decade and I believe it is of the utmost importance that the permanent facility be retained in Cincinnati.

The reasons for this belief are contained in my testimony and I would like to share this view with my colleagues so that they will also be aware of the importance of NIOSH and disruptive effect relocation of the facility would have on the efficiency and effectiveness of NIOSH programs:

TESTIMONY

(Remarks of the Honorable THOMAS A. LUKEN before the subcommitee on Labor—Health, Education and Welfare of the House Appropriations Committee concerning the National Institute for Occupation Safety and Health April 18, 1977)

Mr. Chairman, members of the subcommittee, I thank the subcommittee for allowing

me the opportunity to testify on the fiscal 1978 budget for the National Institute for Occupational Safety and Health. The Subcommittee has already received testimony from appropriate agency officials concerning this subject. As a Member of Congress representing Cincinnati, Ohio, it is my hope that I might provide additional insight into NIOSH on a local level and its need for an adequate budget.

I would like to state at the outset that my concern with the NIOSH budget for this fiscal year is two-fold. First, I believe the Institute's overall operating budget should be such as to allow not only the execution of existing programs but also research and development of new ones. And second, I believe this fiscal year's appropriations should contain funds for construction of a permanent NIOSH facility.

With respect to the later point, we are currently awaiting the recommendations of a private consultant on a site study authorized by this Committee to determine the best location for a permanent NIOSH research facility. The temporary facility has been located in Cincinnati for the past decade. This is the third study for this purpose. It was my hope that by the date of this testimony the recommendations of the consultant would have been finalized and transmitted to the Secretary of Health, Education and Welfare; however, this is not the case, which complicates the appropriating of funds for construction once again.

I stress several points in reference to this site selection effort. First, that such a determination should be made as soon as possible; second, that construction funds for this facility should be appropriated in this fiscal year; and third, that for the benefit of NIOSH and the programs it develops for the nation, the Congress should carefully reveiw this third study to ensure the results reflect the best interest of NIOSH and the people NIOSH was created to serve. It is imperative that in addition to the construction appropriation, this Committee sees fit to appropriate adequate funds for development of new NIOSH programs and the continuation of existing programs while the site issue is being settled. Both the Ford and Carter budget proposals fall short of this goal. I would like to take a few moments to briefly describe some of the programs NIOSH has developed while located in Cincinnati to illustrate the importance of an adequate operating and research budget as well as the suitability of Cincinnati as the location for NIOSH.

NIOSH conducts programs of research, standards development, technical assistance, and manpower development primarily under two laws: The Occupational Safety and Health Act of 1970 and the Federal Coal Mine Health nad Safety Act of 1969. NIOSH also has general research authority under the Public Health Service Act.

NIOSH initiated a number of programs during 1976 to ensure that the Institute would be able to respond more quickly to the ever increasing number of occupational safety and health crises. For example, NIOSH currently issues from 8 to 10 intelligence bulletins a year as new information on potentially dangerous chemical substances is received. Within 2 to 4 weeks, the bulletin goes out to the occupational safety and health community with information on the chemical, including its known toxicity to man and animals, known producers and users, estimated extent of occupational exposure, and further NIOSH action planned. Since 1971 NIOSH has transmitted 65 recommended standards on such substances to OSHA and is developing them at a rate of 24 a year. Cincinnati is currently suffering exposure to carbon tetrachloride in the City's drinking water because the federal government has not developed standards, as described above, on this substance. This is just one example of the need for this type of program in this country and highlights the necessity for adequate funding for its continuation.

The substances for which documents are being developed in fiscal 1977 include anesthetic gases, fibrous glass, polychlorinated biphenyls, nickel, coal tar products, and flurocarbons. All of these substances present serious threats to the health of large numbers of Americans and the continued development of programs such as this is essential to control the hazards such substances present.

With the assistance of NIOSH regional industrial hygienists, the Hazard Evaluation and Technical Assistance Branch has improved its ability to respond to requests for health hazard evaluations from employers and employees representatives. Their goal is to make an initial field investigation within one month after the request is received and issue final report within 7 months. During fiscal 1978, NIOSH plans to complete about 150 health hazard evaluations as well as 80 nonmandated technical assistance efforts.

NIOSH also is conducting 40 industry wide studies into hazards faced by talc workers, lead workers, plywood, paper and pulp workers, printers, painters, dentists and steelworkers as well as others. Laboratory research is directed to 70 hazardous substances and physical agents which are the subject of new or updated criteria documents and standards. The programs given special emphasis in fiscal 77 include energy research, occupational carcinogens, women in the workplace, occupational respiratory disease, safety, analytical methods research, and research and training grants. All of these programs are of the utmost importance to the American worker and the American consumer. They should not be cut-back or disrupted. In the fiscal 1978 budget NIOSH requested to continue to emphasize women in the workplace, occupational respiratory disease, safety, and control technology. The occupational carcinogen program will continue at its current level and the research and training program will be reduced.

These all important NISOH programs, although commendably developed and executed, continue to be hampered by the lack of permanent facilities. It is imperative that NISOH be settled in a permanent facility so that it may continue this work at maximum operating efficiency.

This history of NIOSH operations centers around Cincinnati. The predecessor programs of NIOSH have been organized and reorganized since the Office of Industrial Hygiene and sanitation was established in the Public Health Service in 1914. The Division of Industrial Hygiene, at it was then known, located its field office in Cincinnati in 1950. In the summer of 1967 the program, now called the Division of Occupational health, transferred to Cincinnati. Although the headquarters was transferred back to Washington in 1968, the main research facility was retained in Cincinnati.

Most of NIOSH's growth and development has been conducted in Cincinnati. The City of Cincinnati is considered the home of NIOSH. The City has already invested over $1 million in the facility as a sign of good faith in having the facility retained there as previously indicated. The personnel for the facility are located in Cincinnati and consist of an array of expertise which would take years to reassemble should the facility be relocated.

I quote from this Committee's report dated June 8, 1976 when I state, "(T)he Committee has been told repeatedly by government witnesses that the single greatest problem facing the institute is the recruitment of top level scientific personnel. The Committee feels that the location of the Institute's major research facilities should provide as large a positive factor as possible in attracting top level scientific expertise to the institute and that the quality and relative potential for recruitment of the graduates of the schools of medicine, public health, industrial hygiene and engineering in each of the various locations being considered should be weighed heavily."

I ask the Committee what more positive factor could one obtain than the existence of such scientific personnel already located and working in Cincinnati for the benefit of NIOSH with scholastic consultation and support from local educational facilities. These educational facilities are already conducting internship programs for the purpose of training potential scientific personnel in NIOSH related programs.

I realize that this Committee believed it necessary to conduct this third study. I do not take issue with that decision, I do believe, however, that the time has come for NIOSH to have a permanent home. For reasons of consistency, continuity and efficiency, I believe that the permanent facility should be constructed in Cincinnati.

I can also state that this belief is shared by the employees of NIOSH who have advised me that relocation of this facility would be devastating to NIOSH programs.

NIOSH's extraordinary talent has already done a superlative job in research and development of occupational safety programs, some of which I described in this statement. The job which is being accomplished could be even more extraordinary when the issue of the permanent site is settled. NIOSH can continue to grow and develop as it has in the past without suffering loss of personnel or disruption of programs should the permanent site be in Cincinnati.

In sum, I will state that in my opinion the burden of proof should be as to why NIOSH should be moved from Cincinnati, not why Cincinnati should retain it. We must come to a decision on this issue and ensure, through proper budgeting, that NIOSH does not suffer in the interim.

FOOD AND POPULATION: VII

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. RICHMOND. Mr. Speaker, one of America's most distinguished political analysts, Richard Strout, has recently addressed himself to congressional efforts to deal with the global problem of population growth. Writing in the Christian Science Monitor of April 8, 1977, Mr. Strout asks:

What's the use of sending foreign aid to poor countries that don't reduce their birth rate?

According to the FAO, even after a generation of developmental assistance, most nations are chronic importers of food. While 45 nations either exported food or were self-sufficient in 1950, only 19 nations did so in 1974, with 4 countries accounting for over 90 percent of the exports.

Even though agricultural production has increased dramatically in many countries, accelerated population growth has placed most countries in precarious food positions.

The future does not look better. For example, international development as-

sistance during 1976 totalled about $40 billion. Should the 900 million couples in the less-developed nations in 1990 each produce 4 to 6 children (as parents in the LDC's say they now desire), there will be an additional 3.6 to 5.4 billion children added to the population of the less developed nations in the generation following 1990.

At current assistance levels, less than $10 would be available to each of these children. Even should assistance be doubled, tripled, or quadrupled, it would hardly make a dent in the burgeoning demands of such a population. Thus, it is not selfishness or a lack of charity that calls for population control. It is sheer common sense.

Too often, however, discussions of mankind's population problem focus only on the poorest parts of the world. But before Americans congratulate themselves for reducing their birth rate from 25 to 14 in the past generation, and before too many national magazines and newspapers tell us we have no population problem, we should examine the facts.

The Environmental Fund, in a special release on this matter, has performed a useful public service in pointing out that the United States now adds more people to its population each year than any other nation in the world save India and China. Each year, an additional 3.4 million Americans are added to our population. If this continues, the U.S. population will double in a short 41 years. If we continue to be unwilling to face this problem forthrightly, our country will soon no longer be either rich or secure. For example, while we now have about 2.1 acres of arable land per person in this country from which to support our standard of living, a doubling of our population would destroy millions of acres of valuable farmland as more schools, hospitals, homes, freeways, and shopping centers are built. The available arable land per person would most certainly fall far below the current world average of 0.8 acres.

The editorial by Mr. Strout and the material released by the Environmental Fund follow:

[From the Christian Science Monitor, Apr. 8, 1977]

WHY AID NATIONS THAT DO NOT CURB BIRTHS?

(By Richard L. Strout)

WASHINGTON.—What's the use of sending foreign aid to poor countries that don't reduce their birthrate? Congress is asking this question.

"It is obvious to any rational observer," Foreign Relations Committee chairman Sparkman (D) of Alabama told the Senate the other day, "that no amount of aid is going to lift the burden of poverty from the third world unless effective measures are taken to curb population growth."

Such measures aren't being taken, declares Justin Blackwelder, president of the Environmental Fund. He told a House committee on foreign aid appropriations last week that the United States presently makes millions available to countries for family planning programs. Theoretically they welcome such assistance. But not really, asserts Mr. Blackwelder. The countries accept the family planning money because the United States, the United Nations and the World Bank tie the funds into a package loosely labeled "maternal health and child care and family planning."

The recipient governments are delighted with money for "public health," but the family planning item is just an afterthought, he alleges. "If they were genuinely interested in lowering birthrates they would already have programs to do so themselves," he says. "Sri Lanka has done this." Mr. Blackwelder asserts that most of the others haven't.

Has the time come for tightening up on foreign aid? The Environmental Fund, an independent, nonprofit population organization, and the Rockefeller brothers' fund say yes; they have endorsed linkage: "If you want foreign aid show that you will support population control," they say.

Or, as the Environmental Fund's spokesman puts it:

"The U.S. should rethink its whole foreign aid program. We should announce now, that we will increase aid to those countries which make a genuine effort to reduce the birthrate, and that we will cut off aid to those who do not choose to do so."

Their new approach is not isolated.

In a proposal cosponsored by 200 House members, Rep. James Scheuer (D) of New York would establish a select House committee to make a two-year study of "major adverse effects" of international population growth and to decide what, if anything, to do about it. Particularly, it appears, he would do this in the context of U.S. aid. American-funded family-planning programs abroad now cost $143 million annually, and will rise to $177 million next year. Are they doing their job?

Another congressman, Rep. Frederick W. Richmond (D) of New York, quotes a "Gallup-Kettering poll in African, Latin American, and Asian nations—the number of children couples generally desire in most of the developing world is between 4 and 6." If better sanitary conditions increase the survival rate in these countries that means, explains Mr. Richmond, "the doubling of national populations every 15 to 30 years—a condition that is intolerable."

The United States has a lively problem at its own back door. The growth rate of Mexico is 3.5 percent, one of the highest on earth. Mexico's 60 million people, with 25 percent unemployment or underemployment, will double by 2000. Who will feed them? Where will they go? One estimate is that "10 percent" of Mexico's population is already in the United States illegally. The U.S. Immigration Commissioner publicly declares that he can't hold back the horde—the situation is "out of hand." America's ho-hum attitude to the situation is an interesting feature.

The earth has 4 billion people, it is estimated, one-fourth of whom are desperately poor. For the fifth time the 26 nations of the International Development Association (associated with the World Bank) are just getting ready to raise money for long-term development assistance to poor countries. It's no small amount. The so-called IDA "fifth replenishment" is to raise $7.6 billion, of which the U.S. will supply $2.4 billion, subject to congressional approval.

The IDA program has been successful: it promotes development programs in nations with the greatest poverty. The oil-rich countries are now joining in: Kuwait is down for $180 million; the United Arab emirates, $50 million; Saudi Arabia (contributing for the first time) a hefty quarter billion (in U.S. dollars).

Political strings are not tied to programs. Their goal is to raise standards of living by channeling financing resources to valuable projects. A side effect is that birthrates normally decline, if living standards rise. But that takes time. There is deepening frustration when the social benefits of some bold expensive development program are absorbed and eroded by rapid immediate population growth.

THE ENVIRONMENTAL FUND

It is widely believed, and often stated, that Brazil, Mexico, the Philippines, Pakistan and Bangladesh have high rates of population growth, and that the United States has a very low rate.

It is true that the United States growth rate is somewhat lower than that of most of the underdeveloped countries, but it also has a larger population. Accordingly, if we look to see which countries are increasing their population the fastest in actual numbers of people added each year, the United States is the third highest in the world, surpassed only by China and India.

Russia, with a population substantially greater than the United States population, is growing considerably (25%) slower than the United States.

FIGURES AND SOURCES

Country	Population, 1976 (millions)	Growth rate (percent)	Annual increase (millions)
(1) China [1]	964.4	2.4	23.1

NATURAL GAS

HON. BOB GAMMAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. GAMMAGE. Mr. Speaker, as we embark upon the consideration and implementation of President Carter's comprehensive national energy program, I urge my colleagues to examine the April 18, 1977, Oil and Gas Journal's editorial entitled "Gas-deregulation Foes Misjudge Impact of Higher Prices."

It is important to note the increase in the wellhead price of new natural gas to $1.44 per mcf may encourage increased natural gas from older and less costly fields, but such an artificially low price cannot and will not encourage increased production from the higher cost frontier areas, where the preponderance of estimated natural gas reserves are located.

This editorial, in conjunction with additional recent figures released by the American Gas Association indicating natural gas reserves declined in the lower 48 States for the ninth year in a row, and 90 percent of all gas wells completed were in localities where 30 percent of the estimated gas resources are thought to be, outlines the necessity to

decontrol the wellhead price of new natural gas.

GAS-DECONTROL FOES MISJUDGE IMPACT OF HIGHER PRICES

The U.S. is in danger of denying itself additional supplies of natural gas if it follows the advice of two government officials.

The merits of new-gas deregulation are being assailed by arguments which are both contradictory and irrelevant.

The Federal Power Commission's supply analyst, Gordon Zareski, questions whether consumers would get any real benefit from free-market prices for new reserves in frontier areas and in deeper horizons. Further, he doubts that the remaining reserves potential is large enough to justify exploitation through decontrol.

FEA Administrator John F. O'Leary largely agrees with this reasoning. Prices higher than the current $1.44/Mcf ceiling for interstate sales probably wouldn't bring forth enough new gas to eliminate the shortage, according to O'Leary. He warns of skyrocketing prices, in interstate and intrastate markets, if new gas is decontrolled.

If the President and Congress base natural-gas pricing policy on these arguments, it will be a great mistake.

Both Zareski and O'Leary acknowledge that the increase in the interstate ceiling from 52c last July has spurred new drilling in areas which lack a strong intrastate market. If this price hike has vastly improved incentives in the Rocky Mountains, for example, and in the federal offshore domain, why wouldn't a further increase help even more?

Just as added prospects have become attractive at $1.44, others would be placed on that list at $2, $2.25, or some higher price under decontrol. Decontrol would open up small, shallow reserve packages that were marginal at lower prices as well as larger reserves at great depths which couldn't be touched for less than $2.

The form of gas-price determination, contrary to Zareski's view, is not "almost irrelevant" because the resource base is finite. What is irrelevant is the argument that since the undiscovered potential might be small, removal of price controls wouldn't be worthwhile.

If reserves turn out to be smaller than government and industry experts believe, then the consumer will not pay a big premium to find that out.

One thing is certain. Under price controls, the consumer will never know whether the remaining potential is small or large. Any regulated price limits exploration to those prospects that appear profitable at that rate—and discourages conservation of this premium fuel at the same time.

Higher prices might not solve the gas shortage overnight, but that criticism—leveled by O'Leary—misses the point. No one claims that decontrol would elicit all the gas that consumers are willing to buy at present regulated prices.

It is true that new-gas decontrol would raise rates for that specific increment of gas that could have been developed at $1.44 in areas where the intrastate market is not a factor. But that would not necessarily mean a net increase in the cost to consumers.

In no instance will removal of price ceilings result in prices that are higher than any available alternatives—whether SNG, LNG, fuel oil, or electricity. What regulation supporters ignore is the high cost of failure to remove controls—namely, higher unit prices for dwindling flowing-gas supplies plus substitutes that are twice as expensive as the free-market price for gas.

Finally, O'Leary expresses the fear that decontrol would trigger escalation clauses in old contracts and cause interstate pipelines to bid outrageous prices for new supplies which could be averaged in with cheap gas. This is not an argument against decontrol. It is an argument for backing decontrol legislation such as that introduced by Rep. Bob Krueger (D-Tex.).

The President and Congress should not be misled by tangential or fallacious reasoning which ignores the benefits of deregulation and hides the costs of continued controls.

Interstate regulation has undeniably created the present shortage of gas in the U.S. Deregulation, with appropriate safeguards, would do more than any other single energy-policy move to end that shortage.

OUTSTANDING SERVICE RECOGNIZED

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. STOKES. Mr. Speaker, Members of the House, I would like to bring to your attention turning point in the lives of two men who between them have logged over 44 years of dedicated service to their communities. On Monday, January 3, Mr. Herman Botelho and Mr. Jack Vassalo retired from the San Benito County Board of Supervisors.

Jack and Herman will be sorely missed by the members of the board and the people of San Benito for their wit, wisdom, and evenhandedness in dealing with issues that confronted them during their tenure in public office. Fortunately, they will continue to be active as private citizens in the life of San Benito County.

I would like to chronicle for you the fine accomplishments of these men:

JACK VASSALO

Jack Vassalo was born in Sydney, Nova Scotia, and was raised in Boston where upon graduation he worked for the Boston Herald newspaper. In 1940 he first came to the city of Hollister in San Benito County where he lived for three years before the call to duty brought him into the U.S. Army.

It was during World War II that Jack met Edna. They were both stationed in Africa, and upon returning to the United States in December of 1945, they married and settled in Hollister. For twelve years Jack worked at Tiffany Motors before entering the furniture business in December of 1957. It was in 1964 that he began his distinguished tenure as the Fifth District's Representative on the San Benito County Board of Supervisors.

He served as Chairman of the Agency Formation Commission, as Director of the California Council on Criminal Justice, as a Director of Health Planning, and as a Commissioner of the County's Veterans Memorial Park. In addition, he is a member of the American Legion and of the Veterans of Foreign Wars, past President of San Benito County Chamber of Commerce and past Secretary of the Hollister Rotary Club. Jack, Edna and their daughter, a teacher in the local school, reside today at the family home in Hollister.

HERMAN BOTELHO

Herman Botelho is a native Californian, born in Santa Clara, and a resident of San Juan Bautista since April of 1920. He and his brother Anthony have been in the growing and shipping industry for many years.

His long history of community involvement started in 1944 when he began what came to be ten years of service as a member of the San Juan Union School Board of Trustees. During that period he became the city's leading citizen by being elected City Councilman in 1946 and Mayor in 1949, an office he held until he stepped down in 1962.

It was in September of 1963 that Herman was appointed to fill the unexpired term of Curtis Archibald as County Supervisor of District Two. He gave up his positions on the San Benito County Planning Commission and the 33rd District Agricultural Association Board of Directors to devote himself to his new duties. As Supervisor, he distinguished himself as the Board's representative and later Chairman of the Monterey Bay Unified Air Pollution Control Board.

Herman is a member of the Knights of Columbus, the Hollister Elks Lodge, the prestigious Commonwealth Club of California, and is past Chairman of the San Juan Service Club.

Jack and Herman have become good friends during their thirteen years of joint service on the San Benito County Board of Supervisors. Together they fought the battles and shared the victories and defeats. Their presence on the Board will be missed, but their accomplishments will be remembered fondly by the people they served. I congratulate them on a job well done.

LET'S HEAR IT FOR THE LOBBYISTS

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. FISHER. Mr. Speaker, the American Association of School Administrators has been conducting a series of regional workshops for school administrators who are interested in learning the mechanics of the legislative process. One of the educational tools included in the manual distributed at these Washington Workshops on the Road is an article entitled "Let's Hear It for the Lobbyists" by Roy H. Millenson.

I am introducing this article into the RECORD today in the hope it will be helpful to others interested in the subject:

LET'S HEAR IT FOR THE LOBBYISTS

(By Roy H. Millenson)

For some time now, considerable energy has been expended in the Congress in shaping controls for lobbyist activity in Washington. It now looks as if some legislation will finally be coming to the floor for a vote. And just in time too, for less than two years ago Congress enacted a law making lobbyists more needed than ever before. Persons desiring Federal funds for a pet project, whether education for handicapped children, subsidies for shipping, or research to cure some devastating disease, are now finding it more necessary than ever to employ a hired guide to lead them through the federal funding maze.

An explanation. On July 12, 1974, President Ford signed into law the Congressional Budget and Impoundment Control Act of 1974 (P.L. 93-344), popularly known as the budget reform law. The purpose was to give some order to the chaotic budget process and to give Congress a bigger say in setting federal spending policies. It also established limits on the President's impoundment powers. In all, a very worthwhile endeavor. But an unfortunate byproduct has been to make the funding process much more complex and even more remote from everyday citizen contact and comprehension.

Before the budget reform law, an individual or a group (such as a local citizens' association) desiring federal funding for a pro-

gram for, say, the education of handicapped children would, barring vetoes, have to worry about touching base with Congress only twice. First, there was the authorizing legislation necessary to establish the program and authorize appropriations for it—to follow our example, this could be a bill like the Education of the Handicapped Act. Second, it was necessary to persuade Congress to appropriate the funds. However, since authorizing bills usually are effective for several years, the chief concern boiled down to the annual appropriations. This entailed getting in touch with Congressmen and Senators once each year to persuade them to support needed funding.

But now, under the new law, you can't tell the budget plays without a program—and without a lobbyist. Congress now establishes its own overall budget figures in a multi-step process and anywhere along the line a program can lose out. Let's see how it works.

By March 15 of each year, the authorizing committees and the appropriation committees in both the House and the Senate must report their recommendations for budget levels to their respective budget committees. If a program is omitted from these recommendations, it is one Ides of March which will be long remembered.

Having passed that obstacle, one must next look to May 15 which is the deadline for adoption of the first budget resolution by the House and by the Senate. If the desired funding level is included in that resolution, all to the good. If not, chances for funding drop almost to nil.

The next step is the appropriation bill. Very great difficulty would be experienced in securing approval of an amount in the appropriation bill which is in excess of the first budget resolution. No such obstacle existed before.

But we're not out of the woods yet. Once the appropriation bill has passed, the Second Budget Resolution is hiding around the corner. Not only can it modify the first resolution based on changed circumstances but it also might require the appropriations committees, through a reconciliation process, to alter the amount previously approved for programs in appropriations bills approved by the Congress.

After all this, Mr. John Q. Citizen thinks the process has now run its course and he's home free—the appropriation has been enacted into law and, sure enough, there's the money he wanted for educating those handicapped youngsters or doing research into that disease or subsidizing his business.

Sorry! John Q. can still be forced back to "Go." Although the President may have signed the appropriation legislation, he has now spelled out in law a means by which he can impound expenditures for an individual program, holding back dollars that appeared to be about to flow toward a long-awaited goal. So it's back to Congress again to get it to negate the impoundment.

Although it is relatively simple to stimulate one or two citizen mail campaigns on particular issues in any year experience has demonstrated that, with some few exceptions where outstanding concerns are involved, people will not pursue their Representatives and Senators five or six times during the year at each step of the legislative process—even if they understand the process. And the new budget law has added as many as five new steps to Congressional funding procedures. Also six, instead of four, committees are now involved. Finally, through the impoundment control section of the law, the President is given an additional chance at bat to score against funding which he might oppose.

While these new procedures are indeed complex and frustrating and, as yet, not sufficiently understood, there is waiting in the wings a corps of lobbyists who have mastered the federal funding process and, who, for a fee, will pursue a legislative goal with dogged persistence. So let's hear it for the lobbyists! You're going to need them.

DEFENSE AUTHORIZATION BILL

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 20, 1977

Mr. McCLOSKEY. Mr. Speaker, tomorrow when we consider the defense authorization bill, I will offer an amendment to delete $332.7 million for two oil tankers and $52.7 million for three oceangoing tugs.

The Merchant Marine Act of 1936 provides that our merchant marine shall be "capable of serving as a naval and merchant auxiliary in time of war or national emergency."

At a time when there are large numbers of good, fast, modern tankers laid up around the world, as well as a large number of civilian tankers capable and desirous of serving the Navy, it seems almost incredible that the Navy would want to divert money from combatant ships to support ships of this kind. The facts are as follows:

First. The two Navy oil tankers will cost $161 million each. Good new civilian tankers can be purchased for $10 to $17 million today.

Second. The three Navy tugs will cost $17.5 million each. Comparable civilian tugs cost $3 to $5 million. There are over 1,000 U.S. civilian tugs which can do the same job the Navy ships will do.

Third. Cost of military tugs with Navy crews last year were in excess of $10,000 per day. Comparable civilian tugs were chartered at $2,884 per day.

Fourth. The 1972 Navy/MARAD study of use of civilian tankers concluded that substantial savings could be gained by using merchant marine ships and that tests of the *Erna Elizabeth*, a civilian tanker, showed that civilian vessels were adequate for this task.

Fifth. In November 1975, GAO did a study on the Navy harbor tugs—not the ocean tugs which are in the fiscal year 1978 DOD authorization bill. It concluded that "greater reliance on the commercial sector for tugboat services with a concurrent deactivation of Navy tugboats could bring about significant savings to the Department of Defense."

Sixth. For fiscal year 1976, the Navy states that 39 percent of the Navy's ocean tug requirements were point-to-point towing—the kind which requires no special military features at all. Yet only 3 percent of the Navy's ocean tug services were performed by commercial tugs. There is no question but that commercial tugs could perform the point-to-point towing.

Seventh. The Navy has provided the following cost information: Navy tug operating costs, (approximate) $10,000 per day. MSC tug (military operation but manned with Civil Service crews), (approximate) $6,200 per day. Chartering a commercial tug by the Navy (this figure includes capital depreciation; the Navy operating costs do not), (average) $2,884 per day.

Eighth. Construction costs of commercial tugs are substantially less than Navy tugs. The total program cost for the Navy tug of about 5,000 horsepower is $17 million. Commercial tugs of this size can be purchased for $3 to $5 million. The Navy tugs include many extra features. However, many of them are in modular form and could be placed aboard commercial tugs. In any event, these extra features would not be needed for point-to-point towing.

The $17 million construction cost breakdown is as follows:

[In millions]

Construction cost	$9.7
Changes	.9
Electronics	1.8
Escalation growth	2.8
Testing	.2
Outfitting	.8
Engineering	.8
Total	17.0

Ninth. The Navy indicates it can get by with 12 ocean tugs (four are under construction now). The United States has slightly over 1,000 ocean-going tugs of between 4,000 and 9,000 horsepower. The capacity clearly exists in private industry to meet the Navy's needs.

Tenth. The Navy does not need these big tugs for most of its operations. Basically, they are only needed for war time. Yet, because they are available, they are used for many operations which could be performed by smaller tugs. If private industry with its larger inventory were used more extensively, savings could be achieved by matching tug size and speeds to the particular mission.
